2. UK approach to low-effort amateur licensing

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-01 00:00:00 UTC
From: diale.nospam@mindspring.com
Message-ID: <375448a1.440592093@news.mindspring.com>
Source record: 140927
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

The following Press Release was issued by the RSGB
and the RA on Friday 21 May 1999:

New Licence Sets the Scene for the New
Millennium

UK Amateur Radio Licensing is about to undergo the most
exciting changes
seen since the introduction of the Novice Licence in
1991.
Two major initiatives will allow greater access to the
full range of facilities that
Amateur Radio has to offer, and broaden the appeal of
the hobby to a wider
audience. More amateurs will have the opportunity to
experience worldwide
communications, and newcomers to the hobby will find it
possible to make
contacts on a wider range of frequencies.

These substantial improvements stem from discussions
between the Radio
Society of Great Britain and the Radiocommunications
Agency, following
consultation with the Amateur Radio community carried
out by both
organisations.

A new class of licence, to be known as the A/B licence,
and which will use the
callsign series M5xxx, is to be introduced in the early
autumn. This will provide
access to all amateur bands, on passing the Radio
Amateurs Examination and a
5 words per minute Morse test. 100 Watts PEP output
will be allowed on the
bands below 30MHz (the HF bands); and 400 Watts PEP
output above.

The Novice A and Novice B licences will be enhanced in
the summer to allow a
higher transmitted power than at present. The power
output will go up to 10
Watts PEP. New frequencies will include the 144MHz
band, an SSB allocation

on 3.5MHz and the extension of the existing Novice HF allocation to include
the QRP CW calling frequencies.

It is expected that the World Radio Conference to be held in 2002 or 2003 will
agree to the removal of mandatory Morse testing for access to frequencies
below 30MHz. Following that decision, the existing licence structure will be
replaced with an incentive-based system. In the meantime, discussions are
under way to ensure that Morse and data sub-bands are safeguarded by
incorporating them into licence schedules.

In summary, the improvements are:

Access to the HF bands with a lower Morse test speed
The Class A/B licence to provide access to all HF bands at the 100 Watt
PEP level
Higher output power on all Novice bands
Wider allocations on existing Novice bands
Access to 144MHz for Novice licensees
Safeguards for Morse and data sub-bands
In the longer term, the introduction of an incentive-based licensing system

The RSGB and the RA are hopeful that these initiatives will provide a more
attractive path into Amateur Radio, at the same time as increasing the facilities
available to existing radio amateurs. These measures, together with the new
licence structure, which will be put into place after a future WRC, will provide a
healthy future for Amateur Radio well into the 21st century.

Look at the Web Extra I posted. See the guys who are going to be re-tested thanks to Riley? I nominate one more-N0VFP, the Code Free Classless Brainless Tuchus, oops, I mean Tech.I may be wrong but I think he knew someone, Maybe even bought his way in. Now don't get me wrong;I am NOT stating unequivocally that he's here illegally but I am skeptical and suspicious and doubt if he can even put up a Cloudwarmer or knows what radials do or has a grasp of anything pertaining to the electonics side of ham radio.Why do I feel this way? It's the way he constantly protects the felon KV4FZ. The way he constantly runs down Rich Whiten,WB2OTK, His bigotry. I mean the guy's a complete hobo dressed in a tux and I'm going to E-mail Riley to report the scab. N0VFP is always on here causing trouble instead of posting beautiful and meaningful letters as I do.Yes, I think it's time to give Riley an E or a phone call to put him on the track of the Athens Alabama codeless creep. AF2Y,Doc

The working assumption being that the sender is an appliance operator,
not the builder or inventor of the sending device. I'll watch to see how
well he zero-beats on his reply, and look to see if he modulates his
message in the dah's.

Michael.

5. Why the SICK hoax, Porky???

Newsgroup: rec.radio.amateur.misc

Source record: 140930

Why is Pork Butt perpitrating this horrible hoax about ND8V??

All one has to do is visit the KALAMAZOO GAZZETTE website and their obituary page at: http://kz.mlive.com/obits

Enter Guernsey's name into the obit's search engine or just go through the days for the month of June/May. You'll find nothing under Guernsey for ALL of 1999!!

This obit service covers ALL of southwest lower Michigan. So if Mike died a homeless bum in Paw Paw, the paper would know it.

Now you pathological jerk, tell us what is REALLY going on.

Jack

Message-id: <37511e91.138129379@news.frii.com>

Get off your high horse, David and have a reality check.
In my professional life as the Chief Engineer/Operator in broadcasting, I am charged with the responsibility that we comply with a great many rules that are subject to subjective interpretation.
How would *you* insure an on-air transmission meets the "Public Convenience and Necessity" part of the regulations? How would *you* judge a transmission was obscene and pull the plug, or indecent and take appropriate action?

Would you do nothing, and instead bitch to the local field office about Constitutional rights as you jst did here? Or that they're power hungry jerks? Or that you've got Constitutional rights of free speech and press? As you did here? Or that you're being persecuted because so-and-so got away with something? -As you did here? Are common sense and pragmatism invalid concepts in your world?

There's nothing different between what you're saying and the motorist who tells the cop who stops him, "Hey- why are you picking on me? Everyone else was speeding! I pay your salary, pal! I have my rights! You're picking on me just because I drive a Camaro!"

You're taking whining and not accepting personal responsibility for one's actions to a whole new level.

Here's the deal. The #1 responsibility of any FCC licensee, amateur or otherwise, is this: Protect Your License.

As far as I'm concerned, the shenanigans on 3950 [and elsewhere] by all parties have been nothing but an embarrassment to ham radio. I hope the actions against jammers, pseudo-broadcasters, and political soapboxers of all stripes continue.

Riley is defining the purposes and traditions of the ham radio service for those who need to be hit by a 2x4 to understand. It's not the unregulated free-for-all Internet. It's not about lynch mobs. It's about time.

-BK
Berthoud, Colo.
<<RIGHT ON, BK. IT'S ABOUT TIME THESE "MY RIGHTS ARE BEING SQUASHED" JERKS WISE UP.
IS IT REALLY ABOUT TIME? MAYBE HOWEVER I THINK IT'S ABOUT SAVING OUR FREQUENCIES FROM ENCROACHMENT AND DISSOLUTION. ALL REILLY IS SAYING IS ACT RESPONSIBLY IN AMATEUR RADIO OR YOU'RE OFF HAM RADIO. FREE LOADING AND

DISRUPTING AND GIVING HAM RADIO A BAD NAME AND BAD REP WILL NO LONGER BE TOLERATED. WHINERS...STOP WHINING AND WISE UP. NOTHING'S STRONGER THAN AN IDEA WHOSE TIME HAS COME AND RILEY HAS THE RIGHT IDEA. Doc,AF2Y>>>>>>

A lot of people are running Linux as the OS for AMPRNET hubs etc and
other applications. This is not just on the "PC" but other plaforms as
well, yes there is life outside ms-windoze :)

Announcing the '99 Atlanta HamFest & Computer Fair

http://www.saf.com/arc/atlfest.htm

Location: 116 Acre Jim Miller Park, Marietta, GA
Date: June 5 - 6, 1999
Saturday: 9 AM - 5 PM
Sunday: 9AM - 3PM
Tickets: $5.00

The 1999 Atlanta Hamfest will be the best ever with several clubs participating!

The clubs putting this extraordinary event on are:
The Atlanta Radio Club
Gwinnett Amateur Radio Society
Kennehoochee Amateur Radio Club
North Fulton Amateur Radio League

The 'fest features:
Large Tail gate area
Lots of free parking
20,000 square feet Indoor Market
37,000 square feet Outside Covered Show Ring for Flea Market
RV Camping full hookup for 44 lucky Hams
Cash Vouchers and other prizes

There will be Forums, VEC Exams and more!
For more information, see http://www.saf.com/arc/atlfest.htm

I talked with the owner of Kachina last year about different ways
to remote. I felt that one could use a network card instead of a
modem. What I wanted them to do is to have a slot (PCI) that one
could add whatever one wanted.

Tell us once again what it was that you won. Were you elected to something or was there an unpublicized popularity contest? I keep hearing faint echoes from certain NCI directors about this issue not being a popularity contest. Am I now to understand that this was a misstatement?

I am interested in the article about a 2 mt. receiver published on QST
Arrl magazine February
1999 issue.

Has anybody built and tested such receiver?
Can anybody be so kind to let me know how to get the issue or someway
the photocopies of the article?

Thanks in advance

Max

So if there were CW, packet, and SSB QSOs all competing with each
other on the same frequency, the mode that gets through would be
the winner? Why would you want to encourage such QRM?

CW is not obsolete, a basic knowledge of it is needed until the treaty is changed. We can't have people interfering with beacons for example.

However, I say again 5 wpm is suitable. If you can't learn that, it's because you don't want to. Tough titty.

Written exams need to be modernized and toughened.

I correct my mis-post of last night....

A dedicated 25 kHz extra/25 kHz General,Extra and Advanced CW and a dedicated 50 kHz for all class digital, the rest phone.

160, 30, 17, 12, 10 by gentlemen's agreements.

Dave, thats simply not true.
Which of our 3 code exams meets the ITU requirement? All three.
Which code exam is -necessary- to meet the ITU requirement for all HF
access? 5WPM.
Are there any countries which ignore the ITU requirement? Yes.
Are there any IARU countries which want to change the requirment? Yes.
Are you aware that the ARRL proposed to the FCC that a non-coded ham
simply ignore the ITU treaty and operate code on the General class
frequencies?
Paving a road is not destroying everything and everyone around you -
unless you belong to the Sierra Club. The winds of change are blowing.
Present your facts for all to see. Be constructive or be destructive;
its your choice.

If you want sonething that really screams, try using FPGA. Xilinx
has an app note using a 4000 series part to implement a 16 tap FIR
that runs at 81 megasamples/second. That's equivalent to 1875 MIPS.
Woo boy! Analog Devices and Burr Brown have new A/D chips which
can handle those rates (12 bit resolution). There's an article in the
current issue of Circuit Cellar using AD and Xilinx parts to implement
a fully digital receiver for HF.

Do the Canadians encourage QRM? It is against the rules to QRM
a QSO in progress.

Why should we have to learn Morse code and Electronic Theory? Is it
becasue all the old timers had to? That is about the only reason.
Status Quo

As for what gets thru, ask the guys at JPL, the ones who DX the space
probes in the far reaches of the solar system. They don't use Morse.

One thing Morse has going for it is that only simple equipment is needed.
If you weigh simplicity of equipment along with "getting thru", than Morse
would score fairly high. Better than voice SSB. But JPL can afford the
best and most complex equipment, so all they care about is "getting thru".
Can you QSO with 22 watts over 3 billion miles?

46. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-01 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7ivt1h$qiq@news.Hawaii.Edu>
Source record: 141023
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

```
Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate
audience, below is a list of the rec.radio newsgroups. In most cases,
a group's name will explain its purpose. Cross-posting should rarely
be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local
restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed
with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-
running thread results from a single cross-posted article, and the
contents of such a thread drift further and further away from being
"on-topic" in the various NGs that receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups"
posted on the 15th of each month.

Jeffrey Herman, KH6O

New on Jehosophat!

+Building on Sand?

Linux is turning the computing world on its head and yet it's barely mentioned in traditional Amateur Radio publications. New PC-based radio manufacturers arrogantly assume that we are all running Win95. As this technological storm rages we ask the question, is Ham Radio building its house on sand?

> False; this is just another example the extreme that
> Eric June will go to discredit anyone who does not
> agree with his "we opinion".

You might want to check your facts before you jump in and claim a
statement is false. Read again what I said. I did not say that *ALL*
NCI directors have an irrational grudge/prejudice/hatred against
Extras. Wouldn't that be a silly thing to say since 4 of your
directors are Extras? Masochism is certainly possible, but it would be
highly unlikely for all 4 of them to have that trait.

I exercised restraint and provided only one quotation substantiating
what I said. Now that you have labelled my statement as being "false",
I'll give you a few more, including one from you:

"Actually, Hans ... I have encountered numerous "extras" who couldn't
find their ass with both hands, a map, and a flashlight, technically
speaking, though they *could* beep real fast ... over the years. They
were not friends of mine, nor the sort that I would seek to "hang out
with" ... as a result, I can't recall their callsigns, but even if I
did I would not be inclined to indulge in that sort of "outing" in this
forum." - Carl Stevenson, NCI Director, 11/10/97

"We no-code-test advocates have, for the most part, also advocated
making the written tests better to ensure competency, something that
current tests fail rather dismally at, as evidenced by the huge number
of technically incompetent hams with "higher class" licenses and no
clue about how radios work." - Carl Stevenson, NCI Director, 12/21/97

>If the extra privs of Extra Class were really incredibly significant
that
>would be one thing. However if they are not going to be using fast CW

they
>really only gain 75 khz, in 3 25 khz blocks, of spectrum.
"No, the code exam has been used to keep 408,000 (57%) otherwise qualified operators off the HF bands. All you would allow for phone was 200kc on ten meters. "Let them eat cake." Had someone been more reasonable in the past, you probably could have saved the 20wpm code exam. But no, you had to have it all. So now you going to lose it all." - Larry Klose, NCI Director, 12/13/98

Please explain to me how Extra class hams are exclusively responsible for keeping "qualified" operators off the HF bands, and how Extras determined what the Novice phone allocation would be on 10m? I thought the FCC set the regulations, not the Extras. Extras are only 10% of the U.S. amateur radio population. Do you think we walk around with a "get one regulation free" card in our wallets? Your entire comment is based on an irrational prejudice against Extras. Carl's comments are based on an irrational prejudice against Extras.

With just this limited set of NCI director quotations (and yes I'm still showing restraint, there are oodles and gobs more if you really want them) I've demonstrated that 50% of the NCI Directors who actively participate in this forum (you, Carl, Rick, Bill) have an irrational prejudice against Extras. If you exclude the Extras and foreign members of your board, you can say that 40% (2/5) of your directors have such bias, based only on the limited quotes I provided. So I think I made a pretty fair statement, it is certainly not false.

Let me show you what a genuinely false statement looks like:

"Neither NCI, Carl or I advocate or suggested that the US violate its treaty obligations." - Larry Klose, NCI Director, 04/26/99

Here is why that is a false statement:

"NCI fully supports the concept that the Commission would be well-advised to simply ignore S25.5 and totally eliminate Morse testing as a prerequisite for any amateur license..." - NCI reply comments to docket 98-143, filed with the FCC

Not only is that a false statement, it is also a lie. A lie has the additional requirement that the person sought to deceive and knew that the statement was false when they made it. As a director of NCI, you authorized the reply comments. You had full knowledge of such a position. You are a liar. Put your pretend-lawyer hat back on and Consult Black's Law Dictionary if you need further clarification on what a lie is, and why you are, in fact, a liar.

Here is another statement that is almost certainly false:

"However, those minority comments which insisted upon the maintenance of today's convoluted system of license classes and continued high-speed Morse testing requirements universally failed to provide any compelling, rational reason why such outdated and restrictive

requirements should be maintained" - NCI reply comments to docket 98-143, filed with the FCC

In that statement you are referring to the entire group of people that made ProCode comments (607 comments). For that statement to be true, NONE of those 607 commenters could have provided a "compelling, rational reason" why code testing should be maintained. I recognize that you don't agree with any of these people, but that does not automatically make ALL ("universally") of their comments irrational or non-compelling.

> 2. The Extra class licensee that responded to WT Docket
> #98-143 gave 5.5% support

Uh-oh. Did you tire of imitating a lawyer? Are you now going to imitate a statistician? This certainly isn't your forte:

"The results Comments were 43% No Code, 37% Pro Code, and 20% ARRL.

I never said the numbers were overwhelming, but numbers do indicate that the nocode position has gain support over the last ten years and is now the majority position." - Larry Klose, NCI Director, 03/20/99

The last time I checked my statistics text (or the dictionary) a majority is defined as having greater than 50%. Your 43% is less than 50%. That is called a m-i-n-o-r-i-t-y, Larry. To add insult to injury, you have the audacity to take this shot at Steve (who you were responding to) in the same post:

"I can see you are having trouble with the new math."

Since you insist on dabbling in areas that you obviously know nothing about, let's go ahead and play statistics.

> 1. Extra class licensee hold 4 out 11 positions on the
> NCI Board of Directors, although the Extra class only
> make up 1 out of 10 amateur radio licensees.

I'll do you one better Larry, I'll even make your statement STRONGER. If you exclude the foreign directors, you have 9 directors that form the set that could be Extras. 4 of them are Extras. That means that a whopping 44.4% of your board are Extras. WoW! It sounds like you have a real Extra class country-club going on over there at NCI HQ!

> 2. The Extra class licensee that responded to WT Docket
> #98-143 gave 5.5% support to the NCI proposal and 4.2%
> to the ARRL proposal.
> The procode position got 19.5% support, which was their
> largest supporter.

That's an interesting statistic to choose, Larry. I'll choose to point out that only 18.8% of the comments coming from Extras supported the NCI position. How do you explain the discrepancy between the 44.4% on your board and the 18.8% that commented in your favor? We could talk

about sample sizes, but that would go right over your statistically-challenged head (and if we did, your 44.4% would be the number most in question).

I'll save you the statistical theory and simply claim that you are seeing the "poster child" effect. How many swimsuit ads do you see with overweight and ugly people modeling them? Right, none. Marketers want to create the best possible personification of their products. You follow the same marketing rule by putting your Extras right up front to plant the message "see, even the people who have passed all the code tests want to do away with code testing" into the minds of the uninitiated.

I'm not criticizing you for doing that, but try to be a little more honest when you claim to be stating the truth. If you want to thoroughly shred my "poster child" theory to pieces, all you have to do is provide some NCI membership data that shows that the Extras in your general membership account for 44.4% or more of the total.

> The NCI proposal was well support by Extra, Advance and
> General licensees. No Code International and other
> nocode testing advocates appreciate their support.

I don't know what you mean by the vague "well support[ed]" statement, but the truth is that a *minority* of each of those license classes commented in favor of your proposal:

Extra: 18.8%
Advanced: 33.6%
General: 15.2%

> We could not have won without them.

I guess I must be out of the loop. Did the FCC issue a ruling dropping all code tests down to 5 WPM with a sunset clause providing for their complete elimination in the event that S25.5 goes away? Or did you pick some bad mushrooms?

<<<<This is to whomever hasn't REALLY read this. I don't mean GLANCE; I mean READ. It's an excellent analysis of what we hams are expected to do vis a vis the FCC. Usually female hams belong in the kitchen as does sicko Carol Valentine or in her case, washing her husband's brown shirt and red, black and white swastika armband, but all hail PAULA-the DEJAQUEEN. Right on good looking and keep these dumb male counterparts thinking. Doc,AF2Y>>>>>
There is much confusion regarding what the FCC can or cannot do, and what the ramifications are to amateur license holders. The FCC is a departmental extension of the US Government that has it's own set of ADMINISTRATIVE LAWS.

The difference between STATUTE LAW and ADMINISTRATIVE LAW is that Statute Laws are passed by Congress or States for the "good of the populous". Administrative Laws are passed for the "good of the administering organization".

Take the US Park Service for example. There may be a US Park Service Administrative Law that prohibits drinking alcohol on any federal park grounds in the US. The burden is on the visitor to fully understand the rules and regulations of the park upon entering. The term "ignorance of the law is no excuse" would clearly apply.

Clearly a person can legally stand on a sidewalk, or in their own backyard and drink as much alcohol as they want. As long as this person is of age and doesn't become a nuisance, he clearly has the right to do so. This is the difference between the two types of laws. Certain individual rights are infringed when one agrees to place themselves under the hospices of an governmental department or organization. Another prime example is the military. They have a completely different set of Administrative Laws governing conduct, of which the military can question the applicability of which at any time (without Congressional approval).

Now back to the FCC. The FCC can have Congress add ADMINISTRATIVE LAWS at any time to insure the sovereignty and efficient operation of the FCC. Remember, the FCC's an extension of the government which means they have a governmental purpose for existing. When an amateur radio enthusiast applies for a license what he or she is saying is that they will act according to whatever rule or regulation is in place at that time and the FCC has the right to question the amateurs practices at any time. The burden is always on the amateur, not the FCC.

Like or not there is no constitutional amendment guaranteeing radio use. The use thereof is completely up to the discretion of the department of the US

Government thats been charged with administering it. In this case that department is the FCC.

Hola, Hola, hola!!!!!!

What did you win? I looked at your US FCC web site,
and saw no comment saying "I support NCI", but many which
said "I support ARRL".

What did you win? Who kept score?

Abrigato!

So what's the difference between two signals at 50Mhz or two signals at 300Khz what specific propertys does ground wave have that don't exist at higher freqs? And what do you call two stations on 50Mhz 40 miles apart talking when the band isn't open?

I was expressing my preference, which is to protect the digital modes
(sans Morse Code) from SSB. I do not care if Morse is protected. I
also do not care if Morse is not protected. That is all I am saying.
My opinion only; yours may differ and that is fine. RJB.

>You could, at least theoretically, do sub-Nyquist sampling.

Not practical in this application. Since the TV signal is broadband,
you'd have to do multiple subsamples across the span and recombine
them without losing phase coherence. I don't see any practical way
to do that with audio rate DSP chips.

>The catch would be like using a strobe light: while you can
>flash (sample) at any convenient sub-multiple of the item
>you're looking at, nothing significant must happen during
>the flash. This translates into a moderate sampling rate
>(definitely in the soundcard/DSP eval kit range) but a
>very fast sample and hold ADC (which is not).

Where subsampling is practical, IE a band limited narrow
band signal, you can add an external fast sample and hold
in front of the sound card's A/D. This can be done easily and
cheaply. But you need good bandlimiting, IE tracking preselector
filtering, ahead of the sample and hold, otherwise you'll get alias
artifacts that you don't want as well as the alias down conversion
that you do want. You won't be able to separate them at baseband.
It is this requirement for tight tracking preselector filtering which
makes this approach impractical for a HF amateur band receiver.

In addition to Doc's comments, it is not proper to modify the proper noun "English" with the word "well".

It may be true that "good", "proper" or "acceptable" English 'does not come out of his computer' but that would be because he does not write English "well". "Well", an adverb, may be used to modify the verb "write" but cannot be used to modify the noun "English"; an adjective must be used. I learned these rules in early Grade School (parochial) as a condition of attending the normal curriculum in our public High School. Certainly, I would have flunked Freshman English at UW-Madison had I attempted to modify nouns with adverbs. We must have been strict in Wisconsin in the circa 1960 time frame.

Today's standards are apparently much less stringent. "Well" English might be quite acceptable today as long as one feels good about one's self when writing it that way.

Hi All,

I'm intrigued by the Koch method for teaching/learning CW, as described by N1IRZ (see link at http://griffy.nmt.edu/sara/sara/finley.morse.html). The claimed results are impressive.

Our club wants to run a class to teach new Techs the morse code. This looks like the most efficient way to achieve appreciable speed, but still seems a bit strange.

Has anyone else tried this with a class (or individually) ? What were your impressions ? Would you do it this way again ?

Thanks in advance for sharing your experience !

FCC Amateur Radio Enforcement Log

A representative listing of recent reports on Amateur Radio enforcement actions from the files of the FCC Compliance and Information Bureau:
NOTE: Issuance by the FCC of a Warning Notice indicates that the FCC has what it believes to be reliable evidence of possible rules infractions and not necessarily that the recipient has violated FCC rules. This Enforcement Log is representative of recent Warning Notices, Notices of Violation, and other FCC communications to licensees involving possible serious rules violations. It is not a comprehensive listing.
OAKLAND, CA: The FCC has issued a "final warning" to James C Walker, KF6VAA, of Oakland, for allegedly continuing to transmit on area repeaters after his Technician class grant was set aside in February in connection with the K7IJ repeater shutdown case. FCC Legal Adviser Riley Hollingsworth said the Commission has evidence that Walker has been operating on the WA6SEK 145.21 MHz repeater in his area. "This constitutes a final warning to you that if such operation continues, we will seek criminal prosecution against you in cooperation with the United States Attorney in your jurisdiction," Hollingsworth said. He invited the licensee to contact him to discuss the matter.
SAN ANTONIO, TX: The FCC has requested that Tech Plus licensee Steve P. Bazar, KC5LOT, retake his amateur examinations under the supervision of the FCC office in Houston, Texas. Bazar must appear for retesting by June 30 or his license will be cancelled. The FCC further said it had evidence that Bazar had maliciously interfered with VHF repeater operations in the San Antonio area. In a Warning Notice, FCC Legal Adviser Riley Hollingsworth, K4ZDH, warned Bazar that such operation would not be tolerated. He requested the licensee contact him to discuss the allegations.
SAN ANTONIO, TX: The FCC has requested that Tech Plus licensee Luis A. Caraballo Jr, N7PLC, retake his amateur examinations under the supervision of the FCC office in Houston, Texas. Caraballo must appear for retesting by June 30 or his license will be cancelled.
SAN ANTONIO, TX: The FCC has requested that Tech Plus licensee Roger G. Morgan, KB5URM, retake his amateur examinations under the supervision of the FCC office in Houston, Texas. Morgan must appear for retesting by June 30 or his license

will be cancelled.
STOCKTON, CA: The FCC has requested that Technician licensee William B. Gifford, KF6URY, retake his amateur examinations under the supervision of the FCC office in San Francisco. Gifford must appear for retesting by June 30 or his license will be cancelled.

We have ground wave and sky wave. That's it. That "standard VHF range"
that you mention is due to line-of-sight ground wave.

>Now, try 120 miles to a mobile with just 100 watts - that's
>ground wave (what used to be the FW LW beacon in the 300 KHz

That also is ground wave in which the wave is able to follow the
curvature of the Earth due to diffraction.

Hola, Hola, Hola OM Roger you idjit!

Phone is perfectly authorized in our rules on all those frequencies.
Your FCC is backwards in the business of "protecting" modes when it
should advance competition and may the best mode win. If a mode needs
protection then it must be not robust enough.

Larry,

According to another NCI Director, my proposal was 'scored'
as supporting NCI. Since I do not support NCI in any fashion,
this scoring was pure fabrication on your part, and discredits
your entire evaluation.

Just another case of figures don't lie, but liars figure.

Dave,

Glad to see you here with your buddies WB20TK and AF2Y. You should spend a lot more time here, so that we don't hear your distorted signals on 20 meters. You really should clean up that transmitter, or better yet, shut it off.

With all due respect to Mr. Mendelson, his info is way out of date,
especially with respect to reciprocal permits. Since 1998, there is NO
fee for the issuance of a reciprocal permit, which is limited to 3
months (not 1 year as previously). Also, the US is now an associate
member of CEPT, which recognizes licenses issued by the traveler's own
country (mainly Western Europe, Canada, New Zealand and a few others),
which means an American visiting Israel for a short period can use
his/her own callsign prefixed by "4Z7" (Tech.) or "4X7" for higher
classes. If you're going on aliyah, you can bring in all your
equipment, but if you have a scanner or CB, don't advertise the fact,
since they are technically illegal in Israel. But then so are traffic
infractions, yet the accident rate on Israeli roads is really up there.
Go figure.

Jim:

There are lots of ways to learn Morse code, but the Koch method appears to be one of the most effective. I believe that the Farnsworth spacing/speed is the most important aspect. It helps avoid hitting a barrier at 12 - 15 wpm if you learned to count dit's and dah's. If I was giving a class with the intention of reaching speeds above 10 wpm, I would definitely use Farnsworth spacing, and probably use the Koch method.

I don't know of any scientific studies, but anecdotally, many people vouch for the effectiviness. My own experience was very satisfting. It took a little over 4 months to go from 0 to passing the 20 wpm test. I'm now up to about 35 - 40, but that's another story.

Dear Radiosigs,

About twenty-seven years ago, August 4th, 1997, the Ap index hit 223, the ionosphere was bombarded with all sorts of solar particles with hard-to-pronounce names, and amateur radio was at it's peak. It has never been that good since. Ap indexes even in the 150's are unheard of lately.

Also, 27 years ago, titanium dioxide was first released in a commercial product. It has led inexoribly to the decline of amateur radio as we know it. Titanium dioxide is directly responsible for the decline of the Ap index, and the resultant decline of amateur radio. It has also led to a horrible decline in well tanned girl torsos at the beaches of the world.

In the late 60's a group of induhviduals, mostly users of frequencies near 14.313 who were rankled by the advent of incentive licensing, looked for a way to ruin propagation and thus amateur radio forever. Since propagation depends on a solar component known as freckles-del-sol (better known as sunspots), a means of stopping sunspots would destroy amateur radio.

The group discovered the sun-blocking power of a natural chemical called titanium dioxide, but they needed a way to deploy a thin mist of the chemical into the upper reaches of the earths atmosphere. Since the chemical could be dispersed by evaporation, these diabolocal fiends found the perfect means of sending it skyward.

First they quietly obtained virtually the entire world supply of titanium dioxide, and then they started a rumor in the medical world that the tanning rays of the sun could actually be harmful. (Incredibly, in 1972, people would believe anything, even that the rays of the sun were harmful!)

Literally millions of bikini clad ladies, even on Gilligans island, were panicked! After all, it was August, the height of the swimsuit season, and most of them had not nearly amortized their investment in the latest Jantzen bikini, or partial bikini. What could they do?

Meanwhile, the titanium dioxide Cartel had formulated a mixture of their chemical and coconut and put it on the market as not only a sun-blocker, but also a means of replenishing critical skin oils

depleted by exposure to the sun.

Millions of bikini-owners flocked to purchase the new "sun blocker",
spread it lavishly on their bodies, and returned to the world beaches.

Little did they know the horrible ravages they were inflicting on the
E and F layers of the ionosphere, as the gruesome chemical evaporated
from their skin and rose into the skies of the world, from whence it
ruins propagation on a global scale.

Hams, UNITE! Help take back the ionosphere! Be part of the solution,
not part of the problem. Visit your local beaches today and check the
skin of everyone for traces of this harmful solution. It can be easily
detected by it's characteristic coconut smell, and even small
concentrations are dangerous. Carefully sniff all bodies on the
beaches for traces of this chemical. If detected, throw the
offending person in the water to dilute the effects, and
burn on the spot any garments known to be contaminated.

Save amateur radio....
.....to the beaches, now!

73, de Hans, K0HB

FS: AOR-3000

Made by AOR. Here is a general description of this
receiver scans freq. from 0 Mhz to 2.03 Ghz.
It's all mode, search, free scan, clock, date,
alarm, sleep, and much more. And I have Proof that
it went to AOR to get a check up to replaced
lithium battery and to make sure that it on
frequency. The date of invoice is 3/5/99 with invoice number.
And this is there i ship it to:

AOR U.S.A.
20655 S. Western Ave. Suite # 112
Torrance CA 90501
Tel. 310-787-8615
(This info is for people who needs AOR address)

Good working CONDITION.

1) I have manual for it,
2) Mobil plug & Extra cord.
3) I am also including a RADIO SHACK 12 volt power supply.

All for $725.00
That Includes S & H And Insures 2 day air.
Will e-mail you and call you with
tracking number.
I'll ship anywhere in the USA ONLY.

Accept Prepaid (Postal) Money Order

If send a bank check you MUST wait 10 days
to clear!..

If you like you can e-mail me with your
telephone number and I'll gladly answer
any questions you have.

Apparently Mike Guernsey, ND8V, was indeed killed in an auto accident.Conformation came from his close friend Rube Lloyd, K4RUB. Here is a letter I received from the demented David Tolassi, KC1ZQ. You have to be a sadistic s.o.b. to pen it and he IS.This is what's loose in ham radio.And we have a miserable rat like this, a true blue KV4FZ supporter,who jams the hell out of everyone and plays digital recordings at every chance and Riley Hollingsworth has not taken appropriate action. HUH? AF2Y, Doc

Doc, I'm looking for the phone number for ND8V, do you have it?

Now that blubber belly has died I would like to make an offer on his radios and amps....Anyway, his kid could use the money to buy a piano crate to use as a casket.

I have his photo I stole while at Dayton......I'm here to tell you, they will need a crane to lower him into the ground with, Doc.

Also, what do you think will come of his mobile setup in his pickup truck? Will the bank repo. that radio and antenna along with the truck?

I know that Mike had some hotrods also....What kind of cars were they? Do you know if he has any Mustangs?

Thanks, kc1zq

Not unless you have a lot of time on your hands. It will take about 12 hours for your CQ to be answered (6 hours to & 6 hours from the alien station), assuming that the intelligent life form, with whom you would have the QSO, answers right away. That raises the question IF an intelligent lifeform would bother to answer the Morse "CQ" or simply assume that the sender's plateau of knowledge consisted of making and breaking a switch contact. :)

85. FS: MFJ 1278-B All Mode TNC

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-01 00:00:00 UTC
From: n2rud@my-deja.com
Message-ID: <7j1de3$cf6$1@nnrp2.deja.com>
Source record: 141062

For sale: MFJ 1278-B All-Mode TNC, selling for $180.

This is the current market MFJ model that sells for $270.
Unit does many different modes: packet, RTTY, CW, pactor, SSTV...
Bought new. Have box, manuals and all original items.
Unit is like new, barely used it to try out SSTV.
Send email to <aninno@cnyric.org> if interested.

>one could be excited about? New products?

TenTec had two new radios, DSP based and computer controlled (like Kachina). Interesting, but not quite there IMHO. Kachina had two new remote control options for their radios, slick. Icom had their radio with a TV screen. I don't know what good it is, but it was pretty. Yaesu gave me 3 new hats. Outside, KMA had some nice LP antennas for sale. I bought one for 6m. (These are good.)

I looked for SMD parts but didn't find any I needed. I did get a good deal on some finger stock for my 2304 amp. But the highlight of the hamfest for me was a fellow selling out the contents of his machine shop. I got Starrett, Brown & Sharpe, Proto, General, etc at incredible prices, also picked up some stepper motors for my CNC lathe and a couple of gear head motors for a power feed for my mill.

The weather was perfect, there was plenty of good junk to peruse, and it wasn't stifling inside. The buses ran on time, and some of the hamfest food was even edible. Nothing really startling was announced, but it was a very good hamfest. Sales appeared to be brisk inside and outside. I resisted buying any more computer junk this year (though there were some good deals, especially on 17 and 19 inch monitors). I found a great deal on a Watkins-Johnson receiver, but it was just too big for me to manage on the bus. Next year I've got to get a flea market space so I can wheel the boatanchors to the truck. (Or maybe I shouldn't, when I do have a flea market space I wind up hauling more back than I take.)

Hola!

I think amateur radio publications should talk about radio technologies,
not PC operating system technologies. Computers are simply accessory to
amateur RADIO. If LINUX will improve the noise floor on my new design
for a DSP rxvr, then I care. Otherwise it is of no concern to me as
a radio designer or radio operator.

ARRL and various software vendors must sell up their old, overstocked primevial windows 3.1 software for antenna calculations, propagation predictions and the like. If you mention linux or even win 98 to ARRL HQ, they probably will not have a clue as to what you are talking about. You are speaking to ham radio geeks, man, not computer geeks. They are not one and the same, as one might conclude from reading the various posting in this NG!

In addition to Doc's comments, it is not proper to modify the proper noun "English"
with the word "well".
<<<Mr. Finn, thanks for the input and are you related to Mickey? Look at Len's post and you'll see that the word WELL, modifying English, was written thusly ,"well." That means Lenny knew it was improper but did it to add a bit of levity. Quotation marks around an incorrecly used word or phrase is usually indicative of a play on words.>>>>>
It may be true that "good", "proper" or "acceptable" English 'does not come out of
his computer' but that would be because he does not write English "well". "Well",
an adverb, may be used to modify the verb "write" but cannot be used to modify the
noun "English"; an adjective must be used. I learned these rules in early Grade School (parochial) as a condition of attending the normal curriculum in our public
High School. Certainly, I would have flunked Freshman English at UW-Madison had I
attempted to modify nouns with adverbs. We must have been strict in Wisconsin in
the circa 1960 time frame.

Today's standards are apparently much less stringent. "Well" English might be quite
acceptable today as long as one feels good about one's self when writing it that
way.

Dear Doc,

I too believe that anyone can learn CW. However, I don't believe that it takes as much work as you have put into it. I admire your desire to learn and respect you as an amateur who uses his code skills.

With that said, I must protest your post. I am a CW only operator, but I still have respect for those people that you call "tech-morons" they may not be as hip to the code scene as you and I, but they do fill a niche within the hobby. The fact that they are code free does not automatically put them into the catagory of "lazy"....just different, with different goals and interests.

The fact that you would post such a childish message on this group only shows us all how intelligent you 'really' are. There will always be someone with more skill than you. I might think you to be lazy because you can't copy 40 wpm in your head and some old timers might think I'm lazy because I can't copy faster than 40 wpm.

If you wish to stir it up and get people's goats then please goto teen chat on AOL, and spare us all your rantings.

Sincerely,

Brent Scott

You're asking me to admit to a lie. Check the evidence
at the website below then return here and try to refute
it. My response to the legalistic arguement on what get
posted to what NG was to point out the inability of the
Pharisee to perceive a moral issue. The jackass only
wanted to argue about how many angels can dance on the
head of a pin, and whether they had paid a cover charge
to use the dancefloor. If it got his attention, and it
did, then it served the purpose. Diction is sometimes
as important as grammar. I noticed that you edited the
sentence above because you did not want to address the
moral issue, EITHER.

> My country, right or wrong.

Didn't you complete your dissertation on moral
relativism working under "Professor" Lt. Calley
at My Lai? But no Jews died there, so you are
still very proud of your country. No, wait!
Israel wasn't in that war.

Now, that is so sad! He got the defective genetic contribution from you. Great discussion skills, but without backbone, without moral integrity, without logic, without reason, without the ability to know right from wrong. Now he has to suffer through the rest of his nihilistic life generating noise that serves no purpose, attacking anyone who argues for doing the right thing. Have you been registered as a child abuser for the wrongful things you have taught your son? He's right at the age to become one of the highschool shooters.

Why can't you study the evidence at the website below and address it rather than boring the readers with your cowardly blather?

106. Which antenna tuner EDX-2 or AT-180 best for long wire.....

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-02 00:00:00 UTC
From: Randy and Cara Randall <crrandal@seidata.com>
Message-ID: <37560593.36EE9562@seidata.com>
Source record: 140833

Hello. I have an Icom 706 and a AT-180 automatic antenna
tuner. I would like to operate at
times with a random length long wire (Field day , emergency
operation etc. Will the AT-180 do
it or am I better off getting a Alinco EDX-2 also? The
instructions I have are not clear on
this type of operation with the AT-180.

Thanks,
Randy KB8ASO

It's all a BIG JOKE! ND8V is ALIVE and well.

He has had a lot of money trouble as of late so he felt the only way out
was to FAKE his own death.
```

It's too bad.....I really wanted his radios & amps, not to mention a Mustang if he had one.

KT4TR did a bunch of checking & found NO death records on ND8V...could it be that Mike is at a "fat farm" trying to lose some weight?

As far as Dr. Hate goes, he is the one who has started this war with me. The "gentleman" from NJ is nothing more than a current day nazi doctor who was kicked out of his job for sexual advances on a number of people.

Is blubber belly dead? Is Doc going to get off the air? What will happen to ND8V's radios?

All burning questions that must be found out.

Doc, your knowledge of U.S. history is as contorted as your support of
the Hollingsworth Initiative to Restrict Speech and your support of
WB2OTK, who confuses liberty with license.

Lincoln believed blacks and whites must be separated, and established
Liberia with this goal in mind. Slavery was not the primary issue of the
Civil War either. The War began as a fight over states' rights.

I will not respond to further posts in this thread, as I hold a PhD in
American History, and your stupidity isn't worth carpal tunnel syndrome.

Spare us your Northeastern public school brainwashing posts.

I wonder if OTK resent in his Answers to Mr. H???

Let's refresh everyone's memory!

[UPDATE] EASLEY, SC: The FCC has given General licensee Richard L. Whiten, WB2OTK, another two weeks to complete his reply to the FCC following an inquiry in April. Whiten had responded May 10, but via Certified Mail May 19, the FCC's Legal Adviser for Enforcement Riley Hollingsworth said the responses were incomplete. Hollingsworth said that failure to provide the information requested will lead to license revocation. The FCC had sent Whiten tape recordings of his on-the-air operations on November 22 and 26, 1998. Hollingsworth had requested that Whiten "provide a full explanation of these transmissions" by May 20 and said the information would be used to determine "what action to take regarding the renewal of your Amateur Radio license." The FCC said Whiten could keep the tapes. Commission personnel inspected Whiten's station in January and has requested information on the operation of his station and a high-power linear amplifier the FCC noted upon inspection

Looks like if he don't respond, He'll get his ticket pulled. I think He'll get a big NAL anyway!

If two CW stations were both trying to "get thru" on the same frequency,
could one of them NOT get thru? (since they both can always get through) :)

: Let me remind you Dick, lest you forget, that deliberately QRMing
: a QSO in progress, no matter what the mode, is against the rules.

> and voice.

Wouldn't it be in the best interest of our 'advance the radio art'
purpose to at least set aside some spectrum where people like Carl can
perfect their new digital modes in relative peace? Once he perfects it
to the point of being "the mode that gets through when nothing
else will" he can go take his chances elsewhere.

It might also be in the best interests of the poor guy's health. Can
you imagine how high his heart rate would go when all of his "pileup-
busting, stomp 'em into the dust with your legal-limit (+?) signals"
start calling CQ Contest during CQ WW Phone? :-)

They'd both get through; it's up to the listener which signal he chooses
to copy (some operators can copy both; I used to have the 4 and 8 MHz
piped into one earphone, and 12 and 16 MHz piped into the other).

>Please, when CW stations are doing it, they are not QRMing each other.
>They are "experimenting" to see if they can -both- "get through". =:o

I suspect you're referring to a "Pile up." Here's my pile-up file:

What sounds to you like a dozen-dozen stations QRMing each other is really
an established method of communication. "Pile ups" are understandable
only to those who participate in them frequently. On the maritime bands
we had a world-wide pile up every six hours - hundreds of ship-board
operators at sea, wanting to pass time-sensitive weather observations
(WX OBS), camped out on the calling frequencies, all calling their
favorite shore station, similtaneously. A shore operator picked out
the stronger ships and passed out numbers ("3JKG UR NR 1, KNLF UR NR 2,
JYLS UR NR 3,...") until he had about 20 or 30 ships lined up; then
he QSYed to their respective working frequencies and took their OBS.
After finishing with that group, he'd turn on the CQ tape and the
calling frequencies would come alive again, and he'd line up another
group of ships. Twenty minutes into that OBS hour the calling frequen-
cies would be calm again until the next OBS period, six hours later,
approached. This went on four times per day, every day, for over three-
quarters of a century. (Only by getting WX OBS from every ship at sea
was WMO able to provide accurate WX forcasts for those ships - that was
incentive enough for each ship at sea to take and pass their OBS.)
This is no different than what happens on the ham bands - the DX
station will pick out one station at a time from the pile up then
go on to the next station. As with many of our other procedures,
hams copied this technique from the maritime folks.

Only those unfamiliar with the technique will call it "QRM."

73, Jeff KH6O
(who copied WX OBS for four years at US Coast Guard Radio Honolulu: NMO)

Except that (1) the exchanges take place ON the calling frequency and (2)
there are always some bozos who don't listen and wait for a previous exchange
to complete before calling out again.

The measure of a DX operator is not only his or her ability to pull out
individual calls and reach the operators in order, but often, through
consistency and insistency, the ability to keep order even when the bozos are
out in force.

Jeff, I've been copying CW for 47 years and I cannot copy two equally
strong signals on the *same* frequency. I cannot copy a weak CW
signal on the *same* frequency as a strong one.

I'm sorry - but this is not due to "ground wave" propagation.

By the time you've reached 50 MHz the losses in the soil
are just too great.

What accounts for the propagation that is seen here is mild
'tropo' or also what is called 'ducting' - not ground wave.

I recommend consulting a good text on radio propagation for
particulars on ground wave losses versus frequency.

In broadcast engineering there was considerable work done
in the past showing the difference from just from the low end
of the BC band to the then top end of the BC band.

Truth or fiction? Only your RF prop/broadcast engs
know for sure ...

The 'ground' must exhibit a particular property called 'conductance'
wherein the better the conductance the lower the loss to
an incident radio signal.

The losses are much higher for a 50,000 KHz signal
than a 300 KHz signal. I don't recall the specific formula
right now - it also includes factors for types of soil.
And like most things in nature there is not a linear
relationship between frequency and loss - therefore
losses increase much faster with frequency.

The factors that are prevalent for those conditions are
tropo AKA ducting due to a density diff in the atmosphere
due to such factors as temperature and humidity resulting
in a prismatic type effect as the radio waves traverse the
atmosphere.

Using this effect when it has presented itself I have
talked across Lake Michigan (~80 miles) using a
2 Watt Wilson HT and a rubber duck from Benton
Harbor to Milwaukee back when I was with Heathkit.

- ground wave? No way - Ducting!

Well, you certainly don't have much self esteem
if you refer to yourself as "no one". You read
and respond to my every word as if God created
you for no other purpose.

> Are you telling me the raid would not have occoured
> if there were no amateur station on the compound?

Hey, you're not so stupid after all. The evidence
shows that the amateur station was the first target,
even before BATF pulled up with the cattle trailers.
The BATF started killing people because that is the
only training that the homocidal scumbags ever got.
They didn't know how NOT to kill people.

> You call me a coward but I assure you if I had the
> info I would publish it and not make excuses about
> making arrangements to leave the country.

OK, Send the administrative appeal letter at the
website and ask for the same documents, only put
your name on the request. When you get a description
of the documents that FCC is withholding, which
pertain to the station and its operators, you will
know what the documents are and you can publish
them yourself. I am tired of your BS. Get to work!
And I do not want to here any of your sorry excuses!

Hint: Endorsements on Commerce documents.

Fellows,if you ever have a chance to hear me either on 14.300 or 14.313 about 1100UTC,you will know why I am considered one of the top hams in this nation. Despite a rather sluggish and oftimes dead band, I am working the VKs like you wouldn't believe. I'm offering an instruction sheet on how to build my CLOUDWARMER 2 element wire beam;I have sent out several sheets for just S.A.S.E.s but there still remain a host of you who are languishing in indolence when you could be hauling in all that DX as I am. As I said previously, the idea for the antenna was given to me by one of the finest hams to ever hold a ticket-a man having unbelievable electronics skills in all phases of ham radio-a man who's encyclopedic mind renders books useless-I speak of Richard Whiten, WB2OTK from Easley,S.C. Yes, I was skeptical when Rich first told me about this type of NVIS antenna; in fact, I scoffed at the idea of a dipole having a reflector, but the proof of the pudding is in the amount of QSOs and I am a winner! You too can be a ham radio winner and wizard. Hams will look up to your QSO achievements as they do mine and you too will be the envy of the crowd. That antenna is so good that the other day I taped a weak conversation in a language that seemed bizarre to me. I brought the tape over to the language department at Cresskill State University in North Jersey and you wouldn't believe what they told me. The language was NOT OF THIS PLANET. The tape is now on its way to S.E.T.I. headquarters(Search for Extra Terrestrial Intelligence) as well as to Dr.Alan Hynek in the Chicago area, the man who was called in as an expert during the making of "Close Encounters of the Third Kind." That CLOUDWARMER could have picked up what the Arecibo dish has been looking for for a half century---proof of life elsewhere than earth. I expect a call from the ARRL about this next week and word has it that the NY Post will be sending a photographer and journalist over for pictures and an article. I urge you to get out of your doldrums and send an S.A.S.E. to me for that instruction sheet. It'll make all the difference in the world and out of it also. AF2Y, Doc

EITHER TUNE
> AWAY OR SHUT OFF THEIR RADIO.

I don't know what the "TRUTH" in this case is, I can't
seem to find an answer to my question about what the
normal discussions on the Liberty Net involve. Nobody
seems to want to tell me.

And I guess if the FCC doesn't like what they hear,
they can shut the net off, so nobody else has to
worry about hearing it.

In case you missed the first part of this discussion,
it's not about the "TRUTH". Its's about whether or
not the Liberty Nets view of the truth is appropriate
for ham radio frequencies.....

Well.....
If we post to rec.radio.amateur.policy one might think that we mean to
post about HAM RADIO POLICY....BUT Ham Radio is a hobby and as such is
a part of the American (indeed International) culture. As such it is a
sub-set of culture as well as radio is a subset of technology. IMHO the
overlapping of cultures as well as the overlapping of technologies can
be seen often as being relevent or inter-related. Thus Radio technology
can not be entirely separared from computer technology and the
propensity to attempt to enjoy hobbies can be inter-related by being a
subset of our entire CULTURE. Tradition based on history does not
change but TECHNOLOGY and CULTURE do change. Society or what is called
sociology depend on the technological and cultural changes. As
communication becomes better there is a trend toward world-wide
sociology because styles, media, fashions, fads, movies, music, etc that
are part of culture become world-wide rather than regional....AND that
is why I find it hard to separate radio culture from gun culture or
health food culture or any trends that may affect the future cultures.
I never met a ham I didn't like,
Hams need more license classes,
Please keep thinking,

171. Re: Morse code/Electroni Theory

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-02 00:00:00 UTC
From: Will White <wcw@asu.uswest.net>
Message-ID: <3754E4EB.60DDA118@asu.uswest.net>
Source record: 140959

Now someone wants to do away with the theory, huh? No, the only reason for the theory test is *not* that "the oldtimers" had to do it. Why did *they* have to learn the theory? They had to because it is, still is, will be, essential to make sure operators do not cause excessive QRM, or operate their stations in a manner that is unsafe or unhealthy to themselves, their families, and neighbors. The theory tests *ideally* should (and don't do a good job of this because the questions and answers are published) result in operators who use the spectrum efficiently, properly, according to commonly accepted good, polite, considerate principles, and in accordance with international law and treaties.

172. Re: KOCH Method for Learning CW: Any Experience ??

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-02 00:00:00 UTC
From: Will White <wcw@asu.uswest.net>
Message-ID: <3754EF9E.7B155FB9@asu.uswest.net>
Source record: 140960
Cross-posted to: alt.ham-radio.morse,rec.radio.amateur.misc,rec.radio.amateur.policy

Jim--

As I understand it, the Koch method works as follows: start with two characters, learn them at full speed (i.e. spacing and character speed, no Farnsworth or similarly slow spacing, high character speed), then add pairs of characters as each is mastered to >90% accuracy, and so on. . .I have/am using a method of my own devising that borrows heavily from Koch. I learned all 43 characters via a sort of Koch-Fransworth method. I use a computer trainer (MorseTrainer for Mac) and start with E and T at 22 WPM character speed, and a 12 WPM spacing, and then added opposite characters (I and M, S and O, Q and Y, and so on) until I had 90% accuracy on the whole 43 symbol set, then I moved on to random groups, call sign lists, and simulated QSOs at 22/12, decreasing the spacing gradually. That is where I am now. Interestingly, I am at about 85% at 22/12 of random groups of 2-9 characters (including numerals, punctuation, and prosigns), but lag behind at about 85% 22/10 on call signs, and 75% 22/10 on simulated QSOs. I attribute this to my trying to guess ahead, and in turn actually messing up and missing, lsoing the rhythm and my place.

I would make the following observations and recommendations. First, if I had it to do over again, I would *not* add character pairs in opposite sets. I have found this to be more of a cause of confusion and element counting than a help, especially at the very beginning. Also, while the pure Koch method is very rigorous, and absolutely prevents any element counting, I think it works best with a human trainer, and exhaustive daily work. Lacking a drill instructor, and given a hectic schedule and laziness, I have missed days here and there since I begaan in earnest three months ago. I have also cut sessions short, not meeting my ideal target of two 30 minute sessions per day. Adapting Koch to Farnsworth spacing has helped me to keep motivated by rewarding me with slower, but steady progress. If you can hold classes *every* day, then try the pure Koch method, otherwise, you will have better success with something like what I have done. Best of luck!

Hopefully the next WRC will also result in the allocation of another 1000 KHz
of HF spectrum (not just the proposed 60 meter band) to amateur use, because
without CW requirements, *everyday* on HF will resemble Memorial Day Friday
(or Guy Fawkes Day. . .) on the road. . .

Rich - You started this thread by asking if anyone had ever met a JEW who was a racist or bigot. I consider myself to be a JEW. I do not consider myself to be a racist or a bigot BUT I must admit that I have definately met some JEWS who are racists or bigots or both. I consider your initial question to be quite stupid because anyone can be a racist or bigot...People who might ask dumb questions like you did are especially good suspects.
Bob Wex w2ilp (I Like People)
Yep - The truth always wins in the end - (another generalization, although not racist or bigoted in itself)

Hello FW:

I would remove the GFCI breaker and replace it with a regular 15 amp breaker. Then replace the outlets in the rooms you mentioned with duplex GFCI outlets. Many of the new GFCI breakers now have a monitoring chip that senses current changes. This chip could be the culprit of your RFI.

180. ND8V DEAD? OR ALIVE?

Newsgroup: rec.radio.amateur.misc

Message-ID: <7j3bmfjhb1@nnrp1.deja.com>
Source record: 140968

Where is the record of ND8V being in a "Train Accident"? No one can find a record of this "Accident". Well known Ham Radio lay about slob and Fat amateur radio Bully "PORKBUTT" AKA WB2OTK, and over weight radio amateur career moron K4RUB are telling everyone that this story is true. Is it a "secret" death as Rube the moron wants us to believe? Was Mike cremated or did he have a regular grave yard with service funeral? We do not know. There is no record with the police or in any paper in the area of his death.Or of of a "accident or a death of someone with the name of Mike Guernsey. We all hope Mike is still among the living, but if this is a hoax, it is very upsetting to the amateur community. Tell the truth you duo of BIG BELLYS" , is Mike in fact deceased?

181. Go Koch your CW

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-02 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990602084722.04079.00000018@ng-fl1.aol.com>
Source record: 140969

What's with all this stuff about Koch and cw? I began with records to get the Novice. Something wrong with that? Then just through practice, I advanced my skill to pass the General. Something wrong with that. And how did I pass the Extra code? Easy. For months I'd tune to the high speed cw on the 8 mHz. band(ship to shore and what not) and put in 30 minutes a day a half hour every other day. There's no quick fix for the cw blues-it's simply a matter of putting your mind to it. Anyone can do who is not too lazy to learn. GET THAT, YOU CODE FREE TECH MORONS ? Remember- cw is a foreign LANGUAGE. The only way to master any foreign language is by practicing regularly. If I could have done it, you can too but then again I'm very intelligent,very industrious,very clever, kind,handsome, thoughtful and caring which leaves most of you dummies out in left field. And I'm modest too. 73,Doc,AF2Y

Ever notice how June is long on criticism using what others have posted over
the last few years, yet short on any constructive ideas or proposals
himself. It is easy to make fun or criticize others if June carefully avoids

showing his own ignorance by refusing to post his ideas, thoughts or proposals for changing our rules and regulations. If they have merit lets see them you say NCI is wrong and write long winded and unintelligible papers filled with criticism. yet every time we ask to see your proposal for the ARS and its future, you remain quiet and do not want to answer the post with anything other than carefully worded sentences meant to avoid addressing the subject.

What a stupid website.
"Dem good ole' days of Dixie" just ain't no more and never will be again. Give Southern people some credit...a majority of us would never (do not) buy into this League of the South stuff. We no longer have a bunch of wealthy English landowners who are willing to finance a war, and sacrifice their own children, so the wealthy can enjoy the economic advantages of free labor. States Rights? B.S. It was about money and power.

"Way down South in the Land of Dixie,
"Old Times There, ARE Forgotten".

And as a poignant reminder to those imprisoned in the past, there's no turning back.

Indeed, if the South had won, the CSA would now likely be a poor third world country in approximately the same bankrupt and weakened condition that apartheid eventually brought to the Republic of South Africa.

You're asking me to admit to a lie. Check the evidence
at the website below then return here and try to refute
it. My response to the legalistic arguement on what get
posted to what NG was to point out the inability of the
Pharisee to perceive a moral issue. The jackass only<<<Staggerlee, the more I
read of you the more I need an antidiarrheal agent. Doc,AF2Y>>>>>>
wanted to argue about how many angels can dance on the
head of a pin, and whether they had paid a cover charge
to use the dancefloor. If it got his attention, and it
did, then it served the purpose. Diction is sometimes
as important as grammar. I noticed that you edited the
sentence above because you did not want to address the
moral issue, EITHER.

> My country, right or wrong.

Didn't you complete your dissertation on moral
relativism working under "Professor" Lt. Calley
at My Lai? But no Jews died there, so you are
still very proud of your country. No, wait!
Israel wasn't in that war.

Dear Doc,

I too believe that anyone can learn CW. However, I don't believe that it takes as much work as you have put into it. I admire your desire to learn and respect you as an amateur who uses his code skills.

With that said, I must protest your post. I am a CW only operator, but I still have respect for those people that you call "tech-morons" they may not be as hip to the code scene as you and I, but they do fill a niche within the hobby. The fact that they are code free does not automatically put them into the catagory of "lazy"....just different, with different goals and interests.

The fact that you would post such a childish message on this group only shows us all how intelligent you 'really' are. There will always be someone with more skill than you. I might think you to be lazy because you can't copy 40 wpm in your head and some old timers might think I'm lazy because I can't copy faster than 40 wpm.

If you wish to stir it up and get people's goats then please goto teen chat on AOL, and spare us all your rantings.

Sincerely,

Brent Scott
N5CLK
Austin, TX
...._._
<<<Mr.Scott,I outlined the truth and if you're offended, that's tough noogies. Code free techs are a menace to the integrity, viability and longevity of this hobby/service. Only MONEY is behind their parasitic infiltration of ham radio. Put two and two together. The ARRL is out to sell magazines and books and QSTs primarily. Yes,I am a member of it and will continue to be because BASICALLY it does a nice job. But in the case of these Code Free Tuchuses,someone like N0VFP, the more halfwitted brainless jackass persons who claim to be hams, the more mags are sold. The greater the circulation, the greater number of rigs are sold. The more the rigs and stuff, the more advertising money flows into the coffer. Everyone gets richer and happier but who suffers? HAM RADIO! It's a vicious cycle without regard to the end result. It's as dumb as constantly printing up money in economic doldrums. By doing so, the value of a dollar is devalued. The more these code free tech jerks pour into out hobby, the more it

becomes devalued.WE NEED QUALITY. not QUANTITY. We need not only for the FCC to get tougher with enforcement, but in entrance as well. STOP DISHING OUT TICKETS WHOLESALE!
You want something good? EARN THE GODDAMN THING-DON'T TAKE IT FOR GRANTED.
There's no need to retain the code at 13 and 20 for the Gen. and Extra but dammit, REDUCE IT SENSIBLY-DON'T DISCARD IT IN ORDER TO BRING IN TRASH!
Doc,AF2Y>>>>>>>

Listen guys,if any of you READ and I don't mean comic books, for about ten bucks(that's what I paid in Sept.'98) buy the soft cover edition of GONE WITH THE WIND by Margaret Mitchell. Or if you're cheap, take it out of your library after you've taken a shower.I've read at least 1000 books in my life, some straight novels, some historical novels, some fact etc,. and that book was the greatest thing I ever read. It made the outstanding movie look sick! You'll learn about and APPRECIATE the South from right before the War Between the States to Reconstruction. You will see the transformation of the very young and demure Scarlett O'Hara of Tara turn, by virtue of war, into a scheming vicious bitch who'd do anything for survival. To prepare for this book, check out all the facts abiout the flick by clicking on to this<A HREF="http://www.imdb.com/">The Internet Movie Database. A database of more&#65533;</A> and typing in GONE WITH THE WIND. I kid around about the South-a lot of us do-but to understand the great tradition and strength of the people, both white and black, read it. It's 1050 pages and makes for GREAT SUMMER READING. Do yourself a favor by getting off this USENET and reading it. I of course can stay here because I read everything, know everything and have become a blessing to you. Margaret Mitchell took TEN YEARS to write it. Imagine-ONE DECADE. Her prose is eloquent. Her descriptions breathtaking. Never have I read anything as descriptive as her narrating the burning of Atlanta by that northern butcher Gen.Sherman who should burn in hell. GET THE BOOK. Doc,AF2Y

Monthly Morse QTCs as Audio Files
==========

Starting with QTC No 10 e.g. the one of Sunday, March 20, 1999, the
Deutscher Telegrafie Club announces that its regular monthly QTCs are
available in audio format (MIDI-type) at our web site
http://www.muenster.org/dtc/eindex.html in three different speeds: 12 WPM,
20 WPM and 30 WPM. As unfortunately not all browsers can handle these files
online, we did take care of that and offer these files as a ZIP archive for
individual downloads as well.

We do welcome any comments about this new feature in our guest book !

208. Any Good Sources for Reviews on NEW model HT's?

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-03 00:00:00 UTC
From: Paul
Message-ID: <3756e8c9.65005377@news.mindspring.com>
Source record: 140746
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

Hi Everyone,

With any luck I will soon obtain enough money to purchase a new HT. I am now considering the Yaesu VX-5r (favoriite at the moment), the ICOM IC-T81A, the Kenwood TH-D7A, or perhaps the Alinco DJ-G5T, or the DJ-V5T. I would really like to read some straightforward, not-too-technical reviews on these models, is there a website or current mag that would have any info. on these? If you personally have any specific info/opinions to share, then by all means, please do. Money does not come easily to me, and I would like to do a little research before shelling out $300-$400 on some equipment. Thanks in advance!

Paul

Just for the record. The infamous Dr Hate AF2Y, who has claimed he "INVENTED" the CLOUDWARMER antenna, Of course he did not. It has been around for years and years. He forgets to tell you that the reports he used to get were with an old SWAN transceiver. The output from this creakey contraption was about nil. He also fails to tell you he raised his power to about one thousand watts with a cheaper bottom of the line amp. , and started using a older newer?
Drake tube transceiver, just for the record. This guy has deep problems. If he is so eager to spread the word about his"INVENTION" why does he want stamped self addressed envelopes, El Cheapo

As regards copyrights, you are correct. However, to purposely misinterpret his words or thoughts, against his wishes, is something else altogether.

The two questions "do you think Morse testing is desirable" and "have you ever wished you didn't need to study Morse" are entirely different questions. For me, the answer to both is yes.

Michael.

This is just a short notice to inform everyone who may be interested that there is still space left for the Internet Space Weather and Radio Propagation Forecasting Course, which will commence on 28 June 1999. This will be one of the only classes held this summer. The next date probably won't be until September or October.

The Internet Space Weather and Radio Propagation Forecasting Course is one of the most extensive Internet classes available to teach individuals how to predict space weather and radio propagation conditions. It includes professional PC software tools that can be used by students to gain valuable hands-on experience and to reinforce the topics discussed in the curriculum. An extensive subject index, software reference and class description is available at:

http://solar.uleth.ca/www/course.html

Enrollment information can be found at:
http://solar.uleth.ca/www/enroll.html

Questions or comments should be directed to: COler@Solar.Stanford.Edu.

Doc, your knowledge of U.S. history is as contorted as your support of
the Hollingsworth Initiative to Restrict Speech and your support of
WB2OTK, who confuses liberty with license.

Lincoln believed blacks and whites must be separated, and established
Liberia with this goal in mind. Slavery was not the primary issue of the
Civil War either. The War began as a fight over states' rights.

I will not respond to further posts in this thread, as I hold a PhD in
American History, and your stupidity isn't worth carpal tunnel syndrome.
<<<Your PhD stands for poor hungry dreck.Doc,AF2Y>>>>>>>

Spare us your Northeastern public school brainwashing posts.

You can read the review of the VX-5R from the May QST on the ARRL's Web site (http://www.arrl.org) but you have to be a member to get to it. It's also possible that your local Ham store may still have a copy of the May issue on the shelves.

In an earlier post there was information about the mailing lists for the VX-5R and the TR-81A. I've since subscribed to both lists. The information on onelist, where the lists are based, is impressive for the VX-5R, much more limited for the Icom. Haven't seen a lot for the others.

Well, you did. You said that this NG was for regulatory discussions, which is untrue. We created r.r.a.policy for those. You're apparently too fearful to take your one-way dialog to the proper group.

224. SLAMMIN SCAMMIN' SCHOENBOHM

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-03 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990603194825.00632.00000212@ng-cd1.aol.com>
Source record: 140762

On June 4th, the Dreckmeister KV4FZ with probably his wife or a facsimile thereof,will be leaving (auf Urlaub) on a vacation to the Fatherland,Germany,ugh! Now this is in itself is a miracle when taking into consideration a few pertinent facts about Schoenbohm the con-artist,felon,liar and other assorted negative adjectives. Why you ask? Because on Oct.17,1997, this bum filed voluntary petition #197-0027 for BANKRUPTCY IN U.S. BANKRUPTCY COURT at 5500 Veterans Drive,Suite 351,St.Thomas,USVI 00802-6424. That's right folks,Herbie did his best to weasel his way out of paying a LOT of bread to a lot of people.
Did it work? No,the court ruled otherwise. He wasn't bankrupt but tried like hell to convince everyone he was. Now let's look at the figures.You remember at his sentencing he was fined $5000 for being a very bad boy?That money was due under account number 484364340 to the U.S.Dept. of Justice,P.O.Box 100573,Atlanta, GA 30384. It was supposed to be paid by the time his probation ended. Was it? I REALLY doubt it but one can check it out easily enough. Now let's take Herbie's legal fees. On 10/17/97, he owed the law firm of Jacobs and Brady,7 Church Street,Christiansted,VI 00820, $17,154. Was it paid? HA! On that same date he owed the law firm of Bryant,White and Barnes,47 Kim Street,Christiansted,VI 00820, $9,942.26. Was it paid? HA! On that date he owed his present lawyer, Lauren Colby,10 East Street,Frederick,MD, $11,536.63. Was that paid? HA HA HA! Now keep in mind that since THAT time, Colby has done a ton of additional work for the access excess thief so who really knows how much Herbie owes him? And so, as of that date in '97, counting up those four creditors, KV4FZ owed $43,632,89. And he has the money to go to Europe? Wait, that's the tip of the iceberg. On that date he owed the Small Business Administration in Denver, $17,523.39. Add to this $4956.87 owed two American Express accounts and we're moving up, folks. And how about back taxes owed to the Virgin Island Government? Insufficient payments to that institution was costing Herbie on 10/17/97, $13,518.34. And he can afford to go to Europe? To quote one of the thief's top henchman, the brilliant Queenie Mort,K3QAM, "There's sumpin wrong wit dat pitcher,heh..heh..heh..heh.." Can't understand how Herbie can con his way overseas. Even if he's staying with Joerg Schoenbohm, a member of Berlin's senate, it's still gotta cost the bum. His airfare is low thanks to his wife Monika Lisa(no relation to Mona Lisa) who's employed by an airline. Thank God for that or Herbie would have to row over the Atlantic. Goes to show you something. If you're a good liar, a good talker, a convincer-if you can eek out some bucks from the wallets of your ignorant believers, you too can live well "buckless." Oh well, have a good time Herbie because when you get home, the debts will keep piling up as Colby's day in court fast approaches. In case you haven't heard, Colby will present anal..oops..oral arguments in D.C. Appellate Court on Oct.18,1999. He thinks he's going to overturn the FCC's decision to dump Herbie for good.As I wrote before, HA HA HA HA! And what's really ludicrous is that despite all the damning evidence, KT4TR, Queenie the Weenie, Lloyd the Toid from Highanus, MA

and a few other HERBUMS, have the audacity to mention a check gone awry from Rich Whiten that had never been followed up on in the same vein as the overwhelming miscarriage of justice perpetrated by the gigantic fraud from Saint Croix. I've heard of trying to obfuscate the guilt of someone but you BARF bums had better come up with a better way. AF2Y, Doc

Hi all
I have a Electron Tube for sale.
Model: GL-51064
General Electric
New in box
QTY : 4 box.
If you have any interest make an offer.
Give me a call at 714-778-5151 or e-mail me.
Thanks.

> code debate in Amateur Radio.

I thought I had seen everything on the front page of my WSJ
with my morning tea and Bloomberg News on the teevee in
the background. This one really took the morning muffin however.
At worst Ham Radio got publicity to the degree that quite a
few chuckles were enjoyed by telecommunications businessmen
reading the article, suprised and amused that people are actually
using backwards obsolete morse code to communicate in 1999.
I am sure some now see ham radio like if seeing a blue-haired
old lady tooling down the interstate at 45MPH in a 25 year old
Chevy. At best, some may see it as a wake up call to drop code
so that yet more MEGABUCKS value RF spectrum does not go to
digital cellphones, wireless internet and new technologies.
After all, why should a bunch of WASP's who like to talk
trash on 75 meters SSB be granted spectrum in the 144 and 440
Mhz spectrum, that can support services worth BILLIONS in
revenue to telecommunications providers. (Think about it)

Source record: 140768

I'm trying to find an old friend who's a truck driver, I've lost contact with him, but I need to talk to him urgently about something
very important, he's name is Victor Sanchez, he's original from Colombia, 38 years old, about 5 or 6 feet tall and around 160 pounds
of weight, he's Hispanic.
Is there anyway that someone here could send a message using a radio with the same frequency or whatever the truck drivers use to help me find this guy?
The last time I heard from him, he was living in Texas, I believe somewhere around Galveston, but I'm not sure. It could be anywhere on Texas. His personal car is a 92,93 or 94
Geo Storm, light blue color, hatchback type. The only thing I have left are some pictures that I can e-mail on request, in two of them he's standing up right next to a black Kenworth truck, with the name MC Van Kampen Trucking Inc. on it, and truck number 559, Michigan license plate RM 2957. If you know Victor, please e-mail me with information on how to get back in touch with him, my e-mail is as follows: aplaza@superlink.net
Your cooperation regarding this matter is greatly appreciated, it is really important that I find him as soon as possible.
Thanks,
A. Plaza
aplaza@superlink.net

FOR IMMEDIATE RELEASE June 1, 1999

SPACE BLOBS CREATE SUPER-SPEEDY, BACKWARD AURORAS

Blobs of electrified particles spew violently from the Sun, zoom at "warp speed" toward Earth's magnetic field, and trigger an unusual form of aurora, scientists have discovered using an ultraviolet camera on NASA's Polar spacecraft.

These electrified blobs, called coronal mass ejections, travel at more than 1.5 million miles per hour, or 2,000 times the speed of sound, and create interplanetary shock waves that "ram into" Earth's magnetic field. This is roughly comparable to the way a supersonic aircraft breaks the sound barrier and creates a shock wave that we hear as a sonic boom. With the aurora, the effect of the interplanetary shock wave is not heard, but instead is seen as a multi-colored display by Polar.

The more common type of Earth aurora is formed through a process that begins when the magnetic fields that extend from Earth's Poles are dragged away from the Sun and Earth by the solar wind. When these magnetic fields collide, they annihilate each other and ultimately create a hot, electrified gas that produces an eerie, colorful display near midnight at high and low latitude locations such as Alaska and Antarctica. We call those displays the northern and southern lights.

These newly discovered auroras appear in those same latitude regions -- but unlike the better known auroras, they appear at high noon, when they would usually be obscured by the Sun. That would explain why no one on Earth has reported seeing them yet. In addition, these dayside auroras move much, much faster and in

the opposite direction from ordinary auroras.

"This sheds new light on the way the Sun's tumultuous activities affect us here on Earth," said Dr. Bruce Tsurutani of NASA's Jet Propulsion Laboratory, co-investigator for the Polar camera. "Since this type of aurora has not been seen by earthlings, it's a prime example of a robotic spacecraft finding things we'd never know about otherwise."

"Originally NASA's Wind spacecraft was used to find interplanetary shocks," said Dr. Xiaoyan Zhou, a National Research Council resident research associate who is also on the Polar science team. "We wanted to find out what effect these shocks have on Earth. We were surprised to discover that they caused these unusual, fast-moving auroras." Polar's instruments confirmed their existence with a dozen sightings. These latest aurora findings were based on data gathered during the past two years.

Now that scientists are aware of the new form of auroras, they hope professional and amateur Earth observers will look for the phenomenon at certain locations like Spitzbergen, Norway in the winter, when the skies are dark at noon. "We're anxious to know what these new auroras look like when seen from Earth," Tsurutani said.

More will be learned about these space blobs, or coronal mass ejections, when NASA's planned Solar Probe spacecraft flies closer to the Sun's sizzling surface than any previous spacecraft. Solar Probe will launch in 2007 and will approach to a distance of only 1-1/2 times the Sun's diameter in 2010, surviving temperatures above 3,700 degrees Fahrenheit.

"I can hardly wait to see close-up pictures of a coronal mass ejection when the spacecraft flies through one as it's being formed," said Tsurutani, who also serves as Solar Probe project scientist.

The Polar and Wind missions are managed by Goddard Space Flight Center, Greenbelt, MD, for NASA's Office of Space Science, Washington, DC. The two spacecraft are part of the International Solar-Terrestrial Physics program. Solar Probe is managed by JPL as part of the Outer Planets/Solar Probe project. JPL is a division of the California Institute of Technology, Pasadena, CA.

It's Digi-Key; as someone recently pointed out the name comes from
digital keyer (as in Morse). The guy who started the company started out
building a digital keyer almost thirty years ago, and then it later
morphed into a parts supplier for hobbyists, and alter a bigger name
distributor. The history is on the website, which if I recall correctly
is http://www.digikey.com Someone pointed out the other day in one of the
sci.electronics.* newsgroup that there's a Canadian catalog, and Canadian
orders are shipped from a Toronto warehouse.

Hey Doc,

You made the best use of the training materials that were available to you at the time you learned the code. We have computers and other tools now that make CW training faster and easier, getting people on the air sooner with better starting skills. I agree with you that it is vital to *just do it* get going and study that code. But there is npo reason to not use new techniques and equipment to make that process work better. I don't think any of the "CODE FREE TECH MORONS" are listening, just us soon-to-be CODED GENERAL OR HIGHER GENIUSES.

Er, help me out here - Linux is an "advance in technology"? Why, because the press has finally picked up on it? Unix for X86 machines has been around long before Linus Torvald (sp?) found a repulsively "cute" mascot, and all anti-WINTEL fanatics jumped on board. Whoopee, now I can buy LINUX at Sams Club instead of downloading it for free - that's an "advance in technology"?

I can find a load of UNIX based amateur radio programs with a quick internet search - I think you're blowing smoke, OM.

Since you mention it, Hans, let me also say
that I absolutely do NOT give my permission for NCI
to use anything posted by me for any reason, including
being counted as "supporting" their positions.

I support sensible, logical reform-
not a bunch of name-callers.

I Have to agree, 5wpm is a suitable and the written exams should be harder. The test should include more electronics theory such as Transistor biasing, Calculating amplifier gain, and logic circuits.

Now I think it's time to call for peace again, I think the "Code Wars" should end and the CW hatchet buried once and for all.
I will be first to offer the olive branch by pledging to no longer Break Balls (even K3LT's) and only input my opinion on the subject of CW testing. I will no longer go after any particular ham because of there opinion, even if they flame me.

Thats all for now 73 Rick KC2ESD

> your entire evaluation.

Speaking of liars ... Hans, you were told, in response to
your "How was my commment 'binned' into your 3 'bins,' or
was it simply ignored?" question that your comment was
'binned' in the "Supports no more than a 5 wpm maximum
Morse test" bin ... We NEVER told the FCC that you "support
NCI" ... we told them that that 43% of the comments supported
NO MORE THAN A 5 WPM MORSE TEST FOR FULL HF ACCESS.

That was an accurate characterization of your commment
WRT the code speed recommendation made therein, despite
the fact that your proposal was a bit "different" than
most as far as license classes went.

As you were told, there was EVERY effort made to accurately
reflect your views WRT what Morse testing speed should be
required and that even if your (unique) comment HAD been
simply discounted as "not fitting," the change in the resulting
percentages computed would have been FAR less than 1 percentage
point. Thus, it is TOTALLY dishonest of you to imply that
there was some attempt to "cook the books" ... NCI focused on
the Morse issue and your comments WRT Morse testing were
accurately reflected.

It's abundantly clear that you began a vendetta against NCI
when the BoD refused to "affiliate" with your "club" because
you refused to provide ANY information on its membership and
their views on the code/no-code issue, which pertain directly
to one's qualification for membership in NCI according to NCI's
bylaws.

I had a very strong suspicion at the time that you were seeking
"membership" solely in order to "have a foot in the door" for
the purpose of painting yourself as "an unhappy, dissident

'member of NCI'." In retrospect, it's perfectly obvious that my instincts were right on the mark.

> Just another case of figures don't lie, but liars figure.

NO, just another case of someone "making much to do about nothing" in an ongoing series of attempts to discredit/slander NCI by any means possible, no matter how inaccurate or dishonest those attacks may be.

Message-ID: <Yuv53.1501$M3.68682@news3.ispnews.com>
Source record: 140864

Hello Will:

Im sure the FCC monitors USENET. USENET is considered Public Domain and any criminal or illegal activity on USENET submitted by a poster can be used as evidence against him or her in a court of law.

Do you remember that CBer that was killed by a letter bomb last year in New Hampshire? The descendent was supposedly posting items for sale on the CB newsgroup, of which he never delivered said items after receiving payment. The authorities used all of the USENET postings to identify who all of the possible defendant were. All of the postings were then traced back to their origins to determine who the authors were and where they were located. Tracing a posting is not a very difficult task, considering every posting has to go through an "identifying router". Many people think that because they use free services such as Hotmail, Deja-news or Yahoo that their true identity cannot be determined. This is hardly the case.

Id be pretty disappointed in the FCC if they didn't "keep their finger on the pulse of the hobby" by occasionally scrolling through all of the amateur radio related newsgroups.

Amateur Morse Debate Makes Page 1 of Wall Street Journal

NEW YORK, NY, Jun 3, 1999--Hams checking the prestigious Wall Street Journal for the latest business news and stock quotes yesterday also found some Amateur Radio news--smack in the middle of page 1. A story by Staff Reporter Lee Gomes headlined "TO HAM OPERATORS, MORSE CODE TEST IS LIKE LATIN EXAM; Does It Keep the Barbarians At Bay, or Is It Fueling The Decline of a Culture?" discusses the current code versus no-code debate in Amateur Radio.

"Morse Code is a dying language in the Digital Age, but it's still required reading for amateur radio buffs," Gomes' story begins. His report outlines the broad strokes of the controversy and the impending FCC streamlining that is expected to address future Morse code requirements for amateurs. It also quotes the FCC's Bill Cross, W3TN, as "the FCC's lead staff person on the question," and reports that the FCC "is contemplating relaxing the Morse Code requirement."

Gomes cites Bruce Perens, K6BP, of No Code International, who--in Gomes words--considers Morse code "an antiquated technology" and "a turnoff for young people." "Perens is in the minority," Gomes asserts. "Most licensees don't want any change in the requirement--especially since they have already passed the test themselves.

Taking the opposite viewpoint in Gomes' article is Nancy Kott, WZ8C, of FISTS, which Gomes describes as a "militant pro-Morse group." Gomes says Kott "all but accuses the no-coders of taking bribes from ham

radio makers" and claims
they want the code requirements dropped to attract
more hams and sell more
equipment.

Gomes reports that FISTS members fear a lot of bad,
on-air behavior "without the
screening provided by the Morse Code requirement."
Perens, Gomes says, is not
concerned about a "post-Morse ham world inhabited by
barbarians." Perens points
out for the article that applicants still will have
to pass "rigorous tests" to get a
ticket. Besides, Gomes quotes Perens as saying, "The
riffraff have no reason to
leave the Internet."

The article does contain a few gaffes. At one point,
it refers to Morse code as "dits
and "duhs." It also incorrectly equates today's
International "radio" code with the
original Morse code devised by Morse and Vail some
155 years ago.

Gomes further suggests that all of the 2250 comments
the FCC has received in
response its Amateur Radio "streamlining" or
Biennial Review rulemaking
proposal came from hams concerned about changes to
the Morse code
requirements.

The complete article is available via the Web for a
fee to registered users of the
Wall Street Journal's interactive page, http://
www.wsj.com.

263. ARRL Budget Cuts Sham ! Lobby Remodelling Underway

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-03 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <7j65uihjn1@nnrp1.deja.com>
Source record: 140866
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc,rec.radio.amateur.equipment

After inheriting 800,000 dollars from an estate last year, ARRL has decided to hide its past (antique gear from the lobby) to show that it never had anything to do with CW whatsoever.

The lobby, currently being remodeled comes amid blatant lies such as the need to raise QSL bureau rates for postage and cut W1AW code and operating hours.

The sham ? ARRL continues to hire contester friends of K1ZZ, three in the past year, through unadvertised job openings. Business isn't too bad if they could give Mr. Bee, et al, second careers in Oldington.

More spin from one of the most corrupt NPO's since the Red Cross and United Way scandals of the 90's..

June 4, 1999
Target: rec.radio.amateur.misc

Welcome to the W8MMQ Wire, for June 4, 1999! This newsletter is distributed weekly by W8MMQ and the Radio Society of Central Michigan, and is available free to all radio amateurs.

If you would like to receive this newsletter via email, or would like to be removed from our mailing list, contact Dan/W8MMQ at w8mmq@voyager.net. Your email will be answered as soon as possible.

In this issue: Hurricane Watch Net Prepares for 99 Season; Delaware Ham Retakes Exam; UK Amateur Radio Licensing Change; upcoming amateur radio contests; and much more!

HURRICANE WATCH NET PREPARES FOR 99 SEASON
The National Hurricane Center in Miami, Florida, is inviting amateurs to participate in a communication preparedness exercise this coming weekend to kick off the 1999 hurricane season.

Amateurs are asked to check into the Hurricane Watch Net on 14.325 MHz on Saturday, June 5, 1999, 1800-2000 UTC. Stations are requested to provide a real-time report of their current weather conditions, including wind speed, wind direction, and barometric pressure. Measured conditions are preferred, but estimated wind speeds are acceptable.

These reports will be forwarded to W4EHW at the National Hurricane Center. W4EHW will be on frequency. Stations do not need to continue monitoring the net once their reports have been forwarded to the National Hurricane Center.

The manager of the Hurricane Watch Net Manager is Jerry Herman, N3BDW.

--- Taken from the W1AW Bulletin, 6/2/99

DELAWARE HAM RETAKES EXAM
Back in February, the FCC called upon Sheila Bowden, N3QQS, of Millsboro, Delaware, to retake her amateur Extra class exam. The Commission told Bowden that she had until March 19 to do so.

The ARRL is now reporting that Bowden showed up on March 13, and successfully passed the test, and that the Commission accepted a doctor's notice, exempting her from the Morse code requirements.

Although she has regained her extra class license, at this time Bowden cannot be allowed to administer amateur examinations, primarily because of questions regarding her husband's license. Earlier this year, the FCC dismissed Wayne Bowden's extra class license, AA3RT, after it

discovered "irregularities" in the administration of the exam to Mr. Bowden.

--- W8MMQ/KC8KFZ

UK AMATEUR RADIO LICENSING CHANGE
The following news release was issued from the Radio Society of Great Britain, and the UK's Radiocommunication Agency (RA) on May 21, 1999.

UK Amateur Radio Licensing is about to undergo the most exciting changes seen since the introduction of the Novice Licence in 1991. Two major initiatives will allow greater access to the full range of facilities that Amateur Radio has to offer, and broaden the appeal of the hobby to a wider audience. More amateurs will have the opportunity to experience worldwide communications, and newcomers to the hobby will find it possible to make contacts on a wider range of frequencies.

These substantial improvements stem from discussions between the Radio Society of Great Britain and the Radiocommunications Agency, following consultation with the Amateur Radio community carried out by both organisations.

A new class of licence, to be known as the A/B licence, and which will use the callsign series M5xxx, is to be introduced in the early autumn. This will provide access to all amateur bands, on passing the Radio Amateurs Examination and a 5 words per minute Morse test. 100 Watts PEP output will be allowed on the bands below 30MHz (the HF bands); and 400 Watts PEP output above.

The Novice A and Novice B licences will be enhanced in the summer to allow a higher transmitted power than at present. The power output will go up to 10 Watts PEP. New frequencies will include the 144MHz band, an SSB allocation on 3.5MHz and the extension of the existing Novice HF allocation to include the QRP CW calling frequencies.

It is expected that the World Radio Conference to be held in 2002 or 2003 will agree to the removal of mandatory Morse testing for access to frequencies below 30MHz. Following that decision, the existing licence structure will be replaced with an incentive-based system. In the meantime, discussions are under way to ensure that Morse and data sub-bands are safeguarded by incorporating them into licence schedules.

In summary, the improvements are:

Access to the HF bands with a lower Morse test speed; the Class A/B licence to provide access to all HF bands at the 100 Watt PEP level; higher output power on all Novice bands; wider allocations on existing Novice bands; access to 144MHz for Novice licensees; safeguards for Morse and data sub-bands; in the longer term, the introduction of an incentive-based licensing system.

The RSGB and the RA are hopeful that these initiatives will provide a more attractive path into Amateur Radio, at the same time as increasing

the facilities available to existing radio amateurs. These measures, together with the new licence structure, which will be put into place after a future WRC, will provide a healthy future for Amateur Radio well into the 21st century.

SEARCH FOR ET AT HOME
SETI@home is a scientific experiment that attempts to harness the power of hundreds of thousands of Internet-connected computers in the Search for Extraterrestrial Intelligence (SETI).

Anyone can participate in this experiment by running a computer program that downloads and analyzes radio telescope data captured by scientists and sends results back to the SETI Institute. By sharing the processing work among hundreds of thousands of small computers, vast quantities of information can be processed without the need for expensive supercomputers. Over 350,000 people are participating in this experiment thus far, and this number is expected to grow rapidly.
Since the analysis performed by the SETI@home software operates during a computer's "idle time", it does not interfere with normal computer operations.

Versions of the SETI@home software are available for many popular operating systems such as Unix (including Linux, SCO, and the various BSDs), Macintosh, BeOS, and Windoze (95/98/NT).

Sponsors and technology partners of SETI@home include The Planetary Society, The University of California Digital Media Innovation Program, Paramount Pictures, Sun Microsystems, Fuji Film Computer Products, Informix, Engineering Design Team, The Santa Cruz Operation (SCO), Quantum Corporation, and The SETI Institute. SETI@home is also supported by private donations, and is based at the University of California at Berkeley.

Further information is available at the SETI@home web page at: http://setiathome.ssl.berkeley.edu/.

NEW MICHIGAN REPEATER DIRECTORY WEB SITE
Last week we made a note about a new feature at the Michigan Area Repeater Council (MIARC) web site. The site now has a comprehensive repeater directory for the state of Michigan.

We mentioned that the MIARC handled the coordination of amateur repeaters in the state of Michigan. We have now been informed that the MIARC only handles the coordination of repeaters in the lower peninsula of Michigan, not the upper; in other words, they do not handle coordination for the entire state.

You can visit their site at http://www.qsl.net/miarc/. Click on the Repeater Directory section.

--- W8MMQ/KC8KFZ

UPCOMING CONTESTS AND EVENTS
For the latest amateur radio contest information, visit the ARRL's Contest Calendar, at http://www.arrl.org/contests/. Also, for the latest information on upcoming events and hamfests, visit the ARRL's Hamfest Calendar, at http://www.arrl.org/hamfests.html.

The QRP TACtical Contest, sponsored by QRP Society of Central Pennsylvania and the EPA QRP Club, will run from 1800 to 2400-Z on June 5. Operate CW only, QRP, on 160, 80, 40, 20, 15, and 10 meters.

Also, it's June, and that means Field Day is just around the corner! This year Field Day will be held on June 26 and 27. Be sure to visit http://www.arrl.org/contests/announcements/99/rules-fd.html for complete information.

DX REPORT
From the Marquesas Islands, FO0CLA is now active on Nuka Hiva. This counts as OC-027 for the RSGB Islands on the Air Awards Programme.

From Aland Island, OH0/K7BV will be operational until the 4th of June, using CW on all bands, including WARC and RS-12 satellite, and possibly six metres. This counts as EU-002 for IOTA.

From the Dodecanese islands, SV2/SM7DAY will be on the air until the 18th of June from Kalymnos. This counts as EU-001 for IOTA.

And from Namibia, V5/HB9QQ will be active until the 6th of June.

Information contained in the weekly DX Report is taken from the Radio Society of Great Britain. Visit the RSGB web site, http://www.rsgb.org/, for more information.

AND ... IN CLOSING
Thank you for reading this issue of the W8MMQ Wire. We hope that you have enjoyed it, and please, feel free to pass it along to others.

To read the W8MMQ Wire online, visit http://my.voyager.net/w8mmq/. An archive of past newsletters is available from the web site.

Also, visit the W8MMQ/KC8KFZ Antique Radio Page, at http://my.voyager.net/kc8kfz/. You will find a nice collection of links to antique radio organizations and radio galleries.

Information from the following sources was used in the production of this newsletter: the ARRL Letter, the RSGB web site, the SpaceNews Newsletter, and other published reports.

cut the lengths to be resonant on frequency, the droop wont change the
impedance that much, I think an inverted vee is still very close to 70
ohms. the pattern of the antenna will probably be a little less
directional than a horizontal dipole, height affecting it also. It will
probably work just great.
I have an inverted vee multiband and it works well on all bands, and on
10 meters, but I use a vertical dipole as it works better on 10 meters.
I have made the vertical dipole from copper pipe, and 11 meter quarter
waves back to back, cut to match, both work well.

Hello,

I possess the interfacing for programmed the Motorola GM 300 and the program that go with.

The problem is himself that the software of want not to descend below 438 Mhzs!!!

How to make to can programs the TX on the HAM band.

That is necessary to you him to modify and how on the file gm300.mdf?

Would someone already have programmed this kind of station on strips hams?, and was one able to give me the file gm300 solely.mdf her would be cool.... :)) I am not very good in the HEX .

The ARRL and the FCC need your help.

Starting next week, The ARRL will send out a mass mailing to all Hams with small children (as indicated on thier membership records) This will infom them of a new camapaign called "Removing Hate from Amatuer Radio" This mailing will focus on two hams, Doc, AF2Y and Richard "AKA PORKBUTT" WB2OTK. This will inform parents about these two and will also send tape recordings of them two.

A website will be setup in the following month to keep track of these two.

In other news,
Mr. Hollingsworth is about to go public on some information leading up to LICENSE REVOCATION of these two felons, AF2Y and WB2OTK!

Enjoy,

Bill

Holocaust Timeline

1933 to 1938

1933

January 30 Hitler becomes chancellor of Germany
February 27 Reichstag fire
February 28 Series of emergency decrees declared in Germany - government
suspends many civil rights including freedom of press, speech, and assembly
March 20 Dachau established (originally a concentration camp for
opponents of the Nazis)
March 24 Enabling Act passed
April 1 Government organized boycott on Jewish stores (Germany)
April 7 Minister of the Interior (Germany) issued law of civil
servants;
Quotas on number of Jewish students allowed in higher education (Germany)
April 26 Formation of the Gestapo (Geheime Staatspolizei)
May 10 Book burnings
June Hitler outlaws all political parties other than the Nazi Party
July 14 Decree declares the Nazi Party to be the sole political party
within Germany
August 25 The Haavara agreement signed
September Jews removed from various fields of entertainment including
music, art, and literature

1934

January 26 Germany and Poland sign a ten year non-aggression pact
June 30 The "Night of Long Knives" - the SS purge the SA under Hitler's
orders
August 2 Paul von Hindenberg dies
August 3 Hitler assumes powers of both President and Chancellor

1935

January 13 Germany retakes the Saarland
September 15 Nuremberg Laws passed

1936

March 7 Germany forces enter the Rhineland
August 1 The Olympic Games begin in Nazi Germany
October 25 The Rome-Berlin Axis agreement signed

1937

July 16 Buchenwald camp opens
November 25 Germany and Japan sign pact
December 14 Decree states that Gypsies are "inveterate criminals"

1938

March 13 Annexation of Austria (Anschluss)
March 23 Jewish community organizations are no longer recognized by the government (Germany)
April 24 Jews must register their property (Germany)
April 26 Jewish property expropriated (Austria)
May 29 Jewish role in economy restricted to 20 percent - first anti-Jewish law in Hungary
June 25 Jewish physicians only allowed to treat Jewish patients (Germany)
July 5-15 Evian Conference - 32 countries met to discuss the refugee and immigration problem
July 21 Introduction of identity cards (effective January 1, 1939)
August 17 Jews are required to add "Israel" to their name for men and "Sarah" for women (Germany)
August 26 The Zentralstelle fi¿½r Ji¿½dische Auswanderung (Central Office for Jewish Emigration) is set up in Vienna under Adolf Eichmann
September 27 Jews barred from practicing law (Germany)
September 29 Munich Conference
October 5 Jewish passports are marked with the letter "J" for "Jude"
November 7 Hershel Grynszpan assassinates Ernst vom Rath
November 9-10 Kristallnacht (Germany & Austria)
November 15 Jewish children expelled from German schools

293. Re: Dayton Hamvention - Where Was Everybody???

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-04 00:00:00 UTC
From: Bill Newkirk <wnewkirk@iu.net>
Message-ID: <928519835.395.71@news.remarQ.com>
Source record: 140689

In-duh-vidual spotted!

Most classic hamfests are fund raisers for the sponsoring organization.

The DARA organization runs the show to make the bucks.

The problem is that the cost of running the show can easily run up and the cost of starting the next show can take most of the "profits" from the previous show (this is something that got guys like Jim Bakker in trouble because he didn't realize that something like 90%+ of the contributions to his organizations were being eaten up in the overhead of getting the solicitations out over the TV...)

It could be argued that as long as there is a big line waiting to get in, that the price isn't high enough yet.

For example, I have a pass issued by Disney back when EPCOT was new that was 3 days for $10 and that included transportation access to and between the parks.

Today, i believe it's up to about $50/person to get into any of the O'do parks (Disney, Universal, Sea World) if you just walk up to the gate.

So maybe the prices need to run up another 5 to 10 percent for next year. It's possible to make more money on less sales (and incuring the cost of getting them...). An example of that is the banks that are trying to set up systems that will route calls from high cost/low profit customers to automated services instead of tying up a customer service agent (who's probably costing $25/hour with overhead) to look up balances. In certain cases, the banks don't care if the nuisance customers leave. They weren't making money on them anyway.

Would Dayton lose more than they'd make if the price was $30/ticket? $40/ticket? $50/ticket? and then added some minor feature (get a Coca-cola sponsored free drinks for everyone! booth...) to add value to the exchange?

294. the RISE of the CLOUDWARMER

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-04 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990604141546.29278.00000481@ng-fl1.aol.com>
Source record: 140690

Gentlemen....I'm being swamped with requests for online CLOUDWARMER info. My answer? NO! I have a sheet with all the info. It's 8 x 11 inches. I'm paying to have it copied. If you're too damn cheap to send me an S.A.S.E.then continue using your garbage antennas while I scoop up the DX. Hams must be the cheapest cruds in the world. However there was one fine gentleman from Canada who asked me about onlining it and for him, something else must happen. I don't want to go into details because frankly, you YANKEE TURDS,it's none of your business. It's between me and Canada, thank you. I can't stand all these stupid Americans hounding me...only kidding...that's what Erik Fog,HK3IGH used to say about Americans who JAMMED , never about us great Americans as a whole since we rule the world with our greenbacks while our frequencies will be usurped by Banana Republics if Riley doesn't end the nonsense, NOW! So this is your last chance chumps to get the lowdown on the Cloudwarmer. You'll work more than you hear right now! You too will become as world famous as I. No longer must you wait for band openings--you'll OPEN THEM. If you think I'm blowing smoke, listen for me on 14.313 or 14.300 depending on where KV4FZ pushes Intercon. I'm not on a whole lot but to hear me means you'll never forget me or that booming signal. Modest Doc, AF2Y

I am in need of some information on reprograming the Maxon TP-4800 walkie talkie. I have some Maxon software but not that model. Could also use the external mike connector (I assume that it is where the programing is connected) and perhaps a manual. If anybody can help me I will pay any normal costs and/or trade some info or software. Please contact me by email. Thanks Don KB6GQA

301. Standard HX581 Programming Info and Conn needed.

Brian,
That's what I USED to want, and that's all I probably need, but dammit they just keep coming out with somthing a little smaller, or with more features, and I find myself getting convinced that I've got to have one. Believe me though, if I already had a FT-50RD, I wouldn't be looking at these now. It seems to me that the aluminum case of the VX-5R will get/show scratches, unlike the case on the FT-50RD.
Have you modified yours any? Did you have any trouble doing so? I know that there are several different "firmware" versions out now, some being a little different than others.

Paul

Hi Joe,

Nice choice on the radio. The 50RD now comes supplied with the upgraded keypad for digital voice record and CTCSS decode. Other than that, get the appropriate SMA to BNC adapter so you can connect an external antenna (for mobile or base use). I'd also get the mini-speaker mic (either Yaesu or MFJ equiv for short money) as it is more comfortable to hold the radio for mobile/base use. I would also consider getting the power adapter cable for powering it externally (from power supply, battery, etc).

If you will be carrying it quite a bit, the external rubberized protector is a nice addition and will provide some protection for the radio.

Yaesu is rather fond of special connectors which do not fit with standard power cords, etc. I guess it is their way of ensuring a little extra business after the sale of the radio :) Still, their radios are very nice.

One problem you will likely notice with the FT50 (I've seen it on two early-model FT50s and the new RD model) is that the wide-FM reception is poor (mostly the audio is badly distorted) so things like FM stations are a pain to listen to. Also, the squelch does not clamp down as fast as some other radios such as the FT10. This means that if you are on a busy channel and turn the knob to a quiet channel, you will hear a short burst of white noise as the squelch takes its sweet time to clamp down and cut out the audio. This is especially problematic on the dual-watch function (DW) if you are listening to an active channel, you will get the annoying (but very short) burst of noise as it checks every 5 seconds for activity on the other channel. If both channels are quiet, there is no problem.

Also, the turning knob which is used for almost everything in the radio seems to occasionally "slip" where a turn does not correspond to a display change. Minor but for some reason it seems better on the FT10 models...

Still, the array of nice features for this dual-band radio outweighs the few problems I've seen.

Best of luck,

Dave Bernazzani

I've done the extended Tx mod by removing the solder blob, a very easy job if you have the equipment for desoldering very small circuits. A friend of mine modified his with an exacto knife and it works fine, but i wouldn't recommend that to anyone..... The extended transmit and receive is excellent. I use this radio for work at the Sheriff's dept on the weekends, is very reliable and talks just as good as or better than our Motorola equipment. The dual band feature is nice since our EMS service uses UHF, and the Police, EOC, and Sheriff's dept all use VHF. It's a very good performer in all aspects. My particular radio won't allow for the extended RX for cell phones, but i'm not interested in that anyway...(but i had to check, ya know!) I did get a replacement antenna with some gain to it, seems to help LOTS. I can be at an accident scene 40 miles from the repeater and still hit it reliably on this HT (even out of band, on the commercial freqs we use), which our commercial equipment won't even touch. I've also got it set to do crossband repeat with my mobile - talks to truck on low power uhf, mobile retransmits to the repeater - works great.

Quite frankly, i'd be afraid of having anything smaller than this for the fear of losing it. Our game warden used to have one of those small Motorola HT's, but after misplacing it several times and finally losing it in the field, he's got a much larger and more noticeable radio now.

Now the guys at EMS are wanting me to order some of these for them and modify for business band for use at work....seems they're impressed too...

Source record: 140717

Have you heard the latest "spin" by the "Oddfellows"? Since many have proved the death of ND8V to be a hoax, by searching Coroner records, obituaries, death notices, etc., they are now claiming that the "Oddfellows" advised the family NOT to make the death "public", because of possible harassment by KT4TR and others.

That makes no sense since making the death a public notice would STOP any inquiries into the topic! But the ironic thing about it all, YOU CANNOT HIDE A DEATH FROM THE PUBLIC!!

Sorry we can't take your word for it, "Oddfellows", since you are ALL pathological liars and have "cried wolf" on many occasions. I will contact Kalamazoo County authorities first thing Monday morning. If Mike's death IS true, I will whole-heartedly apologize and grieve along with many of you. If the county has nothing, we will have to begin discussions on WHY Mike and his buddies would create such a lavish "death wish".

Tootles,

Jack

322. 10 meter dipole with 102" whips?

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-04 00:00:00 UTC
From: Randy and Cara Randall <crrandal@seidata.com>
Message-ID: <375888A7.D6EE89A7@seidata.com>
Source record: 140718
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.homebrew,rec.radio.amateur.misc

Hello. I am trying out an idea I had for a rotate able 10
meter dipole antenna.
I bought dipole antenna mount from Jetstream model JTDAK
and thought
I would use 2 102" 1/4 wave stainless steel CB whips I had
laying around instead
of using the 1/2 fiberglass, 1/2 steel whips that Jetstream
sold to go with the mount. (Save $34.00, I'm CHEAP!)
The whips droop 2' lower on the ends than the center. Will
this electrically work? Will the impedance be
so far out and the radiation pattern so fowled up as to make
it useless to even bother to put it up? It
looks somewhat like a inverted lazy U instead of a dipole!
Inverted V's are good, how about a lazy U ?!
I will be using a 1:1 balun to feed it. Your input greatly
appreciated.

Randy KB8ASO

QUOTE
It don't cost me a dime either, . . .
END QUOTE

Correct grammatical usage is "It does not cost me a dime," or, "It doesn't cost me a dime."

If you think education is expensive, try living ignorant.

--

I used to be interested in amateur radio,

until I relized that ham radio is just for Old men.

I would rather ride a skateboard!

332. SF Bay Area Interference - can you ID it?

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-04 00:00:00 UTC
From: Curtis CCR <curtisccr@netscape.net>
Message-ID: <7j7c5q$7h$1@nnrp1.deja.com>
Source record: 140773

Not asking anyone to go track this down for me (it's not an amateur issue), but I thought I might pick the brains of Bay Area hams to determine *what* this might be.....

I have been hearing a pulsing carrier, with a "chirp" on it (for lack of a better description) in Contra Costa and parts of Alameda counties of 456.550 (nFM). This little "trouble maker" is causing problems for a licensee on that frequency.

If anyone in the area would care to tune a receiver up there and take a guess as to what it is, drop me an e-mail. I think I know "where" it is... just trying to get an idea of "what" it is.

BTW - it does not seem to be present in the evening or at night.

Nazi Conspiracy & Aggression
Individual Responsibility Of Defendants
Alfred Rosenberg
(Part 1 of 11)

[Page 593]
A. THE POLITICAL CAREER OF ROSENBERG.
I The political career of Alfred Rosenberg embraced the entire history of National Socialism and permeated nearly every phase of the conspiracy. In order to obtain a full conception of his Influence upon and participation in the conspiracy, it is necessary to review his political history and to consider each of his political activities in their relation to the thread of the conspiracy, which stretches from the inception of the party in 1919 to the defeat of Germany in 1945.
It is interesting to note that for Rosenberg 30 November 1918 marked the

"Beginning of political activities with a lecture about the 'Jewish Problem' " (2886-PS)
An official German pamphlet entitled, "Dates in the History of the NSDAP" discloses that Rosenberg was a member of the German Labor Party (afterwards the National Socialist German Workers Party) in January 1919, and that Hitler joined forces with Rosenberg and his colleagues in October of the same year (3557-PS). Thus, Rosenberg was a member of the National Socialist movement even before Hitler himself.
An extract from "Das Deutsch Fuehrer Lexikon" 1934/35 (3530- PS) completes the biographical data on Rosenberg:

"From 1921 until the present, editor of the Voelkische Beobachter; editor of the 'N.S. Monatshefte'; 1930, Reichstag deputy and representative of the foreign policy of the movement; since April 1933, leader of the foreign political office of the NSDAP; then designated as Reichsleiter; January 1934, deputized by the Fuehrer for the spiritual and philosophical education of the NSDAP, the German labor front -and all related organizations" (350-PS).
In July 1941 Rosenberg was appointed Reichsminister for the Occupied Eastern Territories. (2886-PS)
B. ROSENBERG'S PART, AS OFFICIAL NAZI IDEOLOGIST, IN PREPARING FOR THE SEIZURE OF POWER AND THE LAUNCHING OF AGGRESSIVE WAR.
Rosenberg was the official National Socialist ideologist. Through the ideological tenets which he expounded he exerted an influence upon the unification of German thought, a unification which was an essential part of the conspirator's program for seizure of power and preparation for aggressive war.
[Page 594]

Rosenberg wrote extensively on, and actively participated in, virtually every aspect of the National Socialist program. His first publication was the "Nature, Basic Principles, and Aims of the NSDAP" which appeared in 1922. Rosenberg spoke of this book in the following

"During this time (that is, during the early phase of the party) a short thesis was written, which nevertheless is significant in the history of the NSDAP. It was always being asked what points of program the NSDAP had and how they each were to be interpreted. Therefore, I wrote the principal program and aims of the NSDAP, and this writing made the first permanent connection between Munich and local organizations being organized and friends within the Reich."

Thus, the original draftsman of and spokesman for the party program was Rosenberg.

Without attempting to survey the entire ideological program advanced by Rosenberg in his various writings and speeches, certain of his statements may be considered as indicating the nature and scope of the ideological program which he championed. There was not a single basic tenet of the Nazi philosophy which was not given authoritative expression by Rosenberg.

(1) The theory of racism. Rosenberg wrote the "Myth of the Twentieth Century" published in 1930. At page 479 of this work (3553-PS), Rosenberg expressed the following views on the race question:

"The essence of the contemporary world revolution lies in the awakening of the racial types, not in Europe alone but on the whole planet. This awakening is the organic counter movement against the last chaotic remnants of liberal economic imperialism, whose object of exploitation out of desperation has fallen into the snare of Bolshevik Marxism, in order to complete what democracy had begun, the extirpation of the racial and national consciousness." (3553-PS)

(2) "Lebensraum" Rosenberg expounded the "Lebensraum" idea, which was utilized as the dynamic impulse behind Germany's waging of aggressive war. In his journal, the "National Socialist Monatshefte" for May 1932, he wrote:

"The understanding that the German nation, if it is not to perish in the truest sense of the word, needs ground and soil for itself and its future generations, and the second sober perception that this soil can no more be conquered in Africa,

[Page 595]

but in Europe and first of all in the East -- these organically determine the German foreign policy for centuries." (2777-PS)

Hmmm...Funny thing I can copy everybody who posts in this NG without asking anyone to QSY (tune, retune, detune). That is because I can read the posts in my own good time, not in real time. Future Hams will use spread spectrum modes and tune time instead of frequency to separate signals. Internet users are already doing that but much slower.

It is hard to determine the strong or the weak on the Internet but not on the ether. Therefore the Internet is a great leveler. Get my drift?

Office of Strategic Services
Hitler Source Book
The Guilt of the German Army
by Hans Ernest Fried

[Page 1]
Fried Hans Ernest: The Guilt of the German Army 1942.
German Labor Party Meeting Nov.12 1919:
...and it is certainly true that upon Adolf Hitler, who was used to the discipline and power of the Army, the meeting made absolutely no impression." Since that meeting made no impression on Adolf Hitler, why did he join the little group as "executive member"? There is no direct evidence available for the assumption that he did so in order to receive more information for the Army, or in order to influence the group in a sense agreeable to the Army, rather than from genuine interest. But such an explanation of Hitler's steps cannot be excluded.
As of January 1st, 1920, the party decided to draw up new membership lists; and in order to give the illusion of greater strength the lists "began with #500". Thus, in the new alphabetical list, Hitler received membership card #555, as an ordinary member between 554, Georg Heuring, electrician, and 556, Joseph Hoetzel, soldier. Indeed, so little was Hitler known at the time, that on this membership list his name was spelled "Hittler" ans [sic] as his profession the compiler of the list first noted "painter". Only later (as a photograph of the page shows) was the second "t" omitted and "painter" changed to "writer." As late as January 1921, the Voelkische Beobachter called a Viennese lawyer, Walter Riehl, the "Fuehrer" of the National Socialist movement of Greater Germany.
In the early stages. the Army officers gave Hitler an opportunity to exercise his genius for propaganda and oratory such as his party could never have provided. There is, for instance, the officially reported story of Colonel Hans G. Hofmann, who returned September, 1919, with his volunteer troops from a military action against Hamburg, and who, after his volunteer corps have been taken into the regular Reichswehr, went with them to the German fortress of Passau.
At this time Hitler was education officer in the first Bavarian Riflemen's Regiment. For that reason, Hofmann let him come to Passau, because Hofmann's battalion had been thrown together with a troop that left a great deal to be desired. Hitler addressed the officers and noncoms of the battalion with so much success that Hofmann, the same evening... summoned the citizens' guard so that they might hear Hitler (too). Possibly this was Hitler's first appearance in public. Thus it was an active Army officer who arranged for Hitler's debut outside the military lecture rooms to which he had hitherto been limited. The

next day, Colonel Hofmann arranged for Hitler to address an audience of high school students. No less important than these connections is the fact that they were by no means concealed by either side. These passages are contained in a eulogizing biography of Colonel Hofmann by the future National Youth Leader, Baldur von Schirach, published before Hitler rose to Chancellorship. Schirach also points out that another active officer ordered the crack troops of an infantry company to protect the first public meeting at which Hitler spoke in Munich. "The first company of the Reichswehr Infantry Regiment (?) that was led by (the officer Adolf) Huehnlein us a strong, proud, and nationalistic- minded troop. Hence it was its shock troopers who in 1919 protected the first meeting held by Adolf Hitler."

aren't they still using the "transmit only" scheme for talk-in (tape loop with repeating directions..)??

for that matter, if the directions in the adverts were complete, you shouldn't need a talk-in at all.

you really want to work on getting the general class license or higher. Tech's easy to get and with that you can get into things like satellite that can give you the DX you want. however, it's probably easier to get the HF band privileges...
Neomorpheous wrote in message ...
I'm trying to take the technician license exam on June. I'm doing this besides a hobby, also to be able to communicate with both cars in the family and the house and also among friends in Florida that has HAM radios also. I would like to know if there is a radio that will allow me to have access to the frequencies that I would be entitled once I pass the exam and if those frequencies will allow me to talk at least within a couple of hundred miles away. I'm not looking to bounce signals off the moon or anything like that, I just want to be able to use the radio to communicate for example from Orlando or Tampa to Jacksonville, and also to be able to use the repeaters so if I want to make a phone call from the radio I can. Will the VHF and UHF that a technician is authorized to use will allow me to use repeaters, talk a long distance and make phone calls. I'm planning on running 200 watts of power. Can a Galaxy radio do any of these things? The reason why I ask this, is because I like the format of the Galaxy radios, (buttons and knobs, not pushing buttons). I would really appreciate your help with this since I'm kind of new the HAM hobby and still studying for the test.!!! :)

it's a 5 WPM code test. tape runs about 5-6 minutes with one side of a typical QSO...

would go something like:

VVV VVV
NR5TX/6 DE KF4PZJ/3 R R
FB FRED BT NAME HR JERRY BT
RIG IS 75A4 AND HEATHKIT SB401 AT 42 WATTS.
RST RST IS 579 579 BT
QTH IS WAUGH WAUGH, INDIANA.
HAVE BEEN HAM FOR 15 YEARS.
ANTENNA IS BEAM AT 82 FEET.
I COLLECT ANTIQUE XMTRS.
HOW CPY, FRED?
NR5TX/6 DE KF4PZJ/3 SK AR

You now either have to have 1 minute of solid copy (that's 25 characters in a row. numbers/punctuation count as 2, spaces do not count)
or have 7 of 10 multiple choice questions correct (what most groups do today).
or have 7 of 10 fill in the blank questions correct (with letter perfect answers - what the FCC used to do years ago.)

Writing down dots and dashes isn't "copying code". the examiners expect copy that can be read by an untrained person (that's kinda the whole point...). most testers won't accept something that's solid dots/dashes and they won't give you the time to translate it all. In the real world, where the other guy is now expecting you to answer, he won't be able to know that you're going to spend the next 10 minutes trying to decipher dot/dashes...

Now then -- learning code.

since you have a computer, you need a program like Morse Academy or SuperMorse running in teaching mode. take a few letters at a time and let the machine "teach" you. have it throw some exercises at you as well.

try to do about 20 minutes a day at this.

consider taping some of the random word transmissions on an MD/Cassette/CD-RW and storing them for a couple of days and then play them back later as practice (since you'll have forgotten what was sent..)

the biggest problem with people taking the test is that they've learned the practice materials perfectly, but then get into a real test and get clobbered. you can avoid this by not using prerecorded tapes to learn from (use a computer program that produces random practice..) and using on the

air listening (where you have to copy it to get it -- no substitute for actually having to actually copy or else...that usually gets the brain into learn mode in a big way).

set the computer to send characters at 18 WPM with spacing between them. this will help you keep from learning the dit/dah combinations and help you hear an entire sound as a letter.

good luck,,

bill wb9ivr

>Chevy. At best, some may see it as a wake up call to drop code
>so that yet more MEGABUCKS value RF spectrum does not go to
>digital cellphones, wireless internet and new technologies.

You must not be licensed, so here's some good news for you: There is now
a no-code Technician class license for V/UHF. No need to drop the code
for that spectrum -- it's already been dropped. Where you need the code
is for access to HF, and that spectrum is in no danger of being lost.

348. Radio formulas - web calculators

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-04 00:00:00 UTC
From: Harry Lythall SM0VPO <harryvpo@hotmail.com>
Message-ID: <01beae50$762add90$8734d693@e0060b0eb282a>
Source record: 140789
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.shortwave,uk.radio.amateur,uk.rec.radio.cb

Hi again all,

I have waddled over to the HTML newsgroups and found the users there very helpfull. As a result I have managed to add the promissed radio formulas calculator (under BASIC INFORMATION) at:

http://sm0vpo.8m.com/ Main page
http://www.geocities.com/SiliconValley/3569/ Mirror in the USA
http://hem2.passagen.se/sm0vpo Mirror in Europe
http://members.xoom.com/sm0vpo Mirror in Far-East

So-far I have added calculators for:

Resistors in series /Caps in parallel (bit of a joke here?)
Resistors in parallel / Caps in series
Reactance of Capacitors
Reactance of Inductors
Calculating basic frequency - LC known
Calculating the number of turns on a coil - single layer
Calculating the number of turns on a coil - multi-layer
Evaluating a heatsink (what does this HS in my hand do?)
Calculating heatsinks (how big do I want to have it?)

Soon, I will be adding T/Pi resistive attenuators and VSWR calculators.
I will also be adding calculations involving sugar/SG and potential alcohol content plus boiling point as a measure of alcoholic content.

Best regards from Harry - SM0VPO
==========
PS
Windows is not the answer - it is the question.
The answer is NO!

No, not at all. DejaNews permits web-based reading *and* posting to USENET. All you have to do is give them a "valid" e-mail address (which can be a hotmail, juno, iname, or other free web-based e-mail address/domain, and the info you give them can be entirely false) and you're set. Just look at the headers of posts in this newsgroup, and you will see a lot of "JohnDoe@my-deja.com" type addresses in the sender field.

If you are reading this Hans, please feel free to use whatever material in this post that you want to. I am in Carl's kill file so he won't see this. Putting me in his kill file is the only rational thing he has ever done. If someone beat you over the head with contradictory FACTS every time you opened your mouth, wouldn't you do the same?

In article <7j5vof$hm5$1@news1.fast.net>,
"Carl R. Stevenson" <wa6vse@fast.net> wrote:

> Morse test" bin ... We NEVER told the FCC that you "support
> NCI" ... we told them that that 43% of the comments supported
> NO MORE THAN A 5 WPM MORSE TEST FOR FULL HF ACCESS.

My *GOD* Carl, is spewing forth *lies* the only thing you can do? Even when it is so easy for any of us to verify that you are a LIAR? You CLEARLY say that the 43% SUPPORTS YOUR PROPOSAL. Your proposal calls for the TOTAL ELIMINATION MORSE TESTING!! I quote:

"A substantial body of comments (43.3%) support the total elimination of Morse testing as soon as practical and a reduction to no more than 3 classes of license." - Paragraph 24 (the *CONCLUSION*) of NCI Reply Comments to WTB Docket 98-143, filed with the FCC

"This conclusion is based on the combination of comment supporting NCI's proposal (43.3%) and those supporting the ARRL proposal (20.3%)" - Paragraph 7 of NCI Reply Comments to WTB Docket 98-143, filed with the FCC

"NCI believes that it is also quite significant to note that support for NCI's proposal exceeded support for the ARRL's proposal by a factor of more than 2 to 1 (43.3% of comments filed supported NCI's proposal vs. 20.3% for the ARRL proposal) and that many writers specifically made a point of stating that "The ARRL doesn't speak for or represent me." - Paragraph 8 of NCI Reply Comments to WTB Docket 98-143, filed with the FCC

"As can be seen from the table on the previous page, comments supporting NCI's no code position ranked the highest, totaling 43% of all comments filed (based on documents viewable on the ECFS)." - NCI Ex Parte Presentation to the FCC

> Thus, it is TOTALLY dishonest of you to imply that
> there was some attempt to "cook the books" ... NCI focused on
> the Morse issue and your comments WRT Morse testing were
> accurately reflected.

Arnie and I both imply (actually allege) *exactly* that in the article
we co-authored called "NCI Reply Comments to the FCC - Arrogance,
Deceit, and a Threat to our Nation's Credibility". That is *exactly*
what you did. You can read our article at http://www.knowcode.org

> It's abundantly clear that you began a vendetta against NCI
> when the BoD refused to "affiliate" with your "club" because
> you refused to provide ANY information on its membership and
> their views on the code/no-code issue, which pertain directly
> to one's qualification for membership in NCI according to NCI's
> bylaws.

Gee Carl, do you think this comment you made to Hans might have had
something to do with it:

"Now [Hans] why don't you do us all a favor and take your lying,
stagnated, ARRL apologist ass out of here ..." - Carl Stevenson, NCI
Director, 08/27/97

> NO, just another case of someone "making much to do about
> nothing" in an ongoing series of attempts to discredit/slander
> NCI by any means possible, no matter how inaccurate or dishonest
> those attacks may be.

361. CLOUDWARMER SKEPTICS

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-04 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990604094617.15508.00000409@ng-cc1.aol.com>
Source record: 140802

It happened again this morning at 1150 UTC on 14.313.I TOLD YOU THE CLOUDWARMER WAS THE BEST WIRE ANTENNA IN THE WORLD, didn't I?Didn't I tell you it could hear extraterrestrial intelligence? This morning I was hearing very very faintly "Queenie" Mort calling CQ on .313. As usual, no one answered. I waited until he ceased firing which was equal to trying to bring down an elephant with a pea shooter. The frequency was clear and I called "CQ,AF2Y,treadmill 2." What happened? I was answered by EL2BF/MM2 enterting region 3. Jim was sailing near the Marquesas Islands in Polynesia and gave me a SPLENDID report. If I told you how splendid, you'd think I was lying anyway. I felt sorry for old Queenie because I've been making him look bad for the longest time. All he can do is spin that BIG BEAM around, fed with HIGH POWER and PRAY someone hears him. And all I have to do is just put my measly 800 watts of raw sewage into those parallel wires and WHAM-SOUTH PACIFIC. And so fellow hams-get with the program. I still have instruction sheets to send out for no money but simply a self addressed stamped envelope. You'll never do better than to write me that letter. Doc,AF2Y>>>>>

From: realdeal@my-deja.com
Message-ID: <7j8ndk$e27$1@nnrp1.deja.com>
Source record: 140805

Has any one found out if ND8V is really dead? has any record been found of his death? This is a mystery that needs to be solved. How was he killed? When was he killed and where was he killed? The friends that Mike made on amateur radio deserve more than a statement "We don't want to talk about it". Some loose ends need to be tied together. "DUH Duh" Rube K4RUB seemed to be close to Mike, but he has sealed his famous loose lips on this one. The amateur fraternity needs some answers!!

<< I stand up for the Truth! If you have a problem about that, then get out!
>>

<Folks,Lloyd Davies, although just 25 and a Code Free Tech leech STANDS UP FOR THE TRUTH. And he loves KV4FZ too!! My oh my as my dear friend KE4TEW says,one of the finest hams to ever hold a ticket, Okay Lloyd, I also stand up for the truth, so here's some truthful facts about your boy Schoenbohm,KV4FZ.Theft of service from the Caribbean Automated Long Lines Services happened from these locations between Mar.9,1987 to Dec.10,1987. (1)Residence of the Schoenbohms corresponding to P.O.Box 2570,Christiansted,St.Croix,USVI: (2) Office of Pan American Airlines at St.Croix Airport(3)other unknown locations. You ask why the office of Pan Am? Because that's where Herbie's wife, Monika Lisa worked. Looks to me like BOTH were thieves. Who investigated Herbie abd spouse? (1)Caribbean Automated Long Line Services(CALLS) Security Personnel(2)United States Secret Service(USSS) (3)St.Thomas Police Dept. Detective Section. YOU WANT MORE TRUTH ABOUT YOUR BOY,LLOYD? Read on. And what was written as the main accusations against Herbie and his wife? BOTH WERE HIT WITH"FRAUD AND RELATED ACTIVITY IN CONNECTION WITH ACCESS DEVICES(TITLE 18,USC,SECTION 1029):CONSPIRACY TO COMMIT FRAUD AND RELATED ACTIVITY IN CONNECTION WITH ACCESS DEVICES. As you see,we were dealing with a so-to-speak Bonnie and Clyde scenario. Here'S SOME MORE TRUTH FOR YOU N0VFP. The synopsis of facts in that CALLS Interim Report of Investigation went like this:"Investigation revealed that Herbert Schoenbohm, using a computer program and/or related methods designed to infiltrate telephone systems,knowingly and with intent to defraud,produced,possessed,used and trafficked in one or more counterfeit access devices(codes) and generated through personal use,fraudulent telephone calls valued at _____(no exact figure given. Continued investigation revealed that Monika Schoenbohm used one counterfeit access device(code) which was also used by Herbert Schoenbohm to generate at least one fraudulent telephone call, therefore verifying that Herbert and Monika Schoenbohm CONSPIRED to defrau CALLS and legitimate customers of long distance service.Investigation continues." How you like dem apples, N0VFP? Truthful enough for you?
Lloyd, what do these names have in common? 1.Eszart Wynter
2.Alejandro Belmonte
3.Glynn Poindexter
4. Richard Mitchell
5.Ted Mercier
6.Paul Jimenez
7.Lawrence Burkett
8.Caribbean Mutual Insurance
ALL WERE LISTED AS VICTIMS OF THE SCHOENBOHMS!!!! And that was a STARTER. What that means is that Herbie and Monika used their access numbers as CALLS members to make long distance calls for free. A nice kettle of fish, wouldn't you say?

And in the meantime,KV4FZ had and still has the chutzpah to sit his grimy ass on an Intercon frequency and accuse them of stealing money from phone companies , or actually it was, according to the German vermin from St.Croix,"the Jews on Intercon had set up their little thing to rob phone companies of revenue." And when a pea brain like N0VFP hinges on Herbie's every word and tosses around the term JEW in a deragatory manner,he's of the same anti-Semitic ilk as is his master neo-Nazi bastard from St.Croix. Monkey see-monkey do...sorry WA2EXQ. Want some more truth,N0VFP?Here are some of the actual access devices(codes) Schoenbohm used to defraud CALLS.
254450;245521;145523;254451;874453;254452;202781 etc. And when the judge asked KV4FZ about these and others, he replied,"I didn't use anything to generate them. They were in my head." Is that a joke or what?Lloyd, I have so much info on your boy it'd make your head spin. All fact, son. You're in bed with a thief, a liar, a conspirator and an anti-Semite. That classifies you as manure-remember that! Doc,AF2Y>>>>>>

Not at most public terminals. At places like public libraries a user can either use a common account or sometimes set up an individual account. There is usually no record kept of who this person is.

There is no way to really predict flare activity that far in advance. We know it will increase but we don't know to what extent. Only time will tell. The cycle is slow at going up but we've still got a ways to go until maximum.

From what I have heard, a lot of people didn't go because of the high admission fee. $20 is a bit too much, people go to hamfests to get a bargain. If a seller has an item marked down 10% and that item is normally $200 bucks, then it goes for $180, but add the price of admission back in and you save nothing. Someone is raking in money hand over fist with this event, The vendors have to pay for their spots, inside and outside, the people have to pay for their admission into the event, DARA uses volunteers to run the thing, and the concessions are run by Hara Arena at no cost to DARA. Where is all that money going? Why do they need to charge so much to get into the event?

We have <AGAIN> lowered the prices of all of Clay Whiffen's
remaining equipment including tranceivers and test
equipment.

The IC735 HF tranceiver is now $425. (Picture available)
The TriFuel electric start 8KW generator is now $1650.
Check out all of the TEST EQUIPMENT.
Everything else has lower prices too.
Please take a look at: http://celia.mehaffey.com/k3ix.htm

We have now sold about 2/3 of the items originally listed
and we SINCERELY appreciate the reception our efforts to
dispose of Clay Whiffen's ham radio equipment have received!

Thanks
Joe Mehaffey

For the second week in a row, K5ZU (ex-AB5MV - or "Monkey Vomit") in Arkansas is busily QRMing the Saturday Night Liberty Net on 3.950 Mhz LSB. If these folks don't like 3.950 why can't they just turn their dial and IGNORE 3.950 LSB. Whyis K5ZU and other people so obcessed with a somewhat obscure group of ham op's who get on once a week to discuss conservative politics? Why can not these QRM'ers shut off their radio or go elsewhere? There is no excuse no matter how you cut it for this QRM'ing of a Network of stations who have every right to assemble and hold a form of town meeting on the air. All you QRM'ers go somewhere else. Please. You only continue to show your ignorance and unbalanced mental obsession by QRMing 3.950 SPIN THE DIAL IF YOU DON'T LIKE WHAT YOU HEAR. It works 100% every time, assuming you have the mental fortitude to make a rational choice about how you choose to operate your radio.

You must be a reasonable person if you refer to NCI as "No Cojones
International" :-)

Do you consider it to be inaccurate or dishonest to point out that this
comment by Carl is an outright, unadulterated, unmitigated, lie?:

> We NEVER told the FCC that you "support NCI" ...
> we told them that that 43% of the comments supported
> NO MORE THAN A 5 WPM MORSE TEST FOR FULL HF
ACCESS.

See my response to Carl for substantiation of it truly being a lie.

Well, maybe not, considering where that expression comes from!

So said, in the world of theatre, when you tell some one "Break a leg",
you are wishing that their performance should go so well, they should
have to take a bow!

It will work just fine. Trim it to resonate on your favorite
10m frequency. 102" whips are resonant on 11m.

412. THE SISSY N0VFP REPLIES

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-05 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990605083502.00636.00000933@ng-cd1.aol.com>
Source record: 140589

Isn't this a real tough manly reply from a sissy who dates a girl in church and prefers sitting home on a Friday night waiting to hear a white extremist shortwave radiocast then taking this girl out for dinner or to a movie. Sheesh....what a momma's boy! AF2Y,Doc

>I said that a 25 year old guy, a NORMAL 25 year old guy, does not sit home on
>a
>Friday night waiting to hear some kind of extremist right-wing
>anti-government
>radio broadcast. It's NOT NORMAL.

Really? How about you? You have never answered my question?

Why were cited by the KingsVille, Texas FCC office? What for?

You have avoided this question for 2 weeks now. Everytime I post this, you come back with insults and name-calling, saying things that my Ham Ticket is no good, that I'm "White Trash" and so forth. I think I know, but I want you to tell me. I am getting to you, arn't I? You can't keep this up forever. You and Rich both. The BARF will prevail and you know it. You are but a an old man who has gone insane and needs help.

I think you are hiding something. And I'm finding out day by day. You are losing your grip, you are losing. you are losing!

Soon, WB2OTK will have his just deserve for all the years of his QRM. You think I'm a newbie? I've listened to this stuff for 6 years. I know all the players and who's who.

>He should be out with a woman or a party with
>them or something.

What I do in my private life is none of your damn buisness! If I am married or in love, It dosen't concern you. The reason you make it your buisness is that you use this against people. I've listened to you do this on a number of occasions.

>You have a real psychological problem Lloyd and dollars to donuts that
>gal at church. if one exists, is gonna give you the big heave-ho and probably
>marry a normal Jew.

I have a problem? HA HA It's you Doc, I don't goto bed at night worrying about NAZI's or anyone else. Oh She's real allright, she really likes me. She likes me for what I am and what I stand for.

I have alot of freinds here. If you ever think about doing or plotting anything bad to me, All my freinds will be on you faster than a New York minute!

414. ND8V "SIGHTED" at local rib shack

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-05 00:00:00 UTC
From: realdeal@my-deja.com
Message-ID: <7jbb59$8ha$1@nnrp1.deja.com>
Source record: 140591

ND8V was seen at a local rib shack after he had polished off 30 pounds of barbequed ribs with slaw and all the trimmings..Then he topped this snack off with three 12 inch plates of bannana pudding which he washed down with three gallons of crystal lite. After he wiped his mouth with his sleeve, he was heard to mutter that he had to watch the old weight. When asked about his recent demise, he replied "You know, I thank that was exagerated" "BURP" I think "PORK BUTT" WB2OTK started that report". We will keep you posted about more sightings. Meanwhile "DUH DUH" Rueben Lloyd K4RUB is insisting he is in fact "dead". "Train wreck or somethen". "DUH" , but it is a secret".

The Right Perspective is an EXCELLENT radio show.
Jared Taylor was right on target. It's about time the TRUTH
about the non-White crime epidemic in this country has
been told. The Jewish media has purposely kept these
facts from being made public, because too many people in
possession of the TRUTH could derail their left-wing
agenda.

Hey, if The Right Perspective and Jared Taylor upsets the
AF2Y types, you KNOW it must be GOOD!

Long live our Sovereign Constitutional Republic,
DEATH to the New World Order!

426. Re: FT-50RD Help

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-05 00:00:00 UTC
From: marc_k@walrus.com
Message-ID: <7jbjke$8dj$2@alice.walrus.com>
Source record: 140603

David Bernazzani (dber@tiac.net) wrote:
: Hi Joe,

: Nice choice on the radio. The 50RD now comes supplied with the
: upgraded keypad for digital voice record and CTCSS decode. Other than
: that, get the appropriate SMA to BNC adapter so you can connect an
: external antenna (for mobile or base use). I'd also get the
: mini-speaker mic (either Yaesu or MFJ equiv for short money) as it is
: more comfortable to hold the radio for mobile/base use. I would also
: consider getting the power adapter cable for powering it externally
: (from power supply, battery, etc).

: If you will be carrying it quite a bit, the external rubberized
: protector is a nice addition and will provide some protection for the
: radio.

: Yaesu is rather fond of special connectors which do not fit with
: standard power cords, etc. I guess it is their way of ensuring a
: little extra business after the sale of the radio :) Still, their
: radios are very nice.

: One problem you will likely notice with the FT50 (I've seen it on two
: early-model FT50s and the new RD model) is that the wide-FM reception
: is poor (mostly the audio is badly distorted) so things like FM
: stations are a pain to listen to.

This is a known limitation of the '50.
The wide-band is really more like semi-wide.
Broadcast FM is 75 Khz deviation, and indeed it will distort...BTW
sometimes if you shut the auto mode off, and switch to AM and play with
the tuning, you can improve things a bit.
However, Broadcast television audio, which is only 25 Khz deviation sounds
fine-the fm-wide is wide enough for it.

: Also, the squelch does not clamp
: down as fast as some other radios such as the FT10. This means that
: if you are on a busy channel and turn the knob to a quiet channel, you
: will hear a short burst of white noise as the squelch takes its sweet
: time to clamp down and cut out the audio. This is especially
: problematic on the dual-watch function (DW) if you are listening to an
: active channel, you will get the annoying (but very short) burst of
: noise as it checks every 5 seconds for activity on the other channel.
: If both channels are quiet, there is no problem.

I've not noticed this much, but it may be because I mostly use tone
squelch.

: Also, the turning knob which is used for almost everything in the
: radio seems to occasionally "slip" where a turn does not correspond to
: a display change. Minor but for some reason it seems better on the
: FT10 models...

This IS a issue-but all rotary encoder equipped radios I've worked with do
this to some degree.

: Still, the array of nice features for this dual-band radio outweighs
: the few problems I've seen.

Agreed.

: Best of luck,

: Dave Bernazzani

Message-ID: <SLc63.1383$K2.46990@iad-read.news.verio.net>
Source record: 140605

Hello. Does anyone happen to have a copy of the Extended TX or MARS/CAP mod for the IC-756 that they could e-mail to me? I have found some copies of it on-line, but they are all zipped files. And since all I have is a Macintosh, kind of hard to get at them. Also, does this mod enable TX only .5-30 MHZ and 50-60 MHz or .5-60 MHz?
Thanks a lot for reading.

Instead of all the BS going on about is ND8V alive or dead, why don't someone just call his house and find out? Then we will all know if it's real or a hoax! For a bunch of people who have to pass a test to talk on the ham bands you all don't have much common sense! Maybe that's what is needed instead of Morse Code testing we should have a test to see if your just plain smart enough to use the ham band. Or is it you would rather argue than do something constructive! Good Grief will some one please CALL ND8V !!!!!

This Davies character is not only full of crappola but questions as well. It seems he has a hangup over an ONV I received from Kingsville Texas back in '92 or '93 or'94(who can remember since nothing came of it?) Anyway, Davies is going to tell me why he'd rather sit home on the weekends and listen to white extremist shortwave broadcasts than making out with a gorgeous southern Belle, as if any would give the creep a second look. First off, an ONV stands for OFFICIAL NOTICE OF VIOLATION while an NAL means NOTICE OF APPARENT LIABILITY which translated means "You better come up a really good answer of it's gonna cost you bucks." My ONV from Kingsville Texas was due to my excessive testing for TVI and RFI. They claimed it was about 40 minutes but I can't be sure of it. I must therefore accept their statement as fact. I was running a tape and identifying every ten minutes. My TV and phone in question were upstairs and during the testing,which would have accomplished NOTHING on a dummy load, I was busy putting toroids on the TV's AC cord as well as a K-Com filter on the phone. And that was the whole ball of wax. I replied to Tom Shirley at Kingsville and since I heard nothing more about the incident. common sense told me my resply was acceptable. Hopefully I have satisfied Lloyd Davies, the Code Free Tech moron and I might remind him of the fact that my testing occurred on 20 meters, a band on which I'm ALLOWED due to my code and theory proficiency. Seems to me he CANNOT replicate my band operations since he simply can't learn enough to escape from the toilet bowl of ham radio. Now Lloyd, you have heard my explanation of the ONV. Not one cent was ever paid in any monetary forfeiture. How about telling everyone why you shy away from women. That story about dating one in church is as phony as a kid's escape routine by saying, "My mother won't allow me to...."You got a hangup with women, you fruitcake? You'd rather sit home and listen to right wing garbage? If so, you'll orgasm tonight because of your Liberty Netnoids. Wow,N0VFP, you certainly have an exciting life for a being a "virile" 25 year old! I'm sure everyone on this board envies you. AF2Y,Doc

ND8V was seen at a local rib shack after he had polished off 30 pounds
of barbequed ribs with slaw and all the trimmings..Then he topped this
snack off with three 12 inch plates of bannana pudding which he washed
down with three gallons of crystal lite. After he wiped his mouth with
his sleeve, he was heard to mutter that he had to watch the old weight.
When asked about his recent demise, he replied "You know, I thank that
was exagerated" "BURP" I think "PORK BUTT" WB2OTK started that report".
We will keep you posted about more sightings. Meanwhile "DUH DUH" Rueben
Lloyd K4RUB is insisting he is in fact "dead". "Train wreck or
somethen". "DUH" , but it is a secret".

I got an Alinco DJ-G5TH at a ham show today. It is very nice and very
complex.
I can't even figure how to put basic frequency information for repeater use.
If anyone can explain this or better yet send a scanned page from the manual
for the basis it would be GREATLY appreciated.
Thanks in advance.

The beginner's book "Now You're Talking" only lists about 20 simplex 2 meter frequencies. Surely there are more than this, right? Can't I use any (2 meter) frequency provided I don't interfere with a repeater or other traffic?

Paul

443. Re: 2m Simplex Frequencies?

Message-ID: <37598A14.80EDD260@ibm.net>
Source record: 140620

Sure, you can use any frequency above the 144.1 cw band area. The only problem is that you need to know the band plan and stay out of the weak signal area around 144.100 to 144.300 and the space frequency portion and the packet area. Not that it is illegal, but you sure make a bunch of hams mad if you don't. The same thing about staying on the standard frequencies instead of operationg on say 146.56 instead of 146.52. Not that it is illegal, but that you cause interferance to two 'standard' frequencies.

Yes the 2800H will do a cross band repeater operation, the same
remote control operation as the previous dual band radios but it does
not have V/V or U/U capability.

450. ARRL Fundamentally Corrupt ! More Evidence for Your Review

Since the Drudgery Report I just joined forces with is temporarily QRT, here is some breaking news !

To recap, ARRL was left some @800,000 last year in ONE DONATION. This year, claiming postage rate hikes and a derth of funds, ARRL raised QSL bureau rates and cuts operating hours.

Yet as I type they are remodelling the lobby. As I type, three friends of K1ZZ et al have new jobs through unadvertised openings. Were their relocation costs covered as part of this scam of ARRL members ?

From another source:

>Knowing one of the 3 that they hired personally and
>having him tell me that ARRL has invested 12 million
>bucks just drawing interest etc, its more than a
>scam. They are completly out of touch with the real
>world and thier subscribers.
>The directors fly around the country and world meeting
>in the most expensive places, ie they had a meeting here
>in St Louis recently and they all flew in, meet at the
>most expensive restuarant/hotel in the area. And besides
>that the W0 director did not even show for the meetings.
>The w0 director who I also know, has acquired so many
>frequent flyer miles that he and his wife fly to europe free
>for vacations.
>And they are short on funds ?

455. K1ZZ, W6ROD Indicted for Crimes Against Hamity

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-05 00:00:00 UTC
From: Bill Mather <capecodhams@eudoramail.com>
Message-ID: <Ry_53.2753$Xr4.22679@c01read02-admin.service.talkway.com>
Source record: 140639

Dave Sumner and Rod Stafford were indicted late Friday by the World Court for crimes against hamity.

They stand accused of selling out amateur radio to CBers, fraternizing with skip-shooters, and preparing a Final Solution to the CW problem

The diabolical plot would remove the CW requirement for HF, while preserving the CW sub-bands.

In this way, Sumner, Stafford, old geezers and contesters everywhere would segregate themselves de iure from phone operators (a de facto pratice now), while preserving private spectrum for their own pleasure.

This will increase the size of ARRL membership, flood the coffers with gleeful CBers and insure ARRL pensions for years to come.

:>According to WCBS radio news the other morning, we will become victim to
:>another Y2K happening. In the month of Jan.2000, astronomers except the worst
:>solar flares in hundreds of years which will disrupt all types of worldwide
:>communications. NO JOKE .

According to WGN New's forecast, they say that although it is
predicted to upset SAT and radio communication, it will not
be as strong or long as the past few cycles. They also commented
that we will see more problems from this one simply because of
a higher dependence on SAT COMs and such, not because the cycle
will be "hellfire from the sky". Maybe we should run a board pool with
the square having the closest date and strength as the winner. Then
hire the guy to do the next cycle prediction.

I said that a 25 year old guy, a NORMAL 25 year old guy, does not sit home on a Friday night waiting to hear some kind of extremist right-wing anti-government radio broadcast. It's NOT NORMAL. He should be out with a woman or a party with them or something. Well,here's ToughRambo's reply......
I date my girl in Church, Doc.

This is AF2Y again saying that I'm so happy he does what he does in church. But what's church doing for the schmuck? Does he steal a kiss on a pew. Does he hold hands during "Amazing Grace?" What the hell kind of reply is that? My suspicions are right-the guy's whacked out. Bent out of shape. Looking to Jesus for salvation and to AF2Y for a cyberspace whipping. I can't stand hypocrites and a "religious" one at that, especially coming from anti-Semitic goyische garbage. You have a real psychological problem Lloyd and dollars to donuts that gal at church. if one exists, is gonna give you the big heave-ho and probably marry a normal Jew. AF2Y, Doc

Really? How about you? You have never answered my question?

Why were cited by the KingsVille, Texas FCC office? What for?

You have avoided this question for 2 weeks now. Everytime I post this, you come back with insults and name-calling, saying things that my Ham Ticket is no good, that I'm "White Trash" and so forth. I think I know, but I want you to tell me. I am getting to you, arn't I? You can't keep this up forever. You and Rich both. The BARF will prevail and you know it. You are but a an old man who has gone insane and needs help.

I think you are hiding something. And I'm finding out day by day. You are losing your grip, you are losing. you are losing!

Soon, WB2OTK will have his just deserve for all the years of his QRM. You think I'm a newbie? I've listened to this stuff for 6 years. I know all the players and who's who.

>He should be out with a woman or a party with
>them or something.

What I do in my private life is none of your damn buisness! If I am married or in love, It dosen't concern you. The reason you make it your buisness is that you use this against people. I've listened to you do this on a number of occasions.

>You have a real psychological problem Lloyd and dollars to donuts that
>gal at church. if one exists, is gonna give you the big heave-ho and probably
>marry a normal Jew.

I have a problem? HA HA It's you Doc, I don't goto bed at night worrying about NAZI's or anyone else. Oh She's real allright, she really likes me. She likes me for what I am and what I stand for.

I have alot of freinds here. If you ever think about doing or plotting anything bad to me, All my freinds will be on you faster than a New York minute!

"Practical" is an adjective, which is a word used to modify a noun or
pronoun.

In this posting, the correct word is "practically," an adverb to modify the
verb phrase "give it away."

Hopefully you have remembered to stop and think about what happened on June 6,1944. In case it's slipped your mind, it was called D-DAY, THE NORMANDY INVASION. In was the invasion of Hitler's Europe and the beginning of the pushing of the Nazis out of western Europe back into their fortress Germany and destroying their military along the way.Tens of thousands of Americans died on the beaches that day. They died on the road to freeing Europe from the tyranny of Nazi bestiality and thanks to their valiant efforts coupled with the Soviet advance from the East, eleven months later, top German military bigwigs such as Keitel and Jodl yelled, "Wie geben uns auf,"(We surrender). The next time you listen to the muthas on 3.950 during the week and to the "Liberty Net", keep D-Day in mind. We died to END their kind of hate propaganda. Your fathers and uncles and brothers paid the ultimate sacrifice to wipe out such scum. And how many of you became permanently disabled because of men like Hitler, Tojo and Mussolini? That's what it's all about folks on 3.950. Hitlerite bastards rearing their ugly heads again. SMASH THEM! AF2Y, Doc

What a bunch of twisted Lying propaganda. here we go again. It's on tape you liar. Vic w1wcr moved in on 3950 AFTER there had been a 4 person QSO on an hour before. He just came right in , called the rest of the lids with him and proceeded to lay claim to 3950.
Two of the operators in the existing QSO, after hearing Vic just plow in decided to sign (got ran off) rather than try to hold the frequency against tis LID. The other two operators stayed but were unable to communicate due to Vic and AA8DP QRMing their "established" QSO. Two of the "So Called" net's participants asked Vic "shouldn't we go to 47.5 or something" Vic said No. We're using 3950. the whole time ZU was not going to be "ran off" so he stayed, calling CQ. Two operators tried to answer him but were jammed by some of the "So Called" net's participants. Many other operators HEARD this and attempted to join in the QSO. Vic, after realizing that the frequency was not going to be "taken over" by the "So Called" net decided to move to 3953 and hold the net. That lasted for aboutr half an hour, at which time the LID moved his "So Called" net back to 50. He did so just to create some more chaos,that lasted about 15 minutes, then Vic W1WCR moved the "So Called" net to 47.5 like he was asked to do by one of the members in the beginning. What a "So Called" net control!

Due to the fact that I am concerned about this hobby/service and the enlightenment of my fellow hams, I now offer, free of charge, the latest ARRL WEB EXTRA FOR MEMBERS ONLY LATEST FCC ENFORCEMENT LOG. Thank you notes should be E-mailed to me at radiosigs@aol.com AF2Y, Doc

ï¿½

Text-only page

FCC Amateur Radio Enforcement Log

A representative listing of recent reports on Amateur Radio enforcement-related actions from the files of the FCC Compliance and Information Bureau:
NOTE: Issuance by the FCC of a Warning Notice indicates that the FCC has what it believes to be reliable evidence of possible rules infractions and not necessarily that the recipient has violated FCC rules. The FCC has the authority, pursuant to ï¿½97.519(d)(2) of the rules to readminister any examination element previously administered by a volunteer examiner. This Enforcement Log is representative of recent Warning Notices, Notices of Violation, calls for retesting, and other FCC communications to licensees involving possible serious rules violations. It is not a comprehensive listing.

ALBUQUERQUE, NM: The FCC has requested that Extra class licensee Lois E. Jeter, AC5RM, retake her General, Advanced, and Extra class examination under the supervision of an ARRL-VEC VE team by July 30, 1999, or her license will be cancelled.
ALBUQUERQUE, NM: The FCC has requested that Extra class licensee Richard J. Barlow, AC5MY, retake his General, Advanced, and Extra class examination under the supervision of an ARRL-VEC VE team by July 30, 1999, or his license will be cancelled.
[UPDATE] GAYLORD, MI: The FCC has cancelled the Advanced class license of Joseph C. Walker, formerly W8JCW. The FCC requested in March that Gaylord retake his General and Advanced class examinations under the supervision of an ARRL-VEC VE team by May 15. Walker failed to appear for retesting, and his license was cancelled. The call sign W8JCW no longer appears in the FCC database.
MILLSBORO, DE: The FCC's Riley Hollingsworth, K4ZDH, has announced that a Delaware ham required by the FCC to retake her Amateur Extra class exam has successfully retested. The FCC requested in February that Sheila Bowden, N3QQS, retake her Extra examination by March 19. Bowden appeared at a March 13 ARRL-VEC testing session where she retook and passed the written exam. "We are accepting Sheila Bowden's successful retest for the Extra class license, and accepting the doctor's certificate exempting her from the code test," Hollingsworth said May 27. Hollingsworth said it took until now to clear the case from his books because the FCC wanted to further investigate the physician's waiver that Bowden had submitted in lieu of taking a Morse code

examination.
[UPDATE] OAKLAND, CA: The FCC has dismissed the pending Amateur Radio application of James C. Walker, formerly KF6VAA. In February, the FCC had set aside Walker's Technician class grant in conjunction with the K7IJ repeater shutdown, alleging that Walker had transmitted on the K7IJ repeater before getting his amateur license. In a letter to Walker May 26, FCC Legal Adviser Riley Hollingsworth, K4ZDH, dismissed Walker's still-pending Technician application. Hollingsworth said the Commission had evidence that, despite the setaside, Walker had continued to transmit on amateur frequencies using KF6VAA and had been operating on the WA6SEK 145.21 MHz repeater in the Stockton, California, area. Walker was warned May 20 about that operation. Hollingsworth issued a second warning notice for unlicensed radio operation in his May 26 letter. He said that if Walker later reapplies for an amateur license, he would have to attest that he had ceased unlicensed operation. Hollingsworth also said that the FCC wants to resolve issues related to Walker's operation on the K7IJ and WA6SEK repeaters before it entertains another amateur application from Walker. Hollingsworth said that Walker could face criminal prosecution if he operates radio transmitting equipment again without a license. The call sign KF6VAA no longer appears in the FCC database.
[UPDATE] SACRAMENTO, CA: The FCC has suspended the VHF/UHF privileges of Timmy O. Sheen, N6MZA, a Tech Plus licensee, by modifying his license to prohibit operation above 30 MHz. Sheen already has been called in by the FCC for retesting; he has until June 30 to appear or his license will be canceled. In a May 26 letter, Hollingsworth said the FCC had information that Sheen also had been on the WA6SEK 145.21 MHz repeater "broadcasting, playing music and deliberately interfering with repeater operations for several hours." Sheen had been warned in February about similar operation on the K7IJ repeaters, and Hollingsworth said Sheen had been in touch with him to say other stations had interfered with him and to apologize for events leading up to the more recent allegations. "Retaliation cannot be accepted as an excuse for deliberate or malicious interference or broadcasting," Hollingsworth said, adding "this fact has been explained to you in the past." Sheen has 30 days to protest the action.
SINTON, TX: The FCC has requested that Extra class licensee Harvey H. Morsbach, KC5LZ, retake his General, Advanced, and Extra class examination under the supervision of an ARRL-VEC VE team by July 30, 1999, or his license will be cancelled.
[UPDATE] STOCKTON, CA: The FCC has modified the license of Technician licensee William B. Gifford, KF6URY, to prohibit VHF/UHF operation for 90 days. The FCC alleges that Gifford was "broadcasting and deliberately interfering" with operations on the WA6SEK 145.21 MHz repeater for several hours. Gifford has 30 days to protest the modification. The FCC earlier requested that Gifford retake his amateur examination under the supervision of the FCC office in San Francisco. He must appear for retesting by June 30 or his license will be cancelled.
WINSTON-SALEM, NC: The FCC has requested that Extra class licensee John R. Hamby, WB4UZW, retake his Extra class examination under the supervision of an ARRL-VEC VE team by July 15, 1999, or his license will be cancelled.

GOOD ASSUMPTION

>So what? The 2nd amendment to the Constitution affirms
>their God-given right to free speech.

Damn you cerytainly are showing your ignorance, 2nd Amendment, Free Speech.
You have no idea what your talking about. Your just making a valiant attempt to
repeat some liberty net drivel you've heard.
Give it a break - your losing your own arguement and don't even know why.

>They have EVERY
>RIGHT to voice their opinions

Yes but NOT TO "run others off of the frequency to do so" NOT TO use it for
"newsgathering, broadcasting, playing commercial news tapes, running down the
country. The Amateur Service was not put into place for that purpose.

>We have to stomach all sorts of left-wing bullshit spewed
>forth from the Jewish media hou

Is like the Nazi media hour on Sat nites?
Who said anything about left wing? What does anything Jewish have to do with
it?

>YOU can't stand even a little bit of contrary opinion
>by a small number of ham radio operators???

Your right there, that "So Called" liberty net certainly can not stand that.

>What kind of closed-minded bigot are you?

I don't think anyone is a bigot except maybe you. You've brought up the Jewish
remarks in order to do what?
Oh I get it YOUR *Open Minded* right.
Yeah so Open Minded that you've let your brains fall out.

Next time KNOW what you are talking about before you come in here with your
propaganda. Get an *original* thought for YOURSELF - O.K.? You aren't very good
at "repeating the proverbial "Party Line" While your at it study the
Constitution if your going to TRY ansd quote it.

500. Regarding AF2Y's Notice of Violation REPOST

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-06 00:00:00 UTC
From: n0vfp@aol.com
Message-ID: <19990606134543.06131.00001499@ng-cf1.aol.com>
Source record: 140483

I will post this until I get some answers!

Subject: Regarding AF2Y's Notice of Violation
From: n0vfp@aol.com (N0VFP)
Date: 6/5/99 8:00 PM Pacific Daylight Time
Message-id: <19990605230049.13721.00001345@ng-fv1.aol.com>

"My ONV from Kingsville Texas was due to my excessive testing for TVI and RFI. They claimed it was about 40 minutes but I can't be sure of it. I must therefore accept their statement as fact. I was running a tape and identifying every ten minutes. My TV and phone in question were upstairs and during the testing,which would have accomplished NOTHING on a dummy load, I was busy putting toroids on the TV's AC cord as well as a K-Com filter on the phone. And that was the whole ball of wax. I replied to Tom Shirley at Kingsville and since I heard nothing more about the incident. common sense told me my resply was acceptable."

1. Why was a busy frequency on 20 meters (14.313) chosen as site for this alleged testing?

2. Why was a frequency chosen that was already occupied by members of The Better Amateur Radio Federation?

3. What was the purpose of playing a pre-recorded tape of Adolf Hitler?

4. Why wasn't the frequency checked for activity and possible interference when the station identification was given?

5. Why were the pleas of stations trying to use the frequency ignored?

6. Why wasn't the testing done at night after the band was dead?

7. Why would an Extra Class operator ignore all these factors and choose to cause deliberate and intentional QRM on a busy 20 meter frequency?

8. What documentation is available to prove that the response to the Notice of Violation was acceptable?

9. Was the Notice of Violation ever recinded or withdrawn?

10. Is not true that the Notice of Violation is now a permanent FCC record, verifying that AF2Y engages in intentional and malicious interference?

Just rememeber, I will post these "In your face" until you answer them truthfully!

>> spend 5 hrs a day on subways
>>

When I was that age I also used the subways of New York City. I was able to get my code speed up by reading the advertisements / graffiti and converting them to CW. This also prevented me from making eye contact with the other passengers which was/is considered inappropiate & dangerous.

I never did hear CW though from the motormen or conductors but I did hear some words which I wont repeat here.

Subject: So which "color" are you?
From: newsat5@webtv.net
Date: 6/2/99 8:20 PM Pacific Daylight Time
Message-id: <13980-3755F48E-9@newsd-261.iap.bryant.webtv.net>

The following was heard on SW 5085.0 kHz this afternoon ...

This is mighty scary business folks, and it took the conscience of a turncoat insider to paint a graphically real picture of what many of us have known was going on behind our backs all along.

Enjoy that radio, because we may soon be the only group of people capable of receiving any radio signal at all ... let alone the facts.

Read on ...

In the spring of 1997, Professor Ian Stewart, met with "Mr. Sea" (real name known but withheld) to discuss what he has learned first-hand about the coming persecution at the hands of the New World Order operatives.

With a seven-inch thick portfolio filled with photographs, news articles, correspondence, etc., Mr. Sea revealed disturbing information about New World Order efforts to destroy and enslave America.

The following are some of Mr. Sea's comments. But first, let's take a look at the man who made the comments.

Mr. Sea, a committed Christian, is a former inspector for the Joint Chiefs of Staff and the Department of Defense, with 31years of federal service in the military, nine with the Department of Defense, including two years with the Air Staff.

He's a holder of the Bronze Star, the Purple Heart, the Defense Meritorious Service Medal, three awards of the Joint Service Medal, all of the Vietnamese awards, as well as the Joint Meritorious Unit Medal.

When he retired a few years ago, he was awarded the Secretary of Defense Civilian Service Medal. He's been around the world to 31 countries on four continents, and speaks five languages.

Mr. Sea spoke of the coming American Holocaust of the Government's plans for dealing with individuals opposed to the New World Order movement.

He spoke of the infrastructure that has already been set up to incarcerate and execute Americans, and the locations of the facilities that will be used for these purposes--all with photographs, leaving

little to the imagination.

An interview with Mr. Sea regarding New World Order plans for the U.S. and its citizens "The infrastructure is set up.

There are at least 130 concentration camps, quietly modified facilities which have sprung up and continue to spring up across the country, seemingly devoid of activity, yet requiring strange accoutrements such as barbed wire-topped fencing (with the tops turned inward) and helicopter wind socks.

Most have good logistical supportability, with major highways and railroad transport facilities adjacent to the sites.

"These facilities, many in remote areas across our country, are set up to become concentration /detention camps, complete with gas chambers, for resisters and dissidents. Generally speaking, they're set up for dissenters who will not go along with the New World Order".

The "resisters" are gun owners who refuse to give up their weapons; the "dissidents" are Christians, Patriots and Constitutionalists.

"These camps are set up and functional. I've seen many of them".

"On August 6, 1994, I toured the Amtrak Railcar Repair Facility at Beech Grove, Indianapolis, Indiana. There are at least ten maintenance barns at this facility, covering 129 acres, with two separate fences with their rooftops leaning inward. The windows of several buildings have been bricked up".

Hence, you have three levels of security for Amtrak repair barns!

"There are three helicopter 25-knot aviation wind socks (which aren't the correct ones to use for chemical spills which require 10-knot wind socks).

There are high security NSA-style people turnstiles, and high intensity/security lighting for 24-hour operation.

The box car (gas chamber) building fence is marked with special "RED/BLUE Zone" signs [visible in the photo]. This corresponds to the "mission" of the RED/BLUE Lists which surfaced in June and July of 1996.

"Under martial law, this will become a death camp. They're only going to handle category one and two (RED and BLUE) people there. This box car facility will be used for execution".

"One of the barns is large enough to put four box cars into. There are powered vents on the top of the barn to vent the gas out of the building after the box cars have been fumigated. All of the buildings have newly installed six-inch gas pipes and furnaces installed in all "railroad barns."

Since the photo was taken in August 1994, FEMA has allocated $6 million to make the walls and roofs of the buildings "airtight." Under martial

law, this facility could be immediately used as an SS-style "termination" gas chamber. "On January 27, 1995, The Indianapolis News ran an article titled, "Amtrak Lays off 212 at Beech Grove: 170 Lose Jobs at Maintenance Center Today." Why perform $6 million worth of renovations, and then lay off 212 people?

Because the people doing the final executions will not be Americans. Thus, the "slots" of the 212 will be filled with non-Americans.

"They'll hire foreigners for this "cappo" task. Cappo ("chief" in Italian) was the title of the trustee prisoners who actually killed many Jews for the SS butchers at Dachau, and at other Nazi crematoria across Europe".

"The news article also said, " . . . hopes the yard may be able to solicit work repairing private train cars, and perhaps subway cars from Washington, DC, or other urban areas".

The repairing of private trains is a dead giveaway to death cars!

"The article went on to say, "Late last year, Congress ordered Amtrak to spend at least $5.9 million patching holes in the roof and fixing masonry on the walls of the giant machine sheds at Beech Grove."

These buildings have been "sealed." They're airtight. The facility is constructed to allow gas to be blown into all the buildings via the newly installed, two-story, hot air heating furnaces."

Next, Mr. Sea elaborated on the two categories, the RED and BLUE Lists, and what they mean:

"The RED List is for pick-up and execution before unobtrusive preparations for martial law are initiated. The BLUE List is also for execution, but at a later date within six weeks of martial law declaration.

There are no "re-education" plans for either category--just execution.

"When you get picked up on a RED pick-up, they'll take you from your home at night -- probably around 4 a.m. -- and put you in a black van, then drive you to a helicopter waiting to fly you to an intermediate point.

There, you'll be loaded onto a big 64-passenger CH-47 Chinook helicopter--all black, unmarked and illegally operating under the Treaty on Open Skies. Then they'll fly you to one of 38 cities where you'll board a 747, 737, or 727.

You may be taken straight to a temporary detention facility. When you're RED listed, you'll be taken to a red camp. Then you'll be executed.

"At some point, martial law will be declared. (Martial law is when the writ of Habeas Corpus--to have a trial by jury--is suspended. Instead, of going to the judge, you go straight to jail for a limited time,) I

suspect there will be a major outage, or some other crisis which will be the reason to declare martial law".

At this point, the BLUE listed people will be picked up. At that time, the country will be regionalized into ten sections, which are already designated by FEMA.

"Be advised that it has been proven (in Wyoming and at least one other location) that the black choppers have state-of-the-art radio (RF) frequency wideband jammers, and can jam cell phones and CBs while they're executing black operations missions (i.e., in your area).

This means that your cell phone could be jammed just before and/or during any action against you.

"In June of 1996, an FBI agent got hold of the Region Three BLUE List (from a CIA agent), and found his own name on it, and those of several others he knew in Virginia.

The Regional BLUE List stated that the names on the BLUE List would be picked up "within six weeks of the actual martial law declaration."

"This parallels the Nazi RED/BLUE List policy almost to the letter. The parallel Nazi plan was published by Heinz Hohne in his 1966 book, The Story of the Nazi SS: The Order of the Death's Head. People say, "It won't work".

But it will work if the 300,000 Soviet troops which are ALREADY HERE can get the guns.

The name of the game is to blackball the people to get the guns . . . make the militia look bad, make guns look bad, make everybody give up their guns. Once they get your gun, they've got you, UNLESS you've got the angel of the Lord at your door.

"The ones doing all of this are operating out of the highest places in the Federal Government. They're cooperating with "spirit guides and mediums" and using astrology and numerology. The spirit guides are telling them what to do, and the entire thing is being orchestrated at the highest spiritual levels. Every base has been covered. They've thought of everything.

If you notice, they often do things on the 13th of the month. Mr. Clinton does a lot of things on the 13th. On September 13, 1993, the brokered Israeli-PLO peace accord was signed. He waited 14 days, until September 13, 1994 to sign the Crime Bill. On June 13, 1995, he stated he'd veto the national debt authorization ceiling. On November 13, he did veto it. On January 13, 1996, he made a speech to Bosnia.

"There will be an interim of probably just days from the time they launch the RED List, to the declaration of martial law when they'll start coming after those on the BLUE List. It'll work the same way it did with the Nazis who had a list of people to pick up, on June 30, 1934, before they declared their "mobilization".

"It's the same blueprint being used because it's the same spirit leading the Fourth Reich as led the Third Reich. In Germany, they used trains, here it will be helicopters and 747s".

When Hitler was villainizing the Jews, he hired thugs and dressed them in black uniforms. He was building concentration camps and setting up a transport system.

"In this country, they're now in the process of villainizing Christians, Patriots, Constitutionalists, and outspoken talk-show hosts, etc".

"Who will be doing the actual picking up?
Foreign "cops" (United Nations Internal Security Forces).

Over 30 foreign military bases under the United Nations flag are already set up in the US., all with the approval of special appointees in high Federal positions.

These bases are already manned with over ONE MILLION troops from Russia, Poland, Germany, Belgium, Turkey, Great Britain, Nicaragua, and Asian countries.

Why are they here? Because unlike our own troops--many of which along with the Guard and Reserve of 24 states are being deployed overseas--will have no qualms about firing on U.S. citizens when the time comes.

There are more than 2,000 Russian tanks, military trucks and chemical warfare vehicles just outside Gulfport, Mississippi. They began arriving in January of 1994.

There are 180 foreign troops at Fort Reilly which was confirmed to me by a Brigadier General. There are 300 who came into the Birmingham, Alabama airport on a big white Russian cargo plane on December 13, 1995.

As of 1995, there were 10,000 plus foreign troops at Fort Chafee, Arkansas reportedly making preparations for 20,000 "detainees".

"Also in 1995 at Fort Polk, Louisiana (U.S. Army Post), Russian and Eastern European troops were deployed under the U.N. flag.

[When questioned about this, the legislative aide of the congressman who resides over Fort Polk, stated, "Yes, they were there undertaking broad, joint training exercises. And, yes, the U.N. flag was flying. There may still be some there today."]

"At the Aberdeen Proving Grounds, there are many Russian tanks. One of the NCOs told his father that he'd been maintaining them. "This is going on all over the country. German troops are known to be at Holloman Air Force Base in New Mexico, Wright-Patterson Air Force Base in Ohio, and Fort Hood, Texas.

Chinese troops are known to be at the Long Beach Naval Station in California.

"There's not going to be some future event when the invading troops are going to show up. They're already here! When martial law is implemented, these foreign U.N. troops will be policing our country, carrying out the plans of the New World Order".

>****Donk,actually it was a quid pro quo. I'd explain if he'd explain why he'd
>rather sit home on the weekends and imbibe all the racist shortwave
>propaganda
>crap than making out with a southern Belle. I kept my end of the bargain. Did
>momma's boy Davies? I'm waiting for that reply. Doc,AF2Y******
>

Why has my private life got you concerned? Is what I do, what I listen to on the radio. who I love your business? I think not, but you make it your business, you are out to hurt people. KC1ZQ is right about you.

And now,

Please answer the following for me....

"My ONV from Kingsville Texas was due to my excessive testing for TVI and RFI. They claimed it was about 40 minutes but I can't be sure of it. I must therefore accept their statement as fact. I was running a tape and identifying every ten minutes. My TV and phone in question were upstairs and during the testing,which would have accomplished NOTHING on a dummy load, I was busy putting toroids on the TV's AC cord as well as a K-Com filter on the phone. And that was the whole ball of wax. I replied to Tom Shirley at Kingsville and since I heard nothing more about the incident. common sense told me my resply was acceptable."

1. Why was a busy frequency on 20 meters (14.313) chosen as site for this alleged testing?

2. Why was a frequency chosen that was already occupied by members of The Better Amateur Radio Federation?

3. What was the purpose of playing a pre-recorded tape of Adolf Hitler?

4. Why wasn't the frequency checked for activity and possible interference when the station identification was given?

5. Why were the pleas of stations trying to use the frequency ignored?

6. Why wasn't the testing done at night after the band was dead?

7. Why would an Extra Class operator ignore all these factors and choose to cause deliberate and intentional QRM on a busy 20 meter frequency?

8. What documentation is available to prove that the response to the Notice of Violation was acceptable?

9. Was the Notice of Violation ever recinded or withdrawn?

10. Is not true that the Notice of Violation is now a permanent FCC record, verifying that AF2Y engages in intentional and malicious interference?

Just rememeber, I will post these "In your face" until you answer them truthfully!

With one VERY SIGNIFICANT improvement - it's 32 bit. And that can make
a difference - especially when the application itself is written for
32 bit environment.

Note that 146.56 *is* a standard frequency in areas that use 20 kHz
channel spacing. You need to know what's normal practice in your area,
since it isn't the same everywhere.

>GOOD ASSUMPTION
>

Whatever.

>
>Damn you cerytainly are showing your ignorance, 2nd Amendment, Free Speech.
>

Oops .... ya got me there. Of course, I meant the 1st amend.
I've been so concerned about the attack on the 2nd amend
lately that I accidently typed it when of course I meant the 1st.

But I still stand by my comments.

>Your just making a valiant attempt to
>repeat some liberty net drivel you've heard.
>

That's absurd. My opinions and beliefs do not come from,
nor depend on, the Liberty Net. I would still hold the same
opinions if I never heard the Liberty Net. This so-called
"drivel" that you refer to has often proven to be true.

> Give it a break - your losing your own arguement and don't even know why.
>

You wish!

>Yes but NOT TO "run others off of the frequency

Which they don't

>NOT TO use it for
>"newsgathering,

Since when are amateurs not allowed to discuss the news?

> broadcasting

What broadcasting? The net is not a 1-way conversation by
1 participant. Unless, of course, you're referring to
WA9KJI's "ghost-talking" and K5BLB's playing of jamming
tapes

>playing commercial news tapes,

Now THAT is a "gray area" to me. I honestly don't know
if that is "kosher" or not.

>running down the
>country.

Who's running down the country? Do you mean to tell me
that ham radio operators may not say ANYTHING critical
of their government or society? What are you, a communist?
Don't you remember what the hell the American Revolution,
Bill Of Rights, and The Constitution were all about? Are
you THAT anal-retentive?

>Who said anything about left wing? What does anything Jewish have to do with
>it?

Oh man, are YOU ever in the dark!! It would take too long
to discuss the Jewish control of "our" news media, publishing, etc. But if
you're curious, research it yourself
as I did.

>Your right there, that "So Called" liberty net certainly can not stand that.

It is the illegal jamming by those who disagree with the net
that the Liberty Net cannot stand.

> You've brought up the Jewish
>remarks in order to do what?

In order to try and EDUCATE folks like you who have
your head up your ass.

>Next time KNOW what you are talking about before you come in here with your
>propaganda. Get an *original* thought for YOURSELF - O.K.? You aren't very
>good
>at "repeating the proverbial "Party Line"

I kindly advise you to practice your above statement. Do
YOU have any "original" thought, i.e., a thought that hasn't
been force-fed to you by the "Jews media"?

I have seen your postings warning us about the attack on the
2nd amendment, and I congradulate you on them. However,
the attack on the 2nd amend is only a small part of what's
going on. I strongly suggest you actually INVESTIGATE
the claims and opinions you hear on the Liberty Net. I think
you will find that most of them are TRUE!

SB DX @ WW $OPDX.412
Ohio/Penn DX Bulletin No. 412

The Ohio/Penn DX PacketCluster
DX Bulletin No. 412
BID: $OPDX.412
June 7, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, K3BEQ, K5KG, N5PA, N6RT, K8YSE, CT1END, CX5BW, DJ5AV & DX News Letter, DL3GA, F6AJA & LNDX, G3SWH, G4BUE & DX News Sheet, GM0CLN, GU0SUP, HL1TMU, IK4MHB, IZ5AXA, JA3ART, JM1LJS, LA2PA, PS7AB, VK2ICV, VK4FW, YB4JIM, YT1MM and 5B4WN for the following DX information.

3XY, GUINEA (Look at this callsign!) The "LNDX" reports that Robert, F5MKA (ex-TL8GR) has received the licence and callsign 3XY1B0 (Three X-ray Yankee One Bravo Zero). He is reportedly active on 10, 15 and 20 meters mainly on CW. QSL via F5XX.

7Q, MALAWI. Alan, N5PA, will be arriving in Malawi on July 3rd and leaving on July 13th. He will operate as 7Q7PA and will be there during the IARU DX Contest on July 10-11th. QSL via his home callsign of N5PA.

CASTLE TO BE ACTIVATED. On June 10th, Mor/CT1AHU and David/CT1DRB will be active from Castle Terena - Alandroal, valid to Award DCFP Diploma Castle Forts Portuguese with reference C-002. Activity will be on CW/SSB and operators will sign homecall /P. QSL via their respective homecalls, bureau or direct.

CV5A DXPEDTION TO ISLA DE FLORES (SA-030) DELAYED! Pedro, CX5BW, informs OPDX that at the last moment they received a message from the Uruguay Army (their transport to the island) informing them that it is not possible to carry them to the island until June 18th. So, the DXpedition will be from June 18 to 21st. This means the CV5A activity must wait for 15 days. Pedro states, "Thanks a lot to all hams for the patient". Please refer to OPDX.411 for more details.

CW40, URUGUAY. The "DX News Sheet" reports that special event station CW40CCC will be active June 13-20th. Activity will be CW/SSB on 160-6 meters (including the WARC bands). This activity is to celebrate the 40th anniversary of the Centro Radio Aficionados Montevideo. QSL direct.

CY9, ST. PAUL ISLAND. Dan/K8RF and Doug/K4LT have just returned from their CY9RF operation after an exhausting trip fraught with both problems and good accomplishments! They originally planned a major operation with a group of six top notch operators to enter the CQ WPX CW Contest as a Multi-Multi entry. However, Dan and Doug entered the WPX CW Contest as a Multi-Single and made 4840 QSOs during the Contest, and another 1500-2000 QSOs before and after the WPX Contest. Their M/S score was some 14.4 Meg and it looks like a possible new M/S World record!. The complete story and press release will be sent to all OPDX InterNet Subscribers as an additional bulletin.

CY9, ST. PAUL ISLAND. If you missed the CY9RF operation here is a second chance to work CY9. Look for CY9SS to begin before or after the time you read this. Operators will be VY2SS, VY2CD, VE1PZ, K2NJ, VE9MY and VE9JW. From their latest press release, they will be on the island for 8 days. They are taking 150 feet of tower (and leaving some of it behind), two HF yagis (20-15-10 and 17-12), an R7000 and two 6M yagis. They will be running 1200 watts on 6 meters! Robby, VY2SS, states he will be taking his 91B again on this trip for HF. Also, they will take long boomers and stacks for 2m and 70cm. They plan to stretch a wire across the tickle to the main island for 160M and maybe some balloons as well. On 80m they will hang a loop over the strait between the two islands. They will be active on all bands 160m to UHF including all WARC bands, SSB, CW, RTTY, Satellite and EME. There will be a strong effort to work Europe on 6m. QSL CY9SS to VY2SS direct to call book address: R. Robertson VY2SS, RR#2, Bloomfield Stn., Prince Edward Island, Canada C0B 1E0
Bureau cards will be answered eventually, but Robby states he still has a couple of thousand to send out for the 1996 and 1997 operations. :-)

E4, PALESTINE (Update). It seems E4/OK5DX may have gone QRT. There has been no QSNs reported since May 30th. Also, the correct QSL information for E4/OK5DX is via OKDXF (OK1TN), not OK1YN as first reported in OPDX.411. Send cards to OKDXF (OK1TN), Bradlec 73, 293 06 Mlada Boleslav, Czech Republic or via QSL bureau.

E41/E44/4X DXPEDITION (Changes/Corrections). Hide, JM1LJS, reports that he has mistakenly given the wrong QSL Manger for one of his Palestine operations. The following correction is JL2XUN, not JL2UXN. So, the QSL information is as follows: 4X/JM1LJS via JL2XUN, E41/? via JL2XUN (*** West Bank Only) and E44/? via VK4FW (*** Gaza Only). Hide also mentions that his scheduled airplane flight was changed too. He will leave for his operation on July 25th (00:45 Local Time) and depart on August 2nd (17:30 Local Time).

F, FRANCE. The "LNDX" reports that operators F5LMJ, G0LMX/F5MBO and F6GIN will be active from Glenan Islands (EU-094) for the IOTA contest. They will arrive on July 23rd and they leave on Monday the 26th.

GM, SCOTLAND (IOTA operation). A team from Cockenzie and Port Seton ARC, near Edinburgh, Scotland, will be travelling to the Isle of Tiree (IOTA - EU008, IOSA - NH4, WAB - NM04), the most westerly of the Inner Hebrides, for the "1999 Islands On The Air Contest". The Team, comprising of John/ MM0CCC, Cambell/MM1AVA, John/GM7OLQ, Iain/MM1CPP, Malcolm/F5VBU, Ron/

GM0NTL, Mo/GM0HLK, Colin/GM0CLN and possibly one or two others are due to arrive on the island at approximately 0900z, July 23rd and plan to be active later that afternoon. Some activity may take place using the operators' own calls /P prior to the contest but most, if not all, activity will be restricted to 2A0CCC/P during the contest itself (1200-1200z July 24th/25th). Activity will be on 3.5, 7, 14, 21 and 28 MHz using both SSB and CW. A coastal site at Gott Bay on the eastside of the Island will be used once more and Fred Roe, GM0ALS, has again agreed to act as QSL Manager for the expedition. Info and updates will be available from the following Web site: http://www.btinternet.com/~john.innes/Tiree.html
ADDITIONAL INFORMATION: Tiree is some 10 miles long and 3 miles wide, and is skirted by the Hebridean Sea to the south and east with the Atlantic Ocean to the north and west. The island has no trees, as they cannot root against the severe winter gales, but it is famed for its spring and summer sunshine records and birds, flora and fauna not seen on the mainland. A flat crofting land, Tiree has only three hills above 300 ft with a coastline edged with long, windswept, shell sand beaches.

HL, SOUTH KOREA (IOTA operation). Wan/HL1TMU reports that he and members of Inha University ARC (HL0ZX) will be active as HL0ZX/4 from Pigum Island (AS-060, Chollabuk/Chollanamdo Province), June 22-26th. Activity will be CW/SSB on 10, 15, 20 and 40 meters. QSL via HL0ZX, Inha Univ. A.R.C., Yonghyun-dong, Nam-ku, Inchon, South Korea. Check out their Web Page at: http://www2.inha.ac.kr/~hl0zx
Comments and questions can be sent via E-mail to: hl0zx@www2.inha.ac.kr or hl1tmu@qsl.net

HS, THAILAND. There have been reports that Thailand's PTD has authorized HS stations to operate on 160 and 80 meters during any contests through December, 1999.

I, ITALY (IOTA operations). The "ARI Club of Lucca" informs OPDX that IK5AMB, IK5PWS, IK5VLS, IZ5AXA, IW5CFN and IW5AKR will be active from Montecristo Island (IOTA EU-028, IIA LI-015) on June 26-27th, as IA5/homecall. They will be on HF and VHF (50 and 144 mhz) bands CW/SSB. Their activation could be delayed until July 3-4th. QSL to home callsigns (direct or bureau).
Also, Carlo, I4ALU, will be active from Ustica Island (IOTA EU-051) as IE9/I4ALU from August 8-20th. Activity will be on all bands CW only. QSL via bureau or home callsign.

JW, SVALBARD. Leif, LA2PA, will be signing JW2PA for a week from June 18th to 25th. He will be located in Longyearbyen on Spitzbergen (EU-026). QSL to homecall.

KH0, MARIANA ISLANDS. The members of JARL Kyoto Club will be active from Saipan Island (OC-086) July 19th through August 2nd. The following operators will be active: N3JJ (JA3ART), AE4SU (JA3KWZ), K7IL (JF3PLF), N7EIU (JA3AJ), NH7V (JI3NST), KF8TW (JH3TXR), W8YAQ (JA3YAQ), JA3RR, JH3QNH, JH5IXG(YL) and JA3YAQ. They did not mention their KH0 callsigns, but operators will probably sign KH0/homecall. They plan to be active on all HF bands and 6 meters (mainly on the 12/10/6m bands). It was stated

that the possbility of activity on 160 meters is not "ZERO". QSL via to each CBA in JA, but it's all OK via JARL QSL Bureau.

OJ0 & OH0, MARKET REEF AND ALAND ISLAND (K7BV Update). Dennis/K7BV and the Finnish crew finished their OJ0 operation Friday, May 28th. Their totals from Market Reef were 0J0/K7BV - 6,000 QSOs and OJ0VR - 2,000 QSOs. In the CQ WPX CW Contest, Dennis operated as OH0Z and had 2,988 QSOs, 808 multipliers for a score of 5.8 meg. QSL via KU9C.

OY, FAROE ISLANDS. The "DX News Letter" reports that Stephan/DF6VU and Hubert/DL9YBY will be active until June 11 as OY/homecall/P. Activity will be on SSB and RTTY, on 40, 20, 17, 15, and 10 meters. QSL via homecalls.

PETER ON THE MOVE AGAIN (West Africa). Peter, ON6TT, reports that he will be going on a short mission to TU/9L/EL/XT/TZ. He will be in each country only for a very short while but would still like to operate a bit from each country.

QSL INFO AND NEWS.....
FO0AWI/FO0XUU QSL CARDS. Gerhard, DL5AWI, reports that the QSL cards for the Marquesas/Austral Islands should be mailed out in about 2 weeks. The first layout of the cards were unacceptable.

Michael, DL1GKG/HI3, reports that Karl-Heinz, DK2GP, is now his QSL Manager. QSL via the Bureau as well as CBA.

Doug, N6RT, reports that the following new logs are available on-line at: http://dx.qsl.net/logs
HL0IHQ/2 - IOTA AS-122 Paengnyong Island, May 1999
D99ARDF - South Korean Special Event Station, thru June 2, 1999
PW1S - 1999 WPX CW Contest, by PY1KS
DU1ODX - through May 27, 1999

Igor, YT1MM, reputes the information that "YU HAM are not able to get any QSLs and that YUGOSLAVIA is OFF-LINE" as stated by Ed, YZ7ED. Igor states, "The YU QSL bureau is alive and working (it is operated by Petar, YT1WW), and Yugoslav post office works properly, as letters for all countries in the world are regularly accepted, despite the present circumstances (and the letters DO arrive to their destinations, like Canada, UK, Japan etc.). My radio club (YU1EXY) receives LOT of mail, so I have first-hand proof for my statements. On the other hand, it is a well known fact that a number of countries (like USA, Great Britain and Germany, for example) simply suspended accepting any kind of mail destined for Yugoslavia since early April. Some other countries, like Japan or Hungary accept letters for Yugoslavia and such mail regularly arrives, with a slight delay."

QSL IQ5Z (CQWW '98, ARRL DX '99, CQ WPX '99) to QSL Manager IZ5AXA (direct or bureau).

QSL GU0WWW (which was active in the CQ WPX CW 1999 on 80 meters, from Isle of Sark IOTA EU-114) via 5B4WN: Marios Nicolaou, Box 4834, Nicosia

Cyprus. Marios states cards should be available in July.

MU2K was activated by the Guernsey Amateur Radio Society (GARS) during the CQ WPX CW contest last weekend. The callsign was used by GARS members together with a group of Belgians (also members of GARS) for this contest, and QSL is either to GU3HFN, or - preferably to ON4ON, who is handling the cards for this call.

RADIO SILENCE FOR YB'S. Akhmad, YB4JIM, reports that because of the election event in Indonesia, "all YBs stations will be signing off frequencies (radio silence) from June 1- June 11, 1999".

SPECIAL PREFIX/SPECIAL EVENT. Look for PS400NAT to be active and on the air until December 31st, to commemorate the 400th anniversary of Natal City, in Brazil. Activity will only be on 20 meters SSB. Rony, PS7AB, states, "Please, be patient because I have only a dipole antenna, and my English is bad." QSL via PY Bureau, or PS7AB, Rony Reis, PO Box 2021, Natal/RN, 59094-970, Brazil. For more details, check the Web page: http://www.qsl.net/ps7ab/pydx.htm

SV8, GREECE (IOTA operation). Phil, G3SWH, reports to OPDX that he will be on Mykonos Island (EU-067) again between June 16th and 23rd. He expects to be active as SV8/G3SWH on CW only on all bands 40-10 metres. He mentions that this will be a holiday operation, and he expects to be on the air for an hour or two during the mid mornings and early evenings. QSLs will be via the call book address or the RSGB bureau. ADDED NOTE: Phil states that his 5Z4LI QSL cards have arrived from the printers and he is starting to work through the pile of direct requests.

TM, FRANCE (French activities).......
Look for special event station TM5EUR to be active June 12-13th on all bands and mainly CW. Operations will be from the geographical center of "Euroland" located at Blancafort. QSL via F5IAE.

Look for club station F6KFI to be active June 7-13th as TM6ACO during the 34th LeMans Car Race. QSL via F6KFI.

A group of French operators will be active as TM5B from Fort Brescou (EU-148) from June 25-27th. They will be active on the IOTA frequencies. QSL via F5XX.

VK, AUSTRALIA (IOTA operation). Bill, VK4FW, will be active from the Queensland State (South Coast) Centre Island Group (Fraser Island, OC-142) late June 11th through June 14th. He will only have a R5 vertical and will spend most of the time on CW. Bill states the callsign will be the official Oceania DX Group callsign VK4YN. QSL direct to Bill Horner, VK4FW, P.O. Box 929, Gympie, 4570, Australia.

VK9L, LORD HOWE ISLAND. Nick, VK2ICV, will be active here as VK9LX from October 24th-November 2nd. He will be active in the 1999 CQWW SSB Contest as a Single Op/All Band entry. QSL via P.O. Box 730, Parramatta 2124, NSW Australia. There will be all bands pre-contest activity. Send comments and questions to Nick's E-mail address: vk9lx@qsl.net

YOu are probably correct about that. In the area I am in it is
still 15 khz and I forgot about other areas. Even when there are
standards, they are not standard in all areas.

I heard all that. Tiny Tim tried despirately to answer but ZU was not
listening. It was quite apparent that K5ZU's only purpose was to
interfere. As bad as the Liberty Net folks may or may not be, the
jammers are far worse.

The marine radio services as commercial services tends to transmit as
much as possible information in the shortest possible time. So they use
faster ways to transmit the bulletins. They use satellites for example.
Do _you_ want instead of the code test any questions like:

"Explain detailed different methods to stabilize a satellite system in
the right direction relative to the earth!"

> Hopefully in 2001 the requirement will be totally removed
> from the ITU regulations. Many people site the requirement keeps out
> the bad people. If that was true then the VHF bands and above would

Oh, boy. You seem to know very few repeaters...you should have heared
the rep. on the Zugspitze mountain here in Bavaria...

> The fact of the matter is that the
> majority of people that are no code tech's are not bad operators. I
> would say that 95% are good operators from personal experience.

Maybe 95% of the op's, which you know?

> We can no longer justify CW as a requirement for operating a
> ham radio station.

What about a test in packet radio?

"Explain the exact function of a poll bit in ax.25 protocol!"

"Is the crc checksum built over the complete packet including the frame
header or only over info content?"

Hwsat?

cu, Ralf

Will White <wcw@asu.uswest.net> wrote:
>Why not just eliminate all code tests altogether?

1. Because any frequency you choose on HF is a CW frequency.
2. Because about 50% of the HF QSOs utilize CW.
3. Because it's the only mode almost all the world's HF-licensed hams have in common, and as communicators first and foremost, we should all have at least one common mode.

Something happened working on antenna coax installing a new connector. Radio doesn't transmit with much power (only milliwatts) now! Don't have a clue what happened!

I can hear a clear, good sounding audio signal being transmitted if I monitor with another receiver close to the transmitter, cannot hit any repeaters however. The SWR-Power bridge shows no power out (2M). Using the same coax and antenna I can transmit fine with the HT.

Did the final go or is it something else? The radio acts like it's transmitting, just NO power. The final is a Toshiba S-AV17. If the final is bad, can it be bought somewhere other than Kenwood (big bucks)?

Thanks for your help,
Vic / KE4QJK

You damn liar, KK7HO!!! You have NO idea who I am. But if I EVER run into you, I'm gonna slap you silly, just for being the lying bastard that you are!!!

I HAVE IT ON TAPE!!! K5MVK had the frequency and turned it over to Vic very graciously!!! And Vic, very graciously, thanked Don!!!! It was one-half hour later that Monkey Vomit had a Prozac reaction fantasy and decided HE had the frequency!!!

Are you Clinton's "Lying Tutor", KK7HO???

Jack

Message-id: <19990606160157.06131.00001627@ng-cf1.aol.com>

I answered you. I have a lady freind and what me and her do is none of you darn business!
***Did you say a "freind?" What the hell is that? Did you mean FIEND? If you meant FRIEND, you can't spell a lick. "Me and her do?" This is an example of education wherever you're from? It's "I and she" you idiot. So now we know you're not only fruity but a dopey one at that. I'm worried about you Lloyd. Tell me about this church dating to which you alluded a while back. I thought going to church was for praying, not playing but maybe your Born Again cult does things differently? At any rate, I still think you and K2SAG, that neo-Nazi momma's boy from Hicksville, NY have a very warm relationship going and I wish you two much happiness. I gotta be blunt. Is your lack of interest in women predicated on homosexuality or are you straight?. Don't get me wrong-I have nothing against gays and I'd never disparage against them, therefore if you are, come out of the closet and be a man about it. If not, then I suggest you do what any NORMAL 25 year old man would do--put down your photos of Hitler and his henchmen and get with the program ,if you get my drift,
AF2Y,Doc*********

If I want to listen to SW on the weekends, while she has to work, and we cannot date.

This is my last answer about my life, your ONV is public knowlegde and shall be addressed!

"My ONV from Kingsville Texas was due to my excessive testing for TVI and RFI. They claimed it was about 40 minutes but I can't be sure of it. I must therefore accept their statement as fact. I was running a tape and identifying every ten minutes. My TV and phone in question were upstairs and during the testing,which would have accomplished NOTHING on a dummy load, I was busy putting toroids on the TV's AC cord as well as a K-Com filter on the phone. And that was the whole ball of wax. I replied to Tom Shirley at Kingsville and since I heard nothing more about the incident. common sense told me my resply was acceptable."

1. Why was a busy frequency on 20 meters (14.313) chosen as site for this alleged testing?

2. Why was a frequency chosen that was already occupied by members of The Better Amateur Radio Federation?

3. What was the purpose of playing a pre-recorded tape of Adolf Hitler?

4. Why wasn't the frequency checked for activity and possible interference when the station identification was given?

5. Why were the pleas of stations trying to use the frequency ignored?

6. Why wasn't the testing done at night after the band was dead?

7. Why would an Extra Class operator ignore all these factors and choose to cause deliberate and intentional QRM on a busy 20 meter frequency?

8. What documentation is available to prove that the response to the Notice of Violation was acceptable?

9. Was the Notice of Violation ever recinded or withdrawn?

10. Is not true that the Notice of Violation is now a permanent FCC record, verifying that AF2Y engages in intentional and malicious interference?

Just rememeber, I will post these "In your face" until you answer them truthfully!

****Folks, what you are about to read from N0VFP will convince you that he should be institutionalized. The man's a basket case! AF2Y,Doc********
The following was heard on SW 5085.0 kHz this afternoon ...

This is mighty scary business folks, and it took the conscience of a turncoat insider to paint a graphically real picture of what many of us have known was going on behind our backs all along.

Enjoy that radio, because we may soon be the only group of people capable of receiving any radio signal at all ... let alone the facts.

Read on ...

In the spring of 1997, Professor Ian Stewart, met with "Mr. Sea" (real name known but withheld) to discuss what he has learned first-hand about the coming persecution at the hands of the New World Order operatives.

With a seven-inch thick portfolio filled with photographs, news articles, correspondence, etc., Mr. Sea revealed disturbing information about New World Order efforts to destroy and enslave America.

The following are some of Mr. Sea's comments. But first, let's take a look at the man who made the comments.

Mr. Sea, a committed Christian, is a former inspector for the Joint Chiefs of Staff and the Department of Defense, with 31years of federal service in the military, nine with the Department of Defense, including two years with the Air Staff.

He's a holder of the Bronze Star, the Purple Heart, the Defense Meritorious Service Medal, three awards of the Joint Service Medal, all of the Vietnamese awards, as well as the Joint Meritorious Unit Medal.

When he retired a few years ago, he was awarded the Secretary of Defense Civilian Service Medal. He's been around the world to 31 countries on four continents, and speaks five languages.

Mr. Sea spoke of the coming American Holocaust of the Government's plans for dealing with individuals opposed to the New World Order movement.

He spoke of the infrastructure that has already been set up to incarcerate and execute Americans, and the locations of the facilities that will be used for these purposes--all with photographs, leaving little to the imagination.

An interview with Mr. Sea regarding New World Order plans for the U.S. and its citizens "The infrastructure is set up.

There are at least 130 concentration camps, quietly modified facilities which have sprung up and continue to spring up across the country, seemingly devoid of activity, yet requiring strange accoutrements such as barbed wire-topped fencing (with the tops turned inward) and helicopter wind socks.

Most have good logistical supportability, with major highways and railroad transport facilities adjacent to the sites.

"These facilities, many in remote areas across our country, are set up to become concentration /detention camps, complete with gas chambers, for resisters and dissidents. Generally speaking, they're set up for dissenters who will not go along with the New World Order".

The "resisters" are gun owners who refuse to give up their weapons; the "dissidents" are Christians, Patriots and Constitutionalists.

"These camps are set up and functional. I've seen many of them".

"On August 6, 1994, I toured the Amtrak Railcar Repair Facility at Beech Grove, Indianapolis, Indiana. There are at least ten maintenance barns at this facility, covering 129 acres, with two separate fences with their rooftops leaning inward. The windows of several buildings have been bricked up".

Hence, you have three levels of security for Amtrak repair barns!

"There are three helicopter 25-knot aviation wind socks (which aren't the correct ones to use for chemical spills which require 10-knot wind socks).

There are high security NSA-style people turnstiles, and high intensity/security lighting for 24-hour operation.

The box car (gas chamber) building fence is marked with special "RED/BLUE Zone" signs [visible in the photo]. This corresponds to the "mission" of the RED/BLUE Lists which surfaced in June and July of 1996.

"Under martial law, this will become a death camp. They're only going to handle category one and two (RED and BLUE) people there. This box car facility will be used for execution".

"One of the barns is large enough to put four box cars into. There are powered vents on the top of the barn to vent the gas out of the building after the box cars have been fumigated. All of the buildings have newly

installed six-inch gas pipes and furnaces installed in all "railroad barns."

Since the photo was taken in August 1994, FEMA has allocated $6 million to make the walls and roofs of the buildings "airtight." Under martial law, this facility could be immediately used as an SS-style "termination" gas chamber. "On January 27, 1995, The Indianapolis News ran an article titled, "Amtrak Lays off 212 at Beech Grove: 170 Lose Jobs at Maintenance Center Today." Why perform $6 million worth of renovations, and then lay off 212 people?

Because the people doing the final executions will not be Americans. Thus, the "slots" of the 212 will be filled with non-Americans.

"They'll hire foreigners for this "cappo" task. Cappo ("chief" in Italian) was the title of the trustee prisoners who actually killed many Jews for the SS butchers at Dachau, and at other Nazi crematoria across Europe".

"The news article also said, " . . . hopes the yard may be able to solicit work repairing private train cars, and perhaps subway cars from Washington, DC, or other urban areas".

The repairing of private trains is a dead giveaway to death cars!

"The article went on to say, "Late last year, Congress ordered Amtrak to spend at least $5.9 million patching holes in the roof and fixing masonry on the walls of the giant machine sheds at Beech Grove."

These buildings have been "sealed." They're airtight. The facility is constructed to allow gas to be blown into all the buildings via the newly installed, two-story, hot air heating furnaces."

Next, Mr. Sea elaborated on the two categories, the RED and BLUE Lists, and what they mean:

"The RED List is for pick-up and execution before unobtrusive preparations for martial law are initiated. The BLUE List is also for execution, but at a later date within six weeks of martial law declaration.

There are no "re-education" plans for either category--just execution.

"When you get picked up on a RED pick-up, they'll take you from your home at night -- probably around 4 a.m. -- and put you in a black van, then drive you to a helicopter waiting to fly you to an intermediate point.

There, you'll be loaded onto a big 64-passenger CH-47 Chinook helicopter--all black, unmarked and illegally operating under the Treaty on Open Skies. Then they'll fly you to one of 38 cities where you'll board a 747, 737, or 727.

You may be taken straight to a temporary detention facility. When you're RED listed, you'll be taken to a red camp. Then you'll be executed.

"At some point, martial law will be declared. (Martial law is when the writ of Habeas Corpus--to have a trial by jury--is suspended. Instead, of going to the judge, you go straight to jail for a limited time,) I suspect there will be a major outage, or some other crisis which will be the reason to declare martial law".

At this point, the BLUE listed people will be picked up. At that time, the country will be regionalized into ten sections, which are already designated by FEMA.

"Be advised that it has been proven (in Wyoming and at least one other location) that the black choppers have state-of-the-art radio (RF) frequency wideband jammers, and can jam cell phones and CBs while they're executing black operations missions (i.e., in your area).

This means that your cell phone could be jammed just before and/or during any action against you.

"In June of 1996, an FBI agent got hold of the Region Three BLUE List (from a CIA agent), and found his own name on it, and those of several others he knew in Virginia.

The Regional BLUE List stated that the names on the BLUE List would be picked up "within six weeks of the actual martial law declaration."

"This parallels the Nazi RED/BLUE List policy almost to the letter. The parallel Nazi plan was published by Heinz Hohne in his 1966 book, The Story of the Nazi SS: The Order of the Death's Head. People say, "It won't work".

But it will work if the 300,000 Soviet troops which are ALREADY HERE can get the guns.

The name of the game is to blackball the people to get the guns . . . make the militia look bad, make guns look bad, make everybody give up their guns. Once they get your gun, they've got you, UNLESS you've got the angel of the Lord at your door.

"The ones doing all of this are operating out of the highest places in the Federal Government. They're cooperating with "spirit guides and mediums" and using astrology and numerology. The spirit guides are telling them what to do, and the entire thing is being orchestrated at the highest spiritual levels. Every base has been covered. They've thought of everything.

If you notice, they often do things on the 13th of the month. Mr. Clinton does a lot of things on the 13th. On September 13, 1993, the brokered Israeli-PLO peace accord was signed. He waited 14 days, until September 13, 1994 to sign the Crime Bill. On June 13, 1995, he stated he'd veto the national debt authorization ceiling. On November 13, he did veto it. On January 13, 1996, he made a speech to Bosnia.

"There will be an interim of probably just days from the time they launch the RED List, to the declaration of martial law when they'll start coming after those on the BLUE List. It'll work the same way it did with the Nazis who had a list of people to pick up, on June 30, 1934, before they declared their "mobilization".

"It's the same blueprint being used because it's the same spirit leading the Fourth Reich as led the Third Reich. In Germany, they used trains, here it will be helicopters and 747s".

When Hitler was villainizing the Jews, he hired thugs and dressed them in black uniforms. He was building concentration camps and setting up a transport system.

"In this country, they're now in the process of villainizing Christians, Patriots, Constitutionalists, and outspoken talk-show hosts, etc".

"Who will be doing the actual picking up?
Foreign "cops" (United Nations Internal Security Forces).

Over 30 foreign military bases under the United Nations flag are already set up in the US., all with the approval of special appointees in high Federal positions.

These bases are already manned with over ONE MILLION troops from Russia, Poland, Germany, Belgium, Turkey, Great Britain, Nicaragua, and Asian countries.

Why are they here? Because unlike our own troops--many of which along with the Guard and Reserve of 24 states are being deployed overseas--will have no qualms about firing on U.S. citizens when the time comes.

There are more than 2,000 Russian tanks, military trucks and chemical warfare vehicles just outside Gulfport, Mississippi. They began arriving in January of 1994.

There are 180 foreign troops at Fort Reilly which was confirmed to me by a Brigadier General. There are 300 who came into the Birmingham, Alabama airport on a big white Russian cargo plane on December 13, 1995.

As of 1995, there were 10,000 plus foreign troops at Fort Chafee, Arkansas reportedly making preparations for 20,000 "detainees".

"Also in 1995 at Fort Polk, Louisiana (U.S. Army Post), Russian and Eastern European troops were deployed under the U.N. flag.

[When questioned about this, the legislative aide of the congressman who resides over Fort Polk, stated, "Yes, they were there undertaking broad, joint training exercises. And, yes, the U.N. flag was flying. There may still be some there today."]

"At the Aberdeen Proving Grounds, there are many Russian tanks. One of the NCOs told his father that he'd been maintaining them. "This is going on all over the country. German troops are known to be at Holloman Air

Force Base in New Mexico, Wright-Patterson Air Force Base in Ohio, and Fort Hood, Texas.

Chinese troops are known to be at the Long Beach Naval Station in California.

"There's not going to be some future event when the invading troops are going to show up. They're already here! When martial law is implemented, these foreign U.N. troops will be policing our country, carrying out the plans of the New World Order".

1. Why was a busy frequency on 20 meters (14.313) chosen as site for this alleged testing?
IT WASN'T BUSY. IT WAS AS EMPTY AS YOUR HEAD AND FURTHERMORE I LIVE ON THAT FREQUENCY WHICH IS A DAMN SITE BETTER THAN LIVING IN ATHENS ALABAMA****
2. Why was a frequency chosen that was already occupied by members of The Better Amateur Radio Federation?
****THE BARF STANDS FOR "BIGOTED AMATEUR RADIO FACISTS" not the Better Amateur Radio Federation. I GUARANTEE NO ONE WAS ON FROM THAT GROUP BECAUSE THE FREQUENCY SMELLED CLEAN.*******
3. What was the purpose of playing a pre-recorded tape of Adolf Hitler?*****IT WAS A TAPE OF HERBERT SCHOENBOHM DOING A ROUTINE ABOUT HOLOCAUST TRIVIALIZATION WHICH COME TO THINK OF IT WAS THE SAME AS ADOLF HITLER*********
4. Why wasn't the frequency checked for activity and possible interference when the station identification was given?****THE JAR WAS EMPTY! ZILCH. NADA.WHAT MAKES YOU BELIEVE THE FREQUENCY WASN'T CHECKED? I ALWAYS CHECK FREQUENCIES. SOMETIMES I GET UP AT THREE 'O CLOCK IN THE MORNING TO CHECK FREQUENCIES. THE OTHER NIGHT MY WIFE AND I WENT OUT TO DINE IN A POSH NEW YORK RESTUARANT ON 38th STREET AND I LEFT AT NINE O'CLOCK TO CHECK A FREQUENCY AND THEN DROVE BACK TO FINISH MY MEAL.*******

5. Why were the pleas of stations trying to use the frequency ignored?****YOUR SPELLING IS WRONG AND SO IS YOUR INTERPRETATION. THEY WERE YELLING,"PLEASE USE THIS FREQUENCY>*********

6. Why wasn't the testing done at night after the band was dead?****WHO SAID 20 METERS WAS "DEAD" AT NIGHT?BESIDES,I AM MORE ENERGETIC IN THE MORNINGS AND RUNNING UP AND DOWN A LOT OF STAIRS FROM THE FAMILY ROOM TO THE BEDROOM TOOK A LOT OF ENERGY. BUT THEN AGAIN IF I LIVED IN A LOFT AS YOU DO WITH SAWDUST ON THE FLOOR TO ABSORB THE STINK, I COULD HAVE TESTED AT NIGHT>*******

7. Why would an Extra Class operator ignore all these factors and choose to cause deliberate and intentional QRM on a busy 20 meter frequency?***TO FIND THAT OUT I SUGGEST YOU ASK AN EXTRA CLASS OPERATOR WHY HE WOULD IGNORE FACTORS AND CAUSE DELIBERATE AND INTENTIONAL INTERFERENCE ON 20 Meters****

8. What documentation is available to prove that the response to the Notice of Violation was acceptable?
****IF IT HADN'T BEEN, THE FCC WOULD HAVE COME DOWN ON ME AS THEY DID ON KV4FZ. I WOULD HAVE HAD TO PAY A FINE AND THEN TRIED TO LIE MY WAY OUT OF IT BEFORE JUDGE LUTON.*******

9. Was the Notice of Violation ever recinded or withdrawn?
****NO,IN FACT IT'S NOW BEING MADE INTO A MAJOR MOTION PICTURE STARRING TOM HANKS*****
10. Is not true that the Notice of Violation is now a permane
Just rememeber, I will post these "In your face" until you answer

truthfully!
****YOU GOT ME. IS NOT TRUE A PERMANE AND IN YOUR FACE TOO******Doc,AF2Y

Howdy Victor....although it could be other problems, the most likely one is your suspicion that the final is gone.....if you have the service manual and access to a wide bandwidth scope or VHF/UHF RF microvolt/millivolt meter you can check stage gains up to and past the final block.....that would just confirm. Not sure about the aftermarket supply though I do see adverts for some of 'em.....RF PARTS might be one company to try (QST listed I think and on internet).

KK7HO
Well in so many terms I guess I am! I have to say I don't always agree
or do I approve of the so called conspiracy theory. I will say that I
beleive that under the First Amendment to the Constitution, and section
236 of the Communications act of 1936 they have the right to express
their ideals. Part 97 says that they can do it without being jammed! So
regaurdless what you say they have the right to talk about what ever
they like and I have the right to disagree or agree with what they are
saying. So I ask my question again why does Dr Hate find it nessacary
to jam 3.950 and then talk about how other should lose there license. I
do not understand this action. The First Amendment also allows me to
disagree it alsotells me that I have a choice in the matter. So I'm
afraid no matter what the reason those who jam 3.950 net are wrong.
I will defend the Constitution Of the United States to my last
breath. I said a oath to that fact on January 17,1979. I can't beleive
you guys. Its OK for you to have a opinion and Its ok for you to express
that opinion but its not ok for anyone else to have a opinion that is
different then yours.
So I ask the question again Why does Dr Hate Have to play Beach Boy
music on 3.950. That is illeagal.

>"JohnDoe@my-deja.com" type addresses in the sender field.

I don't think so... not if someone really wants to determine who sent
some post or did some activity.

When you connect to any hotmail or dejanews type service, you have to do
so from _somewhere_. All these sites log the 'remote' IP address where
a given connection to do some operation was made. Its trivial to determine
the 'owner' of the block which the IP is in, or the domain the connection
was made from (usually an ISP or a customer of an ISP). Then its just
a matter of checking logs to see who was using IP xxx.xxx.xxx.xxx at
the specified time, and determine what account was used at that time.

The account holder _is_ responsible for what activity originates from
a given account (read the AUP on virtually any ISP). So the argument
"Joe Foo who I dont know how to reach" was using my account at the time
doesnt wash, either (common excuse I encounter when someone is caught
commiting some net.abuse of one kind, or another).

You might get lucky, and be able to route thru some site that doesnt
keep logs, or doesnt know how to interpret them, but its odds I wouldn't
want to bet my freedom on.

Forget using any ISP account, then connecting to some third party service
such as dejanews, etc to hide from accountability for ones actions.
One does no-no stuff like issue threats, or subsequently harm someone
one has had a beef with, the logs will provide a very clear trail to those
with a possible motive. The net is not a good way to shield oneself from
accountability for their actions.

I have the following manuals.
Found in garage clean-up, not needed by me.
They're yours for mailing costs, or pick up in
the S.F. Bay Area. Please respond via e-mail or
contact me at 510-790-1034. Remove the
spaces & CAPS for proper e-mail address.

d a v e n c i n DONT@SPAM ME t d l.c o m

Manuals are as follows:

PYE TVT (Phillips) Sound-in-Sync TV transmission
device, model LDM-1801. 1972 vintage.

Amber 3500 Distortion & Noise measuring set
1981 vintage

Harris Corp. MS-15R Stereo generator
1977 vintage

Hewlett Packard 141A Oscilloscope
Serials prefixed 547... 1965 vintage

Hewlett Packard 1424A Sampling Time Base
Serials prefixed 740... 1967 vintage

Hewlett Packard 8551B Spectrum Analyzer RF section
Serials prefixed 905... 1969 vintage

Hewlett Packard 8551B Spectrum Analyzer RF section
Serials prefixed 613... 1966 vintage

Hewlett Packare 851B Spectrum Analyzer Display Section
Serials prefixed 526... 1965 vintage

Heathkit TD-1006 Color Organ

Heathkit TS-1630 Speaker column

Heathkit TA-1620 Sound Control Projection Amplifier

And some vintage stereo stuff:
Dual 1219 turntable
Harmon Kardon CAD4 Cassette deck
Teac A-7010 Stereo tape deck.

Let me know if you can use any of these.

549. Regarding AF2Y's Notice of Violation

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-06 00:00:00 UTC
From: n0vfp@aol.com
Message-ID: <19990605230049.13721.00001345@ng-fv1.aol.com>
Source record: 140546

"My ONV from Kingsville Texas was due to my excessive testing for TVI and RFI. They claimed it was about 40 minutes but I can't be sure of it. I must therefore accept their statement as fact. I was running a tape and identifying every ten minutes. My TV and phone in question were upstairs and during the testing,which would have accomplished NOTHING on a dummy load, I was busy putting toroids on the TV's AC cord as well as a K-Com filter on the phone. And that was the whole ball of wax. I replied to Tom Shirley at Kingsville and since I heard nothing more about the incident. common sense told me my resply was acceptable."

1. Why was a busy frequency on 20 meters (14.313) chosen as site for this alleged testing?

2. Why was a frequency chosen that was already occupied by members of The Better Amateur Radio Federation?

3. What was the purpose of playing a pre-recorded tape of Adolf Hitler?

4. Why wasn't the frequency checked for activity and possible interference when the station identification was given?

5. Why were the pleas of stations trying to use the frequency ignored?

6. Why wasn't the testing done at night after the band was dead?

7. Why would an Extra Class operator ignore all these factors and choose to cause deliberate and intentional QRM on a busy 20 meter frequency?

8. What documentation is available to prove that the response to the Notice of Violation was acceptable?

9. Was the Notice of Violation ever recinded or withdrawn?

10. Is not true that the Notice of Violation is now a permanent FCC record, verifying that AF2Y engages in intentional and malicious interference?

Just rememeber, I will post these "In your face" until you answer them truthfully!

From: Graham Selley <grasel@vianet.net.au>
Message-ID: <375A1002.F813DF2C@vianet.net.au>
Source record: 140551

Hello

I am trying to improve my mono-bander, and in so doing with antenna design programs the load impedance has dropped to around 15 ohms from about 34 ohms, does anyone know if I can still use 50 ohm feedline if I use a 4:1 balun to take the load's impedance up to around 60 ohms? By the way the antenna has a split driven-element and is currently fed with a 1:1 balun, swr is around 1.48 to 1.6:1.

I look forward to any replies thanks

Graham Selley

555. Re: Mr. Hollingsworth and The Liberty Net

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-06 00:00:00 UTC
From: Trebb@webtv.net
Message-ID: <8905-375A1A82-6@newsd-243.iap.bryant.webtv.net>
Source record: 140552

As an oldtime ham radio operator (W4ASX) who just happened to run into the Liberty Net years ago, I take exception to Mr. Hollingsworth's reported actions.

Most communications today on ham radio can be done elsewhere like on Internet. Two meters and above can easily be done by cell phone or telephone. Still, Mr. Hollingsworth isn't questioning others similarly. Ham radio operators stand in no different position than other Americans if advocating overthrow of our government. It is always an illegal no-no!

In my view, the Liberty Net represents the essence of ham radio (justice, discussion, education, communications) in a free society. Just listen to inane patter on ham radio and petty hostility. See it too here on Internet, and you'll gain an appreciation for the erudition exhibited on Liberty Net. There, we have scholars, some of whom do tremendous research on their presentations.

It is outrageous to couple charges of interference, which may very well be legitimate, with questioning the scope and purpose of Liberty Net. The latter puts all the allegations at issue, focusing the spotlight not on the Liberty Net but on the actions of Mr. Hollingsworth in his express position as "legal advisor."

What is the extent of authority of anyone who is not a goverment official but a legal advisor? After all, each of us can be an advisor without assuming the authority of officialdom!

As hams, we deserve to know whether his pronouncements can be imputed directly to the FCC. Or are they deniable as official authority? Seems to me that this is Big Brother because we hams can not know whether this is passing fancy or officially and immutably FCC. Obviously, while there is good reason to tighten up on ham radio, arbitrary policing smacks of tyranny, not democracy.

There was a corollary in the 50's when, faced with a genuine threat from the "Iron Curtain," a Senator name McCarthy ruined many an innocent human being with outrageous allegations. I know that when push comes to shove, we tend to panic. But I suggest, in cleaning up ham radio, haste makes waste. Determing the scope and purpose of anyone on ham radio was never intended by Congress to be this kind of license for impugning character.

Though I haven't been on the ham radio airwaves for a long time, I am saddened to read of this current development.

556. Siemens FDD100-8 power pinouts?

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-06 00:00:00 UTC
From: petcrows@bigfoot.com
Message-ID: <3759ee2b.40477501@news.ieighty.net>
Source record: 140553

Greetings,

I am hoping some fellow ham out there may have the info I need, as follows...

I have some 8" disks I would like to read once and for all, and I want to get my old Siemens FDD100-8E 8" drive working.

The info I need is the pinout values for the power connectors. I believe I have the pinout for the edge pins to hook up to a PC floppy controller, but I need to know the values for the power connectors. Here is a description of the two connectors:

A 3 pin connector that hooks up to the motor, with black&yellow, green&yellow, and purple wires.

A 6 pin connector that is mounted on the circuit board for the drive. On the back side of the connector is a J2.

I believe the 3 pin connector powers the drive motor, and the 6 pin connector powers the drive processing functions.

Do you happen to know that the proper voltages are for these two connectors?

This is true. However, many owners of "public" internet terninals don't make any effort to control access at all. So, if someone wanted to track a post to the individual who actually made it, they would have to be very lucky. There would be no record of who was using the terminal at the time the post was made. Now, these public terminals with uncontrolled access are few in number, but a motivated person would have no trouble finding one in a fairly large city.

Not to mention the fact that falsifying the data the user provides to the
owner of public terminals is not hard to do, and none of it is verified.

That's fine, if you aren't ever going to *use* CW. Waiver or no, if you learn the code at 5 WPM, getting past 10 WPM later is going to be a bear for most people. So, I think that a 5 WPM test is likely to result in *fewer* ops using CW in the long run. Why not just eliminate all code tests altogether?

It will still be basically horizontally polarised as the main radiation is
from the centre of the dipole, the ends don't radiate much.
The same thing was done here about 20 years ago with 5ft helically wound
fibreglass whip antennas. With some fiddling and 6 whips, a shortened 3el
10m beam was made and it worked very nicely indeed.

>So maybe the prices need to run up another 5 to 10 percent for next year.
>It's possible to make more money on less sales (and incuring the cost of
>getting them...).

Let me get youe theory stright. If DARA raises ticket prices to maybe lets say $100 each, and Vendor spaces to, lets say $500 a space, then the remaining vendors can charge perhaps $1000 for a $300 HT and DARA will make even more money from the 500 idiots who come all the way across the country just to pay more for something than they can mailorder it for. Do I have it stright?

There was no BIG line waiting to get it. I will only move a lot of stock all the way to Ohio, if I can make money doing it. The price of my used items can not exceed new items. There may be only a limited amount of Micky Mouse, but my items can be bought all over the country at compeating hamfests. People MOSTLY come to hamfest to get a good deal, when that stops, you can have programming out the wazoo, and they will not be there. I sell used gear to pay for my own radio habit and to make a small (very) profit. When that ceases don't exspect to see me a Dayton.

Pat Myrto
I would think if the FCC just like any law offical would have the right to use any means nessacary to gather information. If the FCC where to come into this news group they would surly get alot of information on the attitudes of people and styles of there jamming. If the FCC where to look into this newsgroup they would get a good idea on who is Jamming the Liberty net just by the comments like the idoit useing the lucent proxy saying he is trying to shut the Liberty net down. Also hidding behind the proxy will not protect that fool. All the FCC has to do is file the proper papers and his identy is known, So I do beleive that the FCC can and will use any means nessacary to gether intelligance. I still say this so called crackdown is a farce.
Thats just my opinion I could be wrong.

579. Eight-Year-Old Elmers Directory Needs Elmers!

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-07 00:00:00 UTC
From: pschleck@novia.net
Message-ID: <ibY63.29980$OL.718086@newscene.newscene.com>
Source record: 140276
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.antenna,rec.radio.amateur.digital.misc,rec.radio.amateur.equipment

As readers of the rec.radio.amateur.* newsgroups are probably aware, I maintain a periodic information posting known as the Amateur Radio Elmers Resource Directory (aka the "Elmers List") which provides a list of net Elmers, indexed by topic, and their E-mail addresses. (For users of threaded newsreaders, this article is linked to the base article of the Directory itself). You may also access the Directory at:

http://www.novia.net/~pschleck/elmers/

The Amateur Radio Elmers Resource Directory is 8 years old as of March of this year. In order to maintain its value to the net, I have strived to keep it accurate and up-to-date. In addition to reviewing the currency of the entire Directory every 2 years, I am constantly scouring the newsgroups for new Elmers to join the Directory.

There's always been an implicit invitation for any qualified person to join the Directory. However, since I've lost the half of the Elmers listed due to attrition from the last biannual mass-ack (i.e., no response at their last-known E-mail addresses; the 50% attrition rate seems to be fairly predictable based on the last few mass-acks in recent years), I felt the need to send out this explicit invitation. I'd like to replace the lost Elmers with new, motivated, quality Elmers from the net. Areas of expertise that are most desirable for the Directory right now include:

- Any expertise from residents of states, provinces, and foreign countries not currently represented
- Advanced homebrewing techniques (surface-mount, VLSI, DSP, spread-spectrum, etc.)
- TCP/IP Packet Radio and Gateways/Internetworking (particularly local IP coordinators and/or subnet managers/operators/leaders)
- Amateur Satellites/Space Operation (particularly Microsats, SAREX, and ARISS)
- Amateur-related Software for Unix/PC/Mac/Amiga/Psion/HP-95/PalmPilot
- College Clubs and organizational guidance/strategies
- Boy Scout Amateur Radio Merit Badge Counselors
- Unix/Linux/X-Windows programming and configuration
- Amateur Radio Organizational Contacts (I am especially looking for contacts for the ARRL Field Organization, GRAPES, AMSAT, QCWA, QRP Int., NARA(?), QRZ, CSVHFS, LAMBDA, ARES, RACES, FEMA, NACEC, any state OES or EMA, as well as any regional frequency coordinating body)
- Band, Mode or, Brand-specific equipment (actual manufacturer or dealer contacts would be quite welcome, as long as they reveal their affiliation and at least provide *some* free services)

- Maintainers of unique amateur-radio-related anonymous File Transfer Protocol (FTP) sites and World-Wide Web (WWW) Home Pages (as opposed to those that are substantially a rehash of, or pointers to, existing sites).
- Maintainers of unique amateur-radio-related mailing lists
- Editors/contacts for amateur-radio-related publications

Although expertise in any other area would, of course, be welcome also.

I'd like to emphasize that participation is totally voluntary, with very minimal obligations (1 or 2 polite inquiries a month, if feedback from existing Elmers is any indication). If you find that it is too much work, you are welcome to bow out, no questions asked. You don't even need access to netnews, just a reliable E-mail address.

If you'd like to volunteer, please go to the following Web-based registration form:

http://www.novia.net/~pschleck/elmers/register.html

I've got an old Canadian Marconi transmitter\receiver in good condition

with
headphones, wire antenna etc. Top half of this unit is the
receiver\transmitter,
and the lower half has a mostly empty storage area where speaker is
mounted in
back right hand corner. Just up from it is the cw key. The unit has a
canvas cover
with a snap on straps. Someone once told me this was used in a Lancaster

bomber. I'm looking for any additional info for this set. Approx value
would be
appreciated. There is a metal tag on front cover with some info.

NAL: Notice of Apparent Liability. It is a notice from the FCC saying that apparently you have done something that you were not supposed to do.

In this instance, there is nothing apparent about it. Mr. Hollingsworth has the guy cold. The NAL is just being nice when the best thing to do would be to rip his license off the wall; pile his gear up in the front yard and run over it with a bulldozer; pull down his antennas; and prohibit him and his offspring from ever touching anything other than a TV remote for six generations.

But, because the FCC is made up of nice guys, he will probably get away with a $10,000 fine.

Of course not! I equate *some* contesters with willful interference.
Often, I have had a QSO going when a contest started. Many
contesters don't even listen. They tune up on top of my existing
QSO and start hollering "CQ contest". Thank goodness, contests
are not usually allowed on the WARC bands.

Many of us were been using the Internet for years before MS-Windows could
even begin
to talk to the Internet using UNIX. Telnet, ftp, NFS, gopher, Archie and
hundreds of Internet apps were
online long before MS-Windows even knew what TCP/IP was! Remember that
Mosaic (Netscape)
was first written as an X-Window app!

Hello,

I am getting close to being ready to test at 20 wpm. I tested at 13 wpm and PRINTED the words/letters. I'm struggling to print at 17 and 18 wpm now. My printing is not keeping up with the decoding in my mind.
However, I don't do very well keeping up by using cursive writing either.
I need to decide between the two methods (printing or cursive writing) and work on one. Any suggestions?

Thanks.

.......didaaah.dihdah...didaaaaaah

It's really no hardship at reasonable speeds, but painful drudgery at
both ends when it's unrealistically slow. 5 wpm is painful. 13 is merely
slow. 20 is almost fast enough. I've ordered pizza's and greeted guests
in the middle of slow QSO's.

To put it in perspective, I can type about 60 wpm, heads down, and
simply copying text. Typing junk mail such as this, I think I might
average 20 wpm. I've demonstrated to my satisfaction that PSK31 QSO's
chunk along at about 24 wpm, counting pauses in the conversation.
Setting my keyer at 24 wpm, the sidetone easily keeps pace with the text
flow.

Then you have to differentiaite whether the person taking the written exams has actually learned
anything by passing a written exam that he memorized all the answers for <sigh>. The only true test
in amateur radio is the code test :). That's the reason the pro-coders will always demand that
code testing should remain in amateur radio, when the outside world is going with brand new technology

Balls,

This was so damm ludicrous I just had to send it to
you.....Especially #6.

:)

1. Why was a busy frequency on 20 meters (14.313) chosen as site for
this
alleged testing?
***IT WASN'T BUSY. IT WAS AS EMPTY AS YOUR HEAD AND FURTHERMORE I LIVE
ON THAT
FREQUENCY WHICH IS A DAMN SITE BETTER THAN LIVING IN ATHENS
ALABAMA*******
2. Why was a frequency chosen that was already occupied by members of
The
Better Amateur Radio Federation?
****THE BARF STANDS FOR "BIGOTED AMATEUR RADIO FACISTS" not the Better
Amateur
Radio Federation. I GUARANTEE NO ONE WAS ON FROM THAT GROUP BECAUSE THE
FREQUENCY SMELLED CLEAN.*******
3. What was the purpose of playing a pre-recorded tape of Adolf
Hitler?*****IT
WAS A TAPE OF HERBERT SCHOENBOHM DOING A ROUTINE ABOUT HOLOCAUST
TRIVIALIZATION
WHICH COME TO THINK OF IT WAS THE SAME AS ADOLF HITLER*********
4. Why wasn't the frequency checked for activity and possible
interference
when the station identification was given?****THE JAR WAS EMPTY! ZILCH.
NADA.WHAT MAKES YOU BELIEVE THE FREQUENCY WASN'T CHECKED? I ALWAYS
CHECK
FREQUENCIES. SOMETIMES I GET UP AT THREE 'O CLOCK IN THE MORNING TO
CHECK
FREQUENCIES. THE OTHER NIGHT MY WIFE AND I WENT OUT TO DINE IN A POSH
NEW YORK
RESTUARANT ON 38th STREET AND I LEFT AT NINE O'CLOCK TO CHECK A
FREQUENCY AND
THEN DROVE BACK TO FINISH MY MEAL.*******

5. Why were the pleas of stations trying to use the frequency
ignored?****YOUR
SPELLING IS WRONG AND SO IS YOUR INTERPRETATION. THEY WERE
YELLING,"PLEASE USE
THIS FREQUENCY>*********

6. Why wasn't the testing done at night after the band was
dead?****WHO SAID
20 METERS WAS "DEAD" AT NIGHT?BESIDES,I AM MORE ENERGETIC IN THE
MORNINGS AND
RUNNING UP AND DOWN A LOT OF STAIRS FROM THE FAMILY ROOM TO THE BEDROOM
TOOK A
LOT OF ENERGY. BUT THEN AGAIN IF I LIVED IN A LOFT AS YOU DO WITH
SAWDUST ON
THE FLOOR TO ABSORB THE STINK, I COULD HAVE TESTED AT NIGHT>*******

7. Why would an Extra Class operator ignore all these factors and
choose to
cause deliberate and intentional QRM on a busy 20 meter frequency?***TO
FIND
THAT OUT I SUGGEST YOU ASK AN EXTRA CLASS OPERATOR WHY HE WOULD IGNORE
FACTORS
AND CAUSE DELIBERATE AND INTENTIONAL INTERFERENCE ON 20 Meters****

8. What documentation is available to prove that the response to the
Notice
of Violation was acceptable?
****IF IT HADN'T BEEN, THE FCC WOULD HAVE COME DOWN ON ME AS THEY DID
ON KV4FZ.
I WOULD HAVE HAD TO PAY A FINE AND THEN TRIED TO LIE MY WAY OUT OF IT
BEFORE
JUDGE LUTON.*******

9. Was the Notice of Violation ever recinded or withdrawn?
****NO,IN FACT IT'S NOW BEING MADE INTO A MAJOR MOTION PICTURE STARRING
TOM
HANKS*****
10. Is not true that the Notice of Violation is now a permane
Just rememeber, I will post these "In your face" until you answer
truthfully!
****YOU GOT ME. IS NOT TRUE A PERMANE AND IN YOUR FACE
TOO******Doc,AF2Y

I am a professional software engineer and a long time short wave
listener.

I have developed a Windows program that allows you to filter audio in
real time.

Connect the "Line Out" on your short wave radio to the "Line In" on your
PC's sound card.

Use the Windows "Volume Control" program to assign inputs and outputs
and set levels.

The program takes the digitized audio, filters it and plays it out
through your PC's speakers!

No special hardware or modifications needed.

It does require a fast PC - 200 Mhz or better.

Who cares about what the military uses we are not the military
and by the way a few special forces still are taught it guess who?

Some people still collect and use old HF gear older than most of
us. Still sounds good on the bands so are they obsolete beyond
use? Get real and quit beating a dead horse issue. Remember and
respect your roots! After all without amateur radio opertors/developers
where would communications be today,so let us all enjoy the NOS... ok!

> or from using).
>
> ALL that Cecil said was that, in his view, people should
> be free to choose their mode. YOU took the leap to the
> typical FUD reaction of the PCTA.

Right, but the "Libertarian" seems to have a problem with how people choose to *use* their mode:

"The rule against willfull interference is a protection of my individual rights. Contestors violate that rule at will." - Cecil Moore, 06/05/98

"I also believe that murder should be banned, Michael. Willfull interference is not "live and let live" and is already illegal yet the ARRL encourages willfull interference every contest day. Libertarians support laws to protect individual rights. They are against laws that violate individual rights." - Cecil Moore, 06/04/98

Of course Carl, you have some pretty screwed up ideas yourself in this regard, so I'm sure you two can get together and figure out some kind of anti-contesting regulation to advocate to the FCC:

"The primary outgrowths of contesting are wasteful, valueless congestion and interference, teaching a new generation of hams some very bad habits and poor manners, and stroking the egos of those who are aggressive enough, rich enough, and obnoxious enough to "win." - Carl Stevenson, NCI Director, 10/26/97

"it's the DXers and the contesters and the cranky olde farts who think they "own" their daily sked freqs ... EVERYONE who wants to "keep all the *&^%$# no-coders our of 'our' HF bands" ... THEY're "the lids"" - Carl Stevenson, NCI Director, 08/27/97

"Come on ... admit the truth ... the vast majority of QST's readership couldn't understand well-written technical articles on modern technical subjects ... they're contesters and DXers and rabid Morseodists who stagnated somewhere around 10% comprehension of a 1950s "Handbook"" -

Carl Stevenson, NCI Director, 09/05/97

"contest operators are self-trained in aggressive, often boorish
behavior that has not use and no place in emergency ops. Contest
operation "trains" for EXACTLY the wrong sort of operation and behavior
that emergency situations require ... and it wastes a hell of a lot of
otherwise useful spectrum, too." - Carl Stevenson, NCI Director,
04/11/98

Heil Carl! Heil Cecil! Was machen sie, dumpkopf?

This is from Bill Cooper's Webpage!

http://harvest-trust.org/

Good Stuff!

Harvest Trust and its Trustees believe in Liberty and Freedom for all People, without exceptions, regardless of race, religion, or place of ancestral origin. Harvest Trust supports the Jewish People and their legitimate organizations. This link has absolutely nothing to do with anti-Semitism or racism. The ADL is an organization that manipulates our Jewish Citizens and the general population of America by applying the term "anti-Semitic" to any and all opposition in order to fulfill the secret agenda of Karl Marx's dream of a socialist world. The subversive ADL has worked diligently to control politicians, the domestic and foreign policy of the united States of America, and destroy the Constitutionally guaranteed Rights of all Americans including Jewish Americans. The ADL has become what it pretends to oppose... it has become a strong-arm of modern tyranny. We will undoubtedly be labeled anti-Semitic... indeed we may even be burned out or murdered for daring to speak the truth... but speak the truth we will no matter the consequences. Set yourself Free... click the links below and don't stop reading until you have consumed it all. As always we recommend you listen to everyone, read everything, but believe absolutely nothing unless you can verify it in your program of due dilligence through your research.

This series of 8 historic broadcasts was taken in whole or in part from investigations conducted by the CAJI News Service, the Intelligence Service, Jews For the Preservation of Firearms Ownership (JFPO), reports published by The Executive Intelligence Review entitled "The Ugly Truth About The ADL", and "Dope Inc." Please distribute copies to everyone you know.

Concur. Let's do it as soon as the ITU treaty is revised accordingly.
Until then, I think a 1 wpm test would be in order.

Morse Code is strangling our hobby by acting as a turn-off to many
potential new operators. Let's open our hobby up! Good stiff
reg/theory tests can keep out the riff-raff. As someone said, the ops
in the VHF spectrums are all mostly pretty good ops. Morse Code or
lack thereof has not affected this.

613. TAKING OVER 3.950

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-07 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990607091813.11927.00001422@ng-cr1.aol.com>
Source record: 140389

If the severly hot weather predicted here for today doesn't preclude a 75m. dipole erection, I shall definitely "launch" one at 100 feet and my intention is to, once and for all, take over 3.950 to use it appropriately. And since the discussions on that frequency always seem to revolve around Nazi Germany,I'll initiate my presence by introducing on frequency, a 74 year old friend named Zshesne Bialer who was a highly decorated Soviet infantryman during the 1941-1945 German-Russo War. "Zshess" as I call him, fought with Marshal M.V. Markovvsky's 132nd army in both the Donetz Basin and Prijpet Marshes in which he shot and killed 14 German soldiers and bayonetted another 3 to death. I might make mention of the fact that 8 out of every 10 German troops killed in WWII were done in by the Red Army, bless them. The discussion will open with a prelude to war-the reasons governing Hitler's decision to attack Soviet Russia and then "Zshess", in excellent English, will describe the horrors inflicted on his family by the occupying Hun,their outright murder and pillage of a people deemed inferior by "Der Fuehrer" and how the combination of massive American aid, ferocious partisans and a determined ,patriotic and resilient Soviet army crushed the "superpower" to death. Be sure to tune in at about 7:00 PM. Once again it is contingent upon my ability to erect that dipole on this very hot day. I'd do it now but I'm going out for "Breckie with Mommy and Misty." If my friends get on 3.950 first and the frequency is occupied, POLITELY ask the occupants to QSY. Do not usurp a frequency in use as does Misek of the Nazi Net, both of which or whom will soon be history. Thank you for your attention and in days to come we will be discussing the progress of the Blacks in America, the importance of immigration. the rise of Islam in the United States, the linkage between the ADL, the FBI, ATF and the Southern Poverty Law Center's KKK Watch and then a biography of a great American named Morris Dees who works himself to death attempting to guarantee the rights and dignity of every American. Crazy Dan W4NTI is back in his red hills Alabama duct taped house trailer and is back on line and on amateur radio with his chemical induced remarks on this forum. Lets hope he acts responcible and does not tell people "I AM GOING TO KILL YOU $%$##%&&&&&!!!!!"

This vagabond wannabe southerner has a habit of telling people he will "KILL" them. He is just a little harmless five foot , three inch , bearded gnome, welfare loafer. Pay him no mind . He has a little man complex. He will never change.

I'm at a loss for words why none of you want to believe me when I say that ND8V is in prison.

I did a extreme amount of checking & rechecking late last week and got to the truth of this whole thing.

YES I DID speak with a offical of the Michigan Prison System...His EXACT quote is under my "ND8V in prison" posting.

Mike was a lot of things to a lot of hams. Some say he was a QRM'er, others respect his electronic knowledge....I have said and will keep on saying he is nothing more than a FAT PORK who is now a convicted FELON!

I no longer want his radio gear...it is "stained" by the same fingers that landed him behind bars.

The offical I spoke with would not comment on the reason why ND8V is in grey stone college...he would only CONFIRM that Mike G. was there...there must be some kind of court records that will state the nature of the downfall of one, ND8V.

I would like Bob Youngblood (KT4TR) to do some checking into this whole mess....Bob only knows the truth when- ever I have heard him speak. Above all KT4TR is NEUTRAL in this whole thing, as stated if anyone can find out, Bob can.

ND8V has been a thorn in the side of ham radio from day 1. His "know it all" QSO's can only be matched by WB2OTK & AF2Y....Porky will be off the air soon, now we have to get AF2Y outta here. It's nice to see that they are starting to fall down already.

So there you have it...I have calmed down quite a bit since last week when we all learned about ND8V...I'm ready to start using my vast amount of knowledge to to get to the truth of this story.

If I must, I will go to the prison board hearing of ND8V & put my two cents in as to why ND8V SHOULD REMAIN IN PRISON!!!

It's nice not hearing "CQ CQ CQ from ND8V, CQ CQ CQ this is ND8V calling CQ and standing by".

It is unlikly that you have dropped to 15 ohms. I am curious as to how you come to that conclusion based on the SWR numbers you supplied. A drop to 25 ohms would give you a 2 to 1 swr and 15 ohms worse than that. Be glad to help, plese supply me with a few more details. By the way using a 4 to 1 balun will only cure the symptions... Not the problem if one exists.

Do people still have problems with metal fillings in their teeth rectifying
RF? I used to hear stories about this. I even asked my 60 year old dentist,
and he claims to have had 3 or 4 patients in his career that had this problem.

Absolutely. Ham radio's death has been predicted constantly since the 1920's, often for the same recurring reasons (aging population, commercial grabbing for spectrum, bad manners, etc) I was browsing some QST CDs the other week, and notice how ham radio manufacturers have been touting their gear, and whatever special circuit was cool at the time, as just the thing for dealing with "today's crowded bands. Ads have been using that phrase from the mid 30s up to this month's issue. So, what's new?

635. Any serious discussion about future written elements?

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-07 00:00:00 UTC
From: Will White <wcw@asu.uswest.net>
Message-ID: <375C1ED8.FB0D3887@asu.uswest.net>

Since the code issue is about to die as soon as the FCC inevitably lowers standards later this year to allow wide access to HF at 5 WPM, what is everyone thinking about the fate of the written tests? I have heard various vague assertions that the written elements ought to be "harder", but without much talk about *how* that should be accomplished. As I look through the question pools, I notice that the questions themselves are fairly demanding, but I would suggest two things to make the written elements not so much harder, as better. By better I mean more soundly testing and assuring an appropriate and fair level of RF electronics knowledge, theory, regulations, operation, and safety.

First, the multiple choice format needs to substantially go. Some multi questions can remain, but we must change most of the questions to short answer (two sentences or less) and fill in the blank format (in some places the CW tests are formatted this way already). This change would demand a better understanding of the question, prohibiting guessing and memorization, and allow a range of acceptable correct answers. It is a matter of fact in the education field that multiple choice questions give the poorest indication of an examinee's mastery of test material. They not only allow memorization, but also "discriminate" (I know, that much misused word again!) against examinees who don't "test well" (IOW, who don't answer questions well in this artificial and confusing format). Of course, this would put more of a demand on VEs as well, making grading a slower process. Some real training in test methods might be in order for the VE teams as well, to ensure fair and accurate grading of fill in and short answer responses.

Second, a no-brainer as far as I can tell, seal the question pools. This means the FCC no longer publish the pools, which they only did in the first place as an act of surrender to the people who were paying examinees to memorize questions at real exams, and then tell them as they left the exam site. Publish a detailed syllabus of exam topics, and no more. Make it a summarily license-revocable offense to solicit, provide, pay for, collect, or publish test questions and answers. Now, once the pools are sealed, they will have to be completely rewritten, and I would suggest expanded (the Advanced written, element 4(a) presents 50 questions from a pool of 500) so that no individual test presents more than 1% of the total pool. This last measure will help to make collecting test questions more difficult.

I believe these measures to be fair, appropriate, and effective in ensuring future tests test real, essential, knowledge that can actually be applied. Raising the bar to include Fourier transforms, circuit design, Smith Chart analysis and the like I think are unfair bars, as the written elements ought only to guarantee basic entry-level skills and knowledge sufficient to ensure legal, responsible, and safe operation.

I agree with all three points, absolutely. I was only making the observation that learning the code at under 10 WPM is an exercise in futility. To actually use CW on the bands, an operator needs to be able to read code at speeds above 10 WPM. Most traffic I hear is above 15 WPM. If one learns CW at 5 WPM, progress to and above 15 WPM will likely be slow and unneccesarily painful. So a 5 WPM FCC test is foolish. Testing at 5 WPM, whatever else it may accomplish, will not produce competent CW operators, and may actually have the opposite effect. I think that a 10 WPM (or greater) test needs to be retained to assure a corps of amateurs who can operate CW. The FCC and RSGB and others apprently disagree. They are seeking to appease those who want CW tests to remain with the 5 WPM exam. I say that is just a crumb.

Ah, but 13 or 29 wpm hams should know how to do 5 wpm, don't you think?
Just because a person has demonstrated 5 wpm doesn't mean he should be excluded from the HF
bands where CW occurs.

Lloyd Davies wrote to Doc:

> Are any of them Jewish???

You know Lloyd, you may be pleasantly surprized to know that
your last name actually has Hebrew roots to it. That may help
explain your apparent fascination with all things Jewish.

The root name of "Davies" is "David". That name appears to have
origins in the area known today as "Scotland" but is definitely
not from the Scottish Gaelic, Anglo or Saxon tribes.

In fact, it is likely descended from an early migration of people
to this newly conquered Roman territory from Roman held lands in
the mideast (Assyria, Egypt and most notably Israel). The early Jewish
settlers migrated to "Anglo Land" ("England", including Scotland) and
Eiraan (Ireland) in addition to Gaulia (France) and Espania (Spain).
"Davies", Israeli
in origin, would simply mean "of/from the House of David".

That would make you a very lucky man, Lloyd, because when
those black helicopters come to get you and take you to that
Amtrack station way up there in Indiana, you can plead that
all of this League of the South stuff was just a joke and that indeed
you played a key role as a secret Jewish Conspirator in the New World
Order after Clinton declares marshal law.

Check it out Lloyd, some of your surviving relatives in Europe
likely speak Yiddish to this day.

But most important, make your new found family proud Lloyd.
Get a real ham radio ticket (General or above).
Oy,
and Shalom

If you want to see some real garbage, get a load of this and I'll comment on it after you get an intestine full of it
N0VFP's Shortwave Center
News, Links, and Info

Listen to a audio Greeting from N0VFP Real Audio

Show me with:Ham Radio Page - My Hamshack MWDX Page - AM Dx pages and links Shortwave - Links and some useful info Radio links LINKS - other sites of interest Southern Page - For the Southern Nationalist DX302 Page - A very nice radio! KV4FZ story - Read about this man's fight! News Links, Ham Radio News!

<<<Okay, first off the guy's no ham. He's an SWL who has a meaningless ticket called a Code Free Tech or something like that. Now when you click on to his intro in real audio, you'll hear how people can "find him listening" on various frequencies. Like who gives a squirt to whom he's listening? That's about as interesting as watching grass grow. Then he offers all these "interesting topics" but there's a problem. You can't access any of them. Anything you do access on that page comes up INTERNET MARKETING CENTER...a how to crappola to teach anyone how to make scads of money on the Internet. I admit I'm no computer maven and perhaps I'm doing something wrong, but if not, N0VFP is scamming the hell out of you. He probably owns that MARKETING CENTER thing and sits like a spider waiting for vibrations off the web(no pun intended). My feeling is that anyone who would put KV4FZ STORY-READ ABOUT THIS MAN'S FIGHT is as big a crook as his subject. AF2Y,Doc>>>>>>>>>>>

Source record: 140430

If you click on to Lloyd's second web, you come up with this:

* tinytenna
* qrp 40m cw rig
* trap antenna
* antenna tuner
* specials
* ordering info
* policies
* favorite links
* publications
* 50 ways to Improve Your Shortwave Listening
* Danger on the Internet
* Y2K Manual

NOTHING TO BUY - WE SUPPLY IT ALL - COMPLETELY ASSEMBLED
The antenna, feedline, insulators, support rope, enough plugs and adapters to fit ALL models of radios... even the ones without external antenna jacks.
Comes with easy hook-up instructions. You can't lose!
Money back if not delighted.
Only $35.00 plus $5.95 PRIORITY MAIL shipping & handling U.S., $8.95 shipping & handling elsewhere.
We're gonna take those shortwave signals and trap them inside your radio where they belong!
We'll do it with our SIGNAL TRAP Antenna!
The "SIGNAL TRAP" is an end-fed antenna that works against ground. It's an extremely common antenna among "ham" operators and shortwave DX'ers worldwide!
But if you really don't care about all that technical jargon... we'll just tell you "it works!" Guaranteed to improve your shortwave reception or your money back!
And it comes with DWM's "Lifetime Repair or Replace Warranty"!
The antenna is specifically "cut" for resonance in the 5 to 7 megahertz shortwave frequency range where all the U.S. shortwave stations hang out in the late afternoon and evening. But this
antenna will actually improve reception on ALL frequencies because it uses your homes electrical ground system as the antennas counterpoise!
But wait! There's more! You don't really have to mount this antenna outdoors! [Although that's the BEST for maximum reception] Put it in your attic! Don't have an attic? Use it indoors in your house or apartment! The insulators are removable so you can run the antenna wire discretely along the baseboard of your home or apartment... behind the drapes, couch or bed... away from nosey company, relatives or neighbors.

Hi
I just bought a used Yaesy FT-890,it works fine, exept the auto tuner
will only tune on the 160 and 80 and 40 meter bands, it will not tune
the other bands, it tries to but cannot.
can anyone give me a clue on this problem? is is a common Yaesu problem?
Thank you for any support.

Of all the ridiculous posts I've seen on USENET, this has to rank as the PRIMA IDIOT. I simply cannot believe that any adult smart enough to use a computer could not only believe this crap but also spread it. Yes, it certainly does defy comprehension. AF2Y,Doc

Read on ...

In the spring of 1997, Professor Ian Stewart, met with "Mr. Sea" (real name known but withheld) to discuss what he has learned first-hand about the coming persecution at the hands of the New World Order operatives.

With a seven-inch thick portfolio filled with photographs, news articles, correspondence, etc., Mr. Sea revealed disturbing information about New World Order efforts to destroy and enslave America.

The following are some of Mr. Sea's comments. But first, let's take a look at the man who made the comments.

Mr. Sea, a committed Christian, is a former inspector for the Joint Chiefs of Staff and the Department of Defense, with 31years of federal service in the military, nine with the Department of Defense, including two years with the Air Staff.

He's a holder of the Bronze Star, the Purple Heart, the Defense Meritorious Service Medal, three awards of the Joint Service Medal, all of the Vietnamese awards, as well as the Joint Meritorious Unit Medal.

When he retired a few years ago, he was awarded the Secretary of Defense Civilian Service Medal. He's been around the world to 31 countries on four continents, and speaks five languages.

Mr. Sea spoke of the coming American Holocaust of the Government's plans for dealing with individuals opposed to the New World Order movement.

He spoke of the infrastructure that has already been set up to incarcerate and execute Americans, and the locations of the facilities that will be used for these purposes--all with photographs, leaving little to the imagination.

An interview with Mr. Sea regarding New World Order plans for the U.S. and its citizens "The infrastructure is set up.

There are at least 130 concentration camps, quietly modified facilities which have sprung up and continue to spring up across the country, seemingly devoid of activity, yet requiring strange accoutrements such as barbed wire-topped fencing (with the tops turned inward) and

helicopter wind socks.

Most have good logistical supportability, with major highways and railroad transport facilities adjacent to the sites.

"These facilities, many in remote areas across our country, are set up to become concentration /detention camps, complete with gas chambers, for resisters and dissidents. Generally speaking, they're set up for dissenters who will not go along with the New World Order".

The "resisters" are gun owners who refuse to give up their weapons; the "dissidents" are Christians, Patriots and Constitutionalists.

"These camps are set up and functional. I've seen many of them".

"On August 6, 1994, I toured the Amtrak Railcar Repair Facility at Beech Grove, Indianapolis, Indiana. There are at least ten maintenance barns at this facility, covering 129 acres, with two separate fences with their rooftops leaning inward. The windows of several buildings have been bricked up".

Hence, you have three levels of security for Amtrak repair barns!

"There are three helicopter 25-knot aviation wind socks (which aren't the correct ones to use for chemical spills which require 10-knot wind socks).

There are high security NSA-style people turnstiles, and high intensity/security lighting for 24-hour operation.

The box car (gas chamber) building fence is marked with special "RED/BLUE Zone" signs [visible in the photo]. This corresponds to the "mission" of the RED/BLUE Lists which surfaced in June and July of 1996.

"Under martial law, this will become a death camp. They're only going to handle category one and two (RED and BLUE) people there. This box car facility will be used for execution".

"One of the barns is large enough to put four box cars into. There are powered vents on the top of the barn to vent the gas out of the building after the box cars have been fumigated. All of the buildings have newly installed six-inch gas pipes and furnaces installed in all "railroad barns."

Since the photo was taken in August 1994, FEMA has allocated $6 million to make the walls and roofs of the buildings "airtight." Under martial law, this facility could be immediately used as an SS-style "termination" gas chamber. "On January 27, 1995, The Indianapolis News ran an article titled, "Amtrak Lays off 212 at Beech Grove: 170 Lose Jobs at Maintenance Center Today." Why perform $6 million worth of renovations, and then lay off 212 people?

Because the people doing the final executions will not be Americans. Thus, the "slots" of the 212 will be filled with non-Americans.

"They'll hire foreigners for this "cappo" task. Cappo ("chief" in Italian) was the title of the trustee prisoners who actually killed many Jews for the SS butchers at Dachau, and at other Nazi crematoria across Europe".

"The news article also said, " . . . hopes the yard may be able to solicit work repairing private train cars, and perhaps subway cars from Washington, DC, or other urban areas".

The repairing of private trains is a dead giveaway to death cars!

"The article went on to say, "Late last year, Congress ordered Amtrak to spend at least $5.9 million patching holes in the roof and fixing masonry on the walls of the giant machine sheds at Beech Grove."

These buildings have been "sealed." They're airtight. The facility is constructed to allow gas to be blown into all the buildings via the newly installed, two-story, hot air heating furnaces."

Next, Mr. Sea elaborated on the two categories, the RED and BLUE Lists, and what they mean:

"The RED List is for pick-up and execution before unobtrusive preparations for martial law are initiated. The BLUE List is also for execution, but at a later date within six weeks of martial law declaration.

There are no "re-education" plans for either category--just execution.

"When you get picked up on a RED pick-up, they'll take you from your home at night -- probably around 4 a.m. -- and put you in a black van, then drive you to a helicopter waiting to fly you to an intermediate point.

There, you'll be loaded onto a big 64-passenger CH-47 Chinook helicopter--all black, unmarked and illegally operating under the Treaty on Open Skies. Then they'll fly you to one of 38 cities where you'll board a 747, 737, or 727.

You may be taken straight to a temporary detention facility. When you're RED listed, you'll be taken to a red camp. Then you'll be executed.

"At some point, martial law will be declared. (Martial law is when the writ of Habeas Corpus--to have a trial by jury--is suspended. Instead, of going to the judge, you go straight to jail for a limited time,) I suspect there will be a major outage, or some other crisis which will be the reason to declare martial law".

At this point, the BLUE listed people will be picked up. At that time, the country will be regionalized into ten sections, which are already designated by FEMA.

"Be advised that it has been proven (in Wyoming and at least one other location) that the black choppers have state-of-the-art radio (RF) frequency wideband jammers, and can jam cell phones and CBs while

they're executing black operations missions (i.e., in your area).

This means that your cell phone could be jammed just before and/or during any action against you.

"In June of 1996, an FBI agent got hold of the Region Three BLUE List (from a CIA agent), and found his own name on it, and those of several others he knew in Virginia.

The Regional BLUE List stated that the names on the BLUE List would be picked up "within six weeks of the actual martial law declaration."

"This parallels the Nazi RED/BLUE List policy almost to the letter. The parallel Nazi plan was published by Heinz Hohne in his 1966 book, The Story of the Nazi SS: The Order of the Death's Head. People say, "It won't work".

But it will work if the 300,000 Soviet troops which are ALREADY HERE can get the guns.

The name of the game is to blackball the people to get the guns . . . make the militia look bad, make guns look bad, make everybody give up their guns. Once they get your gun, they've got you, UNLESS you've got the angel of the Lord at your door.

"The ones doing all of this are operating out of the highest places in the Federal Government. They're cooperating with "spirit guides and mediums" and using astrology and numerology. The spirit guides are telling them what to do, and the entire thing is being orchestrated at the highest spiritual levels. Every base has been covered. They've thought of everything.

If you notice, they often do things on the 13th of the month. Mr. Clinton does a lot of things on the 13th. On September 13, 1993, the brokered Israeli-PLO peace accord was signed. He waited 14 days, until September 13, 1994 to sign the Crime Bill. On June 13, 1995, he stated he'd veto the national debt authorization ceiling. On November 13, he did veto it. On January 13, 1996, he made a speech to Bosnia.

"There will be an interim of probably just days from the time they launch the RED List, to the declaration of martial law when they'll start coming after those on the BLUE List. It'll work the same way it did with the Nazis who had a list of people to pick up, on June 30, 1934, before they declared their "mobilization".

"It's the same blueprint being used because it's the same spirit leading the Fourth Reich as led the Third Reich. In Germany, they used trains, here it will be helicopters and 747s".

When Hitler was villainizing the Jews, he hired thugs and dressed them in black uniforms. He was building concentration camps and setting up a transport system.

"In this country, they're now in the process of villainizing Christians, Patriots, Constitutionalists, and outspoken talk-show hosts, etc".

"Who will be doing the actual picking up?
Foreign "cops" (United Nations Internal Security Forces).

Over 30 foreign military bases under the United Nations flag are already set up in the US., all with the approval of special appointees in high Federal positions.

These bases are already manned with over ONE MILLION troops from Russia, Poland, Germany, Belgium, Turkey, Great Britain, Nicaragua, and Asian countries.

Why are they here? Because unlike our own troops--many of which along with the Guard and Reserve of 24 states are being deployed overseas--will have no qualms about firing on U.S. citizens when the time comes.

There are more than 2,000 Russian tanks, military trucks and chemical warfare vehicles just outside Gulfport, Mississippi. They began arriving in January of 1994.

There are 180 foreign troops at Fort Reilly which was confirmed to me by a Brigadier General. There are 300 who came into the Birmingham, Alabama airport on a big white Russian cargo plane on December 13, 1995.

As of 1995, there were 10,000 plus foreign troops at Fort Chafee, Arkansas reportedly making preparations for 20,000 "detainees".

"Also in 1995 at Fort Polk, Louisiana (U.S. Army Post), Russian and Eastern European troops were deployed under the U.N. flag.

[When questioned about this, the legislative aide of the congressman who resides over Fort Polk, stated, "Yes, they were there undertaking broad, joint training exercises. And, yes, the U.N. flag was flying. There may still be some there today."]

"At the Aberdeen Proving Grounds, there are many Russian tanks. One of the NCOs told his father that he'd been maintaining them. "This is going on all over the country. German troops are known to be at Holloman Air Force Base in New Mexico, Wright-Patterson Air Force Base in Ohio, and Fort Hood, Texas.

Chinese troops are known to be at the Long Beach Naval Station in California.

"There's not going to be some future event when the invading troops are going to show up. They're already here! When martial law is implemented, these foreign U.N. troops will be policing our country, carrying out the plans of the New World Order".

Message-id: <375A0BB1.2358@dirtball.com>

Dr Hate why are you jamming 3.950? Playing the beach boys over people*****I'll say this. If I were so inclined to jam 3.950,the Beach Boys would be my choice. I love their sound. A few weeks ago on TNN, a cute female singer had Brian Wilson as guest. The man's a GENIUS. Even though still spaced out and looking much too old for his years, all he had to do was to pick up that mike and as the background came out with, "Dah dah dah dah dah dah dah dah dah dah dah dah," come out with,"Oh the East Coast girls are hip ......I wish they all could be California girls" and he brought the house down. I warn you Oris; say what you want about me but if you knock those Beach Boys, it's WAR! .No group ever had their distinctive harmonies and chord changes. The melodies portrayed to a T the California surf scene. Did you ever hear "In My Room?" Oris, do you realize that Brian Wilson wrote that beautiful tune while suffering from the worst depression possible-so bad that he refused to leave his room which inspired the song? Where in hell's name is your compassion, Oris? And how about "Help Me Rhonda?" A driving beat with great chord changes. "Help me Rhonda-help help me Rhonda." However in the South it sounds like, "Hep me Rhonda, hep hep me Rhonda>" But what's the difference? The Beach Boys will never die even though Brian Wilson lost two of his brothers but Mike Jardine is still left but won't go on stage because of his baldness. And did you know that Glen Campbell began his career as a Beach Boy? And what about Neal Johnstone, the tall guitarist. Oris, you say you never heard of him? Not only was he fantastic as a "Boy" but wrote one of the best ballads in the history of pop Americana. Barry Manilow wants eveyone to think he himself wrote it but it's not true. Johnstone composed a song that begins, "I've been alive forever and I wrote the very first song. I put the words and music together... I am music and I WRITE THE SONGS.. That's right Oris-a Beach Boy wrote the fabulous "I WRITE THE SONGS," that marvelous song which makes the young girls cry. How dare you insult such talent, you piece of kudzu? I'm insulted dirtball and I demand an apology. Doc,AF2Y********

talking about food of all thinks. Whats up with that? I mean you spread your hate all over the news groups. This guys this that guy is this always with the name callin'. Why jam? I have tuned accoss the 75 meter band and it seems to be quite. You could start up your own form of hate net like you do here in the newsgroup. You seem to say all these other people are about hate but that is all I hear you talk about.

"afraid-of-it's-own-shadow" FCC? How about the
deaf, dumb, and blind ARRL?

HAW HAW HAW.

I agree with you that the jamming should stop, but I have
given up all hope. The FCC's track record on going after
jammers is miserable.

Agreed. One has to wonder why KK7HO becomes so
upset when a nationally-known, scheduled net, whom
EVERYONE knows operates on 3950 every Saturday
at 10:00 pm eastern time, obtains legal control of the
frequency.

Ever wonder why KK7HO NEVER complains about the
malicious, illegal jamming that constantly takes place in an
effort to drive the Liberty Net off the air?

KK7HO is very easily annoyed ... by the TRUTH.

As a former US Coast Guard radio operator, I have to ask why you believe
what happens outside the amateur service has any bearing on us? Other
services have equipment and money that we certainly don't. We're now
unique in that we have the capability to use a mode that no other services
have the ability to use.

> Hopefully in 2001 the requirement will be totally removed
> from the ITU regulations.

Hopefully those desiring that the requirement be totally removed will
themselves be totally removed.

> code tech's are not bad operators.

You know all 100,000+ of 'em? Besides, when is "being a good operator"
qualify someone for an HF ham license?

> We can no
>longer justify CW as a requirement for operating a ham radio station.

Sure we can. Every HF frequency is designated for CW usage. CW is the
second-most used mode on HF (but casual listening will show that
about 50% of the HF QSOs are done in CW). Code is the only common mode
among the world's HF-licensed hams. So there.

Amateurs care (or supposed to care) because they're supposed to look out for emergency traffic on all modes, and all frequencies.
In an emergency, anything goes.

>Ham radio is dying and it's the fault of the Extras.

Ham radio will not die. It's the *only* communications medium, outside of shouting, in which any two operators anywhere in the world, can communicate directly without using government or commercial services. Those same two operators don't even need to purchase commercially-built radios -- they can build them themselves.

BTW, your prediction is older than you are: In "...1922 many radio magazines which had catered to the transmitting amateur swung away from him, one even so far as to run an editorial ... prophesying the end of amateur radio." (From Fifty Years of ARRL.)

This is from Bill Cooper's Webpage!

http://harvest-trust.org/

Good Stuff!

Harvest Trust and its Trustees believe in Liberty and Freedom for all People, without exceptions, regardless of race, religion, or place of ancestral origin. Harvest Trust supports the Jewish People and their legitimate organizations. This link has absolutely nothing to do with anti-Semitism or racism. The ADL is an organization that manipulates our Jewish Citizens and the general population of America by applying the term "anti-Semitic" to any and all opposition in order to fulfill the secret agenda of Karl Marx's dream of a socialist world. The subversive ADL has worked diligently to control politicians, the domestic and foreign policy of the united States of America, and destroy the Constitutionally guaranteed Rights of all Americans including Jewish Americans. The ADL has become what it pretends to oppose... it has become a strong-arm of modern tyranny. We will undoubtedly be labeled anti-Semitic... indeed we may even be burned out or murdered for daring to speak the truth... but speak the truth we will no matter the consequences. Set yourself Free... click the links below and don't stop reading until you have consumed it all. As always we recommend you listen to everyone, read everything, but believe absolutely nothing unless you can verify it in your program of due dilligence through your research.

This series of 8 historic broadcasts was taken in whole or in part from investigations conducted by the CAJI News Service, the Intelligence Service, Jews For the Preservation of Firearms Ownership (JFPO), reports published by The Executive Intelligence Review entitled "The Ugly Truth About The ADL", and "Dope Inc." Please distribute copies to everyone you know.

"All modes, and all frequencies"? Where in CFR Title 47 Part 97 is that
written?

All one needs to do is monitor:

500 kHz CW
2182 kHz SSB
8364 kHz CW
121.5 MHz AM
156.8 MHz FM
243 MHz FM

I guess we could toss in CB Channel 9, too.

That would enable one to catch most emergencies. Voluntarily.

A Brief Historical Overview

If there is any one constant in the changing state of the
communications art, it is that "Hams" (Amateur Radio Operators) have
always been on the forefront of it. Rumors abound where the term "Ham"
came from. Some of the more amusing are described in the list of
Frequently Asked Questions for this newsgroup.

Regardless of origin of the name, a "Ham" is universally recognizable
as one who experiments in radio and communications.

Whether it be constructing a low-power CW radio with vacuum tubes, or
designing TCP/IP packet networks, such experimentation has
historically spilled over into the mainstream such as was the case
with Howard Armstrong, who developed the regenerative oscillator and
FM radio, or General Curtis E. LeMay (K0GRL, W6EZV) who was
instrumental in making Single-Sideband the communications standard for
the Strategic Air Command (1946-1992, now reorganized into a joint
command called USSTRATCOM) and eventually the U.S. Air Force. Although
packet-switching techniques originated from DARPA (Defense Advanced
Research Projects Agency) and the ARPANet, no one can deny the

tremendous influence that amateurs, including those within TAPR (Tucson Amateur Packet Radio), have had in demonstrating the viability of TCP/IP and AX.25 communications via radio links. The efforts of AMSAT (the Amateur Satellite Corporation), including the development of many ham satellites and the low-orbiting Microsats (communications satellites no bigger than a breadbox that use store-and-forward packet techniques), have certainly advanced the state-of-the-art in communications, one of the defined purposes of the Amateur Radio Service, as recognized by international treaty.

What is an Elmer?

Since in many cases hams are writing "the book", there is often no "book" or other established reference for a beginner to refer to. Traditionally, information has been passed on from ham to ham via word-of-mouth. Like many of the traditional crafts, a variation of the Master-Apprentice system has emerged, the Elmer-Novice relationship.

The term Elmer has probably been in use since at least the 1950's (I'm told, but haven't yet confirmed, that it appears in British amateur radio publications from that period). The name Elmer was likely chosen because Elmers are usually older and wiser, having the benefit of many years in the hobby, including several failed projects, and an electric shock or two. The first U.S. reference to Elmer in print was from Rod Newkirk, W9BRD, in his "How's DX" column in QST from the early-to-mid-1970's.

Such Elmers have traditionally been the mainstay of amateur radio, and the source of many new hams, particularly those interested in working on emerging technologies. Even more importantly, Elmers provided an outlet for the impatient newcomer who wanted "to know everything, and right away." Faced with such a request, a good Elmer will smile and proceed to lead the novice through some project or operating experience. Several hours, days, or weeks later, the novice would have his answers, but would have earned them. Even better, the sense of accomplishment would boost the novice's confidence and nudge him or her down the road to being a model, experienced ham operator.

Many present hams feel that such an experience is missing today. In today's hustle-bustle world, the response to such natural curiosity and desire to learn is, more often than not, "I'm too busy" or "RTFM." As a result, the quality of new hams declines and the knowledge and operating habits they develop in their first formative months and years leave much to be desired. And the very same hams who claim that they "can't understand the new generation" also, in almost the same breath, lament about the "decline of amateur radio."

What is an Elmer Today?

An Elmer today is of any age, male or female, who has some expertise and is willing to share it with beginners. Elmers don't even need to be licensed amateurs, just people with knowledge in some area of electronics or communications technology.

How do I become an Internet Elmer?

With the ever-widening scope of the Internet, the amateur radio newsgroups on Usenet, and now the World-Wide Web, the potential for Elmers to share their knowledge to a wide audience has never been greater. To that end, I maintain a list of such Elmers. Volunteers may register via my formatted, on-line, World-Wide Web Registration Form:

http://www.novia.net/~pschleck/elmers/register.html

I would prefer that you register using the above form (which not only ensures that nothing is omitted, but also makes adding your entry much easier by automatically converting it to HTML). However, volunteers who are not yet on the Web are also quite welcome, and may register by writing me at elmers-request@novia.net with their name, amateur radio callsign(s) (if any), E-mail address, and area(s) of expertise. URL-format pointers to resources they maintain, such as WWW home pages, FTP archives, mail servers, or mailing lists, would also be quite welcome. The list has gotten large enough that there should be plenty of suitable examples to model your entry after. If you need some further assistance formatting your entry, drop me a line and tell me a bit about yourself. Ironically, sometimes the best Elmers write to me saying, "I'm not an expert, but..."

I have set up an administrivia mailbox for correspondence related to this list (elmers-request@novia.net, the default Reply-To: of this message when posted to Usenet News). I would prefer that all such correspondence be directed to that address. In addition to saving it into a special folder, my incoming E-mail filter will also send you an automated return-receipt.

Also, an unfortunate increase in the amount of unsolicited junk-mail that I receive (often dozens of messages _every day_) has forced me to become much more ruthless about filtering incoming E-mail. While I can guarantee that I will read all mail sent to elmers-request before the next bimonthly posting of the list, mail sent to pschleck may not only not get reviewed for some time, my incoming mail filter (procmail) may even bounce it back to the sender if it can't be automatically categorized as originating from known, friendly senders or have known, welcome keywords in the headers (Elmer is obviously one of those keywords).

How may I obtain the latest copy of the Elmers List?

There are currently 5 ways of obtaining the Elmers List. Any site at least reachable by Internet E-mail can use the Mailing-List or Mail-Server options:

World-Wide Web (WWW):

This is the recommended method for accessing the Elmers list, as it allows this resource to be viewed as hypertext. The home site at www.novia.net features immediate updates each month, hypertext-linked subject and geographic indexes, keyword searching, and registration and feedback forms. The other two sites use automatically-converted versions of the Usenet news articles, but are still usable, particularly if you are outside North America. The site marked with an asterisk also offers Wide-Area Information Service (WAIS) index searching by keyword for all Usenet News FAQ's:

* http://www.novia.net/~pschleck/elmers/
* http://www.lib.ox.ac.uk/internet/news/faq/rec.radio.amateur.misc.html
* http://www.cs.ruu.nl/cgi-bin/faqwais *

(_Note:_ Because of maintenance problems - FAQ documents not being promptly updated in particular - the sites at Ohio State and Smart Pages are no longer recommended for accessing a current copy of the Elmers List and have been removed from the above list.)

see also the newsgroups under comp.infosystems.www.* (I haven't listed URL's for all of the newsgroups under this hierarchy as there are now about a dozen of them (!!!).)

Usenet News:

This was the original distribution medium for the Elmers list. It continues to be supported for users who cannot access the World-Wide Web. Since the document uses URL's throughout, the news article version may also be viewed as hypertext via some mail and news readers. The latest copy of the list can be found in the news articles with Subjects like _"Amateur Radio: Elmers Resource Directory Part */* [*-*]"_ (The * represents a wildcard character, as the need to split the list evenly, as well as keep all parts under the 64K message limit for Usenet, requires that I adjust the split occasionally). Since the list is cross-posted to the following newsgroups:

* news:rec.radio.amateur.misc
* news:rec.radio.info
* news:rec.answers
* news:news.answers

on the first Monday of each even-numbered month, with an expiration date 10 weeks into the future, there should always be a copy available at most news sites. Check your newsreader documentation for information about reading previously-read articles or articles that are "threaded" to this one. Also complain to your local news administrator (E-mail to "news@localhost" or "usenet@localhost") if your local news server is configured to ignore Expires headers (and thus prematurely delete the articles) in worthwhile, mostly moderated, information newsgroups like those listed above.

Anonymous FTP:

If your site is directly connected to the Internet, you may retrieve the latest copy via File Transfer Protocol (FTP) from the following sites:

* ftp://ftp.novia.net/customers/pschleck/elmers/
* ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/ham-radio/elmers/
* ftp://ftp.uu.net/usenet/news.answers/radio/ham-radio/elmers/

Mailing-List:

Since the list is cross-posted to rec.radio.info, the latest copy may be obtained from the mailing-list gateway for that newsgroup (along with many other informational articles about radio) when it is published each even-numbered month. To subscribe, send E-mail to:

listserv@ucsd.edu

and in the BODY (not the Subject) of the message, write:

subscribe radio-info

The server may not be able to determine your return address. In that case write:

subscribe radio-info (your E-mail address)

You should get an acknowledgement very shortly.

Mail-Server:

If you don't want to read through the entire gateway of rec.radio.info, or want a copy of the list right away, send E-mail to:

mail-server@rtfm.mit.edu

and in the BODY (not the Subject) of the message, write:

send usenet/news.answers/radio/ham-radio/elmers/README
send usenet/news.answers/radio/ham-radio/elmers/index/subject/part1
send usenet/news.answers/radio/ham-radio/elmers/index/subject/part2
send usenet/news.answers/radio/ham-radio/elmers/index/geographic
send usenet/news.answers/radio/ham-radio/elmers/list/part1
send usenet/news.answers/radio/ham-radio/elmers/list/part2
send usenet/news.answers/radio/ham-radio/elmers/list/part3
send usenet/news.answers/radio/ham-radio/elmers/list/part4
send usenet/news.answers/radio/ham-radio/elmers/list/part5
send usenet/news.answers/radio/ham-radio/elmers/list/part6
send usenet/news.answers/radio/ham-radio/elmers/diff

and the latest copy of the list should be sent to you E-mail within 24 hours (the mail-server uses batch priority to reduce system demand).

Acknowledgements

By using this resource, you are benefitting the net by obtaining assistance in the fastest and most efficient way possible. By volunteering to appear on this list, you are contributing to the good reputation of the radio-related newsgroups.

Thanks to all the volunteer Elmers, as well as courteous list users, for making this service a success.

Amateur Radio: Elmers Resource Directory

More information about this list can be found in the companion posting
to this file, "Amateur Radio: Elmers List Info and Administrivia."

73, Paul, K3FU

- A -

John Ackermann N8UR

jra@febo.com

http://www.febo.com/

My primary interests are in packet radio network building
(particularly higher speed stuff) and TCP/IP. I've got quite a lot of
info on using the Kantronics D4-10 19.2kB radios, as that's the
hardware we've been struggling with here.

I'm now working heavily with Linux, and help run a TNOS/Linux BBS, and
a Linux native-AX.25 switch. Although I'm not "the world's greatest
authority" on either, I'd be happy to help folks with questions to the
extent I can.

I've developed some experience with full-duplex packet repeaters. I've
built 2 19.2 repeaters, and am working on a 9600 Baud one now.

My World-Wide Web Page above has a reasonable set of resources for
digital networking, including HTML versions of some of my work,
sample configuration files for Linux AX.25, and some Linux software
tools, as well as the Ohio IP address coordination info.

I've just finished writing a book on TCP/IP that TAPR will publish
(hopefully) by the end of the year. It'll be called _Networking
Without Wires_ and is a completely rewritten, and greatly expanded,
version of the old _IntroNOS_ document I wrote several years ago. In
the meantime, I've made the old _IntroNOS_ available in HTML format on

my World-Wide Web Page above.

TAPR (Tucson Amateur Packet Radio) has formed a special interest group to discuss issues of regional packet networking (Net-SIG). As a result, the TAPR net-sig mailing list was born, and is now ready for operation.

This list is <not> intended to replace any of the existing packet-related mailing lists. Its purpose is provide a medium for communications among those interested in packet radio networking, both dealing with technical issues and political/regulatory ones. We'll discuss things like how the potential 219MHz band will fit into the networking picture, how to link areas using different networking schemes, how to set network parameters, etc. The list's charter will be posted there regularly.

The address of the list is net-sig@tapr.org and you can subscribe by sending mail to listserv@tapr.org with the text "join netsig".

Apart from subscribing to the list, you can contact me for further details about the Net-SIG (including upcoming conferences).

TAPR Vice President and Board Member

Joint ampr.org IP Coordinator for Ohio subnet (44.71.xxx.xxx)

Please direct all correspondence regarding the assignment of ampr.org IP numbers in Ohio to:

ipaddr@febo.com

which is a mailing list read by a team of coordinators.

[_Editor's Note:_ All ampr.org coordinators are listed in the document at:

* ARRL Assistant Section Manager of Youth Services (Alabama Section)
* Volunteer, North Alabama SKYWARN
* Member, Alabama Emergency Response Team
* National Weather Service (NWS) Registered Storm Spotter

Contesting is my favorite activity. I operate as many contests as possible, mainly on phone. I do operate CW often on the HF bands. Field Day is a big deal for me. I have been Field Day coordinator for two different groups in the past two years, including one in Mississippi that used my callsign this past year. I operate mostly on the HF bands, especially ten meters.

I am experienced with IBM-compatible computer systems, as well as packet radio networking and BBS systems, specifically MSYS. I am also experienced in APRS. I familiar with repeaters and controllers, specifically the CAT-300 (DX). I am also involved in the recruiting and licensing of other youth, and am planning classes for local Cub Scouts/Boy Scouts.

425 DX NEWS Weekly Bulletin WWW PAGE (NEW SITE!!!)

- ------->> http://www-dx.deis.unibo.it/htdx/ <<---------

NEWS, INFO, RUMORS, DXPEDITIONS, IOTA ACTIVITIES and more

DX CALENDAR, WABA AWARD (rules & scores) now available

in English Version and Italian Version

Same server of the IK4LZH site for QSL MANAGERS.

I am an IOTA chaser, I work DX and I join contests. Actually I'm in
love with RS sats and DOVE telemetry. I'm the Shortwave Listening
(SWL) coordinator of the Italian Amateur Radio Association and I have
a regular SWL page in their official magazine Radio Rivista. Recently
I joined the 425 gang that produces the 425 DX News bulletin. I
translate it into English and send it to many DXers via E-mail. I also
maintain a WWW page to provide the bulletins graphically with previous
numbers and more to come. I've been an SWL since 1974 when I received
a receiver as gift from my parents. Now I'm 36 and I'm running also a
free BBS devoted to HAM/SWL.

During the school year, I am in Baltimore college ARC at University of Maryland, Baltimore County, which is home of the UMBC Amateur Radio Club and KB3CVD:

http://umbc.edu/~rcarls2/hamradio/

During the winter and summer, I am in New Jersey. I am active in ARES/RACES/NTS and local clubs in both areas, and would be glad to help other young people get into the hobby of Amateur Radio, particularly in the interests of Public Service and Disaster Management.

* Callsign Data
* Mobile/Portable/Field Day (FM, HT's, 10m SSB)

I'm willing to act as a reference for anyone wanting info on getting tapes (especially Callsign tapes) from the Department of Commerce National Technical Information Service (NTIS) or wanting other info on callsign-project related stuff.

One of these days I'll actually be around for the un-net! I promise, really! (Well, maybe not. Is anyone even doing the un-net any more? If so, E-mail me and maybe we'll actually do it!)

My job is currently System Administrator for a large UNIX site so I know a little bit about day-to-day UNIX operations and UNIX installation :-) My laptop currently runs Linux most of the time (over 99% of the time). I also have much experience with constructing E-mail paths that will work rather than bounce. Currently I do software full time (yay!), and am fiddling with some laser experiments - if I could get some 'spare' time.

I also have a fair amount of experience in hardware/software interfacing and machine control.

I am available most days; work from home. I am especially interested in teaching the practical side of ham radio technology. I will help troubleshoot kits, old radios, etc., but will expect the new or prospective ham to pitch in.

Expertise gained from over 45 years of ham radio and almost as many years in broadcast engineering.

I have been a radio amateur since 1954, first licensed as KN2HYZ in Peekskill, New York at the age of 14. I have been active in periods ever since, never losing the ham spirit.

I would like to be involved in helping young people start in ham radio. Especially those who are already licensed and are "lost" looking for ways to operate or set up a station.

Carl Estey WA0CQG

wa0cqg@tapr.org

North American Digital Systems Directory World-Wide Web Page:

(Sponsored by Tucson Amateur Packet Radio, TAPR)

http://www.tapr.org/directory/

The purpose of the Digital Systems Directory is not to manage, coordinate, or regulate the usage of digital systems, but to provide the most up to date and accurate listing of digital systems that can be provided. Neither is it a formal organization, but a mechanism to allow regional groups to provide and share information regarding digital systems.

The Digital Systems Directory listing is intended for use by individuals to further their enjoyment of the hobby and by organizations to help plan and develop digital networks.

Please direct any submissions, feedback, or administrivia to my E-mail address above.

ARRL Laboratory Engineer

* Radio Frequency Interference (RFI) matters
* RF Exposure Safety/Regulations
* Equipment Testing

I have been at ARRL HQ for over 13 years. During that time, I have become ARRL's RFI and RF-exposure guru. If you have questions about RFI or RFI exposure, first go to the ARRL's Technical Information Service World-Wide Web Page:

http://www.arrl.org/tis/

and download the applicable information packages. From there, you can direct questions about RFI or RF exposure directly to me. I will either answer your question directly, or refer you to some of my contacts in industry, in the cable industry, etc. ARRL also publishes the _ARRL RFI Book_ and _RF Exposure and You_.

I have also had experience with testing of transmitters and receivers, mainly in conjunction with ARRL's Product Review testing. A copy of ARRL's Test Procedures Manual can be downloaded from:

http://www.arrl.org/members-only/prodrev/testproc.pdf

Before I came to ARRL, I spent a number of years as a TV and audio service technician, so can often help with troubleshooting questions. I wrote the troubleshooting chapter of the ARRL Handbook.

The ARRL Technical Information Service (TIS) Coordinator is now another member of the ARRL HQ staff. Please direct all TIS queries to tis@arrl.org, _NOT_ my E-mail address above.

See Mary Lau's entry for more information about the ARRL Info Server.

Gene Harlan WB9MMM

atvq@aol.com

Amateur Television Quarterly (ATVQ) Magazine

The magazine's E-mail address and mine are the same: ATVQ. There is also a ham radio section for "manufacturers and dealers" on America On-Line in which we list Amateur Television Quarterly, as expert and manufacturer. That is where most of the Frequently-Asked Questions (FAQ's) come from.

Most FAQ's are answered in one of two books we published. ATV Secrets for Aspiring ATV'ers is a non technical book, and Volume II is a 300-page technical manual with theory and projects for all equipment necessary to operate an ATV station. Prices in US funds are $9.95 and $24.95 plus postage ($3.10). Most of your inquires can be answered by either of these two books.

I am also compiling a set of W6ORG Notes, a regular column in ATVQ, which answers many of the technical FAQ's on various equipment and operations. This will be available for $9.95 also.

Assistant EC for Josephine County (Oregon) ARES/RACES

I am involved in commercial RF and wireless design, and willing to
share experience with other amateurs. I have a complete test equipment
facility for checking radios, antennas, etc.

Local NEWSLINE outlet: Program airs on the 147.30 repeater right after
the Monday night net.

I am active on HF, VHF and UHF, including voice and digital modes, and
will help in whatever areas I can for most of Southern Oregon.

ARRL Contest Branch Manager

I have been active in the Hobby for over 28 years, in a wide range of
activities from local clubs, special events, public service
communications, emergency communications, contesting, DXing, packet,
repeaters, traffic handling, and more. I have served as an officer of
local radio clubs, newsletter editor, Events Coordinator, Field Day

Chairman, Local County Emergency Coordinator and Area District EC, member of several emergency preparedness planning groups, SKYWARN coordinator, and liaison to numerous served agencies in North Carolina. I have taught amateur radio licensing classes (theory and code) and have been active in developing small group "seminars" for training (everthing from "how to build a dipole" or "handle traffic" to "how to work with/at various agencies when dispatched during and emergency." I hold WAS (both novice CW and the "Geratol" award, DXCC, WAC and a wide range of on-the-air operating experiences. I was selected for membership in the A-1 Operating Club, have been award "Ham of the Year" awards for local clubs, and am willing to work with new-comers on most any project.

Civil Air Patrol (CAP)

I was Communications Officer and former unit Landstation Bluebird 284, 1980-87. Statistically, Landstations are relatively rare. A land station in CAP is an HF-capable station operating from both mobile and permanent locations as needed. As a land station, I checked into several regional nets for the Missouri Wing of the CAP. I am familiar with the CAP emergency protocol as well as MARS and ARRL. Also, I have extensive teaching experience for Novice to General levels and currently am a teacher.

I would like to help any new or prospecting hams in any way that I can. My personal experience is limited, but I am net control of a local Elmer Net here in Pittsburgh. This net meets every Saturday evening at 9:00 PM local time on one of the repeaters of the North Hills Amateur Radio Club (146.88- MHz). This net is intended to help all new hams. Many experienced hams also check in and can answer questions and share their wisdom with beginners.

Log in as:

anonymous

with your E-mail address as password.

Via TAPR's Listserv (http://www.tapr.org/tapr/html/internet.html)

TAPR maintains several SIGs in various interest areas. To get the
latest list of SIG groups, send an E-mail message to:

listserv@tapr.org

with the subject line:

Request

and one or more of the following in the BODY of the message:

list

for list of mail groups on TAPR.ORG

information listname

(where listname is the name of the mail group)

to request the information on any mail group

subscribe list your_first_name your_last_name

(where list is the name of the mail list you want to join and
your_first_name and your_last_name are your first and last names,
respectively)

to subscribe

Some of the current SIGs include:

NETSIG Regional Networking SIG
BBSSIG BBS SIG
HFSIG SIG on HF Digital Topics
DSP-93 SIG for those that are building TAPR/AMSAT DSP-93 kits
APRSSIG SIG on APRS
TAPR-TNC SIG on TNC Issues
DSP SIG on general DSP topics
MIC-E SIG on supporting the TAPR APRS MicEncoder kit

TAPR-BB Announcement channel for TAPR bulletins and information

General Information about TAPR:

* Ever heard of a TNC?
* Interested in general packet radio information?
* Interested in Spread Spectrum Communications?
* Interested in high-speed packet operations?
* Interested in other types of digital communications?
* Interested in experimenting or building kits?
* Interested in keeping up-to-date on national digital and packet issues?

Then you might be interested in TAPR!

Goals:

* Support Research and Development efforts in the area of amateur digital communications
* Disseminate information on packet and digital communications
* Provide affordable and useful kits for experimenters and hobbyists
* Pursue and help advance the amateur art of communications through publications, meetings, and standards

History:

If you have used a packet radio TNC, then you are already a part of TAPR history.

The TNC (Terminal Node Controller) project was the first big project that TAPR tackled and completed. Now TAPR covers a wide range of interests including: APRS, Spread Spectrum, networking, Timing, DSP, HF, and much more.

TAPR was founded in 1982 as a national organization with interests in the areas of packet and digital communications. Today, TAPR continues as a membership supported non-profit amateur educational research and development organization. TAPR currently has more than 2500 members, worldwide. TAPR continues to develop kits for the amateur community and is working actively on publications and communications standards.

Membership:

Membership in TAPR includes a subscription to the quarterly published Packet Status Register newsletter. PSR has been published since 1982 and is recognized as an authoritative source for up-to-date user and technical information on packet radio. Much of the material in PSR is timeless. Back issues may be obtained from the TAPR office. Membership in TAPR is $20 US for one year in USA, Canada, and Mexico. Outside North America is $25 US.

Join the amateur digital-revolution -- Join TAPR!

Phil Karn KA9Q

karn@unix.ka9q.ampr.org

http://people.qualcomm.com/karn/

High-Performance Software Modem Project

Recently I've been working on a prototype SQPSK (staggered quadrature phase shift keyed) modem for the amateur satellite channel. This modem is implemented totally in software running on a PC with an ordinary (non-DSP) Soundblaster card. It runs at 1200 bps and fits into a SSB transceiver bandwidth.

I've made good progress and have put some info up on my web page about it, including an audio file to show what it sounds like in noise when the signal is still copyable, available from:

http://people.qualcomm.com/karn/ham.html

Watch that page for an announcement of when I actually release the code, which I plan to integrate into KA9Q NOS.

Spread Spectrum

I've been trying to answer the question of consequences of promoting relatively wide-band digital modes on band occupancy and throughput (i.e., What gets optimized? Are there tradeoffs in quality vs. quantity?) in the context of the spread spectrum rules debate, but I think it needs to be a much wider discussion. See my reply comments to the FCC on this issue:

http://people.qualcomm.com/karn/papers/index.html

(See also Steve Bible for more information on Spread Spectrum)

[_Editor's Note:_ I'm honored by the presence of many advanced-level Elmers in this directory, including Jeffrey Angus, Gary Coffman, and now Phil Karn. Phil has graciously agreed to appear in this directory for the purpose of elmering and technical exchange for the advanced topics listed above. As with all of my Elmers, please respect their time by only seeking assistance from them for the topics under which

they are listed. There are many Elmers willing to answer more beginning-level packet radio questions, including basic questions about IBM PC hardware, TCP/IP and NOS. Consult the "IBM PERSONAL COMPUTER (PC) AND CLONES" and "PACKET AND DIGITAL NETWORKING" categories in the Subject Quick-Search Index for a complete list.]

The W5YI Group, Inc.
P.O. Box 565101
Dallas, Texas 75356
USA
Tel. +1 (817) 461-6443

This firm consists of two separate divisions:

EDUCATION DIVISION:

Develops and distributes amateur radio self-training materials,
including the Gordon West/WB6NOA line of audio, video, computer
software and printed study materials. Credit card orders and
information from (toll free): +1 800 669-W5YI (9594). All materials
are guaranteed current and shipped within 24 hours with 2-day priority
delivery. They offer a special discount for instructors conducting
training classes.

W5YI Amateur Radio written license exam and Morse Code training
products are also available from every Radio Shack nationwide. Color
photographs of the major training products are available at their
Express Order or Radio Shack Unlimited desk.

THE W5YI-VEC:

Coordinates the activities of more than one thousand volunteer
examining teams world-wide. The locations of test sites near you can

be determined by calling +1 (817) 461-4663 anytime, including evenings and weekends. Any General, Advanced or Extra Class amateur may form their own VE team by calling +1 (817) 860-3800 during normal business hours.

All examination results are electronically filed with the FCC. Amateur radio licenses and call signs are normally issued within 48 hours of VEC receipt of the examination paperwork. New amateurs may determine their call signs by calling the FCC's toll free consumer assistance line: +1 (800) 322-1117.

Hospital Disaster Support Communications System (HDSCS) Coordinator

HDSCS World-Wide Web Page:

http://members.aol.com/emcom4hosp/

For over 15 years, the 90-plus members of the ARES/RACES-affiliated
Hospital Disaster Support Communications System (HDSCS) of Orange
County, California have served over 35 hospitals in nearly 50
emergency situations. At the new HDSCS site on the Web, you can find

out how volunteer Amateur Radio operators can be an important backup communications resource for hospitals, if the hams are well organized and trained.

There you will find:

* How HDSCS organizes to support hospitals
* What "dedicated communicators" are and why they are important
* Frequently-Asked Questions about hams helping hospitals
* The surprising answer to "How often do hospitals need hams, anyway?"
* Response from hospitals served by HDSCS
* Info given to new HDSCS members
* Recruiting hams for hospital communications
* And lots more...

Joe Moell K0OV

homingin@aol.com

Homing In Column World-Wide Web Page:

http://members.aol.com/homingin/

(Homing In is a column in 73 Magazine featuring information about radio direction finding, hidden transmitter hunting, and jammer tracking.)

This site features:

* Southern California T-hunting, what equipment the winners use
* International-style foxhunts have come to California
* Complete design fixes for the Dick Smith doppler set
* Updates to the Moell/Curlee book (TRANSMITTER HUNTING---Radio Direction Finding Simplified), including board/kit/parts sources and building tips
* Frequently-Asked Questions (FAQ) and answers from the Homing In mailbox
* Index and subject list of all Homing In columns in 73 Magazine through September 1996 (over 90 articles)
* And lots more...

The Homing In site is written and maintained by Joe Moell K0OV. It is not affiliated with 73 Magazine, Wayne Green Enterprises, or any other commercial entity.

I am involved in training for new and upgrading Hams, paying back for Elmering received over the years as I came into Ham Radio. I am a VE for VEC's active in local area. I am most interested in assisting young, old, and handicapped persons to discover Ham Radio. However, I want to help anyone that is committed to getting a Ham license or upgrading. I am most active on Ham satellites, mobile and fixed HF, Digital modes and construction. I am an avid electronics constructor, repairer and experimenter. I am trying to sample all modes, bands, and interest areas. I am also skilled in Public Relations, demonstrations, and "de-mystifying."

Dakota County, Nebraska ARES Emergency Coordinator (EC)

ARRL Official Bulletin Station (OBS)

I have been involved in Packet since 1984. I currently run a Packet BBS with the F6FBB software, as well as a number of Packet Nodes using TheNet Software. I have coordinated the Volunteer Exam Session in this area for a number of years. I operate 2 meters and HF, both CW and SSB. DX'ing and Contesting are some of my activities, along with collecting prefixes.

I have had NWS spotter training and am part of organizing the spotter network in the Siouxland area. AS the EC of Dakota county, I work with the Woodbury County, Iowa EC in the spotter effort.

During my business activity as a Systems Engineer with IBM, I have developed some expertise in PC's and have worked with the DOS, Windows and Windows 95 Operating Systems along with many Ham-related applications.

I have organized a number of Ham events such as Packet Symposiums and am the current Chairman of a Regional Ham Radio Convention.

I am handicapped & spend most of my time at home. My handicap is motor related. I have taught classes in most of the areas listed above. I have been a ham for 25 years. I enjoy talking & working with people. I am a past vice president & newsletter editor for my local radio club. Although not an ARES/RACES member, I have done a lot of disaster & emergency communications. Our local club is VHF-oriented & provides communications for several community events each year. I am active on packet & just recently sold my NODE. Please E-mail or mail me if you think I can help you in any way. By the way, I am married & my XYL is also a ham. I am a Life Member of The American Radio Relay League.

ARRL Registered Instructor

I have a large collection technical manuals. Copies are available for the cost of duplication and postage. THIS NOT A BUSINESS. It is done as a courtesy to those needing assistance.

I lecture and conduct workshops on the subject of ElectroMagnetic Interference, primarily related to problems encountered in the Clinical (Hospital) environment. This is a program based on papers of which I am the principal author published in journals related to Biomedical Engineering. Related to this activity, I have and use signature analysis equipment and, depending on area and time, am available to assist in location and identification of sources of severe interference to radio amateur activities.

Dayton, Ohio E-mail Elmers

Sponsored by the Miami Valley (Ohio) FM Association (MVFMA):

http://www.febo.com/

The Dayton E-mail Elmers service allows new or prospective hams in Dayton and Southwestern Ohio, or even experienced amateurs who are venturing into a new aspect of the hobby, to send an E-mail request for assistance. Volunteer on-line Elmers then can provide a response in the "Elmer" tradition of mentoring new or less-experienced hams.

Today, many hams prepare for their license exams through classroom programs, and the individual Elmer's touch isn't as common as it once was. The E-mail Elmer service is an attempt to restore this long tradition. The MVFMA hopes that the initial E-mail exchange will be the start of an ongoing Elmer relationship in the best tradition of Amateur Radio."

Hams may use the E-mail Elmer service simply by sending an E-mail message to:

elmer@febo.com

and posing the ham radio question they'd like to have answered. Users will get a machine-generated confirmation, and within a few days, they will get a response from one or more of the volunteer Elmers.

For more information, or to volunteer as an E-mail Elmer, contact me at my phone number or E-mail address above.

Keith Petersen W8SDZ

ftp://ftp.simtel.net/pub/simtelnet/

(Formerly wsmr-simtel20.army.mil)

(simtel.net is a service mark of Walnut Creek CDROM)

Announcements regarding uploads to Simtel of amateur-radio-related software are cross-posted to:

news:rec.radio.info

[_Editor's Note:_ This outstanding archive collection, which incorporates much amateur-radio-related software, is listed here for completeness. However, as Keith gets about 200 E-mail messages a day, he strongly encourages self-sufficiency in the use of the archive. The above URL's contain several documents regarding how to download files from and upload files to this archive. There are also many other Elmers willing to answer beginning-level questions regarding accessing files via FTP and WWW. Consult the "INTERNET SERVICES" category in the Subject Quick-Search Index for a complete list.]

I'm a software engineer specializing in Macintosh development, and I've been a ham since 1982. I was first licensed at age 14, and I now hold an Extra class license. My expertise is in antenna-building and theory, CW (Morse Code), DXing, SWLing, and HF operating practices in general. I also operate mobile in a '96 Ford Ranger pickup. I'd be happy to help any new or aspiring amateur radio operators.

Ken Pulfer VE3PU

jkpulfer@rac.ca
jkpulfer@igs.net

Radio Amateurs of Canada (RAC) Treasurer and Webmaster

(RAC is Canada's national amateur radio society.)

RAC World-Wide Web Page:

http://www.rac.ca/

Callsign E-mail Addresses for All Interested Canadian Amateurs

Any licensed Canadian amateur radio operator can now have an E-mail address of the form:

callsign@rac.ca

This means that you will no longer have to advise all your contacts of any new E-mail address if you change your Internet service provider. Canadian amateurs will not have to keep track of dozens or hundreds

of E-mail addresses. Just remembering the callsign is all they will need.

RAC is able to offer this free service thanks to the volunteer help and support of Information Gateway Services (IGS) of Kanata, Ontario, Canada, and in particular the work of Rene Kahle, VA3RDK. Rene developed the E-mail aliasing software, and set up the server hardware (IGS also donates server space for the RAC and ARAS World-Wide Web Pages that contain much useful information for Canadian amateurs).

If you wish to obtain a callsign E-mail address, simply send a message to:

alias@rac.ca

with:

callsign = realaddress

in the BODY of the message.

For example, if my callsign was VA4KP and my real (current) E-mail address was:

ham@qsy.ca

I would put the following in the BODY of the message:

VA4KP = ham@qsy.ca

Any subsequent mail addressed to:

VA4KP@rac.ca

would be redirected by the IGS server to:

ham@qsy.ca

Of course, such mail would NOT go anywhere near RAC headquarters, nor be seen by RAC officials, nor placed in a public database that could be exploited for "junk-mail" distribution. Any E-mail addressed directly to:

ham@qsy.ca

will also be delivered as in the past without passing through the IGS server.

The E-mail aliasing service is currently set up on a trial basis. If it works well and amateurs find it useful, it will remain available for all who wish to use it.

I am a consulting engineer, which takes me to various locations. My home address is shown above and in the call book. I can answer E-mail (as everyone knows) from anywhere that I may be.

Don't know where you are going to use a old horse like myself. I am part of the old and part of the new displine. I have fabricated all my wire antennas which includes the matching device (transformer) and been building equipment for more than a quarter of a century. I also manage to repair all my equipment - when parts are available. I restore early age broadcast receivers and HF transceivers. I know the old Heathkit HW100 and HW101 very well and built a Heathkit 5400 transceiver with matching Power Supply. I have constructed many amplifiers and own a Swan, Collins (S-Line), Kenwood, Heathkit, and Johnson. I am very active in the two meter band.

In addition, I have restored many an old Coleman Lanterns (which is very enjoyable) and also have some American Gas Machine Lanterns (1930's).

"Buck" Rogers K4ABT

k4abt@packetradio.com
buck4abt@inmind.com

Packet Radio Networking World-Wide Web Page:

http://www.packetradio.com/
http://www.packetradio.org/
http://www.sedan.org/

To open the pages, a Packet Radio Glossary that I began writing in 1988, and updated as new mnemonics and acronyms were added to the Packet jargon, is at:

http://www.packetradio.com/glossary.htm

Next there is the "original" Packet Radio Primer for the Novice or beginning Packet Radio operator at:

http://www.packetradio.com/primer.htm

Since 1996, the TNC to Transceiver diagrams from these pages are the most used and imitated on the WWW. I maintain these drawings directly from the Original Equipment Manufacturers (OEM's) and insure they are of the latest makes and models. These interface diagrams are at:

http://www.packetradio.com/tnc2rad.htm

These interface drawings are taken from over 14 years of the PACKET USERS NOTEBOOK column in CQ Magazine. In addition, I've included many TNC and transceiver 9600 baud modifications at:

http://www.packetradio.com/9600mods.htm

I've included several zip files of the latest X-1J4 Rev C code and Packet Radio terminal programs. This site contains information and instructions that enable the reader and user to build and configure a Packet Radio network. Complete with the TNC changes and MODS plus both user level and backbone node parameter suggestions, at:

http://www.packetradio.com/network.htm

The parameters and mode guidelines are at:

http://www.packetradio.com/x1j4pram.htm

To round out these pages to be the most helpful to all Amateurs, there are pages that describe "How to...":

* Design and build antennas, complete with drawings and formulas
* Build a superb ground system for your QTH, node/repeater, or comm site
* Build a solar powered site where no utility mains are present
* A coaxial cable table for the most used Coax by Amateurs
* WX Watch and SKYWARN links
* A Packet Radio bandplan
* An online callbook lookup link
* Hamfest Calendar
* Network maps of the 11 State SEDAN emergency comm network

and much, much more.

* Volunteer Examiner (W5YI VEC)

I have been a ham since 15. I have been an Extra class operator since age 17, and a VE since age 18. [_Editor's Note:_ Possibly the youngest Contact VE ever.]

I am an avid HF QRP (low power) and mobile operator. I have spent literally hundreds of hours installing my mobile station (IC-706 and Screwdriver antenna, plus more grounding straps than I can remember) in my 1995 Neon.

Most of the time I operate QRP CW mobile.

Why? It challenges my operating skills as much as possible, plus QRP is safer (RF-wise) than is 100 or 1500 watts. With the effects of RF exposure still unknown, I don't feel like exposing myself to high-power RF fields any more than necessary, and if 3 watts will do the job, so be it, I'll emit it.

In addition, people are generally amazed when you mention that not only are you running just 3 measly watts output power, and on top of that you're doing it from your car as it's zipping down the Interstate at 65 mph. They just can't believe it's possible that less power than a nightlight is bouncing off the ionosphere and ground three times, and is still able to be detected 10,000 miles away.

I'm here to tell them it is.

I enjoy building kits, and consider myself to be a good builder.

I am a fair contest operator, and enjoy 35 WPM CW ragchews as well as hunting for DX.

I moved from Laurel, MD to Eugene, OR in November, 1998. It has been strange to not hear European stations 24 hours a day, although I am getting used to hearing Japanese stations 24 hours a day. I am a member of the Valley Radio Club of Eugene, and give VE exams with the local group. In the past I have been very active with both the Laurel (Maryland) and University of Maryland Amateur Radio Clubs, and

operated with both during public service events, contests, special events, and emergency operations (earthquakes, hurricanes, etc.). I have been the chief HF operator at University of Maryland HF-related events (Field Day and Sweepstakes) for the past three years.

As a Volunteer Examiner, I have conducted roughly 150 test sessions, testing at minimum a thousand applicants.

I have given Novice/Technician/General license class instruction, as well as taught a 5 WPM code class. I have been told that I have a knack for describing complex subjects in ways that make them far easier for laypeople to understand. I developed a presentation touting the best points of QRP, and made presentations at four radio clubs in Maryland, and at the QRP forum at the 1998 Dayton Hamvention. I organized the Dayton QRP banquet in 1998, and am doing the same in 1999.

Most of all, I love a good challenge, and proving I can do something I've been told is practically impossible.

For instance, would anyone believe that communicating on 20 meters over a distance of 14,000 miles from your car at 2.5 watts was possible?

My favorite aspect of amateur radio is contesting. It drives my station improvements and operating proficiency. I have played around with antennas and made various station modifications to improve my

contact efficiency. Along the way I have solved some RFI problems, built many of my station accessories, installed and built some HF antennas, put up a small (40') tower, etc.

I volunteer as a RACES operator in no particular capacity. I help with a few VE test sessions a year mostly representing the ARRL VEC with the Burlington ARC team.

I work as a SRAM design/product engineer at IBM Microelectronics in Essex Junction, Vermont. I have been interested in electronics and computers since a young age, but only got my amateur radio license in 1993 as a Technician at the age of 31. I got to know the code and upgraded to Extra in February of 1994.

Maintainer of rec.radio.amateur.misc FAQ

(Formerly maintained by Diana Syriac, KC1SP, and Ian Kluft, KO6YQ.)

Available from:

http://people.ne.mediaone.net/wd1v/hamradio.faq.html

Send me an E-mail message with the words "HAM FAQ" on the subject line
(or packet with your E-mail address) if you want the FAQ text file
sent to you as an attached 120 KB file.

Send me a formatted disk with SASE disk mailer if you want the FAQ
text file sent to you on disk. PC or Mac formats are fine.

(The majority of the original content of the FAQ remains the same, but
now it's a hypertext document with hundreds of links to radio-related
sites and is a significant resource to all students of amateur radio -
regardless of their license status.)

ARRL Technical Specialist

I am a pilot (N6141F) with more than 10 years as air and ground search
and rescue. Active in ARES, RACES, and Civil Air Patrol (CAP West 41).

I also have a home in Alpine, Texas, USA.

I now teach classes four times a year. I do classroom work in 15
hours. I teach the Technician class using the ARRL video course.

I also do an adult class where I give them a study guide and have them get the study materials and home study for six weeks. Then I do a Saturday review, and (if needed) a Sunday review, then set up the test the next weekend.

My vocation and avocation both deal with Radio Frequency transmission and propagation. I have spent considerable time working with RF safety issues as they pertain to broadcast radio, television, and now amateur stations.

Presently I serve as Region 3 Administrative Assistant for Air Force MARS.

Additionally, I serve as Activities Director and Chairman of the Field Day Committee for the Viking Amateur Radio Society (VARS).

Courage Center
HANDI-HAM System
3915 Golden Valley Rd.
Golden Valley, MN 55422
USA

Manager, Courage HANDI-HAM System

I have information pertaining to Amateur Radio and physical disabilities or sensory impairments, such as blindness.

Visit us on the World-Wide Web:

http://www.mtn.org/handiham/

HELP WANTED: READERS NEEDED BY HANDI-HAMS

The Courage HANDI-HAM Center needs volunteer readers to record ham radio books and publications on audio tape. Volunteer readers provide a valuable service to persons with severe physical disabilities and sensory impairments who cannot use regular printed books.

Volunteers should hold an Amateur Radio license and be familiar with hobby terms and expressions. A clear speaking voice and the ability to read the written text of Amateur Radio books and describe the diagrams and pictures are essential.

HANDI-HAMS will provide a tech sheet and a sample tape to new volunteers, as well as a copy of the book to be read and cassette master tapes. Readers will need a good-quality cassette tape recorder and a quiet place to record. Some of the books we would ask readers to tape would be ARRL license manuals, special interest Amateur Radio books, and instruction manuals for radios.

This volunteer work can be done in one's own home, at one's own pace, as long as there is a quiet place to read. It is a wonderful way to share Amateur Radio with others!

* CW
* HF
* QRP

I work QRP CW and enjoy wilderness backpacking. I am happy to meet beginning CW ops on the air and take some time to make QSO's. I love simple wire antennas and simple antenna tuners, and enjoy introducing others to these simple pleasures.

I have some experience troubleshooting the Kenwood TS 520, 830 and 440 radios. I also have experience with the older Ten Tec radios like the Triton IV, Corsairs and sometimes work on my OMNI VI. I am happy to help others troubleshoot the rigs, and am willing to take it slowly with beginners (and to find the answer from others when we can't figure it out!)

I am beginning to get interested in better fidelity SSB, and am learning about IF filter options for Kenwood and Ten Tec rigs. I have

experience with the aftermarket Fox Tango, IRCI and now INRAD filters.
I am happy to share information on these options, I currently use
several.

If you are nearby, or coming through the University, stop in to visit
my shack, just for fun. You might force me to clean it up, and that
makes my wife, KC6TKO, very happy.

I am currently a mature student at King's College, University of Aberdeen, studying for the B.Sc. (Hons.) Computing Science. I enter the third year of this course on 25th September 1997.

I also have my own IBM compatible computer, which has a P166 processor, 32M of RAM and a total of 4.6G of hard drive space, spread between three EIDE hard drives. This computer normally runs under the Linux operating system, and I am gradually moving the above Fidonet BBS system across from MSDOS to Linux. Because of the lack of suitable software under Linux, I am writing one myself, having had 15 years experience as a professional programmer.

I am a regular participant in AuroraMUSH, a MultiUser system, and have authored several patches to the suftware controlling it. It may be visited at:

telnet://amush.cx:4190/

Status Servers:

telnet://status1.amush.cx:4191/
telnet://status2.amush.cx:4191/

I have been involved with Packet radio for over a decade now. Indeed, it was packet radio that got me interested in Amateur Radio in the first place.

I started up a mailing list connected with the Amateur Satellite world, currently using manual subscriptions. The list is:

Space.Repeater@cus.umist.ac.uk

and is for the discussion of the possibility of placing an amateur band repeater or transponder in orbit around a planet other than Earth, or on the surface of one of the other planets.

I will add that, although I can claim to be something of an expert on both Linux and Packet Radio, I am definitely NOT an expert on the two together.

I used to run my own bulletin board system before the Internet came along. I also do my own monthly newsletter called the _Hamband DX'er_ for many years. It is still going. I take care of the ARRL SWL Bureau. My name is listed in any callbook under the various QSL bureaus. I am an avid DX'er of the ham bands with over three hundred countries confirmed. Presently I run my own WWW Page to help others with QSL info requests.

DX QSL Info World-Wide Web Page:

http://www.coredcs.com/~mtw/

The DX QSL Info File is updated monthly. It is in Xbase format and runs under a variety of software, including:

* Dbase
* Vplus
* Totalham

+ Contesting is my favorite activity. I operate as many contests as
+ possible, mainly on phone. I do operate CW often on the HF bands.
+ Field Day is a big deal for me. I have been Field Day coordinator for
+ two different groups in the past two years, including one in
+ Mississippi that used my callsign this past year. I operate mostly on
+ the HF bands, especially ten meters.
+
+ I am experienced with IBM-compatible computer systems, as well as
+ packet radio networking and BBS systems, specifically MSYS. I am also
+ experienced in APRS. I familiar with repeaters and controllers,
+ specifically the CAT-300 (DX). I am also involved in the recruiting
+ and licensing of other youth, and am planning classes for local Cub
+ Scouts/Boy Scouts.

-
- American Radio Relay League (ARRL) Webmaster
-
- The American Radio Relay League is pleased to announce the startup of
- ARRLWeb, your League's new HQ-based World-Wide Web site, at the URL
-
- http://www.arrl.org/
-
- ARRLWeb will serve as an essential Internet resource for active hams,
- carrying ARRL news, details on upcoming hamfests, conventions and
- Amateur Radio examinations, the ARRL Publications catalog, information
- of ARRL membership benefits and services, and more.
-
- In inaugurating this new service, the League thanks Scott Ehrlich,
- WY1Z, and the other Boston Amateur Radio Club volunteers who've worked
- since December 1994 to keep ARRL up and coming on the Web via the ARRL
- home page they installed and maintained at oak.oakland.edu. Their
- volunteerism helped show us that upgrading our Internet connection to
- a level that allowed on-campus Web service would be essential to
- ARRL's mission of serving Amateur Radio.
-
- Your comments, criticism and suggestions on how to make ARRLWeb bigger
- and better are _essential_ to its ongoing success, so please drop by
- and say hello!

-
- GRAPES 56 kBaud Packet Radio Modems
-
- I'm not an official representative of the Georgia Radio Amateur Packet
- Enthusiasts Society (GRAPES), but I am in contact with them, and have
- experience using their 56 kBaud radio modems. At the very least, I can
- forward requests I can't handle to the proper people.
-
- The Proceedings of the 6th Computer Networking Conference has a paper
- by WA4DSY explaining the theory and practice of the 56 kBaud radio
- modem. (I think it's the 6th, I don't have my copy handy.)
-
- GRAPES furnishes instructions for modifying a TNC2 to drive the modem,
- but there are better solutions. The Ottawa PI card and the Gracilis
- PacketTwin card are two good solutions. Of course they are PC bus
- cards. If you need standalone capability, the Kantronics Data Engine
- can handle it, as can the incredible Gracilis PacketTen. PacComm
- claims their new Sprint TNC can, too (PacComm now also manufactures
- the Gracilis cards under license and you can get them either from them
- or from Gracilis direct).
-
- WA4DSY has interfaced raw telco codecs to the modems and done "digital
- voice" while mobile. It works quite well.
-
- If you want information on the RF modem (full document sets are $20
- US, creditable towards a later order) write to GRAPES at
-
- GRAPES, Inc
- P.O. Box 636
- Griffin, GA 30224-0636
- USA
-
- GRAPES is a volunteer networking organization. There's no phone
- number, and turnaround on info requests may be slower than when
- dealing with commercial outfits. Please cut the volunteers a little
- slack.

- I'm back in an EE program after 5 years in "real life." Now I know
- what I don't know. My own web pages will improve as my knowledge
- expands and improves. For those on other continents, we have mirrors
- in:
```

+ http://www.repairfaq.org/ (USA)

- * Naples Italy: ftp://ftp.unina.it/pub/electronics/REPAIR/
- * South Africa: soon to be announced
- * UK: soon to be announced
+ Mirror Sites:

- I'm looking for mirrors in other places, especially Australia. If you
- can help and have about 7 MB to spare, you can help us mirror the
- sci.electronics.repair FAQ by reading:
+ * http://plop.phys.cwru.edu/repairfaq/ (USA)
+ * http://fribble.cie.rpi.edu/~repairfaq/ (USA)
+ * http://www.eio.com/repairfaq/serfeio.html (USA)
+ * ftp://www.hitechsurplus.com/RepairFAQ/serfhts.html (USA)
+ * http://www.support-team.com/repairfaq/serfst.html (USA)
+ * http://www.jasper.demon.co.uk/repairfaq/ (England)
+ * http://repairfaq.physik.tu-berlin.de/ (Germany)
+ * http://web.ee.up.ac.za/ee/REPAIR/ (South Africa)

- http://www.paranoia.com/~filipg/REPAIR/F_ReadMe.html#README_006
+ Archive (Compressed) Sites:
+
+ * http://nyquist.ee.ualberta.ca/~charro/cookbook/faq/ (Canada)
+ * http://ftp.unina.it/pub/electronics/repairfaq/ (Italy)
+
+ Translated into Italian:
+
+ * http://www.geocities.com/CapeCanaveral/6369/F_Repair_it.html (USA)
+ * http://ftp.unina.it/pub/electronics/REPAIR.ITA/F_Repair_it.html
+ (Italy)

```
- I am a practicing electronics engineer (for over 35 years) with
- expertise in solving problems in the design of linear circuits, audio
- signal processors, low frequency (DC to 10 MHz), low noise, field
- effect devices, power supplies, batteries, and similar analog
- situations. I'd be glad to assist others in the solution of their
- electronic problems in these and tangential areas. I started in ham
- radio as a kid in the 50's, vacuum tubes, motor generators, and most
- everything related to WWII surplus equipment. Was a design engineer at
- Texas Instruments for several years in the heyday of discrete devices
- and linear integrated circuits, mostly for military and surveillance
- use. My present concentration is toward digital telephonic
- communications. Have now gotten pretty familiar with use of the
- Internet. I guess it goes without emphasis that my capability goes
- beyond the areas I listed as being most competent, but I could be a
- resource you may apply as you feel my experiences would be helpful.

- I have agreed to provide a new home for the "Boat Anchor" mail list,
- with the blessings of Paul Prescott, N1AAC, who took over from Our
- Esteemed Founder Jim Lockwood, KM6NK. I have also agreed to take over
- the rec.radio.amateur.* Working Group mail list, formerly maintained
- by Ian Kluft, KO6YQ. In addition, a new mailing list devoted to
- homebrewing tube transmitters and receivers ("Glowbugs," a sort of
- intersection between Boatanchors and QRP) has been created.
-
- The mailing list addresses are:
-
- * boatanchors@theporch.com (*)
- * glowbugs@theporch.com
-
- Use these addresses for messages of general interest to the entire
- group. Please don't use them to subscribe, change address, etc.
-
- (*) Effective 15 March 1996, the BoatAnchors list went to a
- subscription-only list, with $12 US per year as "dues" to support the
- list.
-
- With monthly costs for Net access at $350 US/month and telephone line
- charges of $50 US plus, we are not getting rich. The fee was set after
- much consultation and wrangling, and was designed to cover the costs
- of running the list... and hopefully provide a surplus to upgrade the
- services we can provide, like better mail delivery, larger archives,
- etc.
-
- The new automated list manager address is
-
- listproc@theporch.com
-
- Use this for subscribing, unsubscribing, getting archived info,
- getting the FAQ message, changing your address, etc.

-
- To subscribe, send a message to this address with "subscribe
- boatanchors <your name>" or "subscribe rra-wg <your name>" Similarly,
- to unsubscribe, replace "subscribe" with "unsubscribe"
-
- The new list owner address is
-
- listown@jackatak.theporch.com
-
- Use this address only when there is a problem which really truly can't
- be resolved otherwise.

- I am an Extra class operator. I work professionally as a manager of a
- computer services department in a large hospital system with more than
- 12 years experience in PC and Host Systems networking, I hold a degree
- in Electronics Engineering, as well as many hours in Computer Science
- Engineering. I operated a land-line BBS for 8 years, and now maintain
- a packet mail drop on 145.01 MHz. I maintain the TriCounty Amateur
- Radio Club (TCARC) of North Texas home page on the web:
-
- http://www.qsl.net/tcarc-ntx/
-
- and am the President of the TCARC. I am also the appointed Emergency
- Coordinator for the City of Azle for Tarrant County RACES.
-
- I like to give talks to Amateur Radio Clubs, school groups, Scouts,
- and similar groups, mainly about Amateur Radio topics. Recent
- presentations I have done include Field Day preparation for clubs,
- Computers and Ham Radio, Building Your First Dipole. I'm open to
- presenting other topics as well. I also help local amateurs to prepare
- their own presentations and talks.
-
- I am a Baptist minister, and would be delighted to administer a Ham
- Radio theme wedding! <grin> I would also provide ministerial services
- for Ham related special events.
-
- I will also provide free Novice/Tech licensing instruction for groups
- of 5 or more in the Tarrant/Parker/Wise County region of North Texas.
- Typically this involves about 18 hours of lecture, and some self study
- on the parts of the students. I'll do this free for nonprofit
- endeavors.
-
- P.S. I monitor 146.98 Boyd repeater while commuting, and you might
- find me working HF CW just about any time.

-
- Author of the QRZ! Ham Radio CDROM
-
- I am interested in receiving amateur-radio-related public-domain

- and/or shareware programs, data bfiles, frequency lists, etc., that
- would make a useful edition to the QRZ! CDROM. Can help arrange volume
- discounts for clubs and groups, and will donate copies of QRZ! to
- qualifying non-profit organizations. Send E-mail or call +1 (602)
- 483-2036.
-
- We now have the QRZ! FTP archive and QRZ! WWW server online, 24 hours
- a day. Our connection is via a T1 line so you should get pretty decent
- file transfer times.
-
- We've got about 7,000 files online, including radio mods, software,
- most everything imaginable. We are also accepting uploads of all ham
- radio related material.
-
- Feel free to stop by and have a look:
-
- * ftp://ftp.qrz.com/
- * http://www.qrz.com/ (WWW interface to the FTP archive as well as a
- Callsign database server)
-
- Authors of ham radio shareware programs, data files, mods, etc., are
- invited to contribute their materials to the QRZ! anonymous FTP server
- above.
-
- I would also like to thank those who have volunteered in helping port
- the QRZ! source code to a wide variety of platforms. In the next
- edition, we'll have support for DOS, Windows, OS/2, Windows NT, Sun,
- NeXT, SGI, Linux, AIX, and HP/UX executables, directly on the disk.
-
- Notably not mentioned is Macintosh, which so far has been a bit
- troublesome to put together. If anyone who can program in 'C' on a
- Macintosh would care to volunteer, please let me know. Although there
- is an experimental Mac interface at this time, I'd like to make it an
- officially-supported platform.
-
- The QRZ! Callsign/E-mail Registry now contains over 4100
- callsign-to-E-mail-address listings and is growing daily.
-
- We have a WWW page where you can input your E-mail address directly
- into the QRZ! Callsign Database, where it will be published on both
- CDROM and on the Internet. When you use this page, your E-mail address
- is made instantly available to the online database.
-
- Everyone is encouraged to check in and add their E-mail address to the
- server. There are no charges or listing fees, and it's free to all
- radio amateurs. The procedure takes only a second, and you are only
- asked to supply your callsign and E-mail address.
-
- Register your E-mail address today!
-

- We're pleased to announce that the online FCC database at qrz.com is
- now updated nightly from the FCC with fresh information.
-
- According to FCC rules, if you've just passed your first test, you can
- begin operating as soon as your callsign shows up in the online
- database.
-
- Please pass on any ideas, suggestions, comments, etc., to my E-mail
- address above.

- I have scratch-built all my antennas for all bands, written antenna
- programs, and experimented with many types of antennas over the past
- 38 years. I have been a ARRL VE for 5 years now, as well as team
- leader. I started in computers by building the Altair in about 1968,
- later switched to Radio Shack. In 1982, I started assembling Clones,
- and still do to this day (for a living). I have written code in Basic,
- Quick Basic and C.
-
- I have built power supplies, both low-voltage-high-amperage and
- hi-voltage-low-amperage. I have wound my own transformers, one of
- which still runs my VHF station after 20 years of use.
-
- It is very hard to pin-point what one knows, as we are constantly
- learning. Also, we must remember the old adage, "USE IT OR LOSE IT."

-
- Educational Advisor to the American Radio Relay League
-
- I specialize in developing growth in volunteer organizations and have
- published and made public presentations on this subject.
-
- I have written and published training/educational curriculums for
- Novice, and Tech Plus amateur radio licenses. Of interest is the fact
- that amateurs licensed through my courses are very likely to upgrade
- as evidenced by the high number of hams in the Lawton, Oklahoma area
- that hold Extra Class licenses.
-
- I organized and conducted a SAREX in southwest Oklahoma that involved
- over 3,000 students in 21 schools in seven cities of southwest
- Oklahoma. The SAREX consisted of an essay contest with the winners
- being able to ask questions of the astronauts while they orbited the
- earth. The live SAREX was broadcasts over the Lawton, Oklahoma Public
- School systems cable television to the public in southwest Oklahoma.
-
- More recently I have been involved in securing building permits in
- Florida to put up amateur radio towers in this highly restrictive
- State.

- Secretary, Collins Collectors Association
-
- The Collins Collectors Association would like to invite those of you
- who have an interest in Collins Radio to subscribe to the now fully

- automated Collins Reflector. This service is sponsored by the CCA and
- is provided at no charge to Collins enthusiasts.
-
- There is an FAQ which will hopefully be sent to each new subscriber
- when they "sign on." If you would like one and don't get it, drop me
- an E-mail at my address above.
-
- There may be a few initial bumps and glitches at first but we hope
- those of you who choose to participate will enjoy it.
-
- As of 1/6/97, the Collins Reflector will be fully automated and I will
- discontinue forwarding the mail manually as in the past.
-
- The new automated list processor will be a real upgrade. It will
- enable you to get the material in nearly real time and does not
- require me to forward each message manually. You will get the material
- much quicker than before. The Collins Listserver behaves much like the
- Boatanchors list. Simply, you subscribe to the list, send it messages
- which it then "reflects" back out to all those who subscribe. This is
- done once every ten minutes.
-
- You must resubscribe to the new listserver in order to continue to
- participate. The automated list server follows the same guidelines
- contained in the CCA FAQ. Please continue to follow those guidelines
- for posting and contributing.
-
- Here is how to subscribe:
-
- Send an E-mail message to:
-
- listserv@listserv.tempe.gov
-
- Leave the subject header of the message blank and in the BODY, simply
- type:
-
-
- subscribe collins
-
- The listprocessor will output an E-mail message back to you with easy
- to follow instructions asking for your confirmation. At that time, you
- will be asked to send a second E-mail message to the listserver.
- Follow those instructions exactly and send the second, confirmation,
- message to the listserver.
-
- If all is successful, you will be signed up to the list and a complete
- set of instructions will be sent back to you in the form of an E-mail
- by the automated list server.
-
- Finally, a very big thanks to Dave Kelly, AI7R and the City of Tempe,
- AZ who have graciously provided and set up the server. Dave and the

- Collins Collectors Association sponsor the Collins Reflector as a no
- charge benefit for Collins afficionados everywhere. Enjoy!

- I have nearly 30 years experience in electronic/computer service work.
- I enjoy designing, building, and operating vacuum tube and solid state
- equipment. I restore, test, repair, and operate antique radio
- equipment. The maximum power I use for daily operations is always
- below 100w, and most of the time, I operate at QRP (5w) or less! (More
- with less.) I have a real enthusiasm for building just about anything
- from nothing, as part of the homebrew aspect of the hobby. When not
- working DX, enjoying a good contest, or have a great time on Field
- Day, I watch over my 6m repeater, or work VHF packet. I am glad to be
- of help to those in need! I fully support the Elmer program as a means
- to bring new people into Amateur Radio. I teach Novice and Tech
- classes for aspiring Amateurs. I am also a merit badge instructor for
- the scouting program, and the advisor for the Bloomsburg University
- Amateur Radio Club.

- * Radio Officer and Chairman of Operations Committee for Lycoming
- County, Pennsylvania ARES/RACES/SKYWARN program

I also have a home in Alpine, Texas, USA.

- I have started doing a weekend or four-night amateur radio licensing
- class that works great. I use the ARRL video course and it works
- super. We watch the tapes, answer questions and then spend a
- three-hour session giving them practice Novice and Technician tests,
- then reviewing each question they missed. We have even had students
- that had studied at home and just did the last session for review.
+ I now teach classes four times a year. I do classroom work in 15
+ hours. I teach the Technician class using the ARRL video course.

- I now do four or six classes a year, some in Texas and some in New
- Mexico.
+ I also do an adult class where I give them a study guide and have them
+ get the study materials and home study for six weeks. Then I do a
+ Saturday review, and (if needed) a Sunday review, then set up the test
+ the next weekend.

- Maintainer of the uk.radio.amateur (United Kingdom) FAQ
+ I work QRP CW and enjoy wilderness backpacking. I am happy to meet
+ beginning CW ops on the air and take some time to make QSO's. I love
+ simple wire antennas and simple antenna tuners, and enjoy introducing
+ others to these simple pleasures.

- Available from:
+ I have some experience troubleshooting the Kenwood TS 520, 830 and 440
+ radios. I also have experience with the older Ten Tec radios like the
+ Triton IV, Corsairs and sometimes work on my OMNI VI. I am happy to
+ help others troubleshoot the rigs, and am willing to take it slowly
+ with beginners (and to find the answer from others when we can't
+ figure it out!)

- http://www.topsy.demon.co.uk/radio-amateur/faq.html
+ I am beginning to get interested in better fidelity SSB, and am
+ learning about IF filter options for Kenwood and Ten Tec rigs. I have
```

```
+ experience with the aftermarket Fox Tango, IRCI and now INRAD filters.
+ I am happy to share information on these options, I currently use
+ several.

- Please direct all FAQ submissions, feedback, and administrivia to
- ukfaq@topsy.demon.co.uk.
+ If you are nearby, or coming through the University, stop in to visit
+ my shack, just for fun. You might force me to clean it up, and that
+ makes my wife, KC6TKO, very happy.

+ Radio License Exams:

http://www.biochem.mcw.edu/Postdocs/Simon/radio/exam.html
+ http://www.biochem.mcw.edu/Postdocs/Simon/radio/commercial.html

- This WWW site allows users to practice for the US Amateur Radio
- examinations on-line. The written examinations for all five classes,
- novice through extra, can be generated complete with figures, filled
- in on-line, and then graded. The results are presented
- question-by-question, and also graphically by subelement, so that
- users can identify areas which require further study.
-
- More advanced options include saving the results of each examination a
- user takes on-line. These results can be used to monitor progress and
- also as a basis for generating exams tailored to a user's needs,
- ensuring that all questions are practiced.
-
- Exams can also be generated and E-mailed to users without WWW access:
-
- Send E-mail to exams@eeyore.biochem.mcw.edu with a line in the BODY of
- the message like:
```

-
-
- generate novice
-
- This will result in a novice exam being generated and E-mailed back to
- you with the answers included at the end of the E-mail. These exams
- lack the figures, so reference to a printed copy is advised! Simply
- replace "novice" with any of the other exam names (technician,
- general, advanced or extra) to get the other exams. To request
- multiple exams in one E-mail, write multiple "generate" lines.
-
- Other exam resources such as the question pools, copies of the exam
- figures, and FCC Part 97 are also available. A comprehensive help page
- exists to guide users through the facilities of the site. All
- questions and queries are welcome!

Although there may be some substance to Echelon (and if so it raises serious legal and constitutional issues), any claim based upon the statements of Bob Barr must be taken with a grain of salt about the size of a north Georgia mule. Much to the embarrassment of those Georgians who are able to read without moving our lips, Representative Bob Barr is something of a looney who knowingly associates himself with militia groups, neo-Klan white citizens councils, gun loonies (no flames please, I am a gun owner and sportsman), and similar right wing fringe groups, i.e., your usual Tiny-Tenna owners. ;-) (Sorry Lloyd, I couldn't resist.) His latest campaign involves protecting us from the subversive influence of witches and Druids in the military!...hardly the behavior of a man with all his tubes in their sockets. So even by the low standards that apply to politicians, Barr has never been known for intelligence, moderation or rationality. Thus, Barr's association with Echelon would serve to diminish its credibility.

- -- - drivel snipped & flushed -----

A profound posting from a mental-midget with the
IQ of a retarded crow bar whose greatest oratorical skills
consisted of repeating ad nauseam on 14313 for six
years the following: "Herbie is number one."
Followed by a variety of animal-like sounds typical of
southern white trash. Lest we not forget the drunken
harmonica playing either.

"realdeal" "plaintruth" & "rileygotcha" = Polly
***HOLD ON A MINUTE, I didn't know ignorant George "Polly"Ashley was all three
of the above. I thought WA2EXQ was "realdeal." Are you positive? Did you know
that s.o.b. was a bigwig in his Methodist church? Goes to show what Methodism
is worth. Yeah, he's an elder, can you imagine? Walks around in vestments-can
you imagine that too?. Claims Jesus loves him which is either putting words
into his mouth or Jesus ain't worth much either. We don't hear too much of
"dumbo" on 20 meters so I thought he either died,got taken off radio or heeded
the letter from Riley. I wish someone would send me a list of who hides behind
what name. Like a COWARDS LIST that I can keep here next to the Apple. Someone,
please send me a list-I'd like to print it out because my Hewlett-Packard needs
some exercise. Doc,AF2Y*******

Dennis:
BB105 is a very run-of-the-mill varacter Diode for VHF tuning purposes. If I remeber it correctly, the max capacitance is around 20 pF.
Unfortunately I have my electronics stuff at another pï¿½lace.
If you do not get the characteristics, please drop me an E-mail and I will look it up asap.
Please tell me also if you need some of these diodes (normally they are used in pasirs...).
I could try to get them in Munich. (In this case give me your postal adress too).

At the first, please excuse my rather poor english, esp. grammatics, but i've had no chance to learn it as a youngster, we'd learned russian language instead in eastern germany.

But to the matter itself: The one, big difference between CW and the computer-based modes is, that one will need a (relatively) big effort to produce readable cw-signs, on the other hand everybody can learn the right way to establish a qso in very short time. You have'nt to know, how it works, you only have to know, which keys to press for which action. Every kid knows today, how to use Dad's PC to access the WWW - the handling of a packet station (i think it's the most used PC based mode today) it's not more difficult than that.
But that's not the kind of proficiency, what we should get in amateur radio today - especially because a lot of OP's (once they reached that level) call them "radio amateur", but makes no further improvement of theires skills.

Let me ask: Why?

I have a attitude of ham radio, which declares it as a live full of learning, doing, learning, doing...will say: the way is the goal.
And - that's my impression - i am in good company that way.
Some of my models are high classed engineers in electronics and other stuff, and i learned that way to live and to learn from them.
And i _really_ have no Acceptance for lamers and loosers, which tends to say "I have learned so much, to read, to write, what the heck have i still to learn until i am a ready steady radio amateur, it must be 'nuff now!"
In eastern germany i've passed a SWL-Test in abt. 1976 or 1977, with CW at 10 WpM, it's no matter. If one want to pass a test, he _will_ pass

his test. But: There was no "questions&answers" compendium, not for the SWLs, not for the "real" Hams. You've had to learn your stuff, you've had to know a lot 'bout your stuff and so you passed _every_ test, 'cause you was a expert on your game. Not because you learned questions and answers.

Ok, that was a hard approach, but it wasn't a bad one!
And we had a lot of guys, which failed on the test, because they wasn't really interested in ham radio. They was members of our class, because the school system in GDR was oriented in that way, that everybody is member of any club, society or whatelse. They called that "social work". They was members to please her school directors!

Today, we have the tests with knowledge of "q&a" before the test, and if one can memorize all, he will pass the test, but say me, Dave: Is this the kind of Hams we want to see as the coming motors of Ham radio?

I think no, and so we have the CW test as a barrier. Sure!!!the function of this CW test was changed over the years: Was it the possibility to copy distress signals, was it the possibility to have well trained OP's for military purposes (we've done so in GDR!) before a lot of years, so it is the function of a barrier today, to filter out (yesyes, i know, but it's difficult to explain) a few of loosers and lamers.

And i think, who is really interested in ham radio, for that guy is the cw test not a real barrier!

I am working in a electronic shop, which sells also cb and ham radio stuff, and so i know a real lot of people. And it's ALWAYS the same procedure: The welleducated technical experts with a nocode VHF/UHF/SHF license, we have a bunch of them here in Germany too, they doesn't cry about shortwave and cw. If anyone of them wants to experiment on shortwave, he learns that bit of cw and works on shortwave, thats all.

But exactly the guys which have just problems to solder a N or BNC type plug the right way, which can't just explain the difference of frequency- and phase-modulation, which are not able to explain what's a modulation index or similar basic stuff (and which have no idea, whats a pollbit in ax.25, hi), exactly these guys are not tired to tell me, what enormous technical potential is in the technician license holders, which important developments are done by nocoders and, and, and....and now we keep these giants of coming technologies out of the shortwave...

Don't kick me off, but when i hear that rumblebumble, i can smile a little bit retired, but thats all...

> An interesting question: Do you want an amateur test where you
> fail the test completely if you can't get perfect answers in the
> satellite stabilization section of the test? Would that be
> reasonable or fair?
>
> (You'll have to admit this would be effective at keeping people
> out of the hobby, which some people seem to be saying is the function

> of the Morse code test).

I think, the right way is anywhere in the middle.

You US-guys have a licensing system with stimulus to education.
You have few points - you have few possibilities on the bands.
You have much points - you have much possibilities.

The new licensing system in DL is not really similar:

We now have Class 1, Class 2 and 3:

Class 1: 75 points out of 100 in tech. stuff, the operational stuff and the knowledge of the laws. PLUS a CW test 12 WpM.
May operate on all bands.

Class 2: The same, but without the CW exam.
May operate on all bands above 144 MHz.

Class 3: Only basically knowledge tested.
May operate on 2 and 70 with max. 10W ERP.

Before, we had the following scheme:

Class B was the highest: 75% tech. stuff correct. (65% op. stuff, 65% law) PLUS 12 WpM CW: All Bands, all modes, up to 750 W.

Class A in the middle: 65% tech. stuff correct, the other the same as by Class B. BUT only a 6 WpM code test. May operate on every Band above 144MHz,
plus a portion of 80m all modes, a portion of 15m, but no SSB and the complete 10m, all modes. Up to 150W.

And the lowest: Class C. Just 50% thech stuff correct, the other 65% / 65% op. stuff / law. No CW. 2mtrs and above. Up to 75W Pout.

What do you think, who was claiming the technical proficiency at the most? The Class B? The A-Class? No, the lowest class with just 50 points out of 100. _That_ was the "real good developers", the "real" Radio amateurs. Oh boy...at mondays was the tests here in munich, 2 hours after the tests was the bunch of the new Class C-Ops in our shop, a few CB-Buddies around and our new king of the world explained them the question for the sense of the live. (of a ham)

Dave, i say only: 42.

And so the Class C ops began to call for the same rights as the Class B operators, without an additional test, and that they had only 50 points at the test - that would be not a argument. "I could, if i should...." ;-)

Dave, i will welcome EVERYBODY on my table, who shows me, that he is in good will. Everybody. And i give all my help to youngsters, they ask me for helping them to improve theires skills, knowledge or whatelse.

But also sure i will kick off the lazy, "kewl boyz", which only knows one word: "Give me!"

And at the last, Dave: I am not THAT big gun in doing morse code, i am not to fast, and i don't make the biggest part of my qso's in cw.

But i understand cw as an essential in amateur radio, and i see one common thing all over the world in the ham community, no matter if one is rich or poor, a world known musician, a genius in science or a kitchens boy at McDonalds: That's CW.

And at least i think, we owe the ole Sam Morse that little bit...
(i am not shure of the correct translation in the last line, you see, what i mean?)

Please excuse the long letter...but i hadn't the time for a shorter one. (Goethe)

cu, Ralf

708. ARRL JUNE VHF CONTEST

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-08 00:00:00 UTC
From: Jim <unique1@epix.net>
Message-ID: <375D97DC.2003B77B@epix.net>
Source record: 140235
Cross-posted to: rec.ham-radio,rec.ham-radio.misc,rec.radio.amateur,rec.radio.amateur.antenna,rec.radio.amateur.homebrew,rec.radio.amateur.misc

Contest period is Jun 12-13(2PM east Sat through 11PM east Sun)

The Murgas ARC will be operating limited multi(6m, 2m, 220, 440) during the ARRL June VHF contest using the callsign K3YTL. We will be running all 4 bands on FM, SSB, and CW from our FN11uh location(northeast PA.) The exchange is a simple call and grid square(see http://www.arrl.org/locate/gridinfo.html to find your square if uncertain.)

2 meter FM will start at 5PM Sat on 146.49 MHz and146.55. Both freqs will be operated on at the top of every hour. Dial around since we might be forced to move if band is crowded. We hear lots of people even though you may not. All other FM should be continuous. CALL US ON 52.525, 223.5 AND 446!

SSB/CW activity should be audible all of the time. Just work us. Answer our CQ's.

All of our stations will be connected, so when you work us on one band simply ask for a schedule on a different band and you can score another contact immediately. Simple!

We thank everyone who participates in this wonderful event. Good luck and happy hunting. CQ contest!

Not so...this system intercepts, amongst others, all electromagnetic communiques leaving North America via satellite transmission - whether phone, fax, etc. Undersea cable is another matter but stations in North America exist to pick up signals that are received by cable and put on the overland microwave system. Fibre optics is secure - for now.

the sav17 has a habit of developing cracks in the ceramic.
usually in the trace that feeds b+ to final.
with care i have repaired these.
so if you can get the cover off look carefully for cracks.
to fix remove from set and heat carefully to 350f in a electric frypan.
creep up slowly on the temp so you dont crack it worse.
then solder a wire across the break.
fixed 50or so like this.

We need the NRA . The idiots in Washington
think more laws, that only the honest citizen will obey, are the answer. The
gun grabbers want to take (erradicate) private gun ownership in this country.
50 more laws won't stop a crazed individual from getting or using a weapon if
he is hell bent on doing it. The laws will only restict the law abiding
citizens from exercising the thier Second Amendment right.
I hope you don't think that the Second Amendment was meant for hunting.

717. MFJ Power Supply Sucks, RF Hash

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-08 00:00:00 UTC
From: Ron Hardin <rhhardin@mindspring.com>
Message-ID: <375DA3B8.4FAF@mindspring.com>
Source record: 140244

I just got a MFJ 4225MV Switching Power Supply, to replace my
12v wall warts on my MW Kiwa loop, ANC-4 interference suppressor,
that I use on my 2010.

The ad in Amateur Radio Trader says
==
No RF Hash!
These babies are clean...
Your buddies won't hear _any_ RF hash on your signal! _You_ won't
hear any in your receiver either!
==
v.5 n.20 p.61

I turned it on, and the MW band is filled with birdies from the
thing, and not weak ones either. It's like running a dozen
computer monitors at once.

Very well said, Ralf. So I see you have them there, too. I was dead sure
it was a California sort of thing.

73's, Michael.

To all who responded, THANKS!

With EMAIL help, some head scratching and VOM, the problem was
traced to the final APC transistor (bad solder joint). Naturally
it was not driving the final.

These news groups are very helpful because of those who respond!

Victor

Old news, at least for those of us who also read 'rec.radio.broadcasting'.

Check out ----

http://broadcast.airwaves.com/AIRWAVES_ONLINE/0688.html

for full details, in the article entitled "Drew on The Mix...October 6,
1997 to May 21, 1999" by MN Maniac from 5/24/99.

Doesn't seem to be archived in DejaNews so follow the above link.

I just got one in for repair, a DEDwood TM-741. The S-AV17 has a crack in the substrate. Vcc line going to the driver. No way to fix except replacement.

> Ah, I take it that you're a Democrat.

And your approach would be what as a republican?
Enforce a manditory government recording device on every electronic device in every home and have it nark on you at least once a day?
It's true, republicans sell our rights out to the highest company bidder (Look at the cell phone freq's and laws)
and also republicans are control freaks who want to stick their noses into everyone's private business.
Pardon, but I would have wiped my ass better if I knew a republican was going to stick his nose up my butt.

I custom build <1 at a time> some darn nice 2 meter antennas!

3 EL Yagi-30.00 These are all aluminum, gamma fed, nice looking and
working
yagis...The Jpole is all aluminum, goes together
in 2 shakes,
4 EL Yagi-37.00 and is 3/4 wavelength long. These are excellent antennas,

and have sold out at local fests and club
meetings each
5 EL Yagi- 43.00 time I bring 'em.

Jpole<3/4 wave length>-23.00

Each antenna comes with an instruction sheet and all hardware to have it up and running in minutes. The yagis have gamma rod assembled and attached to the driven element. The Jpoles come with pre-drilled set points for tuning at 3 points in the band.

I am not some web scammer, I just like building antennas. You can reach me by this email address, by my call book address, or by sending a note to my call sign at PO Box 2189 Schiller Park, Il 60176.
Chicago area hams may arrange for local pickup.
SHIPPING IS $8.50, regardless of antenna. I will ship 2 of any one for $11.00.

INCLUDE YOUR EMAIL ADDRESS IF YOU ORDER BY MAIL...Checks or Money order payable to Doug Adair only...this is not a big business...I am just having fun and helping new hams not GET RIPPED OFF!

Thanks guys...73 and CU on 6 METERS!!!!!!!!!!!!

Welcome to the Auxiliary Communications Service Newsletter, developed by the ACS Training Unit of the State of California Governor's Office of Emergency Services. Please visit our ACS Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in emergency communications closer together by sharing common ideas, and by introducing new technology into the emergency services community. All individuals with an interest in emergency communications, disaster preparedness or helping the community at large are encouraged to participate here in an open forum.

You will find a virtual community here, with representatives from many different organizations with the same common goal: emergency response. We encourage everyone, from whatever organization you represent (or just yourself!) to bring us your ideas, suggestions, concerns, manuals, handbooks, or opinions so that we may share them with the group. To those of you who have just joined us, welcome aboard! .....

>From the Editor's Desk:

Thomas Gibson has submitted a 10 -point checklist for the training of emergency communications volunteers. Let's take the next few Newsletters to examine the checklist, and offer our views on the subject. Please email me with your comments.

Stay safe, everybody - see you next week! Dave Larton, Editor

.....

Please Welcome:

Walburg, Texas

As a new amateur radio operator, I am a member of our local ARES group and I am very interested in emergency communications.

Howard Gorden / W3CQH <gordenh1@westat.com>
Rockville, Maryland

Newly appointed Deputy Radio Officer for RACES in Montgomery County, Maryland. Weekly nets are currently held on the (MADRAS) 145.45 repeater (-600)@ 2000 (8pm local) every Monday if you are visiting the Washington, DC area. 73 de Howard W3CQH

Bob Lachance Jr. <kc7rje@rotd.com>
Las Vegas, Nevada

I am a member of RACES and SKYWARN here in Las Vegas, Nevada. I am a net controller as well as the net coordinator for the Nellis Radio Amateur Club here in Las Vegas. I am the editor of a newsletter for another group I belong to here as well. You migh t say that I'm involved in various aspects of amateur radio. I wouldn't have it any other way! I am interested in emergency communications as well as preparing for any communications failures that may occur as a result of Y2K. No one knows what will occ ur when Y2K occurs and it would be wise for amateur radio operators to prepare now for a communcations failure. I am currently working on my "Grab Bag" to prepare for any communications failures that can occur in Clark County, Nevada. I believe that we should, "Hope for the best and prepare for the worst." Amateur radio can be an valuable resource when a disaster strikes if we are prepared.

Hello OES,

We have been working with SATERN Network, (Salvation Army Team Emergency Radio Network). We operate on 14.265 Mhz. at 1400 GMT Monday through Friday.

We are now in the process of setting up Radio Communication through Amateur Radio Operators in the local area, to support the Salvation Army during a disaster. We are on ground floor number one. From a meeting tomorrow, we will know a little more about wh ere we are going and from.

I have subscribed to your news letter, hoping to gather some information from that to help us in setting up this operation on a local level.

I thank you in advance for anything you may have to help uis here.

May God bless,

Jimmie Fox k7jad
Portland, Oregon

Jack Peterson KF6DMM <kf6dmm@jps.net>
Alta Loma, CA

I'm a member of the Rancho Cucamonga RACES organization, which is an affiliated city within the San Bernardino County RACES/ECS. In preparation for what threatens to be a near-record fire season, ourgroup has undergone refresher wildland fire training, an d has recently participated with the San Bernardino County fire department in their 13th annual "bump and run" fire training exercise, which was hosted this year by the Rancho Cucamonga Fire Protection District, It gave us first-hand, in-the-field experi ence in support communication for a major wildland fire operation, and gave us the opportunity to work within the Integrated Command System and put to work what we have learned in our ICS-100 and ICS-200 training. Our RACES group is very fortunate to have been given the opportunity to work directly with the emergency response groups in such a realistic exercise, We learned a great deal, and will be better able to provide competent communication support when we're faced with the real thing.

Santa Clara, Calif
ADEC/DCRO Training - Santa Clara County

.....

>From the Mailbag:

From: Thomas Gibson <w3eag@worldnet.att.net>
Subject: Ham training

Dave,

I am attaching a ten point guideline for training radio amateur volunteers in the service of emergency management. These guidelines were developed by the APCO Voluteer Resources Committee which I chair. I think that they flesh out step 5. of Stanly Harter's suggestions in the February 1995 issue of the APCO BULLETIN.

73 de Tom W3EAG

The immediate objective of the APCO Volunteer Resources Committee should be to develop a generic training plan which could be used by ARES and RACES organizations to ensure that ham operators are able to function most efficiently when

communicating for or with public safety agencies during emergencies.

This should include such things as:

1. EMERGENCY RESPONSE VEHICLE NUMBERING SYSTEM (POLICE, FIRE AND EMS)

Every agency has its own numbering system. The amateur operators can be more effective if speaking the same language as the public safety personnel with whom they are working.

2. NAMES OF POLITICAL SUBDIVISIONS AND ANY NUMERICAL, OR OTHER SPECIAL, DESIGNATION FOR THEM USED BY THE DISPATCH AGENCY

Knowledge of these will help the operator to understand any geographical information to be transmitted.

3. TEN-CODE, IF USED, OR STANDARD TERMINOLOGY FOR CLEAR SPEECH, IF USED

Many agencies have gotten away from the ten-code but, even so, standard words and phrases are normally used to prevent misunderstandings. Whatever the system, the amateur operator should learn it to properly interpret what he hears. This is not to suggest that ARES or RACES personnel use such codes on the amateur frequencies.

4. NAMES AND BUSINESS TELEPHONE NUMBERS OF EMERGENCY MANAGEMENT OFFICIALS

It is very helpful when an operator is deployed to a given EOC that he know the name of the emergency management (director), (coordinator). This is the individual who will assign the operator or refer him to the proper person who will assign him.

5. EMERGENCY ROOM INFORMATION INCLUDING HOSPITAL NAMES, LOCATIONS, PHYSICIAN IN CHARGE AND ER TELEPHONE NUMBER

In major medical disasters, amateurs may be assigned to hospital ERs to relay patient information on incoming victims. This is very important in allowing the ERs to be prepared for victims before they arrive.

6. FREQUENCIES OF ALL EMERGENCY RESPONSE AGENCIES

It is often helpful to monitor the public safety radio transmissions to help the operator to have a better view of the scope and nature of the emergency.

7. PATIENT CLASSIFICATIONS USED BY EMERGENCY MEDICAL PERSONNEL IN YOUR AREA FOR HOSPITAL NOTIFICATIONS AND TRIAGE TAGS.

In a major emergency, ARES or RACES operators may be assigned to the triage area to report on victims inbound for the hospitals.

The information needed by the hospital is on the triage tag for each victim. Operators should be familiar with the triage tags and the terminology thereon.

8. PROCEDURES FOR AMATEUR RADIO OPERATORS TO USE WHEN REPORTING EMERGENCIES VIA 911 AUTOPATCH TO THE DISPATCH AGENCY

Amateur radio reports to 911 are different than any other channel for reporting emergencies because of the simplex nature, that is, the dispatcher cannot speak to you while you are transmitting. It is necessary, therefore, that this be made known to the dispatcher at once when calling 911. The incident information should then be given in a format that is provided by the 911 agency.

9. INCIDENT COMMAND SYSTEM TRAINING FOR ALL AMATEUR RADIO VOLUNTEERS

Many agencies are using the Incident Command System to manage emergencies. All operators who volunteer for ARES or RACES in the agency's jurisdiction should enroll in an ICS course. Training in CPR and First Aid is recommended, also. Normally there is no charge for volunteers.

10. ACCOUNTABILITY

It is important that emergency management know the location and function of each amateur assigned to a specific drill or emergency. A simple form listing the action sites on the left side and listing the call letters of hams assigned to that site to the right of the location.

.....

Current Events:

From: "Steven J. Makky, Sr." <smakky@pipeline.com>

It is with deep regret I announce the passing of Frank Gunther, W2ALS, on May 31st. in Staten Island, NY.

Many people who have heard the history of radio in public safety applications are aware that one of the first uses of two-way radio in our field was by the Bayonne, NJ Police in 1932. Mr. Gunther engineered this system.

He developed many systems for aviation, shortwave and military communications and was also responsible for one of the first shortwave broadcast stations in the mid-20's and first public radio broadcast from an aircraft in 1931.

He was an associate of the late Maj. Edwin H. Armstrong, the inventor of FM radio and was involved in pioneering experiments of FM radio communications in the 30's and 40's.

I had the fortune of meeting Mr. Gunther in 1995 when I worked for a bi-state government agency's engineering department in New York City; one of our communications systems was located at the tower behind his home. My partner and I helped Mr. Gunther walk down an icy part of his driveway without falling. We chatted a while and then he asked us if we'd like to see some things he had. He took great pride in showing us some of his inventions and some of the circuits he designed. The equipment, although much bigger and bulkier, worked as well as anything that is state-of-the-art today. On his wall spanned diplomas and certificates from the 20's to the present day, with presentations from the Radio Club of America and photographs of his cohorts, other radio pioneers. Few people could be more unassuming and just simply nice (inviting two complete strangers into his home and showing us his lifetime of accomplishments) and at the same time inspire the awe of having created history.

Next time you use your radio, think about the first police officer who ever used a two-way radio and the man standing behind him, who provided the tool. He now stands behind you.

Mr. Gunther was 91.

Steve Makky, Sr., KA2AYR
Communications & Warning Officer/
9-1-1 Coordinator
St. Charles County Gov't.

To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC187 Agency Needs Shift 4/4 For release 6/8/99

(continuation of article by Rick Palm K1CE, from May 1999 QST
Reprinted with Permission; Copyright ARRL)

"AMATEURS SHOULD EMPHASIZE AMATEUR RADIO'S ROLE AS A BACK-UP
Communication SYSTEM, ESPECIALLY NOW FOR YZK PROBLEMS.

Y2K issues came up in several conference discussions. At its meeting in January, the League's Board directed staff to recommend to Section Managers, Section Emergency Coordinators, and ARES groups that they enter into special agreements (MOUs), and conduct drills, with public utilities and public safety agencies for emergency communications should regular communication systems be disrupted by Y2K problems.

There is some serious opportunity for Amateur Radio here. At the FCC's Year 2000 Task Force's public forum entitled "Year 2000: Maintaining Emergency Response Communications," it was clear after listening to many qualified speakers from the FCC, industry, state and county government, and others, that the "millenium bug" will cause problems, including telecommunication problems.

The purposes of the forum were to (1) emphasize the importance of ensuring the proper functioning of emergency communications links: (2) warn about hidden Y2K problems that could affect the functioning of emergency communications systems; and to persuade larger members of the emergency response community that are already engaged in Y2K compliance, to convey the importance of these problems to smaller emergency response entities.

The FCC is taking the Y2K threat very seriously. Many sectors are profoundly concerned about public safety systems being disrupted by Y2K problems. For example, at the time of the forum (November 1998), U.S. Fire Administration studies showed that 98% of the nation's fire departments were aware of the problem, but only 77% were active in trying to address it. Only 27% were fully ready. The USFA is working with FEMA on Y2K-related catastrophic planning.

Amateurs should take the threat seriously, too, and coordinate now with served agencies for MOUs and drills.

EXPANDING OUR CLIENT BASE WITH NEW AGENCIES TO SERVE WILL MAXIMIZE OPPORTUNITIES FOR AMATEUR RADIO.

A good suggestion came from one of our own Emergency Coordinators, June Jeffers, KB0WEQ, at the Midwest Regional Public Service Conference. If we lose the opportunity of serving some agencies as a result of our being displaced by new technology, we can hedge our bets for the future by expanding our client base, ie by drafting new and possibly non traditional entities to serve. Looking for new clients to serve, Jeffers has been working with district schools in establishing an emergency communication network, with a permanent station at district HQ.

Jerry Boyd, K6BZ, a well-respected public safety official, ARRL Section Emergency Coordinator, and frequent QST "Public Service" column contributor identified other sectors for expanding our client base: public works departments, utility companies,

transportation companies, hospitals, convalescent centers, senior citizen homes, and child care centers. See his foresighted editorial in "Public Service", February l995 QST, p 80.

SUMMARY: Is there cause for alarm that Amateur Radio may not have a future in public service communications? In many, especially rural parts of the country, it will be a long time before sophisticated telecommunication Systems become available to public safety and related agencies. In others, new technology is here now and our role has already been diminished as a result. It is clear that new telecommunication tools will ultimately affect the needs of all of our served agencies in the not-too-distant future. We cannot become complacent. We must adapt to meet their evolving needs or we face reductions in opportunities to serve. That translates to less relevance, and a weakened position when it comes time to defend out spectrum needs in the face of increasing pressure from other interests.

If we work to adapt to our served agency's new needs, and keep up our public service record established more than 80 years ago intact, we can continue to count on the valuable returns: as examples, consider that both APCO and FEMA filed comments opposing the powerful Land Mobile Communications Council's petition to re-allocate the 430-440 MHz segment of the amateur 70 cm band. In APCO's case, the organization had broken ranks as an LMCC member to do so. Such support from our served agencies is priceless and we must do everything we can to safeguard it for the very existence of Amateur Radio as we know it today, in the future.

AcknowIedgements -

Members of the ARRL Board of Directors and Field Organization made significant contributions to the planning and execution of the 1998 Regional Public Service Conference program. Thanks go to Directors Frank Butler, W4RH; Many Lou Brown, NM7N (SK), and Lew Gordon, K4VX. Thanks also to Section Managers Randy Stimson, KZ7T; Orlan Cook, W0OYH; Kevin Bunin, K4PG; Rudy Hubbard, WA4PUP; Mike Langrell, AA7VR; Les Shattuck, K4NK and Sandy Donahue, W4RU. And thanks to Section Emergency Coordinators Joseph Plankinton, WD0DMV; Manny Papandreas, W4SS; Tom Rogers, KR4OL; Nils Millergren. WA4NDA; and Lewis Williams, WB7NML. Thanks also to all of the presenters, especially Steve Hailey and Gary Gilbam of National Red Cross Headquarters; Jerry Herman, N3BDW, of the Hurricane Watch Net, and John Mchugh, KU4GY, of the National Hurrican Center." (end)

> Kenwood (big bucks)?

Since I tend to think in the tube world, do you have metering on the final? If so is there high voltage. If there is high voltage is there plate current being drawn in transmit. If there is no B+ then it would be that power supply, if there is HV and no current that I would suspect the tube or your exciter/IPA. Of course if you are in the solid state world then all the above would apply, but you wouldn't have any metering to look at so nevermind!

Source record: 140310

Once the "I want it noowww" no-code whiners get the code requirement thrown out, the next step will be to gut the written element even further. The exams won't get harder, they'll follow your suggestion, and delete all technical questions. After all, requiring knowledge discriminates against the ordinary citizen, who isn't required to know anything about anything else, except when the circus starts, and at what window the bread is being dispensed.

755. Re: Manual for Alinco HT Specifically DJ-G5T models

Message-ID: <Ch%63.25286$Gn3.3533@news.rdc1.il.home.com>
Source record: 140311

One more question,
What is the sequence to recall a memory channel?
I hit MR without the function key and press enter and get the dashes and no entry is accepted, also without hitting enter it does not accept entries so how do I recall a memory channel?

I checked that and basically NONE are available, only some mods and such, no HT manuals. \\I am really upset that a company does not make these available.
I had to fill out a form and give my Credit Card, they don't even have a phone number.

The web site is really under construction, very very sparse.

Thanks for the suggestion though.

Willful interference is not my style, old man. I'm obviously
commenting on the hypocrisy in your position.

I thought you were an Engineer, Cecil. Do you now claim to have had
extensive formal training in psychology that would allow you to make
such an "insightful" inference? Simple question old man, yes or no?

> contesters don't even listen. They tune up on top of my existing
> QSO and start hollering "CQ contest". Thank goodness, contests
> are not usually allowed on the WARC bands.

You didn't say *some* old man, let me quote you again:

"The rule against willfull interference is a protection of my
individual rights. Contestors violate that rule at will." - Cecil
Moore, 06/05/98

"I also believe that murder should be banned, Michael. Willfull
interference is not "live and let live" and is already illegal yet the
ARRL encourages willfull interference every contest day. Libertarians
support laws to protect individual rights. They are against laws that
violate individual rights." - Cecil Moore, 06/04/98

If you meant to say *some*, then please explain why you feel that
contesting should be "banned from the ham bands":

"I know enough to know that "polite contester" is an oximoron. I
personally think contests should be banned from the ham bands.
Contesters willfully interfere with my normal operations. - Cecil
Moore, 06/04/98

That sure sounds like a fascist belief to me old man, certainly not a
Libertarian one. If only *some* contesters are the problem, then why
ban the activity? Only a fascist would do that. Are you next going to
ask that we excuse the infamous fascist Mr. Hitler because he had some
personal anecdotal evidence of *some* 'bad Jews'??

You are certainly a man of contradictions, old man. You are an
embarassment to true Libertarians if that is in fact what you consider
yourself to be. That reminds me of another conundrum that I presented
you which I have still not seen you respond to:

> I'm no longer an NCI member. Fred, himself, promised to remove me
> from the membership list. All I ever wanted was a 5wpm general
> and, seems to me, that is a shoo-in.

A 5 WPM General still involves a code test, right?

Please explain:

"As a Libertarian, I believe in as little federal governmental intervention/control into private lives as possible. It would be hypocritical and inconsistent for any Libertarian to support Morse code testing." - Cecil Moore, 03/18/98

Are you now finally admitting that you ARE a hypocrite AND inconsistent? Or did you resign from the Libertarian party as well? Or do you have some lies floating around in here somewhere?

I'm finding it harder and harder to believe anything you say, old man. You are either a habitual liar, a habitual hypocrite, or you are insane (or all of the above). If you certify for me that you are insane, I will let you off the hook and stop asking you these difficult questions.

No that's not what I'm saying at all. I don't jam and don't condone jamming.
Although the ones that disagree with the comments made on that "So Called" net
seemed to be BLOCKED from making remarks. I guess the jamming is a form of
OUTRAGE.
Vic doesn't let anyone on that doesn't follow the "party" line.
It's human nature to be outraged at certain things. You know foul and
distasteful language doesn't have to come in the form of four letter words.
Actually the net would be "more normal" if they would allow opposing views but
Vic has never done that. As soon as Vic, or the members of the "So Called" net,
determine that the speaker is in opposition to them or their beliefs, they key
up, talk over, call a jammer, attack character etc. Everyone knows this that
has listened for any length of time. The "So Called" net is an organized, one
sided, one theme, repetitious, white supremacist, newsgathering, propaganda
broadcast on Amateur Radio.
An International Embarassment.

I'm a pretty hard person to offend in the insult department, but that one is clearly over the line, IMO. We're debating regulation change in a *hobby* after all, none of this rises to the level of taking shots at a person's physical well-being.

donkboy99 = porkbut = loser = QRMer = theif

Here is a mathmatical fuction I think that we all need to know.
Amatuer Radio - porkbut = A great radio service
The communitive property in mathmatics does apply here. In most
subtraction problems the communitive property doesn't apply except if
and only if one is porkbut and the other is Amatuer radio. I will let
you see the check to the known fact that this is the only case that the
communitive property of subtraction applys. Watch
Amatuer Radio - porkbut = A great radio service
note look at how this plays in the communitive property of mathmatics.
porkbut - Amateur Radio = A great radio service
So has you can see mathmatics proves that Amatuer Radio would be better
off without porkbut. Math does not lie!
This has been a fine lesson in the communitive property of subtraction.

God No!! It is my job and my hobby. I love radio construction. Funny thing, I design and build a project, make a couple of prototypes to get it 100%, then it goes in a drawer with the rest and I start on the next project. I never seem to have the time to actualy get around to using my radio equipment, I am too hapy building it!

Hello !

I'll make a business trip to Boca Raton next 2 weeks. If I'll have time,
I'd like to shop in a HAM Radio store.
Are there any good and cheap stores around Boca Raton or between Miami
and KSC?

Tnx

Joe (OE6RJD)

I think that without HAM's we would be exactly where we are now anyhow, out of need.
Instead of HAM's, some normal person would have invented what we have today.
Just like without Einstein, we would still have the nuclear bomb.

The FCC is attempting to hire him, after discovering that the antenna is tuned to (and very directional on) 3.9MHz. Approval of employment has been delayed because of his childish antics and the fact that he is not a US citizen. The TeleTubbies are British. And this one fits in a little TOO well with the 3.9MHz crowd he would be investigating!

Hope this info is helpful.

In the response from donkboy, the word "your" should be the contraction "you're," a substitute for "you are."

And the word is "panties." When a word ends in "y" preceded by a consonant, the plural is formed by dropping the y and adding "ies." I learned this in the fourth grade. Donkboy must have dropped out in the third grade.

Eric, for a logic expert, you sure don't seem to know much about
logic. Most people know that all-inclusive words like "all", "none",
"always", "never", etc. invariably make a true/false statement
false. I certainly did not say "all contestors" above. I would be
an ignorant idiot to have said "all". Anyone who infers "all" from
the above statement is an ignorant idiot. "Some" is clearly implied
because "all" is completely illogical.

Lloyd Davies wrote to Doc:

> Are any of them Jewish???

You know Lloyd, you may be pleasantly surprized to know that
your last name actually has Hebrew roots to it. That may help
explain your apparent fascination with all things Jewish.

The root name of "Davies" is "David". That name appears to have
origins in the area known today as "Scotland" but is definitely
not from the Scottish Gaelic, Anglo or Saxon tribes.

In fact, it is likely descended from an early migration of people
to this newly conquered Roman territory from Roman held lands in
the mideast (Assyria, Egypt and most notably Israel). The early Jewish
settlers migrated to "Anglo Land" ("England", including Scotland) and
Eiraan (Ireland) in addition to Gaulia (France) and Espania (Spain).
"Davies", Israeli
in origin, would simply mean "of/from the House of David".

That would make you a very lucky man, Lloyd, because when
those black helicopters come to get you and take you to that
Amtrack station way up there in Indiana, you can plead that
all of this League of the South stuff was just a joke and that indeed
you played a key role as a secret Jewish Conspirator in the New World
Order after Clinton declares marshal law.

Check it out Lloyd, some of your surviving relatives in Europe
likely speak Yiddish to this day.

But most important, make your new found family proud Lloyd.
Get a real ham radio ticket (General or above).

For all you foes of the Constitution, recall now that some months ago I revealed the use of this system, in FCC cases against hams that just couldn't be detected through other reception means (especially VHF cases not near a Field Office). Our good friend Phil Kane denied this, and several of you mocked the accusation. A cross I'll gladly bear as a government whistleblower. CIA and NSA are not to operate domestically, for those of you saying who cares. Do you like these people illegaly monitoring your phone ? Your cell phone ? Your e-mail ? The sad thing is many NSA monitors are HAMS. Figures.

Efforts made to prevent privacy abuses against U.S. citizens

June 7, 1999
Web posted at: 11:53 a.m. EDT (1553 GMT)

by Daniel Verton CNN/IDG

(IDG) -- Congress has squared off with the National Security Agency over a top-secret U.S. global electronic surveillance program, requesting top intelligence officials to report on the legal standards used to prevent privacy abuses against U.S. citizens.

According to an amendment to the fiscal 2000 Intelligence Authorization Act proposed last month by Rep. Bob Barr (R-Ga.), the director of Central Intelligence, the director of NSA and the attorney general must submit a report within 60 days of the bill becoming law that outlines the legal standards being employed to safeguard the privacy of American citizens against Project Echelon.

Echelon is NSA's Cold War-vintage global spying system, which consists of a worldwide network of clandestine listening posts capable of intercepting electronic communications such as e-mail, telephone conversations, faxes, satellite transmissions, microwave links and fiber-optic communications traffic. However, the European Union last year raised concerns that the system may be regularly violating the privacy of law-abiding citizens.

However, NSA, the supersecret spy agency known best for its worldwide eavesdropping capabilities, for the first time in the history of the House Permanent Select Committee on Intelligence refused to hand over documents on the Echelon program, claiming attorney/client privilege.

Congress is "concerned about the privacy rights of American citizens and whether or not there are constitutional safeguards being circumvented by the manner in which the intelligence agencies are intercepting and/or receiving international communications...from foreign nations that would

otherwise be prohibited by...the limitations on the collection of domestic intelligence," Barr said. "This very straightforward amendment...will help guarantee the privacy rights of American citizens [and] will protect the oversight responsibilities of the Congress which are now under assault" by the intelligence community.

Calling NSA's argument of attorney/client privilege "unpersuasive and dubious," committee chairman Rep. Peter J. Goss (R-Fla.) said the ability of the intelligence community to deny access to documents on intelligence programs could "seriously hobble the legislative oversight process" provided for by the Constitution and would "result in the envelopment of the executive branch in a cloak of secrecy."

A neighbor once, after months of torture, intimated voices emanated from her washing machine. She was genuinely afraid to use the device, and was certain it, or her house was haunted.

A little investigative work, and a choke on a 75 ohm feedline which was radiating, cured her curse. There must have been enough oxidation in the motor coupling to rectify, and in some way the "bowl" of the washing machine was working like a speaker.

She sleeps better now. Not a CW story, but "voices" none the less.

There is nothing wrong with using a PC on the code test, as long as you are not using it to actually decode the the test data. You simply type into a word processor window or a text editor.

I took, and passed, the 20 WPM test on June 5. There were two of us. I used a pencil and paper and the other tester used a keyboard, hooked up to a laptop. I hate to say it, but, he didn't even make it through the 1 minute practice session before he pushed it aside and used a pencil. I never did find out if he passed.

Yes, that's one solution. Another solution would be to use a gamma
or T match on the driven element. That would allow you to tweak for
a near perfect match. I'd prefer the T match, but for coax feed a gamma
match is also a satisfactory approach.

Go back and read what he's doing again. Super-gaining a yagi will often
result in a very low feed impedance. 15 ohms sounds like a reasonable
number, even lower values are not uncommon. The SWR values he gave
are for his *current* antenna, not his newer super-gain design. An impedance
transformer will be required for his newer design. That could be a balun
transformer, though conventionally a gamma or T match would be used
instead. That avoids issues of saturation of a balun transformer core.

> No that's not what I'm saying at all. I don't jam and don't condone jamming.

Now, that simply isn't true, Timmy. I have a recording of you chanting "nit net, nit net, nit net" over and over again on top of other people's transmissions in an obvious attempt to interfere with others and disrupt their conversation. It's posted at my web site. Please listen to it again if it will help you refresh your memory. If that's not jamming, what is?

It's merely one of hundreds of instances of similar behavior from you.

Is it your argument that inserting unwanted catcalls, obscene words, and snide remarks on top of other people's transmissions, even when you have been pointedly informed that you are not wanted in the QSO is somehow not malicious interference?

Is it your position that merely because you give your callsign while doing so, it is permissible to purposely attempt to drown out others' QSOs?

And as far as "condoning" jamming is concerned, I think that everyone here is well aware how large a percentage of your output is devoted to justifying the outrageous behavior of the known jammers, with whom you seem to have an unusually close on-air and on-line relationship. I'm sure it's well over 90 per cent. In fact, you seem to have relationships with no one else, as far as I can tell.

When you hear K5BLB or (the now defunct) WA9KJI monologuing, jamming, and playing noise tapes, how many times have you chimed in to encourage the noise-making or legitimize it as a "contact"? I've heard you on several occasions encourage your demented friend Sid to play more tapes -- "Yeah, go ahead there Sid, play that tape about them teluptious black bodies..." Or the advertising tape for the Chevy S-10... Or the tape of him reading a magazine article backwards... Or distorted Porter Wagoner music... Or your favorite, the "Anchors Aweigh" tape. "Go right ahead, Sid..."

If that's not condoning jamming, what is?

Further, I've never once heard you discourage the malicious interference activities of your jammer friends. If you were really their friend, and if you really didn't condone their illegal and immoral activities, it seems to me that you would try to steer them away from wrongdoing.

> An International Embarassment.
[...]

Actually, none of that is true, either. I myself have disagreed with Net participants on many issues: abortion, religion, Kosovo, the Republican party, among many other subjects, have all sparked serious and gentlemanly debate. The fact that I disagree with W1WCR or KN4CF or N2SAG or others on the frequency on some issues has never stopped us from treating each other as friends and gentlemen. I've learned a lot.

For several months, until the jammers drove him away, a liberal activist was a regular check-in and was welcomed on the Net. Before they became malicious jammers, even WA9KJI, K5BLB, W5VVI, N5OUG and others were welcomed on frequency by the legitimate participants. Even WB2OTK, with his bad reputation among Net participants and his near-total disagreement, was welcomed to say his piece (at great length, I might add) one night as long as he behaved himself properly on frequency, and on that night he did. You know very well that K1GKM, when behaving within the rules, has been welcomed to voice his strongly divergent point of view.

The only people who are usually excluded by most of the legal operators on 3950 are the ones who have made a career out of intentional interference or other disruptions of the legitimate conversations there. I'm afraid you richly deserve to be put in that category, Tim.

It's as if you and your friends attended a concert in the park week after week, each time pushing your way on stage and dropping your pants while shouting the grossest of obscenities over the orchestra.

It's not surprising that the conductor doesn't want you around
anymore.

Happy Internetting,

Kevin, WB4AIO.

I've done it once or twice so far. Don't use the regular whip, use a
telescoping whip with more gain or a handheld beam like the Arrow.
Also remember the doppler shift, if you can't hear yourself on the downlink
your not making it into the sat and you may be causing QRM to others. Orient
your telescoping whip broadside to the sat, don't point it AT the bird.

Hope this helps.

73,
Tom

Where in the Constitution or The Bill of Rights does it say that an individual has the right of privacy, either physically or electronically?

It doesn't say it anywhere, and even if it did, these monitoring operations were taking place on European and Middle Eastern telephone/satellite systems which wouldn't be subject to our Constitution anyway.

I for one can sleep at night knowing that systems such as Echelon are in operation.

Message-ID: <19990608131426.01882.00000091@ng-ft1.aol.com>
Source record: 140364

>
> 1. Why was a busy frequency on 20 meters (14.313) chosen as site for this
> alleged testing?
> ***IT WASN'T BUSY. IT WAS AS EMPTY AS YOUR HEAD AND FURTHERMORE I LIVE ON
> THAT FREQUENCY WHICH IS A DAMN SITE BETTER THAN LIVING IN ATHENS
ALABAMA*******

Dr. Hate's Lie de-bunked:

If the frequency had been clear, and the station had been properly identified as testing, then the NOV would never have been issued. The fact that the NOV was issued proves that the frequency was occupied and that the true purpose of the tape playing was to interfere with on-going communications.

> 2. Why was a frequency chosen that was already occupied by members of
The
> Better Amateur Radio Federation?
> ****THE BARF STANDS FOR "BIGOTED AMATEUR RADIO FACISTS" not the Better
Amateur
> Radio Federation. I GUARANTEE NO ONE WAS ON FROM THAT GROUP BECAUSE THE
> FREQUENCY SMELLED CLEAN.*******

Dr. Hate's Lie de-bunked:

The frequency was occupied by a number of B.A.R.F. members. That is the real reason why Dr. Hate continuously played the pre-recorded tape for a period of approximately an hour. Dr. Hate's feeble attempt to turn his very serious violation into a joke is further proof that he is afraid to admit the truth. He was caught in the act of causing intentional and malicious intereference. The FCC cited him for his actions.

> 3. What was the purpose of playing a pre-recorded tape of Adolf
> Hitler?*****IT
> WAS A TAPE OF HERBERT SCHOENBOHM DOING A ROUTINE ABOUT HOLOCAUST
> TRIVIALIZATION
> WHICH COME TO THINK OF IT WAS THE SAME AS ADOLF HITLER*********

Dr. Hate's Lie de-bunked:

Of course it was a tape of KV4FZ. What other tape would AF2Y choose to deliberately QRM the B.A.R.F.? A legitimate tester would never have used a tape of his supposed "enemy" to test their rig for BCI/TVI/Telephone interference. The FCC must have agreed since they considered these transmissions to be deliberate and malicious intereference.

> 4. Why wasn't the frequency checked for activity and possible
interference
> when the station identification was given?****THE JAR WAS EMPTY! ZILCH.
> NADA.WHAT MAKES YOU BELIEVE THE FREQUENCY WASN'T CHECKED? I ALWAYS CHECK
> FREQUENCIES. SOMETIMES I GET UP AT THREE 'O CLOCK IN THE MORNING TO CHECK
> FREQUENCIES. THE OTHER NIGHT MY WIFE AND I WENT OUT TO DINE IN A POSH NEW
YORK
> RESTUARANT ON 38th STREET AND I LEFT AT NINE O'CLOCK TO CHECK A FREQUENCY
AND
> THEN DROVE BACK TO FINISH MY MEAL.*******
>

Dr. Hate's Lie de-bunked:

This is another very sad attempt to trivialize a serious violation of the rules. Dr. Hate isn't capable of humor. He is simply trying to avoid admitting that the frequency was in use and that his transmissions caused intentional, malicious interference.

> 5. Why were the pleas of stations trying to use the frequency
> ignored?****YOUR
> SPELLING IS WRONG AND SO IS YOUR INTERPRETATION. THEY WERE YELLING,"PLEASE
USE
> THIS FREQUENCY>*********
>

Dr. Hate's Lie de-bunked:

Dr. Hate isn't slick enough to slide out of this indictment of his operating practices. He was caught in the act of causing deliberate QRM. He was cited. The FCC never modified, withdrew or recinded their citation.

> 6. Why wasn't the testing done at night after the band was dead?****WHO
SAID
> 20 METERS WAS "DEAD" AT NIGHT?BESIDES,I AM MORE ENERGETIC IN THE MORNINGS
AND
> RUNNING UP AND DOWN A LOT OF STAIRS FROM THE FAMILY ROOM TO THE BEDROOM
TOOK A
> LOT OF ENERGY. BUT THEN AGAIN IF I LIVED IN A LOFT AS YOU DO WITH SAWDUST
ON
> THE FLOOR TO ABSORB THE STINK, I COULD HAVE TESTED AT NIGHT>*******
>

Dr. Hate's Lie de-bunked:

It does not matter when it is convenient for Dr. Hate to do his alleged "testing". One would think that an Extra Class amateur would know when the 20 meter is usually "dead" or very quiet. It was up to AF2Y to schedule his "testing" at times when he would be least likely to interfere, choosing frequencies that were unoccupied. Dr. Hate's insult routine is just a smoke screen he uses to try and cover up the basic facts. He was caught QRMing a busy frequency with a pre-recorded tape.

> 7. Why would an Extra Class operator ignore all these factors and choose
to
> cause deliberate and intentional QRM on a busy 20 meter frequency?***TO
FIND
> THAT OUT I SUGGEST YOU ASK AN EXTRA CLASS OPERATOR WHY HE WOULD IGNORE
FACTORS
> AND CAUSE DELIBERATE AND INTENTIONAL INTERFERENCE ON 20 Meters****
>

Dr. Hate's Lie de-bunked:

According to the FCC, Dr. Hate is just such an Extra Class operator. He is an operator who ignored the rights of others and deliberately interfered with legitimate QSO's on 20 meters. The FCC cited AF2Y because it was obvious to them that his alleged "testing" was a lie he dreamed up as an excuse for his psychotic need to interfere with amateurs that he hates.

> 8. What documentation is available to prove that the response to the
Notice
> of Violation was acceptable?
> ****IF IT HADN'T BEEN, THE FCC WOULD HAVE COME DOWN ON ME AS THEY DID ON
> KV4FZ.
> I WOULD HAVE HAD TO PAY A FINE AND THEN TRIED TO LIE MY WAY OUT OF IT
BEFORE
> JUDGE LUTON.*******
>

Dr. Hate's Lie de-bunked:

The FCC does not always issue NAL's in every case where a NOV is issued. The fact that the FCC showed leniency does not change any of the facts. The NOV was never modified or withdrawn. It is a permanent record of AF2Y's illegal activities on the amateur bands. A copy is available to anyone through a Freedom of Information Act request.

> 9. Was the Notice of Violation ever recinded or withdrawn?
> ****NO,IN FACT IT'S NOW BEING MADE INTO A MAJOR MOTION PICTURE STARRING
TOM
> HANKS*****

Miracle of Miracles. Dr. Hate actually admits that the NOV stands to this day. It is a black mark against him and a black mark against all Jewish radio amateurs. Shame on Dr. Hate for bringing disgrace upon his people.

> 10. Is not true that the Notice of Violation is now a permane
> Just rememeber, I will post these "In your face" until you answer
> truthfully!
> ****YOU GOT ME. IS NOT TRUE A PERMANE AND IN YOUR FACE TOO******Doc,AF2Y
>

Dr. Hate's NOV is a permanent part of the FCC record and could very well be used as evidence against him in any future proceedings. All of his insults, sick jokes and other "avoidance techniques" will not change the facts cocerning AF2Y's very serious violation of the amateur radio regulations.

Case closed.

This is indeed an interesting viewpoint.

If the wealthy and powerful can read my mail and listen to my
personal telephone calls at will, and you think that's all right, do
you also agree that it would be only fair to allow _me_ to read
their mail and listen to their telephone calls at will, with no
legal penalties for doing so whatsoever -- right?

Quizzically,

r_buschner@KNUUT.de (Ralf K. Buschner) writes:

>Do _you_ want instead of the code test any questions like:

>"Explain detailed different methods to stabilize a satellite system in
>the right direction relative to the earth!"

>"Explain the exact function of a poll bit in ax.25 protocol!"

>"Is the crc checksum built over the complete packet including the frame
>header or only over info content?"

Now that you mention it, all three of those pieces of information seem more relevant to radio communication, as practiced today, than proficiency in Morse code.

Also note that, if those questions were on an amateur test, you could ignore all three of them and still pass the test easily, as long as you knew the answers to most of the test questions. You don't have to know the answer to every question.

An interesting question: Do you want an amateur test where you fail the test completely if you can't get perfect answers in the satellite stabilization section of the test? Would that be reasonable or fair?

(You'll have to admit this would be effective at keeping people out of the hobby, which some people seem to be saying is the function of the Morse code test).

Dave

Kevin,the problem is that the article that mf_luder posted was only 1/2 informative. The NSA and CIA were in fact listening, or eavesdropping on telephone calls, however, they were EUROPEAN and MIDDLE EASTERN telephone and cellular satellite calls.....NOT U.S. based calls through any American public telecommunication utility companies.

Not all HAM's are bad, just the old elitist farts.
They beleive in hazing others through morse code, when morse code is now worthless.
I don't beleive there should be a hazing process at all.
You know, this is HAM radio, where your transmissions are no one elses damned business except the FCC's.

Yeah, my grandparents used to have a house next to a HAM and my grandparents had a lightbulb in a lamp that talked
everytime the HAM keyed up.
Also, I had a HAM right down the street who just two years ago was making my soundcard talk.
Someone must have complained about him as he and his tower were gone less than a month after he was talking through my soundcard.

Anyone out there that can help out with the identification of this part? This tuning diode lives in a Watkins Johnson 8718A/MFP receiver and is part of the 3rd lo.

I am in need of the specs/data sheet for a varactor diode that was made by Seimans about 1985 or so. It is used in an oscillator circuit, I need the operating parameters so I can repair this circuit. The part number is: BB105B. The circuit is very touchy and I need to get as close to the original part as possible.

It was suggested that this part may have been originally produced by Phillips for Seimans.

I tried all of the usual sources with no results, even tried the manufacturer with no luck.

Thanks in advance
Dennis W6DEN

Hi all
I need some help putting a re-sale value on some Amateur Radio Equipment, which belonged to my Father who died recently. The Kenwood items were bought from new approximately 3-4 yers ago.

*Kenwood TS-950SDX HF Transceiver
*Kenwood Sm-230 Station monitor
*Kenwood SP-950 Speaker
In original boxes with
Manuals - bought from Lowe

*Trio TR-75oo 2metre transceiver
*Trio PS-6 Power Supply
*Daiwa CN-620 SWR/Power Meter
*Icom IC-229E 2m transceiver with manuals

Any help or advise would be appreciated

PLEASE EMAIL DIRECT

Message-ID: <375d53d8.75967078@news.nist.gov>
Source record: 140374

I will be beta testing the new version of the NIST Atomic Web Clock
from June 8, 1999 to about June 13, 1999. If you would like to help me
test this new Java applet, please go to the following URL:

http://www.boulder.nist.gov/timefreq/beta/clock.html

You MUST have a Java enabled browser in order to see the Web Clock.
Also, if you have a firewall, this may prevent the applet from
running.

This is a beta testing process, so this URL may not always be on-line.

Thanks,

Dr. David Lee (N5TLZ)
NIST
Time and Frequency Division
Boulder, Colorado, USA

1) There is an excellent article by Ray Soifer, W2RS, "AO-27: An FM Repeater in the Sky" publ. in NEW HAM COMPANION by ARRL. He worked AO27 with an HT and an MFJ-1717 antenna. His email is w2rs@amsat.org if you can't get the above publication.
2)Chapter 13 of THE ARRL HANDBOOK has basic info on the AR sats.
3)You will need satellite prediction tracks for your area. Go to http://acsprod1.acs.ncsu.edu/scripts/Ham Radio/sattrack.perl/1

Lots of Luck, Oscar

(Simplified test approved by all book and magazine publiher and
liberal-huckster columni$t$ who $ay ï¿½We need more ham$ï¿½)

Please PRINT (that means no squiggly lines)

YOUR NAME (what they call you)
_____

ADDRESS (where you live) _____

BIRTHDATE (when you were born) _____

EXAM

Instructions: Make a circle (one of these round things O) around the
letter of the best answer! This is so we know what your answer to the
question is!

1. You TALK into a microphone with your _____.

A. Hands
B. Feet
C. Toes
D. Mouth
E. Armpits

2. When you talk into a microphone, you talk into _____.

A. the front
B. the back
C. the top
D. the bottom
E. the wire

3. ï¿½HEADPHONESï¿½ are worn over the _____.

A. Knees
B. Eyes
C. Toes
D. Ears
E. Lips

4. What do you do with the AC line cord coming out of a power supply?

A. Hold it in the air to pick up signals
B. Pull on it to start the motor

C. Talk into the plug to get real "skip DX"
D. Hook it to your antenna
E. Insert the plug into a source of power

5. A ï¿½two meterï¿½ radio is:

A. twice as strong as a one-meter radio
B. two one-meter radios in series
C. a CB with two meters on the front panel
D. a good doorstop
E. yo mama

6. A "ten-foot mast" is how long?

A. Ten feet
B. Ten pounds
C. Two meters
D. Tree-top tall
E. yo mama

7. A ï¿½Triband antennaï¿½ is made to work on how many bands?

A. 1
B. 2
C. 3
D. 4
E. 10

8. The ï¿½Marconiï¿½ antenna is named after:

A. Marconi
B. Mantovani
C. macaroni
D. Dean Martin
E. yo mama

9. What colors of DIODES can you buy at a Radio Shack store?

A. Red, blue and black
B. Red, yellow and green
C. Orange and brown
D. I am colorblind so this is a discriminatory question and I should automatically get my license because you have been mean to me.
E. I have no intention of ever using DIODES, so I should get my license for free.

10. What color of SLURPEE can you buy at 7-11?

A. Red, blue and black
B. Red, yellow and green
C. Orange and brown
D. I am colorblind so this is a discriminatory question and I should automatically get my license and free slurpees forever because you have been mean to me.

END OF EXAM.

Well Well Well
Old Charlie's come out in true form. I'm one does not agree with his tacktics. So what does he do, he attacks me! Like I said before he has not a nice word for anyone. I find that very disturbing.
Charlie do you not like the fact that I have questioned your activity not only on 75-meters but 20-meters too. Charlie what I can't figure out about you is that you can't see the forest through the trees. I wonder with all the hate you spew about everyone if you yourself don't have some sort of addiction problem maybe not booze but maybe something else. Has your doctor got you on valuim or prozac or some other anti depressant? Are you taking it right? I mean you seem to hate everyone in this newsgroup. Let make a small simple sujestion. Hit the road and don't let your keyboard hit you where the sun don't shine. I mean why else would you come into a newsgroup that EVRYONE dislikes you. I mean at first I thought that you might add a color and maybe even a different veiw on things but now all I see from you is hate. I want you to know that I want no part of that type of behaivor. You seem to have it in for everyone. WHY?? Why do you hate people that have an opinion that is different than yours. Differance is what makes the world such a neat place to live. Its because of the differances people have in values, opinions we learn. Its good to get another way of looking at things. Its people like you so full of hate that cause wars commit murders etc etc etc... Charlie I would go and talk to somebody about your problem before you hurt someone in your family or even yourself. God knows that if you where take this attude of yours out on the street you might not make it home. PLEASE GET SOME HELP Charlie. PLEASE!
Thats just my opinion I could be wrong.

Let me make this clear
I am not***NEITHER*** a gun collector nor a gun lover. I own one gun for
one***I also have a gun for one "porpose"-to protect FLIPPER*****(IN BROOKLYN,
IT'S A "POIPOSE not "PURPOSE")
porpose. That purpose is to shoot people, theives****THIEVES**** (like
porkbut**Porkbutt*** just a
example he is a theif.) ***THIEF***that***WHO*** come in my home to
steel***STEAL*** stuff and put my
wife and kids in harms way. Now by saying that***COMMA*** I will add this. In
1969
one could have a gun mailed to there ***HIS***house***COMMA*** no questions
asked. We didn't
have half the problems in 1969 that we have now and there was a not***THERE WAS
NO*** very
popular war going on. So whats ***WHAT'S***that tell me? The government screws
up
everything they***IT TOUCHES*** touch. The NRA back in the sixties said that
gun
controll***CONTROL*** would only allow the criminals to have guns and its true.
More
gun control = more problems = more crime!

I can give you another example of how the governement **GOVERNMENT***screws
stuff up
and it has nothing to do with guns. That is the 11-meter band. Who in
there **HIS***right mind would put a radio service on a band that is full of
propagation then say no one may talk over 150 miles. ***QUESTION MARK***I can
give more
example***EXAMPLES*** if need be.
Thats***THAT'S*** just my opinion I COULD BE WRONG!

Hola Jeffrey, you sunburned idjit,

Two points for you to consider:

1. In your country there are now about 675K hams. Of those, about 195K (Techs) do not currently have HF privs. If those 195K hams got on HF (but see point #2) at the same rate as the other US class have, 29% more US hams would be on HF. But since the US constitutes less than 20% of the world population of HF-enable hams, the real increase in worldwide HF crowding would be negligible.

2. You can ignore point 1 above, because most of the 195K US Technicians are "paper hams" who have long since sold their shacks-on-a-belt and are not headed to HF under any circumstances anyhow. The barrier to being an active Tech in your country is basically the cost of an HT, and even at this low cost, most have dropped out of sight. The barriers to being active on HF are much greater (not even considering Morse) including more money, more complex installation (few HF HTs exist), antenna restrictions, and all sorts of other barriers.

Those Tech in your country who wanted HF have long since upgraded.

You are still an idjit.

Possibly, but the issue was more that the system does exist and
Congressmen beyond Zorro (R-GA) are interested in possible abuses.

Further, some here have said don't use EM devices and you're safe. Do
these people consider their computer screens EM ?

To be safe, one would also want to avoid using unshielded TVs and
computer screens, as the TEMPEST system can see what's on your screen
from up to a mile away.

837. Electrical Ground Problem and Hum

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-09 00:00:00 UTC
From: wa2rsx@worldnetwork.net
Message-ID: <375e8ef6.11297650@netnews.worldnet.att.net>
Source record: 140132

Hello:

I am wondering if what I am presently experiencing with regard to electrical house wiring is common and/or normal.

I have measured as much as 3-volts AC between the neutral terminal and the ground terminal of the AC wall outlets.

I have connected a wire to the water pipe, which is used as the Ground point for the circuitbreaker box, in my basement. If I connect that wire to my radio's chassis point, I hear hum in the receiver's audio.

Any comments about resolving this problem are welcomed.

73s,
~Vince~

Hi
I sure hope this stuff stops. Twas not like this forty years ago.
By the way, I guess Jews will go to heaven. Remember Jesus was king of the Jews and the apostles were Jewish!

: bridging the crack in the trace with wire or solder. I've save a lot this
: way.

I have, too.
Even on the RF lines -- I've been able to V E R Y carefully
bridge the crack with a suitably-sized piece of tinned wire.
But some models and/or production runs may have a
difficult-to-open bond/seal between the 'box lid' and the substrate.
YMMV.

And, if this is/was the problem, it is due to an overheat, differential
flexing between the substrate and the attached heatsink plate. Insure
this plate and the rig's heatsink mounting area ARE VERY CLEAN AND
SMOOTH before re/installing the pwr amp. Use a V E R Y small swipe
of 'heat grease' on the back of the pwr amp when mounting -- wipe it
down with a clean finger until you can just barely see it. Do NOT
apply it as you would a gasket sealer for an automotive water pump!!!

>kilohams have HF privileges.

Not unless the third of all hams who currently don't have HF
privileges suddenly start acting like contesters or Dxers in
a feeding frenzy. I don't think that they will. That's not their
training or background. They're used to a more orderly style
of operating.

Lets put this in perspective. There are 40 million CBers,
crammed into 40 channels, totally undisciplined, and totally
without effective regulation. Yet despite that, even on a holiday
weekend, there is usually at least one usable channel to be
found on CB at any given time. With the much larger band
space amateurs have on HF, things can't get that bad with
only a 1/3 increase in HF amateurs, unless they all behave
like contesters all the time.

If we suddenly see sales of 200,000 2 kW plus linears,
and 200,000 towers and stacked monobanders, then things
could get bad. But I don't see that happening. What with
restrictive covenants and family budgets, most of those
who gain HF privileges will only be able to field modest
stations. It might be somewhat easier to find a contact on
the bands (whole segments of our HF allocations are often
nearly vacant now, even when propagation is good), but I
don't see bedlam as a consequence.

>Moore, 06/04/98

> Please explain how banning contests from the ham bands would not affect
> *ALL* contesters. We're all waiting, oh great wizard.

I clearly labeled that statement as a personal opinion. My opinion
is worth exactly what it costs - the same as yours. I merely offered
my opinion. I did not seriously advocate banning contests. Some of
us are pretty casual when we share our opinions. If that chaps your
behind, get some chapstick and stick it.

> If only *some* contesters are the problem, then why ban the activity?

Eric, if you admit to the world that you too stupid to differentiate between casual opinions and serious proposals, I will try to be more careful next time.

>Only if you promise to remain off of any HF frequency in which CW
>is authorized. (Which of course happens to be *all* frequencies!)

Turnabout is certainly fair play in this case. So you should stay off
any frequency where modes for which you aren't equipped are
allowed, and that's every frequency on HF. Your argument would have
more force if there were CW exclusive segments on HF, but there
aren't. Those only exist at VHF.

>>With the
>> demise of CW on the high seas and it only being used by very few
>> countries ham radio can no longer justify the requirement for an HF

>what happens outside the amateur service has any bearing on us? Other
>services have equipment and money that we certainly don't. We're now
>unique in that we have the capability to use a mode that no other services
>have the ability to use.

That's akin to saying, "we're unique because we still use spark, other services
have quit using spark." Your argument would have more force if you were talking
about a technique which is an advance over what others are using, instead of
being something abandoned by other spectrum users.

>> We can no
>>longer justify CW as a requirement for operating a ham radio station.
>
>Sure we can. Every HF frequency is designated for CW usage. CW is the
>second-most used mode on HF (but casual listening will show that
>about 50% of the HF QSOs are done in CW). Code is the only common mode
>among the world's HF-licensed hams. So there.

Every HF frequency is also designated for some other emission. You keep
parroting the mantra that 50% of HF QSOs are done in CW, but even a casual
band survey shows you to be wrong (except during CW contests). I don't know
if that's due to your location, your lack of skill with other modes, or just wishful
thinking, but your claim is still wrong.

I invite anyone to do station counts for the various modes any evening to show the fallacy of that claim. I've done so and posted the results here a couple of times already. The only band where the 50% claim has any validity is 40m. The SW broadcasters do make a hash of the parts of the band devoted by tradition to other modes. But it certainly isn't true of the 75/80m band, where the traditional CW portion is an empty wasteland, the 30m band, where data operation dominates, or any of the higher bands.

The claim that CW is the only common mode of the world's hams rings pretty hollow too. In the first place, it isn't really true in many cases. In the second place, it doesn't matter if it were because there's no mandate that every ham work every other ham. That's probably not possible in a lifetime of operating in any case. I have yet to turn on the HF rig and fail to find more stations to contact than I could possibly have time to work using only other modes than CW. Even if your 50% statistic were true (which it clearly isn't), that still leaves 2.25 million hams worldwide available for contacts in other modes. I seriously doubt I'll be able to deplete that supply in a single lifetime.

Poor old June has gone from trying to prove how intellectual he is and bragging about his supreme grasp of logic on the newsgroup to screaming and calling everyone who disagrees with him a Fascist and devote of Adolph Hitler. Now I ask all of you who belong to the Know code movement is this the way you want your one and only self appointed director to act in a public forum.

I'm not complaining. That's a good indication of when someone has
completely lost the argument. Nothing left except to mount a series

>or any of the higher bands.

Well, as a casual listener (well, sometimes more than casual), I would
say that CW dominates the 40M band as well as the 20M band. Sure,
there are other modes used on 20M (plenty of voice in the upper
section) but from 14000KHz to 14070KHz it's packed wall-to-wall with
CW in the evenings. In fact, my 250Hz filter is sometimes too *wide*
for all the adjacent QSOs going on. 30M is also has some nice CW
action although not nearly as much as 40/20. The SW broadcasters are
also a problem for the CW portion of the 40M band but the CW signals
often punch through. My limited experience with 80M (I don't have a
resonant 80M antenna so I don't spend much time there) seems to be a
reasonable amount of CW action around the Novice/Tech+ portion of the
band - the few times I've tried for a contact have been met with quick
successes even at the effective low-power I put out on 80M. I
couldn't tell you what the actual overall percentage of CW on all HF
bands was but I wouldn't laugh at 50% (OK, maybe chuckle, I agree
it's probably too high a guess). I've also made a fair number of good
QSOs on 15M CW in recent months - far from an empty wasteland you
allude to.

Also, I've never heard any CW activity on 10M?!? Maybe something
wrong with that band on my rig or maybe it's not the right time in the
solar cycle.

Regards,

Dave Bernazzani

More nutty, Fascist, hypocritical ramblings from the fake-Libertarian who wants to ban contesting based on some questionable anecdotal evidence:

"I know enough to know that "polite contester" is an oximoron. I personally think contests should be banned from the ham bands. Contesters willfully interfere with my normal operations." - Cecil Moore, 06/04/98

If some strange youngster rides his bike across your yard, do you want to ban bicycles? How about youngsters?

If you were to witness a drive-by shooting, would you call for a ban on cars? How about guns? If the occupants of the car happened to be Hispanics, would you want to ban Hispanics?

Isn't there already a regulation prohibiting the problem?:

"The rule against willfull interference is a protection of my individual rights. Contestors violate that rule at will." - Cecil Moore, 06/05/98

Any chance you have an irrational bias mixed in with your hypocrisy?

"IMHO, most competitive contesters are A__Holes and the ARS
would be better off without them and their contests. Contests,
like forced Morse code testing, are symptomatic of power mongers." -
Cecil Moore, 06/04/98

Have you been to any lynchings lately? How's your white hood holding
up? Is Acme Swastikas still delivering on time? Shall I call you
Grand Wizard or just Mr. Wizard?

(The following was sent to all recipients on my "listener mailing list" upon termination of my professional relationship with Radio, Inc. this past Friday
afternoon. I am including it here strictly for informational and conversational purposes.)

Hey Gang,

All good things have to come to an end. Unfortunately, my tenure at Radio, Inc. and Mix 103FM came to an unexpected close on Friday.

At 3:00PM (as soon as I finished my show), I was summoned into the office. At
this time, management informed me that there was no need for me to work out the
rest of my time here and that my services were no longer needed. I would be paid throughout the end of the month and the next week was to be considered as
a "vacation." I informed management that I appreciated their offer, but that I
was looking forward to performing my final week on-the-air so that I might be
able to say a proper "goodbye" to all the radio friends I have made here in Western Kansas over the past 19 months. I had prepared a last show. I wanted to perform a last show. Management said they understood my desire for this...however, they felt it in the best interest of all involved that we terminate our relationship effective immediately.

So, I guess I'll say "goodbye" this way...although it sure as hell isn't the same. To all of you whom I have had the pleasure of meeting, getting to know,
and entertaining every weekday...thank you so much for your support. I have been doing radio for nearly 16 years. I have been on-the-air in 7 states, on 20 different radio stations, in markets as large as Orlando, Charlotte, and Minneapolis. You are the most loyal, dedicated, and supportive audience I have
ever had. Yes, you...the listeners of Mix 103FM, my midday show, and The Brown
Bag Special. I wish things had ended differently...in fact, I wish they didn't
have to end at all. I wish management and myself had been able to come to terms on the issues which divided us and ultimately led to my departure. I tried on several occasions to accomplish this, but it was not to be.

You will all hold a special place in my heart. Thank you so much for your phone calls, e-mails, faxxes, personal visits to the studio, and whatever

else
you contributed to my show and my success here at Radio, Inc. You will be missed greatly.

Please feel free to share this information with whomever might be interested.
Since I did not get a chance to say "goodbye" on-the-air, I'm sure a cloud of
speculation will now develop as to the reason for my sudden departure from the
Mighty Mix airwaves. You know the truth. Also, please enter this e-mail address into your address books (mnmaniac@aol.com) and use it exclusively from
now on. This is my personal, permanent e-mail address and will find me wherever I happen to end up in the world. Make sure you keep in touch...and I
will do the same.

Most of all, thank you for allowing me into your home, your work, your car, and
your Walkman. Thank you for allowing me to become a part of your lives these past several months, as you have become a part of mine. We had a good time and
a good run while it lasted. Radio in this area will never be the same.

God bless Western Kansas. This "city kid" from Florida now knows you're the best people in the world. Don't ever change.

Drew A. Durigan
Mix 103FM Midday Air Talent
Brown Bag Special Host
October 6, 1997-May 21, 1999

To whom it may concern -
I do not usually post in rec.radio.amateur.misc...I am a frequent poster in rec.radio.amateur.policy BUT I was notified that my call was mentioned here so I am taking the bait and responding. I can not understand what is meant by the above message. Obviously I am not a NAZI. I am a Jew by ancestry and culture but not especially religious nor am I a Zionist. The same could be said for many other American Jews including the late Isaac Asimov, the late Carl Sagan and the late Albert Einstein....BUT I know it might be unfair to put all Jews in a grouping with such intelligent famous people... If anything is to be said here or elsewhere there is only one Robert I. Wexelbaum, W2ILP and perhaps the world is better for that fact or perhaps not...As to my politics... I am a political mugwump. I am pro-Capitalism. I am pro-increased gun-control. I am a mugwump on the No-code/Pro-code Ham exam debate. I am in favor of increasing the number of ham license classes. I believe that technical theory should be updated and made more comprehensive on ham exams...eliminating fixed Q&As. I believe that ham radio can only survive if it has value to the USA by promoting and giving technical incentive to hams who achieve technical knowledge from their hobby, are constructive and experiment.
I don't think that many people of Jewish backgrounds would agree with everything that I believe and I can't say why they should or should not. I can not speak for any other people...Only myself. I consider myself basically a Humanist BUT I do not belong to any organized Humanist group. IMHO if you put ten Jewish American men in a NG...you won't find any two of them who will agree about everything...except maybe the fact that people who stereotype them are ignoramouses. Oh yes...I am not interested in communicating with people who do not fully identify themselves, as I consider them anonymous "crank callers". I always identify as W2ILP....on the air and on the web.
I am 66 years old. I am happily married and I have three grown children. I am a US Army Signal Corp veteran of the Korean conflict.
I never met a Ham I didn't like,
PLEASE keep thinking,
Bob Wex w2ilp (Individual Logical Poster)

Me thinks some people need to be educated a bit and I am willing to
share what I know for whatever it might be worth.

I have had no formal religious training. I am the product of
American public schools (elementry and high school). My father's family
came to the US from Austria in the mid 1800s and settled in Macon, GA.
My mothers family was originally from Russia and she was born in England
and came to the US when she was seven years old. She spoke no language
but English. I am a Jew because my parents were both Jews and proud of
it. I was circumsized BUT I was never Bar Mitzfered.....HOWEVER..I am
certainly not ashamed of my Jewish heritage nor do I forget what NAZIs
did to Jews in the past. Some Hams got upset when I proved to them that
Charles Lindburgh was a NAZI. Some Hams get upset whenever you squarch
their super heros. Many people can not stand to hear truth but can only
stereotype others from what they have seen or heard in very limited
experience.
Should I distance myself from AF2Y??? I can respect the fact that he
is a ham and is identifying with his call-letters. I dunno because...
I never met a Ham I didn't like and I'm not seeking any,

PLEASE keep thinking,
Bob Wex w2ilp (I Like People)

868. Re: ATTENTION CATHOLICS

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-09 00:00:00 UTC
From: Dan Finn <finnd@earthlink.net>
Message-ID: <375ED98C.81744E06@earthlink.net>
Source record: 140163

Yeah, we Catholics occaisionally run into this tripe on the lower frequency shortwave bands. Here in the South, Roman Catholics have been called names by other so-called religions that I thought it was a sin to speak. We are 'whores of Babylon', 'cursed' etc. etc. The pope is called all sorts of nasty things by so called religious people (nuts) who have names for Catholics far worse than the KKK ever thought of.

One of the worst comes from Brother Stair...the man absolutely hates Roman Catholicism and condemns Catholics. He calls himself a prophet. In his case it is easy; time will expose this con for what he is...a meglomaniac. "Brother" Stair never heard of such words as 'tolerance' and 'love'. What are this guy's credentials for the title "Brother"? Lot's of these guys have the title "Doctor". Perhaps they all have medical or dental degrees and happen to be religious as well.

These so-called fringe 'Christian' religions make every outward attempt to be based on the Bible. Not so with mainstream Baptists, Methodists, Lutherans, they say. Only these "anti" type Kooks are correct, even if their "churches" were founded less than 150 years ago.

They correctly state that Catholicism is NOT based on the Bible.

"Correctly state"? Well yes, it could not have been based on the Bible because universal Catholicism was the first church, founded by Jesus Christ himself, with St. Peter, and when it was founded, the New Testament had not even been written yet. It would begin to be available perhaps 80 years later. At first they only had St. Peter and the subsequent Pope, prior to a Bible. "Thou art Peter ('rock') and upon this rock I will found my church". (note he didn't say Bible). A beautiful play on words: "thou art a rock and upon you, 'the rock', I will found my church".

The Bible came from the Catholic church. Yes, this Bible that forms the very basis for these other fundamentalist religions. For them, their "churches" came from the Bible, therefore they and only they are correct and true. But for Catholics, the Bible came from the church.

They emphasize "Bible", we emphasize "Church", just as Christ commanded Peter.

The tragedy is that all of this anti-Catholic hatred has only one purpose: to destroy
the credibility of that which is trueso that dishonest teachings can be seen in a better light. It is the congregations, the common people who are fooled. They pay, materially and, possibly, spiritually.

Thanks for the information, Doc. Since you installed the air conditioning I think we Roman Catholics should bring the beer (it is not a sin for us to drink beer).

Dan
KR4AJ

Hello Joe-
What do you know? Grammar and spelling are not important to me. It
is the thought that counts. Many times I can not understand what people
are trying to say. This IMHO has little to do with spelling or
grammer. I think that for them it is just a novelty to type anything and
post it without thinking. I wish all you guys would not worry about
grammar or spell checking and just do some real thinking before you post
because you are often giving people the wrong impression here.
I don't even think you really believe most of what you say yourselves.
It is usually people who have an inferiority complex themselves who
say that others are jealous of them. I can't think of anyone I might be
jealous of except maybe Bill Gates or Trump....and I'm not even so sure
I would want to be in their shoes sometimes.
I think that most Americans are tolerant of ethnic, racial or
religious differences and that is what is good for the USA...and that is
why we don't behave like most of the people in Yugoslavia...I hope.
PLEASE keep thinking,
I never met a ham I didn't like,

Yes that sounds better.

And another thing. With CW I don't need a California Kilowatt. Those "Fone" guys like to ignore non pile up busting signals. Oh well, I really didn't have anything to say to them anyway. Guess they don't want any strangers on "Their" frequency.

The way I understand it, this is a "cooperative" effort between the wealthy elites' "intelligence agencies" in their various plantations, often still called "countries," around the world.

It appears to me that such "cooperation" provides an ideal way to get around any pesky laws still on the books prohibiting snooping at will into their serfs' communications. They merely ask for a little "cooperation" from the Australians or British or whomever when an American's private mail or conversations are wanted without resort to inconvenient things like warrants.

Of course, it is _possible_ that there are a few intelligence agents whose loyalty to the people and Constitution of the United States is higher than their loyalty to their employers and the worldwide "intelligence community" -- but such men are probably very few and, if they show their hand, would be quickly terminated in one of the usual ways.

Honor bright,

--

Tenessee WTIA, W4FQF. He jammed on 20 meters with no call for 7 years,
now he is jamming the USENET, heh heh
***DONK, I've known you for 35 years and have never caught you in a lie
therefore.....George Ashley is married to a horse with lipstick who's known as
"One Tooth Ruth." She was a Crawford and that family is known in that hillbilly
craphole as land barons therefore all these "holdings" by "Polly" are as
ficticious as his old lady's virtue. George Ashley, a mental defective who
established himself as one of the biggest A-holes in the history of ham radio,
is no more than a dumbo eared hunk of manure who's claim to fame was the sale
of hermostats probably pilfered by a member of his family and given to the
jackass to help pay for shoelaces and a comb without teeth. I have had the
displeasure of hearing this filthy idiot along with his masturbatory buddy,
Billy Jackoff Moore, for far too long and if not for the long arm of the law
stretching down from Riley in Gettysburg to the backwater toilet bowl of the
south, this creep would still be on playing the harmonica and imitating a
parrot. In response to his defaming my beloved deceased mother, I will tell you
that W4FQF's first wife and daughter both died. Rumor has it from cancer but
knowing the kind of garbage Georgie is, I stongly suspect suicide.
Unfortunately God tooonthe wrong persons in his family. He should have grabbed
"Polly" first and then his ears in a separate bag. We hear much aboout
hypocrisy in religion and unfortunately some ultra right wing hate groups in
this country are cleverly trying to galvanize the average observant WASPS into
an attack mode against the federal government by falsely claiming that Clinton
is anti-Christian and wants to round them up into concentration camps for
extermination. Had it not been for "Polly" arriving on the bands, I would think
that the aforementioned was the height of said hypocrisy, but I'm wrong. The
fact that this pervert is an elder in a Southern Methodist church and brags
about walking around in vestments exceeds that of the religious bullspit spun
by those to the right of Pat Robertson and Jerry Falwell, but not too far off.
How this lowdown miserable escapee from a garbage dump ever became a valued
member of anything, let alone a church, is perplexing. If he were Catholic, he

would have been excommunicated and directed right to Dante's Inferno. The best laugh I will have on this moron is when his idol, Herbert Lucifer Schoenbohm, is given a cease and desist by the FCC and make no mistake about it-it's going to happen. I remember how he and his ignorant ornage growing jackass buddy, KT4TR, bragged about their ability to keep KV4FZ on the air for years and years. Maybe when the Feds hang old Herbie Hitler out to dry, Riley will do the same to that Tennessee enema bag and we can have a double celebration. Well, my wife just asked me to go to the PathMark to pick up a gallon of milk. That's my way of obtaining. If you're in the same boat Polly, go milk Ruth. MOOOOO!
Doc,AF2Y********

>chimpanzee. Yes , he has a lot of explaining to do!!!! He has a lot of
>dirty laundry beside that little pink ticket from the FCC.

And do not forget the modified and edited tapes provided to him by a blind shortwave listener
from Newark New Jersey, named Doris Parnarcello. These were that tapes that
would be played over and over for hours under the guise of "testing for TVI". When Doris learned
of this she contacted AF2Y asking him to stop. He refused saying he could do what
he wished with them, and edit them as he saw fit. Doris then contacted the Net Manager
of the Maritime Mobile Net, Ruth Hoffman N4LMC. Doris had provided these tapes thinking
AF2Y would use them to help stop QRM in the ham bands. Instead the "tooth fairy" edited them
mixing recorded on-the-air statements of KA4MUJ, KV4FZ and others with far-right shortwave
broadcast. When Ruth Hoffman and Doris Parnarcello BOTH asked Doc to stop, he cooked up
a story. A very DISGUSTING story. He gleefully called it "..opening up a can of worms about N4LMC and
Doris". Shortly afterwards storied began to circulate about an alleged lesbian love affair between
Ruth and Doris. The "can of worms" was opened. Since then, the Maritime Nets have wanted nothing
to do with the mad doktor.

Actually Mr. Young, I'm opposed to internationally mandated code testing. Just go look up that
statement that the FCC made that says the treaty does not specify what speed you need to learn
the code at. You need to know the code, but not the speed at which it is sent. I gathered this information from http://www.arrl.org/news/restructuring/98-143/nprm.html.

Working on a dual-band mobile recently, I noticed a lot of aluminum used for the chassis and final heat sink. Here's the question: do more holes in a piece of aluminum work better to cool than no holes?

This radios final has a small fan cooled, horizontal ribbed heat sink. Would the heat sink work better if holes were drilled vertically through the fins (thus providing more SURFACE AREA for cooling)? There would be less aluminum heat sink but more aluminum exposed to cooling air, and this radio get HOT!

Also, inside the radio exist another aluminum heat sink, no ribs, which even at idle is HOT to the touch. No cooling air moves past this heat sink. Would drilled holes help or hurt in this situation?

"Some" is clearly implied, old man? No, *ALL* is clearly implied:

"I know enough to know that "polite contester" is an oximoron [sic]. I
personally think contests should be banned from the ham bands.
Contesters willfully interfere with my normal operations. - Cecil
Moore, 06/04/98

Please explain how banning contests from the ham bands would not affect
ALL contesters. We're all waiting, oh great wizard.

Now that you CAN NOT defend yourself further in this matter, please
recognize that your beliefs are very consistent with fascist ideology.
Fascists believe in restricting the rights of others, often for purely
irrational reasons. That is *exactly* what you want to do.

If only *some* contesters are the problem, then why ban the activity?
Only a fascist would do that. Are you next going to ask that we excuse
the infamous fascist Mr. Hitler because he had some personal anecdotal
evidence of *some* 'bad Jews'??

It's a bummer that you can't run from YOUR OWN WORDS, isn't it old
man? You are a habitual liar (or a lunatic) and an embarassment to
true Libertarians everywhere.

> I would be an ignorant idiot to have said "all".

If they want to inspect my station that is ok ... but they have no
right to inspect any other room ... even if my ham shack is within the
house. They have no right to inspect my main computers either ...just
the one I use for ham radio logging, satellite tracking, etc.

Right on target (pun intended)!

Think about it ... our government is so far away from what
the Founders intended that we now need a non-governmental entity (NRA et al) to
prevent our
GOD-GIVEN Constitutional rights from being taken away
by the very government that is supposed to be protecting those rights!!!

Our government is broken. It has been perverted into
a swaggering, power-drunk monster.

Good luck accessing this page. I tried to view it using both Netscape and
Microsoft Internet Explorer with a 44K connection, and the connection to the
server timed out before the page finished loading.

>Doesn't seem to be archived in DejaNews so follow the above link.

It's probably disappered from Dejanews just like all of Drew's posts after
2/16/99 have . . . including the one where he supposedly apologized for acting
like such a jackass and said he was leaving this NG for good. Yeah, right . .
. he'll be back as soon as he finds another third-rate MOR station that's fond
of having washed-up, has-been DJ's on their staff.
Come to think of it, who the hell cares about a third-rate, washed-up,
has-been DJ like Drew Durigan anyway? He's just another newsgroup troll who
thrives on negative attention.

What it does take is training in Logic 101, Cecil. You contend that
contests cause willful interference. If I disagree with that statement,
I am certainly not in favor of willful interference.

Diagram your statement using logic operatives, then negate it (properly).

And the ARRL wants to give HF CW privileges to *all* hams who don't
presently have them. Is that what you want, Jeff? Seems to me
the ARRL proposal will trash CW QSOs worse than the NCI proposal
will trash CW QSOs.

But Jeff, it is a proven fact that contests cause willful interference.
If you were a mainlander, you would understand. More willful interference
exists during contests than at any other time. Try carrying on a QSO just
before and just after a contest starts and get back to us.

> then you must not be against willful interference.

Really oh great wizard? Actually, I disagree with your Fascist viewpoint that we should BAN any activities that YOU, the great wizard, have decided CAUSE "willful interference". It is your Fascism that I take exception to, Mr. wizard:

"I know enough to know that "polite contester" is an oximoron. I personally think contests should be banned from the ham bands. Contesters willfully interfere with my normal operations. - Cecil Moore, 06/04/98

I humbly disagree with the great fascist wizard. I don't think we should restrict the rights of our citizenry just because YOU have "evidence" of a great willful interference conspiracy. Please turn to the "Biographical Names" section of your dictionary and look up "Hitler". When you can explain to me why his a bad person and you are a good person, you may respond.

In case you want to give it another try: the name is spelled "Siemens".
And the other manufacturer you mentioned is spelled "Philips".

That may give you better chances on search engines.

Victor wrote in message ...
>To all who responded, THANKS!

How many times do I have to read messages from hams that send a "Thank You" addressed to ALL. When one seeks help and someone takes the time to respond, the least the receiver of help can do is send a simple individual reply for thanks. After all-the respondents to this call for help responded one by one. I have received up to 75 messages in a call for help and sent individual thanks to each. It was very time consuming, but it was the right thing to do.

Would you at your wedding, if you were the groom, get up at the end of the reception and yell out, "Gee, Thanks everyone for the gifts?"
If you are a T Y P I C A L ham--absolutely.

It is unlikely you will respond to this if you did not even bother to respond to someone who H E L P E D you.

Oh, great! "Zero-beat" for them is anywhere within 300 Hz. Where will we put them all? How will they even know which QSO they're in???

Until this moment, I didn't think I was one of the "I-had-to-now-you-do-it-too" crowd. Where do I sign? Who supplies the ammo? Am I too late?

Buddy, GIVE THEM VOICE PRIVILEGES!!! They don't want CW; they didn't test for CW; ....

Ummm, before I over-react, what exactly is being proposed?

Michael.

Guys and gals of the Catholic faith. A word to tell you that you too are a target of a hate group on the Internet. Yep,in the HATE DIRECTORY,the same organ pointing out the LIBERTY NET,the following is listed as anti-Catholic. Looks like you're not getting into heaven either. Looks like you'll go to hell with the Jews, but don't worry-we installed air conditioning. AF2Y,Doc

Jesus Christ is the ONLY Way to God
REPENT ye, and believe the gospel!

www.jesus-is-lord.com

reetings in the name of Jesus Christ and welcome to our home page. This site has been created to share the good news of Jesus Christ and to uplift His holy name. ï¿½ ï¿½ ï¿½ Our main message here is, REPENT of your sins and call on Jesus while you still have breath in your lungs. When you die, it will be "everlasting too late" as my grandmother would say.
ï¿½ ï¿½ ï¿½ You need to get right with God for, "behold, now is the accepted time; behold, now is the day of salvation." (II Corin 6:2) |
|
|
|
|
|
|
|
|
|
ï¿½ ï¿½ ï¿½ When you trust Jesus as Lord and Saviour, your entire life will be radically changed not to mention that hell is waiting on all those who die without Jesus.
ï¿½ ï¿½ ï¿½ The only way to God the Father is through belief on His Son, the Lord Jesus Christ. Going to church and doing good deeds won't get you into heaven. In John 3:3, Jesus said to Nicodemus (a religous ruler), "Verily, verily, I say unto thee, Except a man be born again, he cannot see the kingdom of God." Ye must be born again--REPENT of your sins turning to God and believe on the Lord Jesus. Flee from the wrath to come!

"I am the way, the truth, and the life:

NO MAN
cometh unto the Father,
BUT BY ME."
--JESUS CHRIST, JOHN 14:6
JESUS CHRIST IS MORE THAN A GREAT TEACHER,

HE IS YOUR ONLY HOPE

...he [Jesus] was manifested to take away our sins...
I John 3:5

BEWARE OF THE
Latter-Day Saints (aka Mormons)
Don't believe the commercials!!!

The "Church" of Jesus Christ of Latter-Day Saints is a cult. They believe that God is a polygamist, Jesus and Satan are spirit brothers, Mormons will become gods with their own planets, etc. Soulwinners, go to our cults page so you can shut them down when they come your way with blasphemy. Find telling quotes by Brigham Young, Heber Kimball, et al. A sampling--
"...if they are covenant breakers, we need a place designated where we can shed their blood." President Grant, Journal of Discourses (JOD), Volume IV, page 50
"Shall I tell you the law of God in regard to the African or black race? If the white man who belongs to the chosen seed mixes his blood with the seed of Cain, the penalty under the law of God is death on the spot. This will always be so." Brigham Young, JOD, Volume X, page 110

GO HERE FOR INFO ON
THE BIGGEST CULT IN THE WORLD

About Our Site
All Christian friends of this ministry are invited to join our e-mail mailing list. Get periodic news bites. You may view our archives (not all e-mails are public).
Our site index is divided into major sections--
* THE BASICS: How to get to heaven, how to get to hell, comparative religion, the Judgment, the foolishness of atheism, etc.
* THE BIBLE: The importance of the Bible, the alterations found in modern corruptions of the Bible such as the NIV, NASV, NKJV etc. Extensive information on King James, the man.
* TESTIMONIES & COMMENTARIES: Thrilling testimonies of the blood bought and commentaries on contemporary topics like computer games and euthanasia, islam and other cults, etc.
* EVOLUTION: THE BIG HOAX: Information on one of the world's biggest hoaxes.
* THE BELIEVER'S CORNER: Articles for Christians--soulwinning, rock music (christian and secular), christian "psychology", devils, tv, wolves in sheep's clothing, etc.
* THE CHILDREN'S CORNER: Bible stories, God's creatures.
* ROMAN CATHOLICISM: THE CULT OF MARY: There may be some surprises here. Most people, including Catholics, don't know what the Catholic religion teaches in its multitude of canon laws, traditions, catechisms, etc.
* WICCA WITCHCRAFT, THE NEW AGE, BUDDHISM, AND OTHER PAGANISTIC

MUMBO-JUMBO: Series of articles, primarily from the Christian Research Institute, on the paganism and eastern mysticism so pervasive world-wide. Satan is preparing folks for the worship of the Beast. When new agers say, "The Christ" they are not talking about Jesus, they're talking about Lucifer aka Maitreya. Their Jesus was only a man who happened to discover "the Christ" within him. Blasphemy of the first order.

To learn how to print out articles that have black backgrounds go here. If you are a Christian, I encourage you to start your own website. Also, we have a number of on-line books available for your reading pleasure & edification. Each can be found in the section relevant to its topic--for instance, The King James Version Defended is found in "The Bible" section while The Two Babylons and History of the Papacy (this is real good) are found in the "Roman Catholicism" section.
Jesus Christ is the Lord.

TABLE OF CONTENTS

OUTSIDE LINKS IN ALL CAPS

~ The Basics

He that believeth on the Son hath everlasting life:
and he that believeth not the Son shall not see life;
but the wrath of God abideth on him. John 3:36

* God don't need us, we need Him (why does He even bother with this dusty frame?)
* Jesus can save ANYBODY--regardless of what you have done
* How to Get Eternal Life ï¿½ The New Life in Christ--For New Christians
* "I'll get into heaven my way!"
* Hell is Real (when you are dying, you will believe in hell)
* "Who will be resurrected from the dead?" (YOU!)
* Sinners in the Hands of an Angry God (classic on the destruction of the wicked)
* WHEN A SINNER GOES TO HELL ï¿½ Warning: The Day of the Lord is Near!
* The Last Judgment (Judgment Day is coming. Time will cease forever and everyone, dead or alive, small or great, shall appear before the august and imposing presence of the Lord God on His Judgment Seat. The Lord alone will be exalted in THAT DAY.)
* Why Did God Create Us (When He knew some would go to hell?)
* Jesus Christ is God Incarnate (He is God)
* Let's talk about blood. Soul-Saving Blood. (be washed in that crimson, cleansing tide)
* Table of Messianic Prophecies Fulfilled by Jesus Christ (prophecies made hundreds, sometimes thousands of years before Jesus Christ was even born!)

* "But There Are Thousands of Religions!" ï¿½ Faith versus mere belief
* "God is not a trinity!" (oh yes He is)

* Conversation with a Mahometan
* Messiah has Come ï¿½ Where's Rabbi Waxman?
* "Why did Jesus die?"
* THE RESURRECTION: IT'S A FACT
* THAT AMAZING BOOK: THE BIBLE (science behind the Bible / Jesus MUST be Messiah)
* "Rich men wrote the Bible to control the masses!"
* On atheists and scoffers: *The atheist and his atheism. ï¿½ *"I need some proof!"
*"You're closed-minded!" ï¿½ *Quotes by Famous Scoffers
*Atheists sure do talk big--even though there's no such thing as an atheist!
*Testimony of a former atheist--Find out how HARD it is to be an atheist!
*God is. Christians don't have anything to prove to atheists and scoffers.
*"I used to be a Christian." (no you didn't)
* The Sabbath Keepers (false prophets are telling people they have to obseve a Saturday sabbath in order to be saved. there is NO commandment exhorting sabbath keeping in the entire New Testament)
* "What About Acts 2:38?" ï¿½ Pentecostal/Charismatic Chaos (see for yourself)
Laughing, Oinking, Barking, Jerking, and Drunkeness--in God's Name?
17 REASONS WHY HE LEFT THE TONGUES MOVEMENT.

* LISTEN TO THE KJB AS YOU READ ON-LINE!
* Download Authorized KJV & Search Software FREE! (for Win 3.1 AND '95!!)

ALL Modern Versions are corrupted
"If the foundations be destroyed, what can the righteous do?" Psalm 11:3
* Another Bible, Another Gospel An excellent synthesis of the issues behind the "The King James vs. the Modern Bible Perversions Controversy" including the manuscripts, hereticks, changes in doctrine, and other alterations.
* The King James 1611 vs. ALL Modern Versions (scripture comparison, hereticks that worked on new versions, popery's involvement, etc.)
* Why I John 5:7 should be in your Bible! (the corruptions take most of it out & agree with the Jehovah Witness "Bible".)
* The King James Version Defended On line book by Edward F. Hills
* SCRIPTURE COMPARISONS AFFECTING FUNDAMENTAL CHRISTIAN DOCTRINES
* Bible doctrines affected by new versions
* THE BIBLE VERSION DEBATE RESOLVED! (excellent site! covers hereticks Wescott & Hort, NIV, NASV, "the older and better" manuscripts, etc.)
* 300 CHANGES THAT HAVE BEEN MADE IN NEW BIBLE VERSIONS (OF THOUSANDS)
* "Help, I'm Confused! I Have 21 Different Bibles!"
* Satan and the Bible-correcting Movement

The Hereticks Behind The Modern Versions
For there are certain men crept in unawares, who were
before of old ordained to this condemnation, ungodly men...Jude 1:4
* Wescott & Hort from their own mouths (Beginning in the 1850s, these two goons produced their own Greek text based on two of the WORST manuscripts available--Codex Sinaiticus and Vaticanus (these two corruptions disagree between themselves 3,000 times in the gospels alone!!!). Most modern Bibles are based on Wescott and Hort's corrupted Greek Text aka the "Critical Text". The Authorized King James of 1611, on the other hand, is based on the MAJORITY of the 5,332 extant (available) Greek texts. 97 to 99% of ALL AVAILABLE MANUSCRIPT EVIDIENCE AGREES WITH THE KING JAMES OF 1611 while the modern versions limp along with their corrupt underlying text. The King James translators had access to both Sinaiticus and Vaticanus and REJECTED them.)
* THE THINKING, THEORIES, & THEOLOGY OF DRS. WESCOTT & HORT
* J.B. Phillips: Paraphraser, Heretic
New King James Version (NKJV)
* The New King James Version: A Deadly Translation
* NKJV Translators Admit They Changed the Authorized KJV
* THE "NEW" KING JAMES IS A COUNTERFEIT! What's that weird symbol on the front cover?
* NKJV is soft on sodomy like the NIV

New International Version (NIV)
* Which Bible verses did the NIV delete? (the Jehovah's Witness "Bible" deletes the EXACT same ones! ALL of 'em!)
* NIV Old Testament Chairman, Dr. Marten Woudstra, a Sodomite/Homosexual!

* Paid NIV Literary Critic, Virginia Mollenkott, an Unnatural/Lesbian
* "Why isn't the word 'sodomite' in the NIV?" (Handiwork of NIV sodomite

translators!)
* Archaic words in the NIV
* "The NIV Almost Killed My Faith in Christ!"
* HOW THE NIV PERVERTS THE WORD OF GOD (NIV turns Jesus into Lucifer!!!)
* "But My NIV Says Catholics Are Christians and I believe it!"
* New Versions Say Jesus is in Danger of the Judgment(!!!)
* NIV Says David Didn't Kill Goliath(!!!)
* NIV Says there is no Calvary!
* NIV Changes Masculine Words and Makes Them Masculine and
Feminine--Accurate?
* Former NIV reader says NIV alienates the Father and the Son
* NIV Says Troublemakers Should Emasculate Themselves

New American Standard Version (NASV)
* NASV Committee Member: "I'm afraid I'm in trouble with the Lord."
* Verse by verse Comparison between NASV and the KJV
* THE NASV AND THE DEITY OF CHRIST

For the Critics of the King James of 1611
* When you willingly choose a "Bible" that rewrites, adds to, or deletes
from the word of God,
you bring a curse upon yourself. (Rev. 22:18-19; Prov. 30:5-6; Deut. 12:32;
Deut 4:2)
The NIV deletes 64,000 words and many complete verses--and you gullibly accept
it 'cause a man said it should be so.

Catholic Religion Tortures One of Its Own
What is a cloistered nun? The word "nun" is not even in the Bible. And what in the world is penance? These are the inventions of Romanism, a religion that takes occult practices and deities and puts Christian names on top of them. Read the absolutely HORRIFYING ordeal of a woman trapped in a cloistered convent (or should I say torture chamber?). It is worse than a horror movie and totally consistent with the Satanic nature of Romanism--a religion that tortured and murdered multiplied millions of people in the Inquisitions and PROHIBITED the reading of the Bible. Here is
Sister Charlotte's testimony.

~ The Believer's Corner

"If ye continue in my word, then are ye my disciples indeed." (John 8:31)
And being made perfect, he became the author of eternal salvation unto all them that obey him. (Hebrews 5:9)
He that saith, I know him, and keepeth not his commandments, is a liar, and the truth is not in him. But whoso keepeth his word, in him verily is the love of God perfected: hereby know we that we are in him. (1 John 2:4)

* PAPISTS SAY YOU CAN BUY YOUR WAY OUT OF HELL...ER, PURGATORY

(indulgences)
* Hatemonger or Contending for the Faith?

"...the Church (so-called) of Rome has no right to rank amongst Christian Churches. She is not a Church, neither is her religion the Christian religion. We are accustomed to speak of Popery as a corrupt form of Christianity. We concede too much. The Church of Rome bears the same relation to the Church of Christ which the hierarchy of Baal bore to the institute of Moses; and Popery stands related to Christianity only in the same way in which Paganism stood related to primeval Revelation. Popery is not a corruption simply, but a transformation. It may be difficult to fix the time when it passed from the one into the other; but the change is incontestible. Popery is the gospel transubstantiated into the flesh and blood of Paganism, under a few of the accidents of Christianity."
J.A. Wylie, LL.D.
History of the Papacy
circa 1851

~ Wicca Witchcraft, the New Age,
ï¿½ ï¿½ ï¿½ Buddhism, and other
ï¿½ ï¿½ ï¿½ Paganistic Mumbo-Jumbo

For false Christs and false prophets shall rise, and shall shew signs and wonders, to seduce, if it were possible, even the elect. Mark 13:22

* The Parent god some mainline churches are performing father/mother worship.
* Is God a She?
* The Christ of the New Age Movement (Part I of II) Their Christ is not the same as Jesus. A little mumbo-jumbo gumbo for your consideration.
* The Jesus of the New Age Movement (Part II of II) Their Jesus is not the Christ. And he bears no resemblance to the Jesus of the Bible to boot.
* Gnosticism (An understanding of this ancient heresy will provide a good foundation for understanding the gods of paganism.)
* Amazing expose on the new age (good section on the true god of the new age-- Maitreya (who also uses the name Lucifer) is the numero uno teacher, supposedly the most highly evolved being known to man--Jesus was supposedly one of his spokesmen (!!!), Christians have misunderstood Lucifer, his activities and intentions (!!!), since many new agers can't accept the name Lucifer he'll go by Krishna, Buddha, Christ/messiah. Learn about the use of 666, their belief that good and evil are merely different sides of the divine, murder as an instrument of karma, pantheism, we are all gods, we have other selves (Bible calls 'em devils), you create your own reality, ascended masters, etc. I see some tenets of Mormonism here.)

Wicca/Witchcraft
* Contemporary Witchcraft (Wicca ain't "the Old Religion". In fact "Wicca" is quite new.)

* The Modern World of Witchcraft, Part 1
* The Modern World of Witchcraft, Part 2
* Former Witch

Buddhism
* The Buddha and what he taught
* Theravada Buddhism
* Testimony of a former Nichiren Shoshu Buddhist

New Age
* The Christ of the new age movement (for them, Jesus and "the Christ"
are two different entitites!)
* The prosperity gospel and the new age (the "name it and claim it" craze
reminds a former new ager of her pagan days.)
* What is Baha'i?
* Hebrew Roots of Christianity
* News bites (includes news on Scientology, Maharishi, Hare Krishna)
* Testimony of a former New Ager
* New Age Wizard

Devil Visitation, Out-of-body experiences (OBEs), Astral Projection
from those who have been there
* Set free from the spirits that frightened him
* She talked with her familiar spirits (devils) (from witch to rich!)
* Incubus

Witnessing Tools
* Overcoming new age relativism (for them, nothing is true for everyone,
truth is relative, i.e., if you think it's true, it's true for you.)
* Discussing the Bible with new agers
* Evangelizing new agers
* Why I talk with new agers

If this site strengthens your faith in your false religion/belief,
e.g., Catholicism, Islam, Buddhism, Atheism, etc...

NIV Teen Says
Catholics are
Christians The following e-mail did not surprise me one little bit. I had written about this months ago in the article on the NIV blasphemy of gender inclusivity. I had mentioned how my sister received a copy of the NIV teen Bible and it said that Catholics are Christians. Everytime you give your child the corrupted NIV that you hold dear, you are putting poison in them. And what is just as bad, they will not witness to the lost because they will think that they are saved. We are going to have a lot to answer for at the Judgment.
THE E-MAIL
Hi there!
I am writing in response to your webpages on Roman Catholocism. I am only 17 years old, but I have discovered a personal relationship with Jesus through my faith. I believe that all denominations are are Christian...like it is described in my Teen Study Bible (NIV) it's only a matter of preference. (it says it's much the same as having the choice of atheletic shoes!!! 'ya know...Adidas, Nike, etc!)...
CONCLUSION
Don't read this and weep. Read it and take some action--throw that NIV garbage in the trash can where it belongs!

> Where in the Constitution or The Bill of Rights does it say that an
> individual has the right of privacy, either physically or electronically?

The Contitution does not grant the people any rights, the people have all right given to them by their creator. The Constitution grants rights to the government and limits their power. Therefore the question should be, where in the Constitution did we (the people) give the government the right to invade our privacy?

To answer the question directly:

Amendment IX
The enumeration in the Constitution, of certain rights, shall not be construed to deny or disparage others retained by the people.

Amendment X
The powers not delegated to the United States by the Constitution, nor prohibited by it to the states, are reserved to the states respectively, or to the people

So there...I know the government often crosses the line and many of its activities can be considered to be unconstitutional.

> It doesn't say it anywhere, and even if it did, these monitoring
operations
> were taking place on European and Middle Eastern telephone/satellite
systems
> which wouldn't be subject to our Constitution anyway.

True, the Government may listen in to communications from non-US citizens (inculding companies) as long as they are outside the jurisdiction of the USA.

> I for one can sleep at night knowing that systems such as Echelon are in
> operation.

Right, but it doesn't hurt to make sure certain government letter agencies stay within their legal limits...

Eric Baker

918. Re: Oris Dirtball makes his libertynet debut

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-09 00:00:00 UTC
From: Oris <oris@dirtball.com>

Let me make this clear
I am not a gun collector nor a gun lover. I own one gun for one porpose. That purpose is to shoot people, theives (like porkbut just a example he is a theif.) that come in my home to steel stuff and put my wife and kids in harms way. Now by saying that I will add this. In 1969 one could have a gun mailed to there house no questions asked. We didn't have half the problems in 1969 that we have now and there was a not very popular war going on. So whats that tell me? The government screws up everything they touch. The NRA back in the sixties said that gun controll would only allow the criminals to have guns and its true. More gun control = more problems = more crime!

I can give you another example of how the governement screws stuff up and it has nothing to do with guns. That is the 11-meter band. Who in there right mind would put a radio service on a band that is full of propagation then say no one may talk over 150 miles. I can give more example if need be.
Thats just my opinion I COULD BE WRONG!
Oris

Or you can spend about $270 for a Timewave DSP-59 along with a $150 Yaesu
SP-6 speaker to attach it to.

$50 is a BARGAIN.....good job!

923. KB4P's new Maryland subdivision is Ham-friendly

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-09 00:00:00 UTC
From: Santiff Family <santiff@olg.com>
Message-ID: <375E7121.9E92F50E@olg.com>
Source record: 140218
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.antenna,rec.radio.amateur.policy

Bill, KB4P, is subdividing his farm to pay upcoming college tuition for his two daughters. The Fawn Ridge subdivision will expressly ALLOW ham antennas and satellite dishes including the big c-band dishes. The utilities are going to be buried.

The subdivision will consist of 5 lots on 15 Acres. Bill is keeping lot 3 for himself and the other 4 lots range in size from 1.26 to 3.0 acres.

Fawn Ridge is located 0.7 miles west of Maryland Rt. 4 in Calvert County, MD 3 miles south of Dunkirk and 2 miles north of Sunderland. Rtr. 4 is a high speed divided highway which connects to the I-95/I-495 Washington DC beltway at exit 11A on the east side of Andrews AFB. The beltway is 20 minutes from the subdivision. It is also 32 miles north of NAS Patuxent River, home of NAVAIRSYSCOM. It is in the excellent school districts of the award-winning Sunderland Elementary, Northern Middle, and Northern High schools.

All 4 lots for sale are 2/3 clear and slope gently away from the common lane (Shepherd Lane). All are wooded at the back 1/3 with tall trees perfect for one end of your dipoles, longwires, or curtain arrays. A stream runs along the rear boundary of each. Most lots back up to designated openspace or other wooded terrain.

Lot prices are in the $85,000 to $95,000 range. E-mail Bill at santiff@olg.com for photos and a a satellite overhead view with lot lines shown.

73 - Bill

Why don't you talk about how you lost your dentist practice, Charles?
Funny that your chink wife is still with you after "sexual advances" you
had with one of your co workers.

If you only got caught one time...how many times were there that you
did not get caught? Why did the DA in Clifton only charge you with one
count of "sexual contact"? You are a SICK man, Charles.

Did you ever make advances on 12 year olds? Who knows what things you
did to them when they were in your chair.

You should join ND8V in prison, Charlie.

anyone see the adam-12 episode where malloy got shot? his radio mic
was smashed and the only way he could communicate was to 'key' the
radio on and off. he sent a bit of morse code, was cool.

morse code is pretty cool, you don't need a radio to use it.
a mirror and sunlight works too.

anyway, i thought i might throw this in. my repeater is
voice id heavy, i was asked to add more morse code id
in the mix by my friend. after this suggestion,
i made a few rotating bulletins with morse code followed
by a voice counterpart to assist a tech ham in getting some
copy practice right from my repeater. it appears to have
helped alot. upgrade in sight =]

I Don't pay too much attention to Dr Hate, AF2Y. You know the story is, Both he and his troublemaking mother were kicked out of every synagogue in Clifton NJ. It looks like even the jews hate him. And by the way ask him about that rumored money deal on forty meters in the East Cars affair. and while you are at it ask about the missing Mars radio transmitters and receivers that he was said to be involved with. Some people are still scratching their heads about that missing gear. Also the vertical antenna book he was scaming with. Plus the Spanish course he was pushing in the radio magaszines. He has the radio knowledge of a chimpanzee. Yes , he has a lot of explaining to do!!!! He has a lot of dirty laundry beside that little pink ticket from the FCC.

It's sad. If this is the only argument you can put forth toward
keeping a morse code proficiency requirement in Amateur Radio, then
you've lost.

I speak as a licensed Ham of 24 years, a capable CW operator, and a
concerned member of this hobby. I advocate getting rid of a CW
requirement for all license classes in this hobby.

If you want to argue intelligently on this subject instead of the
insipid nonsense and slogans you have posted, I'll be happy to oblige.

> cool than no holes?

As a gross generality, yes. However, there is a practical limit. If you drilled so many holes in the unit, you could reduce the amount of metal that would conduct the heat aware from the transistor and therefore be worse off.

> This radios final has a small fan cooled, horizontal ribbed heat
> sink. Would the heat sink work better if holes were drilled
> vertically through the fins (thus providing more SURFACE AREA for
> cooling)? There would be less aluminum heat sink but more
> aluminum exposed to cooling air, and this radio get HOT!

If your radio is getting hot one or more of the following is happening:
- the output device is not efficient
- you have a bad antenna system
- there is a short in the radio somewhere
- you are applying too much voltage to the unit
- you are simply talking to much
- you have it mounted in an inappropriate location
- the fan in broken
- you are running it at a higher power than you need

> Also, inside the radio exist another aluminum heat sink, no ribs,
> which even at idle is HOT to the touch. No cooling air moves past
> this heat sink. Would drilled holes help or hurt in this
> situation?

Probably not. But I don't know that it would help it either. Most new radios are one big heatsink. If the heatsink is aluminum and unpainted, painting it black will get rid of more heat. Also, attaching a much larger heatsink to the unit will also cool it down.

All semiconductors fail when their die temperature gets too hot - not the case of the component. There is typically a couple of degrees of thermal resistance between the die and the mounting flange. In the case of most output devices, you can get the die well over 100C without any problems. So in other words, it isn't going to fail unless the plastic on the front starts to melt! I've heard of Icom mobiles that were left transmitting and got so hot they melted the front lens and burnt the

table they were sitting on - yet still worked.

945. Re: Kevin WB4AIO an Internet Liar .....

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-10 00:00:00 UTC
From: Kevin Alfred Strom <kevin.strom@innocent.com>
Message-ID: <375FC51B.B732A87D@innocent.com>
Source record: 139982

I'm sure that everyone with more than one neuron has noticed that under your attempted cloak of anonymity (your "style" of writing, if you can call it that, makes your identity virtually certain) you accuse me of lying, and then provide not the tiniest shred of proof -- or even a specific allegation.

There's a very good reason I cancelled those posts -- they were forgeries with my name on them.

Anyone who visits the alt.revisionism newsgroup will note that there, as well as on several other Usenet newsgroups where posts critical of the Jewish establishment's agenda appear, there are literally hundreds of forged postings appearing every day.

Someone has found a way to "jam" those newsgroups with automatically forged posts, just as you and your confrï¿½res jam 75 meters. It's been going on for the better part of a year.

This person or persons has set up an automated "spambot" on those newsgroups, and anyone who posts there will find, within hours, many dozens of posts with himself listed as the author, and with the correct subject line, but with random nonsense text as the body of the message.

As an experiment, you could crosspost a message to this newsgroup and alt.politics.nationalism.white or alt.revisionism, and you would probably see multiple forged posts, with your name on them, here within a day. Someone, try it, and you'll see that I'm right.

I don't mind at all that you've brought our attention to this newsgroup-jamming effort. In fact, there are two reasons I'm happy you've brought it up.

First, it needs to be publicized so that those with the ability to catch such Internet criminals will be encouraged to take action, so the jamming will stop.

Second, the jamming of the newsgroups shows quite clearly that 1) someone doesn't like what's being said in those newsgroups, and 2) they have no arguments against the speech they don't like -- because they know very well that what they don't want others to read is the truth. Therefore, the jamming proves they've lost the argument, just as Soviet jamming proved they'd lost.

And your malicious interference on 75 meters proves the same thing about you.

Thanks for making that more obvious than ever.

Don't put too much money in the slot machines,

Kevin, WB4AIO.

Seems to me Bill was objecting to the "Nazi/Hitler" stuff. The objective use of the word "fascism" alone is nothing to be upset about. From Webster's: "fascism - a tendency toward or actual exercise of strong autocratic or dictatorial control". According to that definition, my mother practiced fascism.

From: K0HB@ARRL.ORG
Message-ID: <375FC865.D470B7EA@ARRL.ORG>
Source record: 139986

The Radio Telegraphy Extremely High Speed Club was founded on the 20th of march 1982 in association with the HSC and VHSC and was created for every amateur who enjoys high speed telegraphy to provide a stimulating challenge to achieve their highest operating speeds. Active members strive for an optimum discipline in radio telegraphy traffic and also encourage and help other amateurs to use high speed telegraphy to increase their speed.

The club consists of honorary members,active members and shortwave listeners who have all the same rights. The club is open to membership from all countries and language groups.

How to join the EHSC

To become an active member of the EHSC two recommendations must be obtained from other active members. An active member may give a recommendation after a "sponsor QSO" under the following conditions: A recommendation can be made after having a 2-way CW contact with a EHSC member for at least 30 minutes using a telegrapy speed of 300 letters per minute or higher(Paris-base,60 WPM). Solid copy must be made by the applicant together with excellent keying. Computers, keyboards or decoders are NOT allowed during these contacts. Reception must be done by ear and only a basic electronic keyer may be used to assist with sending. After having 2 recommendations in your possession you can send your application together with 10 IRC's (or equivalent) and a written and signed statement that the applicant did not used any computers, keyboards or decoders during the sponsor QSO's.

There is no further payment for life membership. Applications should be adressed to the president of the EHSC:

This is retarted. I am 15 yrs old, a General class licensee, and a SSB and Code user on the HF bands. I started that whole "Morse Code" thread to see what the point of it was. Although the "game of telephone" has destroyed my original idea, I learned this. When the band conditions dont work, CW works and SSB voice doesn't. Thats why its best for emergencies.

I dont agree with the current requirements, though. I agree totally with the ARRL plan of restructuring.

5 WPM for General, 12 WPM for Advanced
instead of
5 WPM Sucky Novice license, 13 WPM General, 20 WPM extra.

And yes, the code is easy to learn. If you want a better license, learn the code. It is not hard at all once you get the hang of it.

CGB Spender
I am in favor of the race to which I belong having the
superior position." -Abraham Lincoln

I find it funny that quotes from famous people are never made public
until they have some political merit. Or go the other way Quotes from
famous people are never made public because they don't serve some
politcal ajenda for the time. The one above will be never quoted by a
black man. If one states the differances between the black race and the
white race one finds himself labeled and a racest. What happened to
Jimmy the Greek at CBS is a VERY good example of this. Here is another
one that is held in secrect. Ben Frankin has been quoted in saying those
who give up liberty for safty desirve neither liberty or safty. Boy the
gun control freaks wouldn't want that one to get out. They cry over and
over about gun control and our fore fathers didn't know that things
would turn out like they have. I say that little quote above proves that
those guys KNEW what they where doing and where this contry was going.
I wonder how many more quots from famous people are out there that would
prove one thing or another. If you have to much gun control then the
criminals will be the only ones with guns! Politics go figure!

stevenn
I have heard it told that the Beast was the Roman Catholic church and the Anti-Chirst will rise from the Roman Catholic church. The Book of Daniel talks of this. Also it wasn't the Jews who crusified Jeasus Christ it was the Romans. Piolet was a Roman. The Catholic church rose from Rome. One of the hats that the early Popes used to where had the mark of the Beast in the three words that where on the hat. Now this is stuff I have heard I'm not sure if its true or not true I writing about the part about the popes hat. I have also read that the Beast will rise from the west. Well to the people in Israle, the writers of this prophecy, Europe is the west not the United States. The United States and people on this side of the world are labeled as people of the coastlands. So with this in mind why are there so many saints? Haven't Romans always had many gods? For more on this look at the studies of Martin Luther the founder of the protestant religion. He touches this very unknown fact in his teachings. After all this I don't think the people of the religon are to blame. I would take a look at some of their leaders and the records of the past and looked where the Catholic Religon played a big part in things both told and untold.
Just My Opinion I could be wrong!

That microphone question really shows how much you know-

Even a no-code tech like myself has seen microphones that have the actual microphone input on the back (FS-10) of the microphone, or hidden in the wire (MFJ makes one like this, I believe..)

I do intend to upgrade, but I can definately see how these newsgroups turn off new operators, or people who are thinking about getting their first ticket. I would have quit the hobby the day I got my ticket if people were bitching about the hobby as much as I see on rec.radio.*

Obviously you do, Mr. Davies, or you wouldn't have bothered to respond to my post.

>Impersonating a dead man's call??

Enlighten me, oh great one of the newsgroup! How, preytel, am I "impersonating" (I believe the correct term is "bootlegging') a dead man's callsign? In ONE post I mentioned the callsign of the recently deceased Frank E. Burns of Phoenix, Arizona. I have never "impersonated" the man's call, nor do I need to, since I will soon have my own callsign.
Try getting your facts straight before you post, Lloyd. It would probably help you gain some credibility in this NG, someone which you appear to be sorely lacking in.

961. HSC

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-10 00:00:00 UTC
From: K0HB@ARRL.ORG
Message-ID: <375FDEAE.CC260D4A@ARRL.ORG>
Source record: 139998

The Radio Telegraphy High Speed Club HSC was founded in 1951 as a community within the "Deutscher Amateur Radio Club e.V." (DARC) of radio amateurs interested in high speed telegraphy.

Today there are members in more than 70 countries (DXCC list) and all 6 continents. The HSC is a member of the "European CW Association" (EUCW) and cooperates with other telegraphy clubs.

Our Club stations DL0HSC and DK0HSC transmit "HSC bulletins" every first saturday of each month at 1500 UTC on 7.025 MHz in English and at 21.00 UTC (during summertime at 20.00 UTC) on about 3.555 MHz in the German language. That way you are informed about new members,activities, and other news of common interest.

There are two HSC CW CONTEST's and an HSC MARATHON every year. To promote activities,the HSC issues an award for working members: WORKED HIGH SPEED CLUB (WHSC). This award is for SWL's too.

How to join the HSC

Listen on the HSC frequencies 25 khz from the lower band edges (3570 khz additionally) and contact as many members as possible. Use telegraphy speed of 25 Wpm or higher and show your ability to read and key this speed perfectly. Use your best operating technique , if possible [bk] or [QSK] .
Be courteous and fair,always observe the laws of Amateur Radio and the unwritten laws of ham spirit. The use of keyboards,decoders or computers is NOT allowed.

After a few contacts ask the member to send you his recommendation for HSC membership. Only two-way contacts for at least 30 minutes will be accepted for a test QSO.

When you have 5 recommendations in your possession, send them with your application to the HSC secretary, DL1PM.

All applications should contain the statement that you did not use a keyboard,decoder or computer during the five test QSO's. Enclose DM 10,- or 8 IRC's to cover costs. Applicants in Germany have to state additionally that they are members of the DARC. There is NO further payment for life membership.

963. SHSC (50wpm)

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-10 00:00:00 UTC
From: K0HB@ARRL.ORG
Message-ID: <375FDFAF.D3C6B576@ARRL.ORG>
Source record: 140000

The Radio Telegraphy Super High Speed Club was founded on the 20th of march 1982 in association with the HSC and VHSC and was created for everyamateur who enjoys high speed telegraphy to provide a stimulating challenge to achieve their highest operating speeds.Active members strive for an optimum discipline in radio telegraphy traffic and also encourage and help other amateurs to use high speed telegraphy to increase their speed.

The club consists of honorary members, active members and shortwave listeners who have all the same rights. The club is open to membership from all countries and language groups.

How to join the SHSC

To become an active member of the SHSC three recommendations must be obtainedfrom other active members. An active member may give a recommendation after a "sponsor QSO" under the following conditions:A recommendation can be made after having a 2-way CW contact with a SHSC member for at least 30 minutes using a telegrapy speed of 250 letters per minute or higher (Paris-base, 50 WPM). Solid copy must be made by the applicant together with excellent keying. Computers, keyboards or decoders are NOT allowed during these contacts. Reception must be done by ear and only a basic electronic keyer may be used to assist with sending. After having 3 recommendations in your possession you can send your application together with 10 IRC's (or equivalent) and a written and signed statement that the applicant did not used any computers, keyboards or decoders during the sponsor QSO's. There is no further payment for life membership. Applications should be adressed to the president of the SHSC:

965. VHSC (4 0wpm)

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-10 00:00:00 UTC
From: K0HB@ARRL.ORG
Message-ID: <375FE1B5.51FAFDD8@ARRL.ORG>
Source record: 140002

The Radio Telegraphy Very High Speed Club VHSC was founded on May 1st 1961 under protection of VERON and DARC and has the intention to gather radioamateurs who are able to transmit and to copy very high speed telegraphy, and doing so, to encourage CW-Traffic in general and QRQ-Traffic in particular. The VHSC Committee consists of:

PA0LOU : Chairman
PA0DIN : Secretary/Tresurer
DK5JI : Member (President of HSC)

How to join the VHSC

Be active on the bands, using telegraphy speed of 40 wpm or higher, and show your ability to read and key this speed perfectly. VHSC-Members may give you a recommendation for the VHSC-Membership. Do not ask for a recommendation, do not chase for it! Just show your capability of solid copy and exellent keying at a speed of at least 40 wpm! A recommendation can be made after having 2-way-CW contact -- with a VHSC-Member -- for at least 30 minutes using telegraphy speed of 200 letters per minute or higher. (PARIS-base, 40 wpm). Solid copy should be made by the applicant together with excellent keying. No keyboards or decoders are allowed during these contacts. A recommendation is valid for maximum 3 years.

After having 4 recommendations in your possession, send then with your application for VHSC-Membership and 10 IRC, or equivalent (DFl. 16,-- at present), to the VHSC-Secretary. The call of a VHSC-candidate will be
published in our VHSC-bulletin, this is a newssheet which is sent to all members. If there are no objections raised by VHSC members within 3 months the VHSC-candidate can be registrated as a VHSC-member.

All recommendations must show the duration of the VHSC-test-QSO and must mention the CW-speed used during that VHSC-test-QSO. All applications should contain statement, that the applicant did not use keyboard or decoder during the four (4) test-QSO's. A certificate of membership is sent to members.

There is no further payment for life membership. Applications should be adressed to the president of the VHSC:

I am in favor of the race to which I belong having the
superior position." -Abraham Lincoln
>>>>>Apparently Oris is insinuating that Abraham Lincoln was a racist like he. Try going to the library you ignoramus and looking up the Lincoln-Douglas debates in Illinois in 1858. No, Lincoln was NOT a lover of the black man but rather a person who saw the infamy in slavery. Realizing that the Black issue had within itself the seeds of the destruction of our republic, he issued the famous "House Divided" speech which still rings true 150 years later.Now Oris goes off on a tangent trying to make a statement for the uncontrolled proliferation of guns in this nation. How the two are related is beyond me but any rational person recognizes the folly in the association. Any person in this nation who, after seeing the effects of all-too-easy gun ownership vis a vis the killings in our schools and elsewhere, and refuses to recognize the stupidity in continued laxness, must either be crazy or just plain afraid of the federal government based on imbibed and digested right wing propaganda designed to create panic over and fear of Washington,D.C.To these brainless idiots, I suggest a one way flight or sailing OUT OF HERE, for good! Go someplace in which you feel less threatened.Understand that WE WANT CHANGE that will alter a destructive situation. Stricter gun legislation is the ONLY way to accomplish it and by no means does that imply the forfeiture of weapons.

I now beleive Dr Hate A.K.A. old Charlie AF2Y there is a COMMY yep a full blown COMMY. If it where up to old Charlie he would have all of our guns then what our land (Oh you own to much land so the government is going to take it from you) Heck why not our businesses too. The government all ready takes half the money businesses make. Why not take the other half too. I bet if one wasn't a jew he wouldn't be able to own any land at all. All this if it where left up to old Charlie there to run things. Lets see If it where up to old Charlie the right to express ones opinion would be fine if it where the same as old Charlie's there. I bet the Newspapers would have to get Charlie's OK before they printed anything. I bet one couldn't even look at a photo of a naked woman much less a good looking naked women Dang nabit I wonder if we had gun control in the USA before the civil war there would of been no civil war as well as Prussia would be running Europe and Americans would be sp-eaking German. HMMMMM Gun Control sounds like another way to weakin the most poweriful nation in the world. Listen Charlie it isn't our army that keeps other countries out of here is US and don't you forget it. If people die in this nation I say one thing welcome to America lifes a bitch ain't it.
See Charlie I took a oath in 1979 to defend the Constitution of the United States of America. I beleive that aposing gun control of any kind holds me to that oath. I also beleive that exposing you bleeding heart liberals holds me to that oath. Its Commies and the bleeding heart liberals like yourself that are going to destroy freedom as we know it today. The way I see it old Charlie is one of those COMMies that wants to see the great nation of the UNITED STATES OF AMERICA just plain fall! SO Charlie you keep trying to get your UNCONSTITUTIONAL gun control passed and I'll keep on fighting you.

971. Pacific Propagation (MUF) for July 1937 (Amelia Earhart Archaeology)

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-10 00:00:00 UTC
From: acampane@postbox.acs.ohio-state.edu
Message-ID: <acampane.1268.375FF47E@postbox.acs.ohio-state.edu>
Source record: 140008

I have been researching for several years the communications problems encountered by Amelia Earhart in her July 1-2 1937 flight in the Pacific. Onequestion cropping up often concerns the day and night near and far propagation on her two frequencies (80m,40m) 3105 and 6210 kHz. I would appreciate it if someone could delve into their 1937 QST archives and find the chart for the month of July 1937 for pacific propagation (US-Fiji-Lae/Sydney path).

If that was not published then, then use a 22 year cognate (1959 July, 1981 July, 2003 July).

Answer to my E-mail if your can sinceI do not often look here.

Tnx, W8EDR
Angelo Campanella.

Jeff,

I am very sorry to hear about your wife; it must have
been a terrible blow to lose her so suddenly. Even
tho it was many years ago, I know the pain of losing
a loved one never really goes away. You have my
deepest sympathies.

Just start using your filters/killfiles/etc. and this
newsgroup will become readable again. (Personally,
I avoid as much as possible any response to juvenile
behavior, since attention is what they crave.)

It's a real shame one has to resort to such things...
but enduring daily spews of immature, hate-filled
rantings from certain few sad and pitiful creatures is
only a waste of time - and responding to them even
more so. <sigh>

Cheers!

974. HELP need info on rovering in VHF Contest from CA

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-10 00:00:00 UTC
From: mikrounit@hughes.net
Message-ID: <375ff4d2.1580985@news.hughes.net>
Source record: 140011

Hello,

This is Mike, KQ6MU.
My plans have changed for the contest.
I was going to go up with a friend on a mountaintop, but
now I may be going ROVER in California.
I would like to get some pointers and hints on where to set up
my antennas for the following grids:

DM03, DM13, DM23, DM24, DM25, DM05, & DM15.

These are the order of which that I will be traveling through these
girds for this weekend's VHF QSO Party!!!
Maybe someone out there could give me good places, such
as a park or an empty lot\field, to set up my radios and antennas.
Please tell me what city to go in.
I don't think that we will be able to go on mountain peaks, but ridges
are ok too. 2 reasons: too much time to get to a mountaintop, plus
a Ford Escort is the vehicle that I will be in.

If you can help me, please E-mail me:

mikrounit@hughes.net

I would greatly appreciate it!!!
Thanks & 73,

Mike Green KQ6MU
DM04 Palmdale, CA USA

stevenn
I have heard it told that the Beast was the Roman Catholic church and the Anti-Chirst will rise from the Roman Catholic church. The Book of Daniel talks of this. Also it wasn't the Jews who crusified Jeasus Christ it was the Romans. Piolet was a Roman. The Catholic church rose from Rome. One of the hats that the early Popes used to where had the mark of the Beast in the three words that where on the hat. Now this is stuff I have heard I'm not sure if its true or not true I writing about the part about the popes hat. I have also read that the Beast will rise from the west. Well to the people in Israle, the writers of this prophecy, Europe is the west not the United States. The United States and people on this side of the world are labeled as people of the coastlands. So with this in mind why are there so many saints? Haven't Romans always had many gods? For more on this look at the studies of Martin Luther the founder of the protestant religion. He touches this very unknown fact in his teachings. After all this I don't think the people of the religon are to blame. I would take a look at some of their leaders and the records of the past and looked where the Catholic Religon played a big part in things both told and untold.
Just My Opinion I could be wrong!
73 from Oris
-- <<<You're wrong alright. First off. Martin Luther was a demented, ugly and evil renegade Catholic who couldn't make it in his own faith and then tried to destroy it. It's interesting to note how the sanctimonious hypocritical right wing W.A.S.P.s conveniently put the blame for anti-Semitism on the Catholics while it was Marty himself, in many of his vicious tracts,who denounced the Jews as devils. The beginning of the Reformation was 1517 and up until then, there was never any love between Catholic Europe and its Jews. When Luther broke with Rome,he welcomed the Jews to his new movement, hoping to convert them.In his 1523 tract called,"THAT JESUS CHRIST WAS BORN A JEW," he offered a sympathetic posture to them, beckoning them into his fold. It didn't work. We are an implaccable people who refuse to accept any man as God since it was forbidden in the Ten Commandments. And so Luther got mad as all hell at these stubborn people and issued a tract called,"CONCERNING THE JEWS AND THEIR LIES." Once again, how many times have you Catholics heard the right wing WASPs blame you for the ills in Christendom and for the Holocaust etc? In that aforementioned tract, Luther wrote,"First their synagogues should be set on fire and whatever does not burn should be covered up and spread over with dirt so that no one may ever be able to see a cinder or stone of it. And this ought

to be done for the HONOR of God and of CHRISTIANITY in order that God may see that we are CHRISTIANS, and that we have not wittingly tolerated or approved of such public lying,cursing and blaspheming of HIS SON and HIS CHRISTIANS. Secondly their homes should be broken down and destoyed...they ought to be put under one roof or in a stable...they should be deprived of their prayer books...their rabbis must be forbidden under threat of death to teach any more..passports and travelling privileges should be forbidden...and so on and so forth." What we have here is THE BLUEPRINT FOR THE HOLOCAUST. And the final result took root NOT in Catholic Germany but in PROTESTANT Germany. I see nowhere in CATHOLIC doctrine such evil and sadistic expositions. Additionally out of the mouths and pens of these right wing screwball evangelical WASPs there's a reference made to the Pope being the "beast" and representing the evil 666 number.The 666 invention came about because of an inscription carved into his crown was intentionally misinterpreted as being that number. 666 is just like any other number-no evil connotations in the least. The loony Evangelists created it to fit their agenda. SheerMALICIOUS CONTRIVED invention! This End Time garbage never came from any bible but rather from a chap named John Nelson Darby, a British preacher, and it's called ESCHATOLOGY. It refers to FINAL MATTERS ....a thousand year reign of Christ at the end of history, commonly known as MILLENNIALISM. Darby had quite an imagination by formulating and spreading the notion that Jesus's return to earth will begin by THE RAPTURE(I'm sure you've heard this term if you listen to the various religious nut cases on the shortwave bands such as Brother Stair and his trumpets), What is this RAPTURE?It's when all the faithful will be swept up into the air to meet Jesus on his way down! CAN YOU BELIEVE SUCH IDIOCY? Then the cataclysmic events of the Tribulation will come with seven years of terror and calamity until Jesus tosses out all evil in the Battle of Armegeddon.And do you know who's maily responsible for spreading such crap..for fomenting hatred against Catholics by emphasizing such terms as "Rapture,Gog,Magog,anti-Christ,Mark of the Beast etc?"" A guy who's made a lot of MOOLAH off it. Hal Lindsey in his 1970 best seller"THE LATE GREAT PLANET EARTH." Still after more green, in 1980 he authored,"THE 1980's-COUNTDOWN TO ARMAGEDDON" and that too made a bundle. To give you an example of how crazy are these "END TIMES" Fundamentalists, remember the Soviet Prime Minister, Mikhail Gorbachev? Remember he had a purple blotch on his forehead and he was a MAN OF PEACE, not war? Medically speaking, that blotch was a PORT WINE NEVIS, an unsightly birthmark. But the Brother Stair screwballs wanted you to think THAT WAS THE MARK OF THE BEAST, the anti-Christ! And the pathetic part of the whole thing is that people BELIEVE SUCH CRAP! And hate Catholics thanks to it. And hate Jews also.This lecture was not intended to run down entirely the non-Catholic portion of Christianity but rather to delineate the need for ECUMANISM and to show how dangerous religion can be if used improperly,mainly for achieving the sordid aims of a political agenda. All too often I read and hear about the danger to American Jews from the Religious Right. That's undeniable because of the way they proffer their "goodness" by EXCLUDING the Jewish element in society. However it's very important to take note of the methods employed to downgrade the Church of Rome as well as the very positive role of Catholicism in America. AF2Y,Doc>>>>>

...and these "small lakes" are the least utilized, with vast empty spaces, even on 70 CM. And in demand commercially. Hence, the most vulnerable to being lost.
The HF ham bands are heavily utilized on a world-wide simultaneous-use basis, and provide for non-channelized, unlimited time one-on-one QSO's without using a shared infrastructure like repeaters, and using a small fraction of the bandwidth. They are also the least sought after for commercial use, hence we have actually gained more bands over the years (12, 17, 30 meters).
It is understandable then that many of us consider HF operation an essential (for some of us the only desirable) ham radio spectrum in which to operate.

73,
Don, W6JL

Where are all you Clinton bashers who said he was so wrong in bombing that hideous Milosevic?. Where are you who said he was depleting our chief stockpile of Cruises? Where are you who said we could never defeat the big brave Yugoslavians? Where are you who said we'd have to engage in a VietNam style ground war to win? You're all windbags!
Clinton was right. It cost us money, time and effort but the world knows the price for attempted genocide. WAY TO GO. MR. PRESIDENT! Doc,AF2Y

Well I'm glad to see it end, I mean $1,000,000.00 a bomb There goes
socail secruity. The only think I could think of was people home
watching TV and armed people would come to the door and say GET OUT! No
cops to call no nothing. In fact it was the COPS telling these people to
get out. This sounds like the way Charlie would run things if you don't
agree with him get out. Its over for now but I would say that this
conflict is far from over. I would hate to remind everyone about the
first death camps where in Albania pre World War II and it was the
Orthodox Catholics (serbs) that where put to the death by the ethnic
albanians. But that is OK right? Just like its OK for the Germans to
kill Jews. The Jews haven't let go so why should the serbs.The Jews are
still looking for socalled NAZI Commanders to seek vengance not justice
but vengence. So I can see the same thing happening here. The little
kids will growup knowing that the serbs tossed them out on the street
and the same thing will happen in a few years as the pendulum swings the
other way.
Oh but there is a differance between the Orthodox Catholics and the
Roman Catholics. So I have a feeling that this thing is far from over.
All Clinton did was push the pendulum alittle more to the left. This
battle between the serbs and the albanian peoples has been going on for
as long as time it self.
I say we nuc the whole area and start over just like what we
should of done in nam. There is no such thing as a controled war. If
you're going to have war finish it and finish it right. We should of
NUCed IRAQ too! Kill em all then start over.
Scorched earth policy.
Of corse Charlie would be pejudice just kill the type of people he
don't like or don't agree with him.
I beleive in equal rights kill everyone and let God sort it out.

What makes you think this whole mess is over Doc? It's just begun, tell me what is the KLA going to be doing? Ill tell you what, using the "protected" Kosovo as a safe zone to launch their attacks against the serbs. This, of course, will lead to the Serbs returning the favor. And where does that leave the US? Right in the middle of a mess that will make Vietnam look like a game show. Clinton is a fool and a socialist. Any you know it.

Subject: WHY MASS TNX BULLS?
Path: K1UGM!WG1I!N0RSE!KT0H!N7CLV!N7MMC!KA6EYH!W3IXR ...

From: KB0JKR@W0CFY.#NCKS.KS.USA.NA
To : BULTIN@ALLUS

Greetings to all, the name is Tim. I, like many packeteers, list bulletins
from the local BBS often. I have seen bulletins requesting for help all of
the time. Days or weeks later, I see a bulletin from the same station who
sent the help bulletin thanking all of those who sent them information.

I find this rather odd since someone took time to send the requested info.
Then, the needy station sends them (and all others who helped) one message.
"Thanks to everyone for your help," they say, and I do not doubt that they
sincerely mean it. Why do they not send a personal message to each person
who sent them a message? If a person took time to send you help, does that
person not deserve a bit of your time for a personal message of gratitude?

Have a wonderful week to all.

Now you've forced me to send my "Benefits of contesting file:"

You say that because you don't understand the benefits of contests. Only the most efficient and robust equipment installations, from radios, operating position, lead-in, to antenna, can be a serious contender. Here, you'll find only the very best operators, knowledgeable of propagation conditions, international procedures, and operating techniques who, when hearing something as simple as a single "dit", know how to interpret such a cue.

These exceptional operators and the powerhouse stations they operate are whom your community turns to when disaster strikes, for these communicators voluntarily "train" themselves weekend after weekend, in the most grueling mental and physical activity known to the amateur radio service. No other operators are better prepared for the rigors of providing emergency communications for the duration of the emergency than contesters.

Yes!!!

Nuclear X-rays and Prompt Gamma pulses create a very broadband Electromagnetic Pulse (EMP) that easily exceeds 50,000 volts per meter (50,000 times 80meters/2 (half wave) equals 4,000,000 million volts across your 80 meter dipole). By the way, that is 42 billion watts in 377 ohm atmosphere across your antenna!!!!

During the 50's when Above Ground Nuclear testing was being performed, the STARFISH event, 700 miles from Hawaii, turned off the power grid in Hawaii. That was in the days of Vacuum Tubes...what happens today in the solid state world?

Extensive studies and tests have been performed in this area...nuclear weapons x-ray and gamma radiation will kill your radio and most everything else.

(The following was sent to all recipients on my "listener mailing
list" upon
termination of my professional relationship with Radio, Inc. this past
Friday
afternoon. I am including it here strictly for informational and
conversational purposes.)

Hey Gang,

All good things have to come to an end. Unfortunately, my tenure at
Radio,
Inc. and Mix 103FM came to an unexpected close on Friday.

At 3:00PM (as soon as I finished my show), I was summoned into the
office. At
this time, management informed me that there was no need for me to
work out the
rest of my time here and that my services were no longer needed. I
would be
paid throughout the end of the month and the next week was to be
considered as
a "vacation." I informed management that I appreciated their offer,
but that I
was looking forward to performing my final week on-the-air so that I
might be
able to say a proper "goodbye" to all the radio friends I have made
here in
Western Kansas over the past 19 months. I had prepared a last show.
I wanted
to perform a last show. Management said they understood my desire for
this...however, they felt it in the best interest of all involved that
we

terminate our relationship effective immediately.

So, I guess I'll say "goodbye" this way...although it sure as hell isn't the
same. To all of you whom I have had the pleasure of meeting, getting to know,
and entertaining every weekday...thank you so much for your support. I have
been doing radio for nearly 16 years. I have been on-the-air in 7 states, on
20 different radio stations, in markets as large as Orlando, Charlotte, and
Minneapolis. You are the most loyal, dedicated, and supportive audience I have
ever had. Yes, you...the listeners of Mix 103FM, my midday show, and The Brown
Bag Special. I wish things had ended differently...in fact, I wish they didn't
have to end at all. I wish management and myself had been able to come to
terms on the issues which divided us and ultimately led to my departure. I
tried on several occasions to accomplish this, but it was not to be.

You will all hold a special place in my heart. Thank you so much for your
phone calls, e-mails, faxxes, personal visits to the studio, and whatever else
you contributed to my show and my success here at Radio, Inc. You will be
missed greatly.

Please feel free to share this information with whomever might be interested.
Since I did not get a chance to say "goodbye" on-the-air, I'm sure a cloud of
speculation will now develop as to the reason for my sudden departure from the
Mighty Mix airwaves. You know the truth. Also, please enter this e-mail
address into your address books (mnmaniac@aol.com) and use it exclusively from
now on. This is my personal, permanent e-mail address and will find me
wherever I happen to end up in the world. Make sure you keep in touch...and I
will do the same.

Most of all, thank you for allowing me into your home, your work, your car, and
your Walkman. Thank you for allowing me to become a part of your

lives these
past several months, as you have become a part of mine. We had a good time and
a good run while it lasted. Radio in this area will never be the same.

God bless Western Kansas. This "city kid" from Florida now knows you're the
best people in the world. Don't ever change.

> DOC,AF2Y>>>>>>>>
>****Bob Wex...there's a misunderstanding and if I stepped on your toes, I
apologize. K2IVX is Jewish and believes that being nice to anti-Semites is the
"in thing" because if one is, then they won't call you a "kike." Somehow "Donk"
thought you were of K2IVX's ilk but he could be mistaken. I, on the other hand,
am diametrically opposed to K2IVX's pacifist leanings due to ,in my
estimation,their traiterous overtones. The problem is that K2IVX may very well
hate those who hate us, but hates WB2OTK worse than KV4FZ and his
goosesteppers. This has clouded K2IVX's mind, warped his judgment and
sensibility and has given several an image of a flawed man. Last weekend IVX
was asking me some questions on the phone which, after reflecting on them,
confused me. He thought I had conspired with "Donk" to run him down or at least
that's what I thought he meant. The answers he requested by phone were not
exact enough and he went ballistic. The truth is I need no one with whom to
conspire over anything. I am my own man and say what I mean and mean what I say
and am known for my candor which is more than KV4FZ can say. I think "Donk"
must have confused you with someone else. AF2Y, Doc********
> Sent via Deja.com http://www.deja.com/

> Share what you know. Learn what you don't.
Me thinks some people need to be educated a bit and I am willing to
share what I know for whatever it might be worth.

I have had no formal religious training. I am the product of
American public schools (elementry and high school). My father's family
came to the US from Austria in the mid 1800s and settled in Macon, GA.
My mothers family was originally from Russia and she was born in England
and came to the US when she was seven years old. She spoke no language
but English. I am a Jew because my parents were both Jews and proud of
it. I was circumsized BUT I was never Bar Mitzfered.....HOWEVER..I am
certainly not ashamed of my Jewish heritage nor do I forget what NAZIs
did to Jews in the past. Some Hams got upset when I proved to them that
Charles Lindburgh was a NAZI. Some Hams get upset whenever you squarch
their super heros. Many people can not stand to hear truth but can only
stereotype others from what they have seen or heard in very limited
experience.
Should I distance myself from AF2Y??? I can respect the fact that he
is a ham and is identifying with his call-letters. I dunno because...
I never met a Ham I didn't like and I'm not seeking any,
PLEASE keep thinking,
Bob Wex w2ilp (I Like People)

KKKevin you take SPIN DOCTORING to new heights. Clinton should recruit you to cover up some of his lies.
The Jamming that the "So Called" net receives is brought on by themselves and their activities on frequency. Yopu KNOW, but most assuredly won't admit, that W1WCR and the other NET LIDS have moved in and taken over, ran people off jammed etc., for years.
Your clame that I have jammed hundreds of times is another out and out Lie kkkevin and you know it. Spin Doctoring and disinformation doesn't change what you, the net or the truth is about. You should worry more about "personal" life than about Spin Doctoring LIES for the "So Called" net. Now I will suggest to you one more time that you keep me out of your propaganda posts kkkevin, if not, you could have some explaining to do like two others will be doing.

We don't have to prove anything. It's all there. You are the one who
gonna have to explain when that $10,500 NAL is hand delivered by Mr.
Hollingswoth! heh heh

ORIS your just a wanna -be, why else would you just pop in here and join a fray like this not knowing a damn thing about what is or has been going on for years. I think you should just worry about yourself. You see, here you are calling me a jammer and you don't know that I am. I'll set you straight, I'm not but you know the nazi net will lie about that, they're pissed because I tell it like it is about them, 3950 and their activity. Plain and Simple Oris, even you should be able to understand that.
Oh, and by the way Riley has already been to Vegas ol man. He had a large crowd and GOOD discussions.

Yes, and lets not forget that Doris claimed that Dr Hate, AF2Y made sexual advances toward her on the land line. And he is a happy married man to hear him tell it. A wife who answers the phone with "DOC NOT HOME" YOU CALL BACK RATER". Doris said he was a "creep" But we already knew that! And he shows it every day.

I did a search at dejanews just to get an idea about this guy. I ran across a tremendous amount of posts that he canceled and some very telling subjects, remarks, comments and Newsgroup activity. I believe this Wb4aio character has been potrayed rather accurately here in this NG. The newsgroups and responses/cancelled posts just about says it all.
Have a look at this

http://www.deja.com/[ST_rn=if]/dnquery.xp?DBS=2&groups=alt.politics.white-power&QRY=kevin+strom&svcclass=dncurrent

Do a little more searching than i did and I'm certain you'll find more interesting tidbits about wb4aio in the various (what an understatement) Newsgroups that he frequents.

I think in this day and age we lack true American hero's. When I grew up there was a picture of Charles Lindberg in our living room, of which I never really understood (until I was about 15) the impact of such an individual on my father.

Its the battle of "good" Vs. "evil", or doing something "that no man has done before". When I was a kid 2 way radios were something magical. Imagine be able to "talk through the air" just like the W.W.II soldiers using huge GE Walkie Talkies.

It may in fact be time for an avenger like Riley Hollingsworth to come to the rescue of this hobby and be held as the leader of the next generation of amateur radio preservist.

I agree 100% Bill. Next time you are at a BOD meeting or on
a vacation to Washington D.C. with your friends, see what you
can do to make sure that never happens again.

Or are you trying to tell us that you just don't like it when
the 'other' guys use that 'facists' stuff ? Sometimes I just can't
figure you out, Bill. You don't like these potty mouth guys in
the newsgroups, you don't like people that use the term
'facisit' but yet you sleep with one. Maybe Cecil is not the
only double standard guy around here after all..... When
you and Carl went to visit the Candy Company did you stay
in separate rooms ? Twin beds or one kingsize ?

You could clear this whole 'facist' thing up if you could just
explain to us the difference between a no code 'facist' and
a pro-code 'stupid, ignorant, facist asshole'. That would probably
throw a little light on the situation, and explain to us why you
ditched all your Mount Olive Township morals for a seat on
the BOD of NCI.

My mother always told me "Actions speak louder than words".
You mother forgot to tell you that when you sleep with the
devil, your butt is gonna get warm..... You gotta knock off this
holier-than-thou crap Bill, it just doesn't fit you any more.

When you were the ARRL Laison For Mount Olive Township, we
all thought you were a nice guy. But now we know the awful truth.
You sold your soul to the devil for a seat on BOD. You should
have run for Section Manager, it would have fit you much better.

"I have never denied you any rights. I have only said I think
you're a stupid, ignorant, facist, asshole. You have every
right to your opinions and to voice them no matter how
disgusting they may be. I hope my postion is perfectly clear."

1064. FCC Enforcement

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-10 00:00:00 UTC
From: Oris <oris@dirtball.com>
Message-ID: <375FBCAB.4F4B@dirtball.com>
Source record: 140122

I would like to know where the FCC so called crack down is? Here in the Atlanta GA., Greenville S.C. area (that trek of area around the two) it is the same stations the same crap over and over again. I mean the FCC is supposed to have a crack down going on. Guys caught in the act of organized jamming. I'm beginning to wonder if what old porkbut said in the beginning was true and I quote the FCC is in the act of selective enforcement. We all know that one of the stations that the FCC caught in the act of organized jamming (going to one frequency and talking about the stations that they ar going to interfear with and then going to that frequency and commiting the act!) is good friends with a FCC employee who used to own a repeater hear in the Atlanta GA area and this same employee has been known to intercept Riley Holingsworth's email. This is the Same FCC employee that dumpster dived destroyed confuscated equipment and passed it to this Atlanta station who got caught for organized jamming for distrubution to the freebanders and CBers alike. So I wonder what the deal is here. Now all of this is just allogations and old news.I'm just wondering why nobody has takin' the time to see if any of this is true. If somebody has takin' the time to see if it is true why wasn't the findings made public? I think these matters and other matters of scandal have been swep under the rug. I will say this the FCC employee in question no longer works in the Atlanta area and now works in the Houston TX area. I wonder why the FCC decided to move him? I wonder if the same practice is going on but now they are moving the illeagal equipment across state lines. I wonder what the FBI would have to say about this? I wonder if this same FCC employee is running a repeater in Houston on taxpayers time and dollars. I wonder if this same FCC employee is "dumpster diving in Houston.
I just bring all this old news up because the FCC just like any government office sees scandal they cover it up by moving the person or persons in question to a different department within the government or different city in the same department. In this case that is what the FCC did. I just don't want you all to forget how the FCC let this one Atlanta Station off the hook when he was caught in the act. What is the deal there? In a time that the FCC is supposed to be cracking down? And to the few busts that have gone down well that looks like just something personnel to me. Some of what these stations did is in no comparison to organized jamming. I would call on the FCC to yank this guy's ticket in the Atlanta area make him retest and watch him for any illeagal CB activity. This guy also was under investagation for this same type of activity on the 11-meter band that got a FCC employee who was doing the investagation moved to another department for fear of scandal. So has the houston TX employee of the FCC and this worm operator got some kind of illeagal deal going on that goes right to the top? I think that the amateur radio community deserves a answer here! Why hasn't this clown

gotton a NAL? Why is the employee of the FCC gotton FIRED? Is Riley Hollingworth really on the road or is he floating about on taxpayers money?
Don't forget!
Oris

I just got off the phone with the DA's office in Clifton, NJ.....They
are going to fax me their case records about Charlie (Doc). The
gentleman said that included in the fax will be the ARREST WARRENT for
AF2Y.

This will prove for once and all that AF2Y should join ND8V in PRISON.
Charles (Doc) is a sick man & should get some help.

I refuse to call Charles "Doc" due to the fact that the only "Doc" he
is, is one of ill will towards fellow man!!

Stay tuned.....I will post all legal papers I receive on a web page.

It's costing me $15.00 for the faxing of the papers....A small price to
pay for the DOWNFALL OF AF2Y.

Careful, there, Gary. Jeff has more than sufficient skills under his
belt. I would trust his operating skills over most other hams, in
an emergency, anytime, if my butt was in the thick of the fracas.
I trust the training and skills of ``Coasties'' after having the
priviledge to be around them several times. They do it for a living.
That makes a difference.

I would also back him up on the contention that there is still a large
percentage of CW on the ham bands, if you care to listen. It tends to
be very seasonal and not regional as SSB or other digital modes are.
I run 40M CW every night, and it is usually wall-to-wall CW in the usual
hours you would expect to hear someone on. In summer, CW tends to shift
with the bands to higher bands. SSB tends to sick around in the same
old cliques on the same frequencies, all the time, on the usual bands.

That is not necessarily good, nor bad, but whatever floats yer boat.
I never have any trouble getting enough CW QSO's to keep me happy.

> I invite anyone to do station counts for the various modes any evening to
> show the fallacy of that claim.

OK, let us do that. You talley up numbers of stations per unit frequency,
per band, and we will do likewise. Scan the bands from bottom to top,
logging time, frequency, and calls heard.

> But it certainly isn't true of the 75/80m band, where the traditional
> CW portion is an empty wasteland, the 30m band, where data operation
> dominates, or any of the higher bands.

You are mixing apples and oranges again, Gary.....

Folks on 75M SSB are regional, and run in cliques. The data channels
there are exactly the same. CW tends to be more frequency agile,
depending upon time of day, season, and band, and tends to be less
regional. Somehow you need to factor that in, too.

On 30M, we share the bands with fixed commercial/military data
stations, as a secondary use. There is still a lot or CW there
but it tends to be mostly DX or QRP folks. Something is always
there, though, almost anytime.

> The claim that CW is the only common mode of the world's hams rings
> pretty hollow too.

Yes and no, but it is always a least common denominator. That has
merit in many types of QSO, where language is problematic.

> that still leaves 2.25 million hams worldwide
> I seriously doubt I'll be able to
> deplete that supply in a single lifetime.

Whatever floats yer boat, Gary, but quit complainin' so much and
put the lips to the mikeymike, the fingers to the keyboard, or
grapples ye up yer CW sendin' iron and QSO some. With 2.5 million
hams yet to go, that leaves me a lot of fine CW to do yet.....
You can run whatever, and still be happy.

Bob/NA4G

Very well said, Tom.... I have found that exact thing over the past
30 years on CW (gee it does not seem like that long), and have mostly
always had problems with SSB folks who think they own the air waves.
Data folks are often quite nice, but there are not a lot of them
about. They beat to a different drummer.

> Face it, CW is going DOWN and there is nothing you can do to stop it!
> By 2003 CW could very well be HISTORY as a requirement.
> so stop crying and get back on the air and ENJOY yourself!

> FMnotCW

Mr. FMnotCW, has a lot to learn about radio. IFF CW may reach a downside
officially, in the next few years, and maybe it will or maybe it won't,
rest entirely assured, Mr. FMnotCW, that there are a goodly number of
fine CWists that will be plying the ether waves for many years to come.
I would reckon I probably have another 30 years before I go pushing up
daisies, and I will be rattlin' an' bangin' on that ol' brass monkey of
a sendin' iron every step of the way.... and ENJOYing it all they way,
too. If you don't, I sense you will have missed out on a lot of the
finer points of ham radio, the people (behind the sendin' irons).......

Caveat....

Chuck.... There is a proper CWist's scripting method, dating from the early radio (and maybe even landline) days. It is in one of the army military TM CW manuals and in Harvey Streichartz's Marine Radio Operators Manual for commercial marine operators (Cornell Maritime Press, 1943 or thereabouts). The scripting method was devised to reduce the number of writing strokes to the minimum, for acceptable messaging. It works, but takes some bit of training to develop correctly. If you are a typist, you might use a mill to handle it, instead, if that is acceptable to your VE's.

Scripting works up to around 30wpm, relatively easily. Handwriting works also, to around 30wpm, but is harder on the fingers. For any sort of serious speed copy, you need a mill.

It sometimes helps to burst script, i.e., copy a word at a time rather than letter by letter. But, that requires you to develop a copying behind technique of a few letters up to a line, and that is not easy for most folks to do. That only comes with time.

For the purposes of taking an exam, take notes instead of full copy, if you really have trouble pushing the fingers along at that speed. That will be entirely sufficient for answering questions. Your speed in writing will come with time.

If you insist on full copy, find that scripting method and practice it for a month or two, and that should help. My OM, who was a commercial and military op for many years and a ham for 70 years, could do it in his sleep, and it was a joy to watch, but I use a mill instead or take notes.

When you copy, get in the commercial/military practice of 5 groups or words per line. That actually makes it a little easier to put down on paper, since your return arm movement is not so great and you don't get so lost behind.

Hang in there, and you will do fine.

GL YM.... DE NA4G/Bob UP

As has been said ad infinitum, but apparently not sunk in with most
folks, it is not lawful to modify and use a ham tranceiver outside the ham
bands. Such a radio is not "type accepted" by the FCC.
If you have a legitimate need to communicate on bands outside the ham
bands, buy a radio which is type accepted for those bands. If you wanna
play Ricky Rescue or Johnny Law, use the right radio ! Generally speaking,
if you are authorized to use a public safety freq the agency in question
will probably give you a radio. If you're not, they'll probably give you
something else when they catch up to you......

Just a point of order here Cecil (rather than a vote of support for the stylings of E. June). Because of the way you are using the word fascist, the words communist, socialist, republican, and democrat would be equally valid descriptions of what is in fact nothing more than a rule that is supported by a government.

An autocracy is lead by a monarch or dictator who rules with unlimited authority and undisputed influence or power (an autocrat). I can't see how that is a fitting description of our government or of anyone on this newsgroup.

Haven't tangled with the IRS lately, have you Jim? And of course, I am speaking figuratively in common everyday language rather than scientifically. If the FCC can rationalize away a violation of an international treaty, that certainly seems rather autocratic to me. Sometimes bureaucrats and autocrats are indistinguishable.

First I am a G7, now for the supprise
Im all for keeping morse, if you like morse use it
BUT If you don't like morse (I hate it) then I should NOT have it forced on
me by people
who think that just because I am a B holder then I am second class.
I took the same exam as the M0's

I heard a saying once, sorry if I quote it wrong but the message is the same

"I disagree with what you are saying but I will fight to the death your
right to say it"

This debate is harming the ham community, dont you think its time to respect
others
likes and dislikes. That goes for all the B's and noncode holders who
slag off A's

Sorry if I have upset anyone but this subject is why packet is in the bin

Now listen up, Oris Dirtyballs...in this country everyone has a say and you say garbage. To convince us Americans that greater gun control is not needed is done either out of stupidity or naivete. You might say that guns don't kill people, people do. If that's true, then a lot of people would have to die by arrows, rocks, you name it. Guns make it EASIER to kill and faster. Do you think our founding fathers had HAND GUNS and SEMI-AUTOMATIC WEAPONS on their minds when the right to bear arms became law? Far from it. The right to bear arms dealt with MUSKETS to protect oneself and the family against marauding Indians and British invaders. And for enlightenment, the right to a militia had nothing to do with any right to belong to a private army to fight the federal government. It dealt with something we now call THE NATIONAL GUARD. You right wing crazies are insufferable idiots, boors and I might say, DANGEROUS too. You're the type of people who believe that murdering abortion doctors is your RIGHT because somehow in your demented minds, Jesus would want it. You IMAGINE persecution by this government.. You have no understanding of the importance of NATO and the United Nations, believing that both rob us of our sovereignty. You fall for right wing lingo such as ONE WORLD GOVERNMENT. You think the FBI and ATF intentionally kiled the folks at Waco while the truth is that David Koresh had no formal Christian organization whatsoever. It was a militaristic right wing cult whose compound was loaded with illegally acquired weapons which the FBI demanded to inspect. Oris Dirtyballs,you simply don't know what you're talking about. Instead of reasoning things out and using an intelligent analytical approach to politics, your mind runs amock with inconsiderate and irresponsible allegations. In case ytou're interested, one of the prerequisites for suing for slander or libel per se, is the labeling an individual a communist which is what you did to me. You had better learn to control yourself before you get yourself into litigational doo doo and it's no idle threat. And from what I am hearing, I also suggest you take a bath. Doc,AF2Y

Tonight's the night. The dipole is at 85 feet; the 800 watt linear is fine tuned to one frequency and beginning at 0000 UTC, I wll be there with guns blazing. Anyone wanting my card will have to send an S.A.S.E. along with his. I'm making my daughter a big wedding in July and I must save every cent possible-I'm sure you understand. Of course, an offering enclosed in the envelope with your QSL and S.A.S.E. would not bother me at all. I'm not sure if my pal, the ex-Soviet soldier who mutilated many brave Nazi soldiers fighting on the Eastern front for "Lebensraum," will be there, however we should have a lively OPEN FORUM just the same. I said OPEN FORUM-for all! Not an exlusive forum for white supremists, gay bashers, immigrant bashers, anti-Semites and Holocaust revisionists. This one is going to AMERICAN in nature! C.U.L.

You tell them to QSY. And there may not be any Nazi's there. Just some guys
from the Great Liberty Net. And Arkansas Bob. And the "White Noise Jammer".
And a few disk jockeys. And hopefully Oris. And literally tens of thousands
of SWL's with Radio Shack receivers and Tiny-Tenna's.
Jam them off the freq? I doubt it. Most of the Liberty Net guys can plow
you under if they want to. But come on in and tell KE2LO and WB4AIO and W1WCR
about your Russky buddy who killed all the Germans. We just can't wait to hear
about it. My Tiny-Tenna is all shined up and ready to listen. I'll be tuned
to "AF2Y's frequency" all night waiting on the edge of my seat.

I didn't deceive them either. My company did not have a retirement plan for me so I put $2K in my IRA. The IRS disallowed it because they said my company did have a retirement plan (They did but only for officers of the company). Nothing my company nor I could do or say would convince the IRS otherwise. They forced me to pay tax and penalities on my IRA contribution even though it was perfectly legal and above board. Sounds pretty autocratic to me.

You'll be surprised to learn that not only do people who live in
an autocracy have to pay taxes, but so do people who live under communism,
socialism, and democracy! Why do you keep talking about autocrats?
Politicians and bureaucrats are the same under any form of government.

I just got off the phone with a Maxwell Hungadunger of the FCC and explained the situation on 3.950. I asked if was okay for me to go on that freq. since I am opposed to the run-of-the mill hatemongering going on there. He said by all means to go ahead but progress in a manner concomitant with good operating procedures and abide by all rules and regs set forth in Part 97. I assured him I would and that my presence on that frequency would be of the highest caliber. He said he had confidence in me and God speed.

Here's one of the 3.950 "Liberty Net" captains. Yes, indeed, nothing like having an "open forum" for current events. WHAT A JOKE! AF2Y, Doc

Jewish Supremacy:
Those Who Want to Dominate a Multiracial Society Are Racial Supremacists; Those Who Want to Live in a Healthy, Homogeneous Society Are Racial Separatists.

by Kevin Alfred Strom
Have you ever noticed the psychological phenomenon in which a person will often call attention to the real or imagined faults in others that he himself suffers from? The name of this phenomenon is projection, and it certainly crops up often in life: the mentally unbalanced man accusing others of being "crazy"; the extremely jealous woman accusing her husband of not trusting her; the habitual schemer accusing his co-workers of plotting against him; the greedy man excoriating his fellows for being selfish; etc.
This phenomenon is nowhere more apparent than in the controlled media's readiness to accuse anyone who believes in White survival of being what they call a "White supremacist." This has to be the most egregious example imaginable of the pot calling the kettle black.
Actually, it is more like the pot calling the silverware black, since most of those accused of being ï¿½ "White supremacists," or in illiterate-speak, "White supremists" [sic], are actually White separatists, a very important distinction. It is the largely Jewish masters of the media who are supremacists supreme.
A separatist desires that his people should have freedom and independence from domination by other peoples, and to that end he works for the day when his people shall be able to live and provide for themselves in their own nation, without the burden of an underclass or overclass comprised of other peoples. A separatist specifically does not desire to be an overclass. He does not want to rule over any other people. In fact, a separatist does not want a multiracial society at all.
A supremacist, on the other hand, wants and demands a multiracial society. In this multiracial society he wishes his race or social group to be the dominant one. The fact that this desire is usually cloaked in pretensions of beneficent intentions and "the greatest good for the greatest number" should not obscure the fact that it is a master/servant relationship that the supremacist wants. White Americans who promoted Black slavery in this country during the first half of the 19th Century could properly be called supremacists. White American businessmen who support increased Third World immigration to provide themselves with cheap labor are essentially supremacists. The White upper class have abandoned their own people, but they daub their unconscionable piggish greed and treason with a fake gilding of "tolerance" which they themselves neither believe nor practice.
The world champions of hypocrisy when it comes to ethnic supremacy, however, have to be the organized Jews. Dominant in the Hollywood/New York cultural

axis, when anyone challenges their interests they are quick to denounce with the words that they have made into terms of opprobrium: "racist," "White supremacist," etc. In their movies and their newscasts they are zealous in their promotion of the idea of a multiracial, multicultural society in which all live in perfect harmony. In fact, the genesis of this "multicultural" moral and social construct was with the leftist media Jews and their allies, as they themselves admit in private Jewish publications (see previous article, "Yiddishkeit Pathology." But a careful examination of organized Jewry's attitudes towards other races reveals a quite different face from that presented to the public. In fact, it can be fairly said that Jewish religion and Jewish practice exemplify racial supremacy at its most hateful and its most outrageous. In truth, after examining definitive Jewish religious documents one can be forgiven for thinking that racism just might have been invented by the Jews.

Let's take a look at the record.

A few years ago a friend of mine, after a long evening discussing politics and conspiracy, asked me, "If there really were a Jewish plan to dominate and enslave us as you say, surely someone would have defected and spilled the beans on his fellow conspirators."

"Well," I replied, "I agree that would be the very best evidence of all."

I can tell you now that such evidence not only exists, but it is plentiful. It is not all in one place, and one has to examine the testimony of more than one individual to get the complete picture, but there are indeed defectors from what my friend called the "Jewish conspiracy." I am not sure how well the word "conspiracy" now applies to a domination presently being conducted more and more out in the open, but a conspiracy it once was, and defectors it has surely had, though not all of them would have claimed that title. Long-time readers will be familiar with the names of a few of these: Benjamin H. Freedman, Alfred Lilienthal, Victor Ostrovsky, Samuel Roth, Marcus Eli Ravage, Noam Chomsky, Israel Shahak. Each provides a piece of truth that the ruling establishment does not wish you to know.

Today let us examine Israel Shahak. Israel Shahak is a professor emeritus at Hebrew University and longtime Israeli dissident. Israel Shahak is a liberal Jew who excoriates "Nazis" repeatedly and vociferously in his writings. Israel Shahak is himself a former resident of the Bergen-Belsen concentration camp during World War II. He was raised as an Orthodox Jew. He is a Jew who settled in Palestine in 1945 and was witness to the founding of the state of Israel. And he is a powerful opponent of Jewish hypocrisy.

The extraordinary thing about Israel Shahak is that he does not have a double standard for Jews and non-Jews when it comes to racial supremacy. Shahak is against racial supremacy whether practiced by Jews or non-Jews, and he finds that it is practiced extensively by Jews and is in fact part of their religious traditions. Professor Shahak finds this morally disturbing and not in the long-term interests of Jews. Professor Shahak has published a book which examines the issue of Jewish racism in detail, Jewish History, Jewish Religion: The Weight of 3,000 Years.

Israel Shahak says that Judaism and its teachings are "poisoning the hearts and minds" of its followers and have been doing so for thousands of years. In a recent forum at the Massachusetts Institute of Technology, he acknowledged that Jews have been persecuted in the past, but emphasized that today "it is quite

common that a persecuted group becomes the persecutor."
One of Shahak's favorite activities is translating the Hebrew press into English for the edification of the rest of us, a practice which has earned him the burning hatred of many in the Jewish establishment. One article he translated recently, by Israeli journalist Tom Segev, relates the writer's random walk through Jerusalem in the company of an Arab lawyer. The lawyer was stopped repeatedly by Israeli guards and his identification papers were demanded. One guard ordered him, "Come here, jump." Then the guard dropped his papers on the road and, laughing, demanded that the Arab pick them up. Aside to the Jewish journalist the guard stated, "These people will do whatever you tell them to do. If I tell him to jump, he will jump. Run, he will run. Take your clothes off, he will take them off. If I tell him to kiss the wall, he will kiss it. If I tell him to crawl on the road, won't he crawl? . . . Everything. Tell him to curse his mother and he will curse her too." The guard continued, offering his opinion that the Arabs are "not human beings." The border guards then searched the lawyer, gratuitously slapping him, and ordered him to remove his shoes, warning him that they could order him to remove all his clothes if they so chose. Segev continues: "My Arab kept silent and sat down on the ground." The border guards laughed and said again, "Really, not humans."
This, of course, is a relatively mild example of the attitude of many Jews toward Gentiles, but it suffices to show the mentality involved.
Shahak, in an article entitled "The Ideology Behind the Hebron Massacre," gives us some additional recent examples of this widespread Jewish attitude. He translates a few of the statements of a religious group in Israel called the Gush Emunim, which, according to Shahak, "enjoy[s] [Yitzhak] Rabin's friendship and strong influence in wide circles of the Israeli and diaspora Jewish communities."
This sect states that Jews are not and cannot be a normal people.
One of their leaders, Rabbi Schlomo Aviner, stated,". . . while God requires other normal nations to abide by abstract codes of justice and righteousness, such laws do not apply to Jews.ï¿½
Rabbi Israel Ariel states, "A Jew who kills a non-Jew is exempt from human judgment, and has not violated the prohibition of murder."
According to Gush Emunim rabbis, "all Arabs living in Palestine are thieves because since the land was once Jewish, all property to be found on that land really belongs to the Jews."
These Jewish fanatics feel invincible. They possess one of the world's most powerful military machines (built up by five billion or more U.S. dollars in annual aid) and have plenty of potential American cannon fodder at their disposal. They state: "Israel need have no fear of future wars, and can even provoke them at will . . . Even if there is peace, we must instigate wars of liberation in order to conquer . . ."
In Shahak's article former Knesset member Rabbi Eliezar Waldman, who is now the director of the main Jewish school in Kiryat Arba, expresses the view "that by fighting the Arabs, Israel carries out its divine mission to serve as the heart of the world . . . while Arab hostility springs, like all anti-Semitism, from the world's recalcitrance against being saved by the Jews, . . . or from Arabs seeking to fulfill their collective death-wish."
Shahak recounts the answer of a rabbi who was asked by an Israeli soldier if it was proper to kill Arab women and children. The rabbi's answer was a quote from

the Jewish holy book, the Talmud "The best of the gentiles . . . kill him; the best of snakes . . .dash out its brains." Some holy book; some religion!
Shahak contends that Jews are imbued with such attitudes to the degree that they are immersed in Judaism. In his book he explores the anti-Gentile outlook of Judaism's Talmud. He writes:
"According to the Jewish religion, the murder of a Jew is a capital offense and one of the three most heinous sins (the other two being idolatry and adultery). Jewish religious courts and secular authorities are commanded to punish, even beyond the limits of the ordinary administration of justice, anyone guilty of murdering a Jew . . . When the victim is a Gentile, the position is quite different. A Jew who murders a Gentile is guilty only of a sin against the laws of Heaven, not punishable by a court. To cause indirectly the death of a Gentile is no sin at all.
"Thus, one of the two most important commentators on the Shulhan 'Arukh explains that when it comes to a Gentile, "one must not lift one's hand to harm him, but one may harm him indirectly, for instance by removing a ladder after he had fallen into a crevice . . . there is no prohibition here, because it was not done directly."
"A Gentile murderer who happens to be under Jewish jurisdiction must be executed whether the victim was Jewish or not. However, if the victim was Gentile and the murderer converts to Judaism, he is not punished.
Shahak reveals that according to the Talmud:
"Sexual intercourse between a married Jewish woman and any man other than her husband is a capital offense for both parties, and one of the three most heinous sins. The status of Gentile women is very different. The Halakhah presumes all Gentiles to be utterly promiscuous and the verse "whose flesh is as the flesh of asses, and whose issue [of semen] is like the issue of horses" is applied to them . . . Therefore, the concept of adultery does not apply to intercourse between a Jewish man and a Gentile woman; rather the Talmud equates such intercourse to the sin of bestiality . . .
"According to the Talmudic Encyclopedia: "He who has carnal knowledge of the wife of a Gentile is not liable to the death penalty, for it is written: `thy fellow's wife' rather than the alien's wife . . . and although a married Gentile woman is forbidden to the Gentiles, in any case a Jew is exempted."
"This does not imply that sexual intercourse between a Jewish man and a Gentile woman is permitted -- quite the contrary. But the main punishment is inflicted on the Gentile woman; she must be executed, even if she was raped by the Jew:
"If a Jew has coitus with a Gentile woman, whether she be a child of three or an adult, whether married or unmarried, and even if he is a minor aged only nine years and one day . . . because he had willful coitus with her she must be killed, as is the case with a beast, because through her a Jew got into trouble."
"If a Jew finds property whose probable owner is Jewish, the finder is strictly enjoined to make a positive effort to return his find by advertising it publicly. In contrast, the Talmud and all the early rabbinical authorities not only allow a Jewish finder to appropriate an article lost by a Gentile, but actually forbid him or her to return it .
. . "It is forbidden to defraud a Jew by selling or buying at an unreasonable price. However, fraud does not apply to Gentiles, for it is written: ï¿½Do not defraud each man his brother . . . The Halakhah interprets all such idioms [as

ï¿½each man his brotherï¿½ or ï¿½neighborï¿½] as referring exclusively to one's fellow Jew.

"In 1962 a part of the Maimonidean Code . . . the so-called Book of Knowledge, which contains the most basic rules of Jewish faith and practice, was published in Jerusalem in a bilingual edition, with the English translation facing the Hebrew text. The latter has been restored to its original purity, and the command to exterminate Jewish infidels appears in it in full: "It is a duty to exterminate them with one's own hands." In the English translation this is somewhat softened to: "It is a duty to take active measures to destroy them." But then the Hebrew text goes on to specify the prime examples of "infidels" who must be exterminated: "Such as Jesus of Nazareth and his pupils, and Tzadoq and Baitos [the founders of the Sadducean sect] and their pupils, may the name of the wicked rot." Not one word of this appears in the English text on the facing page (78a). And, even more significant, in spite of the wide circulation of this book among scholars in the English-speaking countries, not one of them has, as far as I know, protested against this glaring deception.

Jew Israel Shahak has done the world a great service. He has been intellectually honest and very courageous. In Israel he speaks against Judaism at a very real risk to his life so as to reveal the truth about the most long-standing and utterly hostile racism the world has ever seen: Jewish racism.

Israel Shahak's works make it clear that the new religion of "equality" promoted by the Jewish establishment is for Gentile consumption only. Organized Jews promote "equality," but they believe in the very opposite. They believe that they are a special, chosen people, destined to rule all others and to own all the wealth of the world. They are fanatical about preserving their heritage and their identity, their exclusive Jewish schools, and their organizations. The prevailing Jewish world view is a textbook example of the racial supremacy they are so fond of accusing others of having.

What can we learn from this? I assure you it is not my purpose to promote hatred or racial supremacy from our side of the racial divide. The very fact that I devote so much space to truth-telling Jewish dissidents should prove that.

I think we can learn a lot from an unbiased observation of Jewish activities. First we must acknowledge that they have been amazingly successful at surviving. Surrounded by often hostile majorities, they have preserved their identity, their culture, and the germ of their racial uniqueness through millennia. For that we can credit their intense sense of identity and solidarity and their belief in themselves as a people. I deeply wish that we Europeans could emulate them in this regard, for then our survival would be assured.

But I cannot recommend their hypocrisy as an example to be followed. This hypocrisy always leads them to practice a supremacist rather than a separatist way of life. Despite some Zionist denials the Jewish way of life shows every sign of continuing on its perpetual path of living among other peoples as a solid, organized minority and attempting to gain the upper hand in Gentile nations by promoting the poisonous idea of a raceless society. This destructive and hypocritical approach is sure death for the Gentiles, of course, and in the long run always backfires on the Jews. That is precisely what Professor Shahak is worried about.

I think that racial separatism, not supremacy, is the only path to independence and freedom for all peoples on this planet. It is also a path that is in harmony with our natural instincts. Our instincts -- all of them -- are there for very important reasons, and we would not be what we are if it were not for the instincts which led us to survive the rigors of Ice Age Europe and to consider ourselves fundamentally different from peoples who developed closer to the Equator.

My friend, a long-time shipboard CW operator, would like to become a ham, but he's only interested in CW communications. He feels that learning about satellites, FM, SSB, pulse, RTTY, FAX, SS, AMTOR, packet, SSTV, FSTV, EME, meteor scatter - all are *unnecessary* to amateur radio licensing requirements. He never plans on using any of these modes, yet, he'll flunk the exam if he doesn't learn about these topics which are being "forced" upon him.

Which of us are qualified to determine just what is necessary and unnecessary to become licensed?

No one has gone home yet ... NATO has not even moved in yet. Most
refugees never go home. In which case Milosevic wins because he has
reduced the population balance by a large percentage. How long do you
think our troops will stay after they start dying from snipers and
land mines? Milosevic is an indicted war criminal. He is still in
charge. Now he can move his troops back, regroup and hit somewhere
else in Yugoslavia.

>From: radiosigs@aol.com

>You yell and scream and call people who want better gun legislation,
>communists.

well I have to respond to this. I'd call them liberals. There are 20,000 gun laws now, enforce those rather than create more. Criminals and whackos won't abide by them anyway.

>I'll tell you when you yourself will wise up and see the sense
>behind such legislation

Thwere isn't any sense behind legislation that restricts the rights of honest citizens because of criminals or loonies. Anyone can choose not to own firearms. They've been around for a long time, over the fire[place, under the bed, in the garage, etc. the difference is education, kids used to be taught how to use them, what they are for, what they can do, and until recently there weren't many accidents. And most od the recent incidents were not accidents. they were perpetrated by people who didn't give a damn about the law to begin with, so 20,000 more won't stop them. takking guns from honest law abiding citizens is for 1 Un_ Constitutional. What part of "shall not be infringed" is hard to understand? the second amendment primer is full of the writting of those thatr created ALL of the amendments in the Constitution and they were clear on what their meanings were.
We cannot just switch the Constitution on and off depending on the issue at hand. The founding father put that as the Second Amendment for a reason and it wasn't hunting.
i've noticed lately that most people, not all, but most, who hold that liberal view are from the east, wonder why that is??

>When a kid shoots one of yours at school. AF2Y,

How about when a kid gets ran over? How about when a kid drowns? Should we get rid of cars and swimming pools too??

3950 Contest!

In hounor of AF2Y aka "Dr Hate" getting on 3950 this weekend. We are having a contest. The winner will get to accompany Mr. Hollingsworth to the QTH of Porkbutt when his NAL is ready to be handed out!

2nd place winner will win a trip to visit Oris's QTH! And dinner for 2 at his house!

CONTEST:

Our staff has prepared a short quiz for you..

Who has recently gotten his HF privlages SUPSPENDED for 6 months?

a K5BLB
b W1WCR
c W2YEE
d WA9KJI

2. Who was sent a letter wanting this ham to account for every OO card and some comments made last Novemeber on 20 meters?

a KK7HO
b WB2OTK
c K5ZU
d KN4CF

What was the call sign of the repeater in California that got taken off the air and was recently allowed back on?

a. N0VFP
b WB0CXJ
c K7IJ
d KJ4JE

Who was the person who recently quit a SW broadcast station because of conflicts with a "Hate Speech Policy"?

a Brother Stair
b Pastor Pete Peters
c Randi Steele
d Kevin Strom

Please e-mail answers to DX302MAN@AOL.COM our staff will process and tally the results during next week's "Great Liberty Net"

Thanks for reading. I hope someone can help us. My brother recently bought a Yaesu FT-1000MP HF rig and he's having a problem trying to calibrate the VFO display so that it's on the right frequency. If I set my VFO to 28.41500 he has to set his to 28.41505 for us to be on frequency with each other. I checked the tone on 10.000mhz and it matches there but can't seem to get it on freq on phone. Any help or suggestions would be greatly appreciated. Please email keith@toolcity.net if you have any comments or suggestions.

73 and good DX,
Keith Reynolds - n3uux

You must have missed this the last time I posted it, my
server must be hosed up again. So one mo' time......

I agree 100% Bill. Next time you are at a BOD meeting or on
a vacation to Washington D.C. with your friends, see what you
can do to make sure that never happens again.

Or are you trying to tell us that you just don't like it when
the 'other' guys use that 'facists' stuff ? Sometimes I just can't
figure you out, Bill. You don't like these potty mouth guys in
the newsgroups, you don't like people that use the term
'facisit' but yet you sleep with one. Maybe Cecil is not the
only double standard guy around here after all...... When
you and Carl went to visit the Candy Company did you stay
in separate rooms ? Twin beds or one kingsize ?

You could clear this whole 'facist' thing up if you could just
explain to us the difference between a no code 'facist' and
a pro-code 'stupid, ignorant, facist asshole'. That would probably
throw a little light on the situation, and explain to us why you
ditched all your Mount Olive Township morals for a seat on
the BOD of NCI.

My mother always told me "Actions speak louder than words".
You mother forgot to tell you that when you sleep with the
devil, your butt is gonna get warm...... You gotta knock off this
holier-than-thou crap Bill, it just doesn't fit you any more.

When you were the ARRL Laison For Mount Olive Township, we
all thought you were a nice guy. But now we know the awful truth.

You sold your soul to the devil for a seat on the BOD. You should
have run for Section Manager, it would have fit you much better.

"I have never denied you any rights. I have only said I think
you're a stupid, ignorant, facist, asshole. You have every
right to your opinions and to voice them no matter how
disgusting they may be. I hope my postion is perfectly clear."

> about. From Webster's: "fascism - a tendency toward or actual
> exercise of strong autocratic or dictatorial control". According
> to that definition, my mother practiced fascism.

No Herr Cecil, according to YOUR definition, YOU are a fascist. Here you are being a fascist, advocating a BAN on contesting which would violate the rights of our citizenry in the process:

"I know enough to know that "polite contester" is an oximoron. I personally think contests should be banned from the ham bands. contesters willfully interfere with my normal operations." - Cecil Moore, 06/04/98

And here are YOUR definitions of that term:

"Citizens of this free country have inalienable rights....That's the difference in a free country and a fascist/socialist country." - Cecil Moore, 10/01/98

"That you would say such a thing indicates what an aggressive thug you are even toward friends of CW who don't share your exact feelings... Our point of disagreement lies in my being a Libertarian and your being a fascist (as are most Democratic and Republican politicians). You elite fascist types believe that you know what is best for me. You believe that my life belongs to you. How do you get away with believing that your life belongs to you and my life belongs to you too?" - Cecil Moore, 03/22/98

And, of course, who could forget some of your self-righteous bulls**t when you try to lay the "fascist" label on someone else:

"Our differences are political and center around the role of government in a free society. I am a Libertarian who believes citizens should have as much freedom as possible. You are an elitist fascist who not only believes that you know what's best for yourself, but that you know what's best for everyone else. Thanks but no thanks, Dick. We fought two world wars to rid ourselves of your ilk." - Cecil Moore, 03/15/98

"Oh Dear Dick, I apologize. I forgot that you are such a superior specimen of a human being that you alone, do not need to have your fascist tendencies reined in by the Bill of Rights. Of course, you would be the first benolevant dictator in the history of the world. Please forgive me for thinking otherwise. Your postings are so filled with love and respect for your fellow man that it was downright unkind of me to think that you might be capable of anything except god-like goodness. Of course Lincoln was wrong when he said all men are created equal. We shouldn't lump all humans together and grant each of them the same set of inalienable human rights. Of course, you are entitled to more rights than anyone else and I am surely to be pitied for being so nearsighted about your good intentions which are so obvious from your postings." - Cecil Moore, 03/15/98

Am I taking anything out of context, Cecil? Do you want the whole darned posts?

Now why don't you take a break from this newsgroup and head over to 3950 where you belong, you disgusting, fascist hypocrite. You don't need an Extra to get on that frequency, Herr Cecil.

Holy cow, Bill. I thought you were a little smarter than old D. You
are the THIRD NCI director to play the "victim card" in what, a week?
First Carl & Larry, now you. I caution you to NOT make their mistakes
and to try to get your FACTS straight before you decide to do it
again. You will only look sillier than you are about to.

This "man" is getting exactly what he deserves, a taste of his own
medicine, which is EXACTLY what this wretch dishes out to everyone
else. Let me illustrate:

"Our differences are political and center around the role of government
in a free society. I am a Libertarian who believes citizens should have
as much freedom as possible. You are an elitist fascist who not only
believes that you know what's best for yourself, but that you know
what's best for everyone else. Thanks but no thanks, Dick. We fought
two world wars to rid ourselves of your ilk." - Cecil Moore, 03/15/98

> He does not want the world to know he got his
> upgrade through whining instead of work?
"He is a sensitive guy and doesn't want to be treated like a
Jew in Nazi Germany which is exactly the way you guys would
treat him. He probably spent ten times as much time trying

to get to 13wpm as you did. Is that not effort enough?" - Cecil Moore, 12/16/98

"Oh Dear Dick, I apologize. I forgot that you are such a superior specimen of a human being that you alone, do not need to have your fascist tendencies reined in by the Bill of Rights. Of course, you would be the first benolevant dictator in the history of the world. Please forgive me for thinking otherwise. Your postings are so filled with love and respect for your fellow man that it was downright unkind of me to think that you might be capable of anything except god-like goodness. Of course Lincoln was wrong when he said all men are created equal. We shouldn't lump all humans together and grant each of them the same set of inalienable human rights. Of course, you are entitled to more rights than anyone else and I am surely to be pitied for being so nearsighted about your good intentions which are so obvious from your postings." - Cecil Moore, 03/15/98

> It's called the wimpy waiver syndrome. It usually
> affects lazy people that justify their cheating
> because they feel the present regulations are unfair.
"Jones, if I cut-and-paste the emails so you cannot discover the identy of my EE friend who spent hundreds of hours trying to get to 13wpm, will you converse with him? The reason to shield him from you is that he doesn't like getting treated like a Jew in Nazi Germany." - Cecil Moore, 12/16/98

"That is discrimination, pure and simple since Morse code in no way is a qualification for ham HF access. Did you support the privileges that the whites had and the blacks didn't? Did you support the privileges that males had and females didn't? Did you support the privileges that non-Jewish people had and Jewish people didn't in Nazi Germany?" - Cecil Moore, 03/22/98

"That you would say such a thing indicates what an aggressive thug you are even toward friends of CW who don't share your exact feelings... Our point of disagreement lies in my being a Libertarian and your being a fascist (as are most Democratic and Republican politicians). You elite fascist types believe that you know what is best for me. You believe that my life belongs to you. How do you get away with believing that your life belongs to you and my life belongs to you too?" - Cecil Moore, 03/22/98

Is that enough, Bill? Do you want a few more? The pathetic thing is that Herr Cecil *IS* a fascist, and the victims of his assaults were not.

You tell them to QSY. And there may not be any Nazi's there. Just some guys from the Great Liberty Net. And Arkansas Bob. And the "White Noise Jammer". And a few disk jockeys. And hopefully Oris. And literally tens of thousands of SWL's with Radio Shack receivers and Tiny-Tenna's.
Jam them off the freq? I doubt it. Most of the Liberty Net guys can plow you under if they want to. But come on in and tell KE2LO and WB4AIO and W1WCR about your Russky buddy who killed all the Germans. We just can't wait to hear about it. My Tiny-Tenna is all shined up and ready to listen. I'll be tuned to "AF2Y's frequency" all night waiting on the edge of my seat.

It does Dick, but only if context can be used in his favor:

"Don't mind being closely analyzed, Jim. But I do mind your sadistic destructive tactics. It is impossible for you or me or anybody else to make English a context-free language. You conveniently use that fact to promote your power trips. Old trick, doesn't work." - Cecil Moore, 06/05/99

Cecil is the great hypocritical charlatan, and I am happy to say that he is now being exposed for what he truly is, using his own words to do it. Kinda hard to dance, obfuscate, and deny THOSE.

The years of his freely pontificating, boasting, and lying to this group have come to an end. I don't think he can write a simple declarative sentence without contradicting himself. I'd be surprised if even the most rabid NoCoders believe a word he says anymore. He did *QUIT* NCI, after all. Then again, well, maybe I wouldn't be surprised.

You live by the sword, you die by the sword (figuratively, of course).

Just like any other day, Jim, I say, "frequency is in use OM". Funny,
the only time that is ignored is during a contest. I have been called
every name under the sun by contesters simply because I am not involved
in the contest and want to continue my pre-existing QSO. This is my
personal opinion and pet peeve: Contest competition among amateurs
brings out the absolute worst characteristics of Homo sapiens. It is,
IMO, basically the same human characteristic that causes world wars.

More ramblings of a lunatic, Cecil. I argue that you are a fascist hypocrite and I can prove it (that you are, that is). I do it with your own words so that we don't have to play your game of 'dictionary obfuscation'. Go ahead, browse around at my other postings, see if you don't agree that you are a hypocritical fascist.

FYI, I've been contesting since I was 13. I've made THOUSANDS of QSO's in contests. Heck, I even made top 10 W/VE once (1981 I believe) and you have to be pretty driven to do that. I've operated in 4 major contests (and some minor ones) since reactivating in February. Why is it that I don't have a SINGLE citation from the FCC regarding anything, including willful interference? Why is it that I've NEVER been in an on-air argument with anyone who even THOUGHT I was interfering with them?

It's very simple Cecil, the set of willful interferers and the set of contesters are not the same set. There are already FCC regulations prohibiting deliberate interference. You can't get that through your wood-headed Fascist mind, so you want to BAN all contesting.

Nope, I'm finding it harder and harder to believe that you are a Mensa member. What was it you said you scored on that test? Could there have maybe been a scoring goof-up?

Let me give you some of your own advice, old man:

"It is better to be silent and thought a fool than to open one's mouth and remove all doubt." - Cecil Moore, 02/25/99

Source record: 139934

Kevin you seem to be refering a previous post to me. You're becoming so ridiculous and paranoid that you now have robots "jamming" the Internet". It's becoming more and more obvious that anyone who doesn't agree with the like of you is "automatically" classified a jammer. Now it doesn't matter whether they are on the Internet or radio. Boy do you need some help (psychotherapy).

>Anyone who visits the alt.revisionism newsgroup

not many do that, and I believe that the crrect group that the poster refered to was alt.whitepower wasn't it?

>Someone has found a way to "jam" those newsgroups with automatically
>forged posts,

Thats kind of like you and the NITS "automatically" calling anyone a jammer isn't it?

>I don't mind at all that you've brought our attention to this
>newsgroup-jamming effort. I

Maybe not, but you and the NITS seem to mind tremendously that I have brought "Attention" to your jamming and take-over, broadcasting on 3950. Isnthat right kevin?

>First, it needs to be publicized so that those with the ability to
>catch such Internet criminals will be encouraged to take action, so
>the jamming will stop.

That's exactly what I thought a little over a year ago when I started bringing attention to the jamming and take-over antics of the "So Called" liberty net.

>Thanks for making that more obvious than ever.

Bill, Bill, Bill.... Haven't you learned anything from me yet? If you guys pull a weapon out of your satchel bag and start swinging it around, I'm going to take it out of your hands and shove it up your ____ (figuratively, of course, at least here on the newsgroup). That's what my dad taught me to do.

I arrived here in April 1999. Guess who went out and dredged out a Nazi/fascist "deep end" to toss innocent ProCoders into LONG before that? Right, a certain Mr. Cecil Moore:

"That you would say such a thing indicates what an aggressive thug you are even toward friends of CW who don't share your exact feelings... Our point of disagreement lies in my being a Libertarian and your being a fascist (as are most Democratic and Republican politicians). You elite fascist types believe that you know what is best for me. You believe that my life belongs to you. How do you get away with believing that your life belongs to you and my life belongs to you too?" - Cecil Moore, 03/22/98

"Our differences are political and center around the role of government in a free society. I am a Libertarian who believes citizens should have as much freedom as possible. You are an elitist fascist who not only believes that you know what's best for yourself, but that you know what's best for everyone else. Thanks but no thanks, Dick. We fought two world wars to rid ourselves of your ilk." - Cecil Moore, 03/15/98

"Oh Dear Dick, I apologize. I forgot that you are such a superior specimen of a human being that you alone, do not need to have your fascist tendencies reined in by the Bill of Rights. Of course, you would be the first benolevant dictator in the history of the world.

Please forgive me for thinking otherwise. Your postings are so filled with love and respect for your fellow man that it was downright unkind of me to think that you might be capable of anything except god-like goodness. Of course Lincoln was wrong when he said all men are created equal. We shouldn't lump all humans together and grant each of them the same set of inalienable human rights. Of course, you are entitled to more rights than anyone else and I am surely to be pitied for being so nearsighted about your good intentions which are so obvious from your postings." - Cecil Moore, 03/15/98

"That is discrimination, pure and simple since Morse code in no way is a qualification for ham HF access. Did you support the privileges that the whites had and the blacks didn't? Did you support the privileges that males had and females didn't? Did you support the privileges that non-Jewish people had and Jewish people didn't in Nazi Germany?" - Cecil Moore, 03/22/98

"He is a sensitive guy and doesn't want to be treated like a Jew in Nazi Germany which is exactly the way you guys would treat him. He probably spent ten times as much time trying to get to 13wpm as you did. Is that not effort enough?" - Cecil Moore, 12/16/98

I've got more, want to see them? How about the entire posts?

I sure hope he can swim in that "deep end" as well as he can dig it and toss people into it...

Oh look, there is one ham, out of 600K of us, who agrees with Burt. What Burt doesn't realize is that he's committed the same sin (if you can call it that) as those he's complaining about. His complaint should have been sent via private email to those he's found in error, rather than an ALLWORLD article to two NGs.

>> Those "small lakes" are over 99% of our total alloted spectrum.

>If your going to use drugs, you MUST SHARE!

Well, at least we know what's always on your mind -- you keep mentioning
"drugs" in your posts. In any event, a Tech has access to over 99% of
our spectrum. That's an undeniable fact. Not bad for only having to
memorize the answers to a 55-question multiple-choice exam.

Source record: 139951

Well it really happened. Almost. The Great Liberty Net guys were there on schedule. And Oris dropped by for a brief visit. Oh my what a signal. My Tiny-Tenna went into melt-down.
But no word from those who killed all the Germans. We did not hear AF2Y on "AF2Y's frequency". And we were hoping. We were waiting. Everyone in the Tiny-Tenna web ring went out and bought fresh batteries. What a let down. Almost.
The toll-free lines DX302MAN's Washington, DC headquarters were jammed all night with disappointed SWL-ers calling in to ask where's AF2Y and his friend who killed the Germans. As an added bonus we were hoping AF2Y would bring his other friend, W2OTK. Or is that WB2OTK? I forget.
DX302MAN said he was afraid all 274 of his staffers were going to go postal due to the volume of calls from frustrated SWL-ers. You can't blame them for being disappointed. This was the biggest letdown on 3950 since the night K5ZU pulled a no-show and didn't do his "Yyyouuuuu people make me sick" speech. Much bigger than the news about WA9KJI.
Maybe tomorrow night it will be all better. We sure hope so. So many SWL-ers. So many Tiny-Tennas. So little excitement on 3950 lately.

It was thusly spoken upon us--
>>"That's ok we can argue all we want about keeping the code test. But something needs to be done to bring people into amateur radio and not keep them out. Soon enough all the brass pounders will be gone.....snip<<

I get a sense of deja vu here. It was only a few years ago that we were told that the only way to "save" amateur radio was to create a "no code" license. They told us that we needed such a license to "bring people into amateur radio". Well, we have such a license. Now those same people are telling us that the only way to "save" amateur radio is to let everyone have access to the HF frequencies. HELLOOOOO! If the no-code license did not "save" amateur radio how are the HF freqs going to "save" it????

Why do some people who served our country harp on it the rest of their life. Is it the only thing in life they have any reason to be proud of. It looks like a very few veterans of The Veit Nam debacle want to make it a claim to fame and riches? Give me a break. Millions have served their country, returned, had a good life, and did not try to scam the rest of their life on the principal that they deserve to not work, lay around,, take drugs, etc. and it is their due for two or three years of service. I don't get it . Like I said, get a life go to work, and quit sticking that hand out for welfare. Maybe you fit the catagory. I don't know. You are plenty defensive about it. It is none of your business how I served my country. But I did, and I don't expect Uncle Sam to let me free load the rest of my life when I had no physical damage. PTS Bull Shit!!!.

> I get a sense of deja vu here. It was only
> a few years ago that we were told that the
> only way to "save" amateur radio was to create
> a "no code" license. They told us that we
> needed such a license to "bring people into
> amateur radio". Well, we have such a license.

Have a little faith. I came in on the "no code"
license and I'm glad it was available at the time.
The first thing I did was buy a radio. Figured if I
had a reminder of money sitting on the shelf, I would
eventually make time to get the license. About two
years later, I was a ham, and then a year after that,
I was a real-ham.

> Now those same people are telling us that the
> only way to "save" amateur radio is to let
> everyone have access to the HF frequencies.

Everyone has access to HF frequencies, it's called
CB.

> HELLOOOOO! If the no-code license did not
> "save" amateur radio how are the HF freqs
> going to "save" it????

How do you know it didn't, give it some time. The whole
world isn't made up of liberal whinny babys, that are
too lazy to work for anything, when they can whine and
have it given to them. There still are people left,
who will see the requirements and have the motivation
to work towards achieving those goals.

That goes against my experience, Eric, and the experiences of others.
There is more willful interference during contests than at any other
time. That interference is NOT coming from non-contesters. I am against
willful interference and you are opposed to my position. That tells me
that you just haven't gotten caught yet. You idiots willfully interfere
with us ordinary folk so badly during contests that we are forced off
our normal frequencies and onto the WARC bands. If you can't find a
clear frequency during a contest, Eric, exactly what do you do?
I think we already know.

DOKTOR HATE, AF2Y
Has appointed his self as Ambassador to all the goy radio amateurs. This means he will be on this forum baiting goys, and just being a regular schmuck and putz. The other fine Jewish amateurs just shake their heads and say oy vay! when his name is mentioned. They say "What do you expect from such a schmuck!! he is mashugana". He will be on here spreading his bigoted brand of hate.

Thank You

Eric, why are you wasting so much time and energy on my pet peeve? Is that the best you can do? Note that I did not seriously suggest a ban on contesting. I clearly identified it as a personal opinion, clearly biased, clearly subjective.

> Am I taking anything out of context, Cecil? Do you want the whole
> darned posts?

Nope, that's in context given the following definition of "fascism" from Webster's. "fascism - a tendency toward ... strong autocratic ... control". If that doesn't describe the procode testing agenda, I fail to see what does.

Over and above the ITU treaty requirements, you guys advocate using the autocratic control of the federal government to promote an affirmative action program for med/high-speed code. That, based on the Webster's definition, **IS** "fascism". Live with it.

Ham and SWLs. You are not going to believe this until you do it. I'm sure you've heard of Brother Stair from Walterboro,S.C. Calls himself the LAST DAY PROPHET OF GOD and can be heard constantly on many SW frequencies, one of which is 9.475 mHz. Now I thought all along this guy was a freak show-a nobody trying to convince everybody he's somebody. I tune in just for kicks-don't believe a single word the guy says but am astounded by his anti-Catholic rhetoric-his beating on the Pope-his insinuations about the Pope being the anti-Christ and all that rot. You might as well know that I'm pro-Catholic and if I ever converted from Judaism(it ain't gonna happen), I'd never latch on to anything began by that rotten skunk Martin Luther who was loony tunes to begin with. Anyway,so there I'm sitting listening to this big mouthed Stair creep still thinking he's unknown except among the unenlightened bohunks and rednecks from "DELIVERANCE" country. WHAT A SHOCK I GOT! I nearly dropped my yarmulka and rosary beads. Go ahead and log on a search engine called NORTHERN LIGHT. Type in http://www.northernlight.com and type in Brother Stair. You know what comes up? Sit down folks. There are, now get this...52,788 items found for that name! I said, 52,788.
Think I'm kidding?. TRY IT. I'm a relative greenhorn on a computer, far from being an expert on ham radio and being voted as having the number one wire antenna in North America which has picked up and I have taped EXTRATERRESTRIALS(look for me on CNN shortly). I never remember seeing that many items associated with anyone, especially someone I took for a nobody fire and brimstone preacher. Hat's off to Brother Stair. It pays to spread his type of bullsnot on the shortwave bands-there's fame and finance to it. Doc,AF2Y

Why do you think I chose the words, "I personally think", instead of the words, "I seriously advocate"? It was to identify the statement as a pet peeve instead of a serious proposal. You are a silly little boy for making such a big deal out of my pet peeve. And I am not the only one peeved at contesters.

> "That you would say such a thing indicates what an aggressive thug you
> are even toward friends of CW who don't share your exact feelings...

When you run out of rational arguments, just start cutting and pasting all over the newsgroup, eh, Eric. You will not make any friends that way.

Well Eric, I'm waiting. I haven't felt anything yet. Have you been
trying to do something to me?

> "Our differences are political and center around the role of government
> in a free society. I am a Libertarian who believes citizens should have
> as much freedom as possible. You are an elitist fascist who not only
> believes that you know what's best for yourself, but that you know
> what's best for everyone else. Thanks but no thanks, Dick. We fought
> two world wars to rid ourselves of your ilk." - Cecil Moore, 03/15/98

I used the word "fascist" within the dictionary definition of the word.
"fascism - a tendency toward strong autocratic control". According to
that definition, Eric, you and Dick are both fascists because you do
advocate "strong autocratic control" over the Morse code testing
requirement. I do not agree with Bill that the word "fascist" or
"fascism" is a dirty word. It is a descriptive word, in the same
sense that "communist" or "socialist" is a descriptive word.

> "That you would say such a thing indicates what an aggressive thug you
> are even toward friends of CW who don't share your exact feelings...

Cut and paste and cut and paste and cut and paste because you have
nothing more to say? If you can't win with logic, overwhelm with volume
eh, Eric - another fascist technique learned from your mentor?

> Is that enough, Bill? Do you want a few more? The pathetic thing is
> that Herr Cecil *IS* a fascist, and the victims of his assaults were
> not.

Bill and I are not attached at the hip. We have our disagreements.
The use of the word "fascist" is one of them. "Fascist" and "socialist"
have the same emotional content, IMO.

I now beleive Dr Hate A.K.A. old Charlie AF2Y there is a COMMY yep a full blown COMMY. If it where up to old Charlie he would have all of our guns then what our land (Oh you own to much land so the government is going to take it from you) Heck why not our businesses too. The government all ready takes half the money businesses make. Why not take the other half too. I bet if one wasn't a jew he wouldn't be able to own any land at all. All this if it where left up to old Charlie there to run things. Lets see If it where up to old Charlie the right to express ones opinion would be fine if it where the same as old Charlie's there. I bet the Newspapers would have to get Charlie's OK before they printed anything. I bet one couldn't even look at a photo of a naked woman much less a good looking naked women Dang nabit I wonder if we had gun control in the USA before the civil war there would of been no civil war as well as Prussia would be running Europe and Americans would be sp-eaking German. HMMMMM Gun Control sounds like another way to weakin the most poweriful nation in the world. Listen Charlie it isn't our army that keeps other countries out of here is US and don't you forget it. If people die in this nation I say one thing welcome to America lifes a bitch ain't it.
See Charlie I took a oath in 1979 to defend the Constitution of the United States of America. I beleive that aposing gun control of any kind holds me to that oath. I also beleive that exposing you bleeding heart liberals holds me to that oath. Its Commies and the bleeding heart liberals like yourself that are going to destroy freedom as we know it today. The way I see it old Charlie is one of those COMMies that wants to see the great nation of the UNITED STATES OF AMERICA just plain fall! SO Charlie you keep trying to get your UNCONSTITUTIONAL gun control passed and I'll keep on fighting you.

Yep. Reported in a newsmagazine this week:

Number of wiretap requests submitted by the FBI to the
Department of Justice in 1996 -- 2,636

Number of requests rejected by Reno's DOJ -- *1* --that of
the scientist who "released" the nuclear material to China.

And they're using the 'excuse' that they "thought it was all
worked out since FBI didn't resubmit the request". Yeah,
Right!!!

Yeah, they're clean!

> Jeff KH6O

I often keep a standby receiver on some of the emergency QRG's.
One day, about 5 years back, I heard a beacon on 8364. A beacon?
What on earth would be sending a beacon signal on 8364? From
memory, the beacon sent out.....``SOS SOS DE xxxx xxxx BT
(ship number was then sent, then) SUB SUNK SUB SUNK'', and it
went away for a couple of minutes. Then it returned. The RAL
receiver I was using was a 50 year old naval regenerative shipboard
receiver, but the signal was loud enough to be heard with the tin
cans setting on the table. For confirmation, I dialed up an RBC
and an R-388 additionally, and it was still there. By then, I was
getting an uneasy feeling in the gut. I called a ham a few miles
up the road who was an old Navy op, and he heard it too. I then
made the assumption that it was for real, and called WLO's op on
the landline. He could not hear it from his QTH. That was most
perplexing. I put him on hold, and called the old Navy op back,
and he could still hear it, and my receivers were still hearing it.
I held the phone up to the tin cans so the WLO op could hear it.
I wanted to make very sure we were all hearing it for real.
The WLO op then transferred me to NMN's duty chief, and he took
the information but did not say anything much at that time. A day
or two later, I got a landline thanking me for the information,
from NMN's chief of operations, and he related to me that it was
for real, and that a British sub in the Mediterranean had not gone
down, but did lose overboard its 500khz/8364khz emergency beacon,
and it had fired off for some two days, until the battery quit.
I was able to hear it off and on, for about 18 hours or so.

I am most glad that it turned out not to be real distress call.
Even then, it put an uneasy feeling in the pit of the stomach.
You have heard one on watch, for real, and that is also not so fun.
I heard one for real when the MV Salvador Allende went down in
the North Atlantic in December(?) of 1996 or thereabouts on 600M.
Hearing the distress calls and the relays and tfc is unnerving.
But, it serves to show that sometimes things do happen on
the emergency channels, even in CW, although those days are
mostly gone, now. I was listening on the 8mhz band a couple
of nights ago, and there are still about a dozen call tapes
droning on, into the night, if you listen a little.....
so CW is not quite dead, yet.

Will, this is exactly why I say that in 2027 when I retire, I'll then devote the time to learning faster code. I've spent too much time learning the slow code already.

HERR DOKTOR !
For a Yid you are ONE BIG DUM SMUCK and a Putz to boot.

I Now understand why they banned you and your mother from the local Shule.
You for being a Putz and a Shmuck, this for letting the Goim baiting turn you into a ranting and raving Shmuck in front of the WORLD, and your poor mother for being the mother and of the Shmuck of the Year.

It is a Shame that you are a Jew, it the likes of your type that have started the Pogroms and the HATE against the Jews.
You are the type of Jew that GIVES JEWS A BAD REPUTATION.
Just Shut UP and Go and have a stiff Drink or some thing BUT PLEASE STOP MAKING JEWS LOOK STUPID.

> Which is worse? That or raking me over the coals for posting
> a pet peeve regarding willful interference from contesters?

A PET PEEVE? Oh come on Cecil, you are a member of Mensa and supposedly a dedicated Libertarian. You know better. Did Hitler just have a PET PEEVE against Jews? Let me show you what a pet peeve is:

"What the hell do you call CW DX contests ... it's an electronic machismo version of paintball wars, with the HF bands as the playing field. Damned little to do with radio, per se ... just Morse machismo and "stomp 'em into the dust with your California Kilowatt and big beam." - Carl Stevenson, NCI Director, 12/14/98

Do you notice how Carl expresses a strong dislike of contesters but stops short of supporting a BAN of contesting? THAT is a pet peeve. You, oh great wizard, are a FASCIST:

"I know enough to know that "polite contester" is an oximoron. I personally think contests should be banned from the ham bands. contesters willfully interfere with my normal operations." - Cecil Moore, 06/04/98

In case you don't understand what a Fascist is, let me give you some of YOUR definitions. I won't bother with Webster's because I know you would just twist the definition as you have done with "ignore". You CANNOT run from your own words, old man:

"Citizens of this free country have inalienable rights....That's the difference in a free country and a fascist/socialist country." - Cecil Moore, 10/01/98

"That you would say such a thing indicates what an aggressive thug you are even toward friends of CW who don't share your exact feelings... Our point of disagreement lies in my being a Libertarian and your being a fascist (as are most Democratic and Republican politicians). You elite fascist types believe that you know what is best for me. You believe that my life belongs to you. How do you get away with believing that your life belongs to you and my life belongs to you too?" - Cecil Moore, 03/22/98

And, of course, who could forget some of your self-righteous bulls**t when you try to lay the "fascist" label on someone else:

"Our differences are political and center around the role of government in a free society. I am a Libertarian who believes citizens should have as much freedom as possible. You are an elitist fascist who not only believes that you know what's best for yourself, but that you know what's best for everyone else. Thanks but no thanks, Dick. We fought two world wars to rid ourselves of your ilk." - Cecil Moore, 03/15/98

"Oh Dear Dick, I apologize. I forgot that you are such a superior specimen of a human being that you alone, do not need to have your fascist tendencies reined in by the Bill of Rights. Of course, you would be the first benolevant dictator in the history of the world. Please forgive me for thinking otherwise. Your postings are so filled with love and respect for your fellow man that it was downright unkind of me to think that you might be capable of anything except god-like goodness. Of course Lincoln was wrong when he said all men are created equal. We shouldn't lump all humans together and grant each of them the same set of inalienable human rights. Of course, you are entitled to more rights than anyone else and I am surely to be pitied for being so nearsighted about your good intentions which are so obvious from your postings." - Cecil Moore, 03/15/98

Now why don't you take a break from this newsgroup and head over to 3950 where you belong, you disgusting fascist hypocrite. You don't need an Extra to get on that frequency, Herr Cecil.

Why are you talking about the founding fathers? Your ancesters came over in a stinking steamer smelling like goats as they begged through Ellis Island, way over a century after any of the things you talk about. Keep your mouth shut, your ancesters were johney come latelys way after the revoulation and the constitution was written. you are a descendent of a bunch of squareheads who were run out of another country because they did not fit in. You are proof that the immigration policy then was a bad idea. But we are stuck with putzs like you.

This has thrown a scare into everybody.
The Liberty Net guys are sweating bullets.
Vic was so shook up he went over to Walter's and tied one on.
Arkansas Bob is hiding under his bed clutching a bottle of pills.
Oris got so nervous he blew up his amp.
N0VFP fainted and broke his Tiny-Tenna.
Yep, everyone's in a real tizzy over this one.
Looks like the regulars are so scared they will QSY to 3545 and work CW tonight.
Yeah - right. You do believe me don't you?

Great idea on the contest, 302MAN. Your dedicated staff sure has worked hard lately. I hope they all get their 6-figure bonus checks again this quarter as usual. What would we do without them.

In order to make the contest go better, maybe you could give more detail on the following:
What is an NAL and why would someone get one?
Who is this Pork Butt character?
Does he (or she) have anything in common with the Randi Steele person from question 4, part c?
What are the comments you refer to in question 2? (Perhaps you could provide links to some wave files so we will all understand better.)

I hope this helps open the contest to more people, as there could be hundreds of thousands of hams and SWL-ers who may like to enter.

Mark,
in most cases, this is true. However, owing to recent events regarding internet harassment and the Communications decency act, the local Libraries here in Phoenix have initiated account tracking using the customers libaray card. Its quite simeple and will allow for easy tracking of possible problem accounts should they arise.

And you STILL claim that your "personal opinion and pet peeve" should
result in a BAN of the activity?

"I know enough to know that "polite contester" is an oximoron. I
personally think contests should be banned from the ham bands.
Contesters willfully interfere with my normal operations." - 06/04/98

Please explain the apparent hypocrisy:

"I am a Libertarian who believes citizens should have as much freedom
as possible. You are an elitist fascist who not only believes that you
know what's best for yourself, but that you know what's best for
everyone else. Thanks but no thanks, Dick. We fought two world wars to
rid ourselves of your ilk." - Cecil Moore, 03/15/98

"On the contrary, I am a registered Libertarian who believes that the
government that governs the least, governs best." - Cecil Moore,
09/17/98

Don't you think this is one of those areas that might want to admit you
are WRONG on and "change your mind"?

Welcome at the club... :-)

I think, not the No-Code-License is the Problem.
The No-Code-Licenses are made to give give Newcomers an easy start, give them the possibility to improve theirs skills not only in theory, but on the band.
The problem are _these_ nocoders, which tends to stay on the same low level, but are cryin', what good op's they are, and don't improves the skills and knowledge instead...

And it seems to be the same matter in the US as here in Germany... :-(

> BUT If you don't like morse (I hate it) then I should NOT have it
> forced on me by people
> who think that just because I am a B holder then I am second class.

Dave, it's a simple thing:

A class b operator is not more and not less than any other ham.
The point is, how he would get the next higher class of license:

Either he works on it (then he is one of us) or he prefers to cryin' and discriminatin' hams with ooold and experienced skills. Then he is just a butthead, lazy or not able to do, what we've all done. Thats all.

I know a lot of class 2 OP's here in germany, which have done very important developments. And i never heard one of them talking about a access to shortwaves w/o a cw exam, or a deletion of the requirement of the cw test for shortwave-access. Never.
But i hear all the way such fuzz from guys, which don't even know whats the difference between phase modulation and frquency modulation...

So i think, not the license class stands for the quality of the ham, it's only what he makes out of it.

Whew, there for a minute I thought you might have been addressing your
post to me, I was almost ready to tell you to f*ck off. First of all,
no one asked you for any legal advice. There always will be an
abundance of "laws" here in the US with more added every year.
Brian has a good use for his radio, and if there is law against that
then it is the law that needs changing. I hope the amateur radio
community continues to experiment with RF communications, including
modification of equipment, as this leads to innovation and
technological progress, as well as scientific discovery.

Paul

Well either there was no take-over on 3950 or else the 85 foot dipole is not doing much good. It's almost 11:15pm EDT and no sign of anyone but some of the Liberty Net regulars. And they are having no trouble talking over the static. Arkansas Bob came out of hiding and shared some words of wisdom, too.

We are so disappointed. I would imagine DX302MAN's telephone staff is having a rough night again tonight with all the frustrated and disappointed SWL-ers calling in to complain. And at this time, there is a lot to complain about. Another broken promise. And we were hoping to hear war stories. Maybe tomorrow night. Fat chance.

You jumped into this thread with a put down of ohara sensei. Since
you're going to criticize vets and their accomplishments we do have a
right to know how you served your country. The questions is still
unanswered, how did you serve your country?

> It looks like a very few veterans of The Veit Nam debacle want to make
> it a claim to fame and riches?
Do you mean Senators McCain, Kerry, Admiral Stockdale? Rep. Randy
Cunningham, Lt. Alvarez, Jan Scruggs, Oliver North, Gen. Schwartzkopf.

> Give me a break. Millions have served their country, returned, had a >good life, and did not try to scam the rest of their life on the >principal that they deserve to not work, lay around,, take drugs, etc. >and it is their due for two or three years of service. I don't get it .

Are the above comments from some personal, in depth scholarly research
you did on veterans and published? Or is it a personal prejudice formed
from what you read in the news media.

> Like I said, get a life go to work, and quit sticking that hand out >for welfare. Maybe you fit the catagory. I don't know. You are plenty >defensive about it.

Huh??, I'm sensitive about Vietnam Vet issues, therefore, I must be a
welfare cheat, loafer, etc. Interesting logic!?!
First you tell me to get a life and go to work, then you're not sure if
I fit this category. Thus it appears to me you have stereotyped certain
individuals, including me, without any real analysis. That's OK as long
as your truthful about it and not try to hide your personal prejudices
under some "work ethic" principle.

>...I don't expect Uncle Sam to let me free load the rest of my life >when I had no physical damage. PTS > Bull Shit!!!.

Aahh!! Gotcha! That's the rub, no physical damage, eh. So all these
nightmares people have after life-threatening events are B.S.? Are you
saying there is no variance in human reactions to life's events?
I guess if my uncle, Korean War vet, was still alive I'd have to tell
him all those Chinese Communists he saw night after night, year after
year were BS just so he didn't have to work.
I'll have to tell my friend TC all those VC he sees in his nightmares
are BS so he doesn't have to work the next day. I'll have to tell my

police officer friend who killed another deputy accidentally, that the urinary incontinence & bad dreams are just BS so he can collect disability. Nah, why don't you tell them?

Good point, Jeff. So why all this bickering among hams re CW? The FCC is the governing body that decides what is or is not necessary, we accept its rules, and get licensed by them. Let the FCC make its decision and move forward.

> most of those that had drifted into such usage agreed
> to stop. You come in here late in the game and want
> to drag out the sleazy tactics by posting quotes that
> everyone agreed should stop.

Really, Bill? You have agreed to stop the lying and the deceit?
Please explain:

Lie:

"We NEVER told the FCC that you "support NCI" ... we told them that
that 43% of the comments supported NO MORE THAN A 5 WPM MORSE TEST FOR
FULL HF ACCESS." - Carl Stevenson, NCI Director, 06/03/99

Truth:

"A substantial body of comments (43.3%) support the total elimination
of Morse testing as soon as practical and a reduction to no more than 3
classes of license." - Paragraph 24 (the *CONCLUSION*) of NCI Reply
Comments to WTB Docket 98-143, filed with the FCC

Please take your whining about "sleazy tactics" to your mommy or
someone actually practicing "sleazy tactics". Lying and deceit ARE the
"sleazy tactics" in my book. Exposing them is honorable and righteous,
and I will never compromise that "tactic", not for you and not for
anyone.

I'll make you a deal. If you will immediately disband NCI and cease
your sleazy tactics of lying and deceit, I'll stop making you look so
bad when you lie or seek to deceive. How's that?

If you want any other agreements or deals from me, let me roughly adapt
Mr. Franklin Delano Roosevelt's words as my own: 'I do not seek, nor
will I accept, anything but the unconditional surrender of NCI'.

1218. NCI responds to ARRL's recent letter to the FCC

Newsgroup: rec.radio.amateur.misc
Date: 1999-06-12 00:00:00 UTC
From: "Carl R. Stevenson" <wa6vse@fast.net>
Message-ID: <7jtp9g$9mp$1@news1.fast.net>
Source record: 139818
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

-----BEGIN PGP SIGNED MESSAGE-----
Hash: SHA1

NCI has filed a formal response to the ARRL's 2nd ex parte
presentation to the FCC in WT 98-143, in the form of a
letter dated June 7, 1999, pointing out that the ARRL's
assertion that "the state of limbo created by the current
FCC Amateur Radio restructuring proceeding, WT Docket 98-143,
is stifling Amateur Radio's growth, as current and
prospective hams await an FCC Report and Order" is *not* the
true cause of staganation and decline in the ARS, but rather
the causes are antiquated Morse Code test requirements and an
unnecessarily complex licensing structure.

The Commission was also reminded that the ARRL's proposal was
the LEAST favored solution to restructuring in the body of
comment in this proceeding.

Additionally, NCI also noted that it appeared that the ARRL's
letter may have constituted an improper ex parte presentation,
since no evidence of the disclosure memorandum required by the
Commission's Rules in such "permit, but disclose" proceedings
was found in the ECFS.

Adobe Acrobat .pdf format copies of NCI's written rebuttal of
the ARRL's letter and of the required "Memorandum of Ex Parte
Presentation" may be found at http://www.nocode.org/articles

: Who got the boot from Bellsouth?? It wouldn't of been pig vomit would
: it?

BellSouth no longer reveals the identities of the accounts that they terminate, so I quite honestly can't tell you who it is. All I can do is to tell you that the rogue canceler is known to bellsouth.net and has been dealt with by them.

Undoubtedly, it is the same person who has just started canceling posts from an account at att.net, and I have sent the latest forged cancels to

abuse@worldnet.att.net

along with all relevant headers. I wonder how many accounts the person will have to lose before they get the message that canceling other people's posts is a very stupid thing to do.

Interested in Amateur Radio, Electronics, Computers, etc.?

Next weekend, come out to the 1999 FATHERS DAY HAMFEST
Sunday, June 20th 1999

In Historic Frederick, Maryland
At the Frederick County Fairgrounds, 797 East Patrick St.

- Easy access from I-70, I-270, US-40, US-15 etc.
- Plenty of Parking

- ARRL VE Testing (courtesy of MADRA VE Team)
- Testing starts promptly at 09:00

- Large Outdoor Flea Market / Tailgating Area
- Indoor Ham Radio, Electronics, Computer Commercial Vendors
- New and used Ham Radio equipment and accessories - Two
commercial new equipment vendors - Icom, Kenwood, Yaesu etc.

- Good Food and Refreshments (no outside food vendors, please)

- Rain or shine, 08:00 to 15:00 EDT

- Admission: $5.00 per person donation
- Tailgating spaces: $5.00 each + one admission
- Indoor vendor tables: $15.00 each

Talk-in: Call K3ERM on 147.060 (+) K3MAD repeater
146.640 (-) K3ERM repeater
146.520 (x) Simplex

Email to me or to n3vok@erols.com with questions, vendor reservations,
etc. Include fax number for map and/or flyer.

Ok Jeff, lets say that to use 6meter and up you must learn to send and receive RTTY by ear at 5wpm even though you don't like RTTY and don't want to learn it! Or for that matter, Fax, SS, AMTOR, or any of the others you listed. The point is to get your Amateur license you must learn about them not learn to do them. The same should be true of CW, we should have to learn about it not learn to do it to receive a license and privileges for HF operation! Just require it for the CW subband privileges! If there were strictly RTTY or AMTOR subbands it should be the same, show that you can with a small test to earn the privilege!

BTW I don't want to see Amateur Radio turn into a wasteland like CB Radio has turned into. But you know as well as I do that CB never was that bad untill the FCC quit enforcing the rules. The CBer's with their "I got a bigger radio than you" mentality and lack of courtsy is the reason I became a ham. I never dreamed when I started this that I would see the same kind of attitude from the higher class hams over CW

>
>Which of us are qualified to determine just what is necessary and
>unnecessary to become licensed?

None of us are, that's why we have the FCC to make those kinds of determinations fairly on our behalf! We can only make suggestions.

>
>73, Jeff KH6O

73 to you Jeff, even if we don't agree on CW at least we live in a nation where we can agree to disagree in freedom.
P.S. I am studing code to upgrade because it is interesting to me. I just don't feel like I should be forced to learn it to upgrade my license!

Your argument does not carry much weight. The questions on the test pertain to knowledge of the subject of the various modes, not a physical operational test as is CW. To bring CW into the same class as the rest of the test, one should only have to demonstrate knowledge of how it is done, i.e. how the equipment is operated. As to your question "Which of us are qualified to determine just what is necessary and unnecessary to become licensed?", it's obviously not us, that decision, like all others, should be handled by those god-like individuals that make up the government for only they have the knowledge and wisdom to decide what is best for the common citizen.

Ham radio will not die. It's the *only* communications medium, outside of shouting, in which any two operators anywhere in the world, can communicate directly without using government or commercial services. Those same two operators don't even need to purchase commercially-built radios -- they can build them themselves.

BTW, your prediction is older than you are: In "...1922 many radio magazines which had catered to the transmitting amateur swung away from him, one even so far as to run an editorial ... prophesying the end of amateur radio." (From Fifty Years of ARRL.)

Well, if it was an international requirement, and if about 50% of the QSOs
were taking place utilizing RTTY, and if RTTY was the only mode all the
world's hams had in common, I supposed it would be a fair requirement.

>Or for that matter, Fax, SS, AMTOR, or any of the others you listed. The point
>is to get your Amateur license you must learn about them not learn to do them.

Think of it this way, we've waived the skill tests for all the other
modes. (You welcome!)

Code is really the only mode would takes skill to learn and use. The
others can me mastered in just a short time. In Coast Guard Radioman
School, 5 months were devoted to getting the recruits up to 25wpm, while
RTTY, SITOR, voice were all learned in just a few hours.

>The same should be true of CW, we should have to learn about it not learn to do
>it to receive a license and privileges for HF operation! Just require it for
>the CW subband privileges!

CW is allowed on any HF frequency, so any "subband" is the entire band.

Source record: 139843
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.homebrew,rec.radio.amateur.misc

For some reason I am reminded of Cary Grant (English?) the famous, long-lived, Hollywood film star who towards the end of his extensive career received a wire (a telegram in the UK) from one of his loving but curious fans. It read "HOW OLD CARY GRANT STOP".

Conscious of maintaining good relations with his world-wide fan clubs he wired an immediate reply. It read "OLD CARY GRANT FINE STOP HOW YOU STOP".

Are baggy underpants still in vogue ?

A 102" whip is 1/4-wave resonant (above a perfect ground) at 28.1 MHz when one allows for an end-effect of 3%. But the end-effect depends on antenna diameter which is neglected in ARRL publications. Makes quite a difference between lattice masts and 18-gage wire on 160m.

Since everybody on your side of the pond quotes from them, out of curiosity a couple of months ago I purchased the two american bibles :- ARRL Handbook and the ARRL Antenna Book. One of the first thing I noticed was One S-unit = 6dB. The amount of excellent info contained between the covers is stupendous.

I'm getting near the end of a bottle of Californian red. Good for the arteries. Must put out the cat. Good night Cec and all other readers.

FAT CHANCE..!! Good luck tuning this one in..!! Apparently, two brain-surgeon Hams in Los Angeles, KD6GDB and WH6CSG have put up Real Audio live from 147.435 notorious L.A. repeater.. BUT.....On the Internet of MILLIONS.......They have a bandwidth setup that only accomodates about TEN USERS AT A TIME..!!!!!!!!

Now who, I ask you, would put up LIVE Real Audio on the net with that kind of useage..?? This truly deserves an award for STUPIDITY..

Too bad I missed the beginning of this thread.....
FYI: I used 6 102" steel whips spaced .125A to .065A apart and planted on the flat roof of my shack using grounded chickenwire mesh as counterpoise. To my surprise and delight, the array work as well as my 4 element 10m beam. Of course the array refuses to rotate :(
Hames in the Southeast hear my 2.5 watt signal very well with it, so It does work.
See ya
Jim

Sir:

This forum is amateur radio misc. We are radio amateurs and if we want to talk misc, that is not your affair. You must be interested. You can usually tell by the posting title what gives, so just don't pull it off the forum, you are not required to. Go to one of the other amateur forums and talk about what you want to. We are talking misc here.

I think I found the problem, Cecil. I was doing some web browsing last nite, and I found www.contestqrm.com. The is a high level conspiracy that has been going on in the contest world for many years. All of the major contests award extra points for taking the frequency away from W6RCA. You're special. Enjoy it while it lasts.... Hope to QRM you in CQWW this fall, I need all the points I can get.

He's doing a good job.

All of Dr. Hate's and Porkbutt's freinds are in a frenzy!

313 has been in a wad all day because of him. PB's gang whining about John's witness on 313.

It's understandable that the gang would be upset over KC3AU's discussing things in a QSO with his friend 6Y5GR. John confronts them with a message of light and righteousness, which they'd rather not think about. Could it be that they prefer darkness because their deeds are evil? (See John 3:19.)

Keep it up, KC3AU. We need your witness on 313. If ever there was a sphere of darkness, this is it. We are praying that your message will be received by those who need it so desperately.

Flamers, go for it. But KC3AU's message of light and righteousness will overpower your best efforts. Listen to John. Repent while you have a chance. Today is the day of salvation. Tomorrow may be too late.

What is sacrilegious about someone publicly proclaiming their love for Jesus
Christ?

Oh .. I get it! It's a Jew thing, right? After all, Jews are
consumed with hatred towards followers of Jesus Christ.
If you doubt this, check out the Jewish Talmud, and note
how hostile the "Jews media" and Hollywood are towards the so-called "religious
right".

The same goes for the morse test.

You make your statement in the first sentence in the above paragraph as
if it was the gospel according to St. Carl. The case for abandoning
morse testing has not been proven. Why not just admit that YOU desire
it to end because you personally cannot fathom the usefulness of morse
testing? In addition, you have not been appointed the arbiter of what
is *rational*.

I've not seen much evidence to support the claim you make in the the
last sentence. I certainly wish you'd point us toward a study
validating your assertion. You needn't post it here. Just direct us to
it.

> > Others try several times to pass one test after knocking

That would apply to passing a morse exam too.

You've just set welfare reform back decades.

> A ham radio license is EXACTLY the same, IMNSHO.

But then a driving license is almost universal and isn't difficult at
all. It is also not an amateur radio license. I am happy, however, to
note that you didn't have any difficulty in obtaining a driving license.

It sounds as if you're subconcious is speaking here. I'll bet you're
wrong. Most of us don't have your way with words. I'd probably say,
"I'm pleased I was able to pass that exam because it was tough".

> This is much like those who have submitted to the Morse

> "thrown away the key" never (or seldom) to use Morse again.

...but you have absolutely no knowledge of the number of individuals who feel this way about morse code testing. I've run into a couple of them in 36 years on the air.

> I firmly believe that having Morse crammed down their
> throats has turned more people off to Morse than it has
> recruited as Morse enthusiasts and that there would probably
> be fewer people with a distaste for Morse had they been

...and I firmly believe that it is your attitude toward learning morse code which made you into the disgruntled individual we've come to know here.

Wow! This is really getting surrealistic. Even most no-coders know how to send and recognize SOS (That's why they could use it in the show "believably". LA cops AFAIK, don't receive Morse training). Besides that, (a) it was a stupid plot device, (b) Martin Milner still can't act, and (c) TV shows are probably not a really great input to base federal communication policy upon.
